If the applicant, other than a tribe or an Alaska Native Village government, is proposing a project benefiting Native Americans or Native Alaskans, or both, it must provide assurance that its duly elected or appointed board of directors is representative of the community to be served. An organization can conclusively establish that it meets this requirement through a signed statement or resolution stating that its duly elected or appointed board of directors are either Native Americans or Native Alaskans or a copy of the organizational charter or by-laws that clearly states that the organization has a board drawn from members of those groups.

Although for-profit regional corporations established under ANCSA are not eligible applicants, individual villages and Indian communities are encouraged to use the for-profit corporations as subcontractors and to collaborate with them in joint-venture projects for promoting social and economic self-sufficiency. ANA encourages the for-profit corporations to assist the villages in developing applications and to participate as subcontractors in a project.

Note: Under each competitive area, ANA will only accept one application which serves or impacts a reservation, Tribe, or Native American community. If a Tribe or Alaska Native village chooses not to submit an application under a specific competitive area, it may support another applicant's project (e.g., a tribal organization) which serves or impacts the reservation.

In this case, the applicant must include a Tribal resolution which clearly demonstrates the Tribe's support of the project and the Tribe's understanding that the other applicant's project supplants the Tribe's authority to submit an application under that specific competitive area for the duration of the approved grant period.

E. Grantee Share of the Project

Grantees must provide at least 20 percent of the total approved cost of the project. The total approved cost of the project is the sum of the ACF share and the non-Federal share. The non-Federal share may be met by cash or in-kind contributions, although applicants are encouraged to meet their match requirements through cash contributions. Therefore, a project requesting $100,000 in Federal funds must include a match of at least $25,000 (20% total project cost).

As per 45 CFR Part 74.2, In-Kind contributions is defined as "the value of non-cash contributions provided by non-Federal third parties. Third party-in kind contributions may be in the form of real property, equipment, supplies and other expendable property, and the value of goods and services directly benefiting and specifically identifiable to the project or program."

In addition it may include other Federal funding sources where its legislation or regulations authorizes using specific types of funds for a match and provided the source relates to the ANA project, as follows:

- Indian Child Welfare funds, through the Department of Interior;
- Indian Self-Determination and Education Assistance funds, through the Department of Interior and the Department of Health and Human Services; and
- Community Development Block Grant funds, through the Department of Housing and Urban Development.

An itemized budget detailing the applicant's non-Federal share, and its source, must be included in an application.

If an applicant plans to charge indirect costs in its ANA application, a current copy of its Indirect Cost Agreement must be included in the application.

A request for a waiver of the non-Federal share requirement may be submitted in accordance with 45 CFR 1336.50(b)(3) of the Native American Program Regulations.

F. Review Criteria

A proposed project should reflect the purposes of ANA's SEDS policy and goals (described in the Background section of this competitive area and in the Background section of Competitive Area 1), include a social and economic development strategy which reflects the needs and specific circumstances of the local community, and address the specific developmental steps that the tribe or Native American community is undertaking toward self-sufficiency.

The evaluation criteria are closely related to each other and are considered as a whole in judging the overall quality of an application. Points are awarded only to applications which are responsive to this competitive area and these criteria. Proposed projects will be reviewed on a competitive basis using the following evaluation criteria:

(1) Long-Range Goals and Available Resources. (15 Points)

(a) The application describes the long-range goals and strategy, including:

- How specific social, governance and economic long-range community goals relate to the proposed project and strategy;
- How the community intends to achieve these goals;
- The relationship between the long-range goals and the applicant's comprehensive community social and economic development plan. (Inclusion of the community's entire development plan is not necessary); and
- A clearly delineated social and economic development strategy (SEDS).

The application documents the type of involvement and support of the community in the planning process and implementation of the proposed project. A Tribe may meet this requirement by submitting a resolution stating that community involvement has occurred in the project planning. All other eligible applicants may meet this requirement by providing documentation of community support/involvement. The type of community you serve will determine the type of documentation necessary.

For example, a tribal organization *may* submit resolutions supporting the project proposal from each of its members tribes, as well as a resolution from the applicant organization. Other examples of documentation include: community surveys; minutes of community meetings; questionnaires; tribal presentations; and/or discussion/position papers.

Applications from National Indian and Native organizations must clearly demonstrate a need for the project, explain how the project was originated, state who the intended beneficiaries will be, and describe how the recipients will actually benefit from the project. National Indian and Native organizations should describe their membership and define how the organization operates.

(b) Available resources (other than ANA and the non-Federal share) which will assist, and be coordinated with the project are described. These resources should be documented by letters or documents of commitment of resources, not merely letters of support.

- "Letters of support" merely express another organization's endorsement of a proposed project. Support letters are not binding commitment letters or do not factually establish the authenticity of other resources.
- "Letters and other documents of commitment" are binding when they specifically state the nature, the amount, and conditions under which another agency or organization will support a project funded with ANA funds.

For example, a letter from another Federal agency or foundation pledging a commitment of $200,000 in construction funding to complement proposed ANA funded pre-construction activity is evidence of a firm funding commitment. These resources may be human, natural or financial, and may include other Federal and non-Federal resources. (Applicant statements that additional funding will be sought from other specific sources are *not* considered a binding commitment of outside resources.)

(2) Organizational Capabilities and Qualifications. (10 Points)

(a) The management and administrative structure of the applicant is explained. Evidence of the applicant's ability to manage a project of the proposed scope is demonstrated. The application clearly shows the successful management of projects of similar scope by the organization, and/or by the individuals designated to manage the project.

(b) Position descriptions and/or resumes of key personnel, including those of consultants, are presented. The position descriptions and/or resumes relate specifically to the staff proposed in the Approach Page and in the proposed Budget of the application. Position descriptions very clearly describe each position and its duties and clearly relate to the personnel staffing required to achieve the project objectives. Resumes demonstrate that the proposed staff are qualified to carry out the project activities. Either the position descriptions or the resumes contain the qualifications and/or specialized skills necessary for overall quality management of the project. Resumes must be included if individuals have been identified for positions in the application.

Note: Applicants are strongly encouraged to give preference to Native Americans in hiring staff and subcontracting services under an approved ANA grant.

(3) Project Objectives, Approach and Activities. (45 Points)

The application proposes specific project objective work plans with activities related to each specific objective. The objective work plan(s) in the application includes project objectives and activities for *each* budget period proposed and demonstrates that each of the objectives and its activities:

- Is measurable and/or quantifiable in terms of results or outcomes;
- Supports the community's social and economic development strategy;
- Clearly relates to the community's long-range goals;
- Can be accomplished with the available or expected resources during the proposed project period;
- Indicates when the objective, and major activities under each objective, will be accomplished;
- Specifies who will conduct the activities under each objective; and
- Supports a project that will be completed, self-sustaining, or financed by other than ANA funds at the end of the project period.

(4) Results or Benefits Expected. (20 Points)

Completion of the proposed objectives will result in specific, measurable results. The application shows how the expected results will help the community meet its long-range goals. The specific information provided in the narrative and objective work plans on expected results or benefits for each objective is the standard upon which its achievement can be evaluated at the end of each budget year.

(5) Budget. (10 Points)

A detailed and fully explained budget is provided for each budget period requested which:

- Justifies each line item, with a well-written justification, in the budget categories in Section B of the Budget Information of the application, including the applicant's non-Federal share and its source;
- Includes and justifies sufficient cost and other necessary details to facilitate the determination of cost allowability and the relevance of these costs to the proposed project; and
- Requests funds which are appropriate and necessary for the scope of the proposed project.

For business development projects, the proposal demonstrates that the expected return on the funds used to develop the project provides a reasonable operating income and return within a future specified time frame.

G. Application Due Date

The closing date for submission of applications under this competitive area is: May 17, 1996.

H. For Further Information Contact

Sharon McCully (202) 690–5780, Department of Health and Human Services, Administration for Children and Families, Administration for Native Americans, 200 Independence Avenue, SW., Room 348–F, Washington, DC 20201–0001.

Competitive Area 3. Indian Environmental Regulatory Enhancement Projects

A. Purpose and Availability of Funds

The purpose of this competitive area is to announce the anticipated availability of fiscal year 1996 funds for environmental regulatory enhancement projects. Approximately $3 million of financial assistance is anticipated to be available under this announcement for environmental regulatory enhancement projects. ANA expects to award approximately 35 grants under this competitive area. The funding level for a budget period of 12 months will be up to $250,000.

B. Background

Despite an increasing environmental responsibility and growing awareness of environmental issues on Indian lands, there has been a lack of resources available to tribes to develop tribal environmental programs that are responsive to tribal needs. In many cases, this lack of resources has resulted in a delay in action on the part of the tribes.

Some of the critical issues identified by tribes before Congressional committees include:

- The need for assistance to train professional staff to monitor and enforce tribal environmental programs;
- The lack of adequate data for tribes to develop environmental statutes and establish environmental quality standards; and
- The lack of resources to conduct studies to identify sources of pollution and the ability to determine the impact on existing environmental quality.

As a result, Congress enacted the Indian Environmental Regulatory Enhancement Act of 1990 (Public Law 101–408) to strengthen tribal governments through building capacity within the tribes in order to identify, plan, develop, and implement environmental programs in a manner that is consistent with tribal culture. ANA is to support these activities on a government-to-government basis in a way that recognizes tribal sovereignty and is consistent with tribal culture.

The Administration for Native Americans believes that responsibility for achieving environmental regulatory enhancement rests with the governing bodies of Indian tribes, Alaska Native villages, and with the leadership of Native American groups.

"Environmental regulatory enhancement" includes (but is not limited to) the planning, development, and application of laws, training, monitoring, and enforcement procedures, tribal courts, environmental laboratories and other facilities, and associated regulatory activities to strengthen the tribal government's capacity to enhance the quality of reservation life as measured by the reduction of pollutants in the air, water, soil, food and materials encountered by inhabitants of tribes and villages.

Progress toward the goal of environmental regulatory enhancement would include the strengthening of tribal environmental laws, providing for the training and education of those employees responsible for ensuring compliance with and enforcement of these laws, and the development of programs to conduct compliance and enforcement functions.

Other functions leading toward enhancing local regulatory capacity include, but are not limited to:

- Environmental assessments;
- Development and use of environmental laboratories; and
- Development of court systems for enforcement of tribal and Federal environmental laws.

Ultimate success in this program will be realized when the applicant's desired level of environmental quality is acquired and maintained.

C. Proposed Projects to be Funded

Financial assistance provided by ANA is available for developmental projects designed to assist tribes in advancing their capacity and capability to plan for and:

- Develop or enhance the tribal environmental regulatory infrastructure required to support a tribal environmental program, and to regulate and enforce environmental activities on Indian lands pursuant to Federal and Indian law;
- Develop regulations, ordinances and laws to protect the environment;
- Develop the technical and program capacity to carry out a comprehensive tribal environmental program and perform essential environmental program functions;
- Promote environmental training and education of tribal employees;
- Develop technical and program capability to meet tribal and Federal regulatory requirements;
- Develop technical and program capability to monitor compliance and enforcement of tribal environmental regulations, ordinances, and laws; and
- Ensure the tribal court system enforcement requirements are developed in concert with and support the tribe's comprehensive environmental program.

D. Eligible Applicants

The following organizations are eligible to apply under this competitive area:

- Federally recognized Indian tribes;
- Incorporated non-Federally recognized Indian tribes;
- Alaska Native villages as defined in the Alaska Native Claims Settlement Act (ANCSA) and/or nonprofit village consortia;
- Nonprofit Alaska Native Regional Corporations/Associations with village specific projects; and
- Other tribal or village organizations or consortia of Indian tribes.

The following organizations are not eligible to apply:

- Urban Indian Centers;
- Incorporated nonprofit multi-purpose community-based Indian organizations;
- Public and nonprofit private agencies serving: Native Hawaiians, peoples from Guam, American Samoa, Palau, or the Commonwealth of Northern Mariana Islands;
- Incorporated nonprofit Alaska Native multi-purpose community based organizations; and
- National or regional incorporated nonprofit Native American organizations with Native American community-specific objectives.

Proof of an applicant's nonprofit status, such as an IRS determination of nonprofit status under IRS Code 501(c)(3), must be included in the application.

If the applicant, other than a tribe or an Alaska Native Village government, is proposing a project benefiting Native Americans or Native Alaskans, or both, it must provide assurance that its duly elected or appointed board of directors is representative of the community to be served. An organization can conclusively establish that it meets this requirement through a signed statement or resolution stating that its duly elected or appointed board of directors are either Native Americans or Native Alaskans or a copy of the organizational charter or by-laws that clearly states that the organization has a board drawn from members of those groups.

Note: Under each competitive area, ANA will only accept one application which serves or impacts a reservation, Tribe or Native American community. If a Tribe or Alaska native village chooses not to submit an application under a specific competitive area, it may support another applicant's project (e.g., a tribal organization) which serves or impacts the reservation.

In this case, the applicant must include a Tribal resolution which clearly demonstrates the Tribe's support of the project and the Tribe's understanding that the other applicant's project supplants the Tribe's authority to submit an application under that specific competitive area for the duration of the approved grant period.

E. Grantee Share of the Project

Grantees must provide at least 20 percent of the total approved cost of the project. The total approved cost of the project is the sum of the ACF share and the non-Federal share. The non-Federal share may be met by cash or in-kind contributions; although applicants are encouraged to meet their match requirement through cash contributions. Therefore, a project requesting $250,000 in Federal funds must include a match of at least $62,500 (20% of total project cost).

As per 45 CFR Part 74.2, In-Kind contributions is defined as "the value of non-cash contributions provided by non-Federal third parties. Third party-in kind contributions may be in the form of real property, equipment, supplies and other expendable property, and the value of goods and services directly benefiting and specifically identifiable to the project or program."

In addition it may include other Federal funding sources where its legislation or regulations authorizes using specific types of funds for a match and provided the source relates to the ANA project, as follows:

- Indian Child Welfare funds, through the Department of Interior;
- Indian Self-Determination and Education Assistance funds, through the Department of Interior and the Department of Health and Human Services; and
- Community Development Block Grant funds, through the Department of Housing and Urban Development.

An itemized budget detailing the applicant's non-Federal share, and its source, must be included in an application.

If an applicant plans to charge indirect costs in its ANA application, a

current copy of its Indirect Cost Agreement must be included in the application.

A request for a waiver of the non-Federal share requirement may be submitted in accordance with 45 CFR 1336.50(b)(3) of the Native American Program Regulations.

F. Review Criteria

A proposed project should reflect the environmental regulatory purposes stated and described in the Background section of this competitive area. The evaluation criteria are closely related to each other and are considered as a whole in judging the overall quality of an application. Points are awarded only to applications which are responsive to this competitive area and these criteria. Proposed projects will be reviewed on a competitive basis using the following evaluation criteria:

(1) Long-Range Goals and Available Resources. (15 Points)

(a) The application describes the long-range goals and strategy, including:

- How specific environmental regulatory enhancement long-range goal(s) relate to the proposed project and strategy;
- How the community intends to achieve these goals;
- The applicant's specific environmental regulatory needs; and
- A clearly delineated strategy to improve the capability of the governing body of a tribe to regulate environmental quality through enhancing local capacity to perform necessary regulatory functions.

The application documents the type of involvement and support of the community in the planning process and implementation of the proposed project. A Tribe may meet this requirement by submitting a resolution stating that community involvement has occurred in the project planning. All other eligible applicants may meet this requirement by providing documentation of community support/involvement. The type of community you serve will determine the type of documentation necessary.

For example, a tribal organization *may* submit resolutions supporting the project proposal from each of its members tribes, as well as a resolution from the applicant organization. Other examples of documentation include: community surveys; minutes of community meetings; questionnaires; tribal presentations; and/or discussion/position papers.

(b) Available resources (other than ANA and the non-Federal share) which will assist, and be coordinated with the project are described. These resources should be documented by letters or documents of commitment of resources, not merely letters of support.

- "Letters of support" merely express another organization's endorsement of a proposed project. Support letters are not binding commitment letters or do not factually establish the authenticity of other resources.
- "Letters and other documents of commitment" are binding when they specifically state the nature, the amount, and conditions under which another agency or organization will support a project funded with ANA funds.

For example, a letter from another Federal agency or foundation pledging a commitment of $200,000 in construction funding to complement proposed ANA funded pre-construction activity is evidence of a firm funding commitment. These resources may be human, natural or financial, and may include other Federal and non-Federal resources. (Applicant statements that additional funding will be sought from other specific sources are *not* considered a binding commitment of outside resources.)

(2) Organizational Capabilities and Qualifications. (15 Points)

(a) The management and administrative structure of the applicant is described and explained. Evidence of the applicant's ability to manage a project of the scope proposed is well documented. The application clearly shows the successful management of projects of similar scope by the organization, and/or by the individuals designated to manage or consult on the project. The tribe itself may not have experience to meet this requirement but the proposed staff and consultants should have the required qualifications and experience. The application should clearly describe any previous or current activities of the applicant organization or proposed staff and/or consultants in support of environmental regulatory enhancement.

(b) Position descriptions and/or resumes of key personnel, including those of consultants, are presented. The position descriptions and/or resumes relate specifically to the staff proposed in the Approach Page and in the proposed Budget of the application. Position descriptions very clearly describe each position and its duties and clearly relate to the personnel staffing required to achieve the project objectives. Resumes indicate that the proposed staff are qualified to carry out the project activities. Either the position descriptions or the resumes contain the qualifications and/or specialized skills necessary for overall quality management of the project. Resumes must be included if individuals have been identified for positions in the application.

Note: Applicants are strongly encouraged to give preference to Native Americans in hiring staff and subcontracting services under an approved ANA grant.

(3) Project Objectives, Approach and Activities. (40 Points)

The application proposes specific project objective work plans with activities related to each specific objective. The objective work plan(s) in the application includes project objectives and activities for *each* budget period proposed and demonstrates that each of the objectives and its activities:

- Is measurable and/or quantifiable in terms of results or outcomes;
- Supports the community's strategy for environmental regulatory enhancement;
- Clearly relates to the community's long-range environmental goals;
- Can be accomplished with the available or expected resources during the proposed project period;
- Indicates when the objective, and major activities under each objective, will be accomplished;
- Specifies who will conduct the activities under each objective; and
- Supports a project that will be completed, self-sustaining, or financed by other than ANA funds at the end of the project period.

(4) Results or Benefits Expected. (20 Points)

Completion of the proposed objectives will result in specific, measurable results. The application shows how the expected results will help the community meet its long-range environmental goals. The specific information provided in the narrative and objective work plans on expected results or benefits for each objective is the standard upon which its achievement can be evaluated at the end of each budget year.

(5) Budget. (10 Points)

A detailed and fully explained budget is provided for each budget period requested which:

- Justifies each line item, with a well-written justification, in the budget categories in Section B of the Budget Information of the application, including the applicant's non-Federal share and its source;
- Includes and justifies sufficient cost and other necessary details to facilitate the determination of cost allowability and the relevance of these costs to the proposed project; and

- Requests funds which are appropriate and necessary for the scope of the proposed project.

G. Application Due Date

The closing date for submission of applications under this competitive area is March 1, 1996.

H. For Further Information Contact

Sharon McCully (202) 690–5780, Department of Health and Human Services, Administration for Children and Families, Administration for Native Americans, 200 Independence Ave., SW., Room 348–F, Washington, DC 20201–0001.

Competitive Area 4. Native American Languages Preservation and Enhancement Projects

A. Purpose and Availability of Funds

The purpose of this competitive area is to announce the anticipated availability of fiscal year 1996 funds for projects which assist Native Americans to assure the survival and continuing vitality of their languages. Approximately $1 million of financial assistance is anticipated to be available under this competitive area.

For Category I, Planning Grants, the funding level for a budget period of 12 months will be up to $50,000. For Category II, Design and/or Implementation Grants, the funding level for a budget period of 12 months will be up to $125,000.

B. Background

The Congress has recognized that the history of past policies of the United States toward Indian and other Native American languages has resulted in a dramatic decrease in the number of Native American languages that have survived over the past five hundred years. Consequently, the Native American Languages Act was enacted in 1990 (Title I, Public Law 101–477) to address this decline.

This Act invested the United States government with the responsibility to work together with Native Americans to ensure the survival of cultures and languages unique to Native America. This law declares that it is the policy of the United States to "preserve, protect, and promote the rights and freedom of Native Americans to use, practice, and develop Native American languages." The Congress made a significant first step in passing this legislation in 1990, but it served only as a declaration of policy. No program initiatives were proposed, nor were funds authorized to begin a significant program to carry out this policy.

In 1992, Congressional testimony highlighted that of the several hundred Native American languages that once existed, only about one hundred and fifty-five (155) languages are still spoken or remembered today. However, only 20 are spoken by persons of all ages, 30 are spoken by adults of all ages, about 60 are spoken by middle-aged adults, and 45 are spoken only by the most elderly.

In response to this testimony, the Congress passed the Native American Languages Act of 1992 (Public Law 102–524) to assist Indian tribes, Alaska villages, and Native American groups to assure the survival and continuing vitality of their languages. Passage of this law is an important second step to support the survival and continuation of Native American languages. It provides a basic building block foundation upon which Tribal nations can rebuild economic strength and maintain rich cultural diversity.

The Federal government recognizes that substantial loss of Native American languages has occurred over the past several hundred years. The nature and magnitude of the status of Native American languages will become better defined as language assessments are made.

The Administration for Native Americans (ANA) believes that responsibility for achieving language(s) project results rests with the governing bodies of Indian tribes, Alaska Native villages, and in the leadership of Native American groups. The local community and its leadership are responsible for determining its own goals, setting priorities, and planning and implementing programs which support the community's long-range language goals.

Preserving a language and ensuring its continuation is generally one of the first steps taken toward strengthening a group's identity. Therefore, projects proposed under this program announcement will contribute to the balanced development in a native community and can significantly contribute to its path toward self-sufficiency.

Under this competitive area eligible applicants will have the opportunity to develop their own language plans, increase their technical capabilities, and have access to financial and technical resources in order to assess, plan, develop and implement programs to address the survival and continuing vitality of their languages. ANA recognizes that potential applicants may have various levels of specialized knowledge and capabilities to address their specific language concerns. This competitive area is designed to take into account these special needs and circumstances.

"Language preservation" is the maintenance of a language so that it will not decline into non-use.

"Language vitality" is the active use of a language in a wide range of domains of human life.

"Language replication" is defined as the application of a language program model developed in one community to other linguistically similar communities.

"Language survival" is defined as the maintenance and continuation of language from one generation to another in a wide range of aspects of community life.

C. Proposed Projects to be Funded

There are two types of projects applicants may apply for:

- Category I—"Planning Grants"-for projects up to 12 months, the funding level will be up to $50,000 or,
- Category II—"Design and/or Implementation Grants"—for projects up to 36 months, the funding level for a budget period of 12 months will be up to $125,000.

Category I—Planning Grants

The purpose of a Planning Grant is to conduct an assessment and to develop the plan needed to describe the current status of the language(s) to be addressed and to establish community long-range language goal(s) to ensure its survival.

Project activities may include, but are not limited to:

- To collect data, organize it, and determine and describe current language status through a "formal" method (e.g., work performed by a linguist, and/or a language survey conducted by community members) or an "informal" method (e.g., a community consensus of the language status based on elders, tribal scholars, and/or other community members);
- To establish the community's long-range language goals; and
- To get the necessary training and technical assistance to administer the project and achieve the project goal(s).

Category II—Design and/or Implementation Grants

The purpose of providing an option for a Design and/or an Implementation Grant is:

Option One: So tribes or communities can design and/or implement a language program to achieve the community's long-range language goal(s); and

Option Two: To accommodate where the Tribe or community is in their long-term language(s) goals continuum.

Applicants under Category II must be able to document that:

(a) Language information has been collected and analyzed, and that it is current (compiled within 36 months prior to the grant application);

(b) The community has established long-range language goals; and

(c) Community representatives are adequately trained so that the proposed project goals can be achieved.

Category II applications may include purchasing specialized equipment (including audio and video recording equipment, computers, and software) necessary to achieve the project objectives. The applicant must fully justify the need for this equipment and explain how it will be used to achieve the project objectives.

The types of projects and activities ANA can fund under Category II include, but are not limited to:

- Establishment and support of a community Native American language project to bring older and younger Native Americans together to facilitate and encourage the teaching of Native American languages skills from one generation to another;
- Establishment of a project to train Native Americans to teach Native American languages to others or to enable them to serve as interpreters or translators of such languages;
- Development, printing, and dissemination of materials to be used for the teaching and enhancement of Native American languages;
- Establishment or support of a project to train Native Americans to produce or participate in television or radio programs to be broadcast in Native American languages; and
- Compilation, transcription, and analysis of oral testimony to record and preserve Native American languages.

Policy

It is ANA's policy that funds will not be awarded for projects addressing dead languages.

Requirement

The Institute of American Indian and Alaska Native Culture and Arts Development has been established by the Act as the repository for copies of products from Native American languages grants funded under this program announcement. At the end of the project period, products of Native American languages grants funded by this program announcement must be sent to the Institute. Specific information about the repository is in the ANA application kit.

Federally recognized Indian Tribes (as listed by the Bureau of Indian Affairs in an October 21, 1993 **Federal Register** notice, 58 Fed. Reg. 54. 364 (1993)) are not required to comply with this requirement.

D. Eligible Applicants

The following organizations are eligible to apply for funding under this competitive area:

- Federally recognized Indian Tribes;
- Consortia of Indian Tribes;
- Incorporated non-Federally recognized Tribes;
- Incorporated nonprofit multi-purpose community-based Indian organizations;
- Urban Indian Centers;
- National or regional incorporated nonprofit Native American organizations with Native American community-specific objectives;
- Alaska Native villages as defined in the Alaska Native Claims Settlement Act (ANCSA) and/or nonprofit village consortia;
- Incorporated nonprofit Alaska Native multi-purpose community-based organizations;
- Nonprofit Alaska Native Regional Corporations/Associations in Alaska with village specific projects;
- Nonprofit Native organizations in Alaska with village specific projects;
- Public and nonprofit private agencies serving Native Hawaiians;
- Public and nonprofit private agencies serving native peoples from Guam, American Samoa, Palau, or the Commonwealth of the Northern Mariana Islands. (The populations served may be located on these islands or in the United States); and
- Tribally Controlled Community Colleges, Tribally Controlled Post-Secondary Vocational Institutions, and colleges and universities located in Hawaii, Guam, American Samoa, Palau, or the Commonwealth of the Northern Mariana Islands which serve Native American Pacific Islanders.

Participating Organizations

If a tribal organization, or other eligible applicant, decides that the objectives of its proposed Native American language project would be accomplished more effectively through a partnership arrangement with a tribal school, college, or university, the applicant shall identify such school, college, or university as a participating organization in its application. Under a partnership agreement, the applicant will be responsible for the fiscal, administrative and programmatic management of the grant.

Proof of an applicant's nonprofit status, such as an IRS determination of nonprofit status under IRS Code 501(c)(3), must be included in the application.

If the applicant, other than a tribe or an Alaska Native Village government, is proposing a project benefiting Native Americans or Native Alaskans, or both, it must provide assurance that its duly elected or appointed board of directors is representative of the community to be served. An organization can conclusively establish that it meets this requirement through a signed statement or resolution stating that its duly elected or appointed board of directors are either Native Americans or Native Alaskans or a copy of the organizational charter or by-laws that clearly states that the organization has a board drawn from members of those groups.

Under each competitive area, ANA will only accept one application which serves or impacts a reservation, Tribe or Native American community. If a Tribe or Alaska Native village chooses not to submit an application under a specific competitive area, it may support another applicant's project (e.g., a tribal organization) which serves or impacts the reservation.

In this case, the applicant must include a Tribal resolution which clearly demonstrates the Tribe's support of the project and the Tribe's understanding that the other applicant's project supplants the Tribe's authority to submit an application under that specific competitive area for the duration of the approved grant period.

E. Grantee Share of the Project

Grantees must provide at least 20 percent of the total approved cost of the project. The total approved cost of the project is the sum of the ACF share and the non-Federal share. The non-Federal share may be met by cash or in-kind contributions; although applicants are encouraged to meet their match requirements through cash contributions. Therefore, a project requesting $125,000 in Federal funds must include a match of at least $31,250 (20% total project cost).

As per 45 CFR Part 74.2, In-Kind contributions is defined as "the value of non-cash contributions provided by non-Federal third parties. Third party-in kind contributions may be in the form of real property, equipment, supplies and other expendable property, and the value of goods and services directly benefiting and specifically identifiable to the project or program."

In addition the non-Federal share may include certain funds distributed to a tribe, including interest, by the Federal government:

- Funds from the satisfaction of a claim made under Federal law;

- Funds collected and administered on behalf of such tribe or its constituent members; or
- Funds for general tribal administration or tribal development under a formula or subject to a tribal budgeting priority system; such as, but not limited to, funds involved in the settlement of land or other judgment claims, severance or other royalty payments, or payments under the Indian Self-Determination Act (25 U.S.C. 450f et seq.) or tribal budget priority system.

A complete itemized budget must also detail the applicant's non-Federal share, and its source.

If an applicant plans to charge indirect costs in its ANA application, a current copy of its Indirect Cost Agreement must be included in the application.

A request for a waiver of the non-Federal share requirement may be submitted in accordance with 45 CFR 1336.50(b)(3) of the Native American Program Regulations.

Applications submitted as a partnership arrangement with a school, college, or university, may use contributions from the "partner" organization(s) to meet the non-Federal share, as appropriate.

Applications originating from American Samoa, Guam, Palau, or the Commonwealth of the Northern Mariana Islands are covered under section 501(d) of Public Law 95–134, as amended (48 U.S.C. 1469a) under which HHS waives any requirement for local matching funds under $200,000 (including in-kind contributions).

F. Review Criteria

The proposed project should address the Native American languages purposes stated and described in the Background (Section B) of this competitive area.

The evaluation criteria below are closely inter-related. They are considered as a whole in judging the overall quality of an application.

Points are awarded only to applications which respond to this competitive area and to these criteria. Proposed projects will be reviewed on a competitive basis using the following evaluation criteria:

(1) The Current Status of Native American Language(s) is Described and Description(s) of Existing Programs/Projects (if Any) Which Support the Language(s) are Included. (10 Points)

(a) The application fully describes the current status of the Native American language(s) in the community. ("Current status" is defined as data compiled within the previous thirty-six (36) months.)

The description of "current status" minimally includes the following information:

(1) Number of speakers of the language(s);

(2) Age of speakers;

(3) Gender of speakers;

(4) Level(s) of fluency;

(5) Number of first language speakers (the Native language is the first language acquired);

(6) Number of second language speakers (the Native language is the second language acquired);

(7) Where the language is used (specific uses such as: home, court system, religious ceremonies, church, multimedia, school, governance activities and other, as appropriate to applicant);

(8) Source of data; (formal and/or informal); and

(9) Rate of language loss or gain.

The application has clearly described the current status of the Native American language(s) to be addressed by the project.

Note: Planning Grant applicants may not have all the information requested about their current language status, since obtaining this data may be part of the planning grant application being reviewed. Applicants applying for Category I—Planning Grants can meet this requirement by explaining their current language status and providing a detailed description of any circumstances or barriers which have prevented the collection of community language data.

(b) The application fully describes existing community language or language training programs and projects, if any, that support the Native American language to be addressed by the proposed project.

Existing programs and projects may be "formal" (e.g., work performed by a linguist, and/or a language survey conducted by community members) or "informal" (e.g., a community consensus of the language status based on elders, tribal scholars, and/or other community members).

The description should answer the following:

(1) Has applicant had a community language or language training program within the last thirty-six (36) months?

(2) Has applicant had a community language or language training program within the last ten (10) years?

Applicants that answer "no" to either question (1) or (2) should provide a detailed explanation of what barriers or circumstances prevented the establishment or implementation of a community language program.

Applicants that answer "yes" to either questions (1) or (2) should describe recent language program(s), including:

(1) Program goal(s);

(2) Number of program participants;

(3) Number of speakers;

(4) Age range of participants (e.g., 0–5; 6–10; 11–18;, etc.);

(5) Number of language teachers;

(6) Criteria used to acknowledge competency of language teachers;

(7) Resources available, if any, to the applicant (e.g., valid grammars, dictionaries, and/or orthographics or describe other suitable resources); and

(8) What has been achieved.

(2) Long-Range Goals and Available Resources. (25 Points)

(a) The application describes the proposed project's long-range goal(s) and strategy, including:

- How the specific Native American(s) long range community goal(s) relate to the proposed project;
- How the goals fit within the context of the applicant's current language status; and
- A clearly delineated strategy to assist in assuring the survival and continued vitality of the Native American language(s) addressed in the community.

(b) The application explains how the community or tribal government (where one exists) intends to achieve these goals.

The application documents the type of involvement and support of the community in the planning process and implementation of the proposed project. A Tribe may meet this requirement by submitting a resolution stating that community involvement has occurred in the project planning. All other eligible applicants may meet this requirement by providing documentation of community support/involvement. The type of community served will determine the type of documentation necessary.

For example, a tribal organization *may* submit resolutions supporting the project proposal from each of its member's tribes, as well as a resolution from the applicant organization. Other examples of documentation include: community surveys; minutes of community meetings; questionnaires; tribal presentations; and/or discussion/position papers.

Applications from National Indian and Native organizations must clearly demonstrate a need for the project, explain how the project was originated, state who the intended beneficiaries will be, and describe how the recipients will actually benefit from the project. National Indian and Native organizations should describe their membership and define how the organization operates.

(c) Available resources (other than ANA and the non-Federal share) which will assist and be coordinated with the project are described. These resources should be documented by letters or documents of commitment of resources, and not "letters of support."

- "Letters of support" merely express another organization's endorsement of a proposed project. Support letters are not binding commitment letters or documents that factually establish the authenticity of other resources.
- "Letters and other documents of commitment" are binding and specifically state the nature, amount and conditions under which another agency or organization will support a project funded with ANA funds. These resources may be human, natural or financial, and may include other Federal and non-Federal resources.

Applicant statements that additional funding will be sought from other specific sources are *not* considered a binding commitment of outside resources.

If the applicant proposes to enter into a partnership arrangement with a school, college, or university, documentation of this commitment must be included in the application.

Note: Applicants from the Native American Pacific Islands are not required to provide a 20% match for the non-Federal share if it is under $200,000 and may not have points reduced for this policy. They are, however, expected to coordinate non-ANA resources for the proposed project, as are all ANA applicants.

(3) Project Objectives, Approach and Activities. (25 Points)

The proposed objectives in the Objective Work Plan(s) relate to the competitive area goal to ensure the survival and continuing vitality of Native American language(s). More specifically, together they will achieve the Tribe or community's language goals for the proposed project. If the project is for more than one year, the application includes Objective Work Plans for each year (budget period) proposed.

Each Objective Work Plan proposed clearly describes:

- The Tribal government's, or community's active involvement in the continuing participation of Native American language speakers;
- Measurable or quantifiable results or outcomes;
- How they relate to the community's long-range language goals;
- How the project can be accomplished with the available or expected resources during the project period;
- How the main activities will be accomplished;
- Who specifically will conduct the activities under each objective;
- For Category I projects, what the next steps may be after the Planning project is completed; and
- For Category II projects, how the project will be completed, become self-sustaining, or be financed by other than ANA funds at the end of the project period.

(4) Evaluation Plan. (15 Points)

A section of the application includes an "Evaluation Plan" with a baseline to measure project outcomes, including, but not limited to, describing effective language growth in the community (e.g., an increase of Native American language use). This plan will be the basis for evaluating the community's progress in achieving its language goals and objectives.

(5) Sharing Plan and Plan to Preserve Project Products (10 Points)

A section of the application includes two plans:

(a) A *Sharing Plan* that identifies how the project's methodology, research data, products or outcomes can be shared and used or modified, by other tribes or communities. If this is not feasible or appropriate, provide the reasons. The goal is to provide opportunities to ensure the survival and continuing vitality of native languages.

(b) A *Plan to Preserve Project Products* describes how the products of the project will be preserved through archival or other methods, for the benefit of future generations.

(6) Organizational Capabilities/Qualifications and Budget. (15 Points)

(a) The management and administrative structure of the applicant is explained. Evidence of the applicant's ability to manage a project of the proposed scope is well defined. The application clearly demonstrates the successful management of projects of similar scope by the organization and/or by the individuals designated to manage the project.

(b) Position descriptions and/or resumes of key personnel, including those of consultants, are presented. The position descriptions and/or resumes relate specifically to the staff proposed in the Approach Page and in the proposed Budget of the application. Position descriptions very clearly describe the position and its duties and clearly relate to the personnel staffing required to achieve the project objectives. Resumes demonstrate that the proposed staff are qualified to carry out the project activities.

Either the position descriptions or the resumes contain the qualifications, and/or specialized skills, necessary for overall quality management of the project. Resumes must be included if individuals have been identified for positions in the application.

Note: Applicants are strongly encouraged to give preference to Native Americans in hiring staff and subcontracting services under an approved ANA grant.

(c) A detailed and fully explained budget is provided for each budget period requested which:

- Justifies each line item, with a well-written justification, in the budget categories in Section B of the Budget Information of the application, including the applicant's non-Federal share and its source;
- Includes and justifies sufficient cost and other necessary details to facilitate the determination of cost allowability and the relevance of these costs to the proposed project; and
- Requests funds which are appropriate and necessary for the scope of the proposed project.

Note: (Applicants from the Native American Pacific Islands are exempt from the $200,000 non-Federal share requirement).

G. Application Due Date

The closing date for submission of applications under this competitive area is March 15, 1996.

H. For Further Information Contact

Deborah Yatsko, (202) 690–7843, Department of Health and Human Services, Administration for Children and Families, Administration for Native Americans, 200 Independence Ave., SW., Room 348–F, Washington, DC 20201–0001

Part III—General Application Information and Guidance

A. Definitions

Funding areas in this program announcement are based on the following definitions:

- A "multi-purpose community-based Native American organization" is an association and/or corporation whose charter specifies that the community designates the Board of Directors and/or officers of the organization through an elective procedure and that the organization functions in several different areas of concern to the members of the local Native American community. These areas are specified in the by-laws and/or policies adopted by the organization. They may include, but need not be limited to, economic, artistic, cultural, and recreational activities, and the delivery of human services such as health care, day care, counseling, education, and training.

- A "multi-year project" is a project on a single theme that requires more than 12 months to complete and affords the applicant an opportunity to develop and address more complex and in-depth strategies than can be completed in one year. A multi-year project cannot be a series of unrelated objectives with activities presented in chronological order over a two or three year period.
- "Budget Period" is the interval of time (usually 12 months) into which the project period is divided for budgetary and funding purposes.
- "Core administration" is funding for staff salaries for those functions which support the organization as a whole, or for purposes unrelated to the actual management or implementation of work conducted under an ANA approved project.
- "Environmental regulatory enhancement" includes (but is not limited to) the planning, development, and application of laws, training, monitoring, and enforcement procedures, tribal courts, environmental laboratories and other facilities, and associated regulatory activities to strengthen the tribal government's capacity to enhance the quality of reservation life as measured by the reduction of pollutants in the air, water, soil, food and materials encountered by inhabitants of tribes and villages.
- "Language preservation" is the maintenance of a language so that it will not decline into non-use.
- "Language vitality" is the active use of a language in a wide range of domains of human life.
- "Language replication" is the application of a language program model developed in one community to other linguistically similar communities.
- "Language survival" is the maintenance and continuation of language from one generation to another in a wide range of aspects of community life.

B. General Considerations

Non-ANA resources should be leveraged to strengthen and broaden the impact of the proposed project in the community. Project designs should explain how those parts of projects which ANA does not fund will be financed through other sources. For example, ANA does not fund construction. Applicants must show the relationship of non-ANA funded activities to those objectives and activities that *are* funded with ANA grant funds.

Costs of fundraising, including financial campaigns, endowment drives, solicitation of gifts and bequests, and similar expenses incurred solely to raise capital or obtain contributions are unallowable under a grant award. However, even though these costs are unallowable for purposes of computing charges to Federal awards, they must be treated as direct costs for purposes of determining indirect cost rates and be allocated their share of the organization's indirect costs if they represent activities which 1) include the salaries of personnel, 2) occupy space, and 3) benefit from the organization's indirect costs.

All projects funded by ANA must be completed, or self-sustaining or supported with other than ANA funds at the end of the project period. "Completed" means that the project ANA funded is finished, and the desired result(s) have been attained. "Self-sustaining" means that a project will continue without outside resources. "Supported by other than ANA funds" means that the project will continue beyond the ANA project period, but will be supported by funds other than ANA's.

C. Activities That Cannot be Funded by ANA

The Administration for Native Americans does not fund projects that operate indefinitely or require ANA funding on a recurring basis. The Administration for Native Americans does not fund objectives or activities for the core administration of an organization. "Core administration" is funding for staff salaries for those functions which support the organization as a whole, or for purposes unrelated to the actual management or implementation of work conducted under an ANA approved project.

Under Competitive Area 2, ANA will consider funding core administrative capacity building projects at the village government level if the village does not have governing systems in place.

However, functions and activities that are clearly project related are eligible for grant funding. For example, the management and administrative functions necessary to carry out an ANA approved project are not considered "core administration" and are, therefore, eligible costs. Additionally, ANA will fund the salaries of approved staff for time actually and reasonably spent to implement a funded ANA project.

Projects or activities that generally will not meet the purposes of this announcement are discussed further in Part III, Section H, General Guidance to Applicants, below.

D. Multi-Year Projects

Applicants may apply for projects of up to three years. A multi-year project is a project on a single theme that requires more than 12 months to complete and affords the applicant an opportunity to develop and address more complex and in-depth strategies than can be completed in one year. Applicants are encouraged to develop multi-year projects. A multi-year project cannot be a series of unrelated objectives with activities presented in chronological order over a two or three year period.

Awards, on a competitive basis, will be for a one-year budget period, although project periods may be for three years. Applications for continuation grants funded under these awards beyond the one-year budget period, but within the three-year project period, will be entertained in subsequent years on a non-competitive basis, subject to the availability of funds, satisfactory progress of the grantee and determination that continued funding would be in the best interest of the Government. Therefore, this program announcement does not apply to current ANA grantees with multi-year projects that apply for continuation funding for their second or third year budget periods.

E. Intergovernmental Review of Federal Programs

This program is not covered by Executive Order 12372 or 45 CFR Part 100.

F. The Application Process

1. Availability of Application Forms

In order to be considered for a grant under this program announcement, an application must be submitted on the forms supplied and in the manner prescribed by ANA. The application kits containing the necessary forms and instructions may be obtained from: Department of Health and Human Services, Administration for Children and Families, Administration for Native Americans, Room 348F, Hubert H. Humphrey Building, 200 Independence Avenue, SW., Washington, DC 20201–0001, Attention: 93612–961, Telephone: (202) 690–7776.

2. Application Submission

One signed original, and two copies, of the grant application, including all attachments, must be mailed on or before the specific closing date of each ANA competitive area to: Department of Health and Human Services, Administration for Children and Families, Division of Discretionary Grants, 370 L'Enfant Promenade, SW., 6th Floor, ACF Guard Station, Washington, DC 20447, Attention: William J. McCarron, ANA No. 93612–961.

Hand delivered applications are accepted during the normal working hours of 8:00 a.m. to 4:30 p.m., Monday through Friday, on or prior to the established closing date at: Administration for Children and Families, Division of Discretionary Grants, 6th Floor, ACF Guard Station, 901 D Street, SW., Washington, DC 20024.

The application (Form 424) must be signed by an individual authorized (1) to act for the applicant tribe or organization, and (2) to assume the applicant's obligations under the terms and conditions of the grant award, including Native American Program statutory and regulatory requirements.

Each tribe, Native American organization, or other eligible applicant may compete and receive a grant award in each of the three competitive areas under this announcement. The Administration for Native Americans will accept only one application per competitive area from any one applicant. Alaska Native entities may submit a SEDS application under either competitive area 1 or 2, but not under both.

If an eligible applicant sends in two applications for the same competitive area, the one with the earlier postmark will be accepted for review unless the applicant withdraws the earlier application.

3. Application Consideration

The ANA Commissioner determines the final action to be taken on each grant application received under this program announcement.

The following points should be taken into consideration by all applicants:

- Incomplete applications and applications that do not conform to this announcement will not be accepted for review. Applicants will be notified in writing of any such determination by ANA.
- Complete applications that conform to all the requirements of this program announcement are subjected to a competitive review and evaluation process (discussed in section G below). Independent review panels consisting of reviewers familiar with (1) American Indian Tribes and Native American communities and organizations, (2) environmental issues, and (3) Native American languages, as appropriate, evaluates each application using the published criteria in each funding competitive area. As a result of the review, a numerical score will be assigned to each application.
- The Commissioner's funding decision is based on the review panel's analysis of the application, recommendation and comments of ANA staff, State and Federal agencies having contract and grant performance related information, and other interested parties.
- The Commissioner makes grant awards consistent with the purpose of the Act, all relevant statutory and regulatory requirements, this program announcement, and the availability of funds.
- After the Commissioner has made decisions on all applications, unsuccessful applicants are notified in writing within approximately 120 days of the closing date. The notification will be accompanied by a critique including recommendations for improving the application. Successful applicants are notified through an official Financial Assistance Award (FAA) document. ANA staff cannot respond to requests for information regarding funding decisions prior to the official notification to the applicants. The FAA will state the amount of Federal funds awarded, the purpose of the grant, the terms and conditions of the grant award, the effective date of the award, the project period, the budget period, and the amount of the non-ACF matching share requirement.

G. The Review Process

1. Initial Application Review

Applications submitted by the closing date and verified by the postmark under this program announcement will undergo a pre-review to determine that:

- The applicant is eligible in accordance with the Eligible Applicants Section of this announcement; and
- The application narrative, forms and materials submitted are adequate to allow the review panel to undertake an in depth evaluation. (All required materials and forms are listed in the Grant Application Checklist in the Application Kit).

2. Competitive Review of Accepted Applications

Applications which pass the pre-review will be evaluated and rated by an independent review panel on the basis of the specific evaluation criteria listed in Part II. These criteria are used to evaluate the quality of a proposed project, and to determine the likelihood of its success.

3. Determination of Ineligibility

Applicants who are initially rejected from competitive evaluation because of ineligibility, may appeal an ANA decision of applicant ineligibility. Likewise, applicants may also appeal an ANA decision that an applicant's proposed activities are ineligible for funding consideration. Section 810(b) of the Native American Programs Act, as amended, 42 U.S.C. 2991h, specifies the appeals process when ANA determines that an organization or activities are ineligible for assistance. When an applicant or the activities proposed by the applicant are rejected as ineligible, the applicant will be advised of the appropriate appeal process.

H. General Guidance to Applicants

The following information is provided to assist applicants in developing a competitive application.

1. Program Guidance

- The Administration for Native Americans funds projects that demonstrate the strongest prospects for addressing the stated purposes of this program announcement. Projects will not be funded on the basis of need alone.
- In discussing the goals, strategy, and problems being addressed in the application, include sufficient background and/or history of the community concerning these issues and/or progress to date, as well as the size of the population to be served. This material will assist the reviewers in determining the appropriateness and potential benefits of the proposed project.
- In the discussion of community-based, long-range goals, non-Federally recognized and off-reservation groups are encouraged to include a description of what constitutes their specific "community."
- Applicants must document the community's support for the proposed project and explain the role of the community in the planning process and implementation of the proposed project. For tribes, a current signed resolution from the governing body of the tribe supporting the project proposal stating that there has been community involvement in the planning of this project will suffice as evidence of community support/involvement. For all other eligible applicants, the type of community you serve will determine the type of documentation necessary. For example, a tribal organization may submit resolutions supporting the project proposal from each of its members tribes, as well as a resolution

from the applicant organization. Other examples of documentation include: community surveys; minutes of community meetings; questionnaires; tribal presentations; and/or discussion/position papers.

- Applications from National Indian and Native organizations must demonstrate a need for the project, explain how the project was originated, state who the intended beneficiaries will be, and describe how the recipients will actually benefit from the project.
- An application should describe a clear relationship between the proposed project, the social and economic development strategy, or environmental or language goals, as appropriate, and the community's long-range goals or plan.
- The project application, including the Objective Work Plans, must clearly identify in measurable terms the expected results, benefits or outcomes of the proposed project, and the positive or continuing impact that the project will have on the community.
- Supporting documentation, including letters of support, if available, or other testimonies from concerned interests other than the applicant should be included to demonstrate support for the feasibility of the project and the commitment of other resources to the proposed project.
- In the ANA Project Narrative, Section A of the application package, "Resources Available to the Proposed Project," the applicant should describe any specific financial circumstances which may impact on the project, such as any monetary or land settlements made to the applicant, and any restrictions on the use of those settlements. When the applicant appears to have other resources to support the proposed project and chooses not to use them, the applicant should explain why it is seeking ANA funds and not utilizing these resources for the project.
- Reviewers of applications for ANA indicate they are better able to evaluate whether the feasibility has been addressed and the practicality of a proposed economic development project, or a new business, if the applicant includes a business plan that clearly describes its feasibility and the approach for the implementation and marketing of the business. (ANA has included sample business plans in the application kit). It is strongly recommended that an applicant use these materials as guides in developing a proposal for an economic development project or business that is part of the application.
- Applications which were disapproved under a previous closing date and revised for resubmission should make reference to the changes in their current application which are based on ANA panel review comments.

2. Technical Guidance

- It is strongly suggested that the applicant follow the Supplemental Guide included in the ANA application kit to develop an application. The Guide provides practical information and helpful suggestions, and is an aid to help applicants prepare ANA applications.
- Applicants are encouraged to have someone other than the author apply the evaluation criteria in the program announcement and score the application prior to its submission, in order to gain a better sense of the application's quality and potential competitiveness in the ANA review process.
- For purposes of developing an application, applicants should plan for a project start date approximately 120 days after the closing date under which the application is submitted.
- The Administration for Native Americans will not fund essentially identical projects serving the same constituency.
- If a project could be supported by other Federal funding sources, the applicant should fully explain its reasons for not pursuing other Federal funds for the project.
- Applicants are strongly encouraged to submit proposals addressing environmental regulatory enhancement and Native American languages preservation and enhancement under the issue-specific competitive areas described in this announcement.
- For purposes of this announcement, ANA is using the Bureau of Indian Affairs' list of Federally recognized Indian tribes which includes nonprofit Alaska Native community entities or tribal governing bodies (IRA or traditional councils). Other Federally recognized Indian tribes which are not included on this list (e.g., those Tribes which have been recently recognized or restored by the United States Congress) are also eligible to apply for ANA funds.
- The Administration for Native Americans will accept only one application, per competitive area, from any one applicant. If an eligible applicant sends in two applications for the same competitive area, the one with the earlier postmark will be accepted for review unless the applicant withdraws the earlier application.
- An application from a federally recognized Tribe, Alaska Native Village or Native American organization must be from the governing body of the Tribe or organization. ANA will not accept applications from tribal components which are tribally-authorized divisions of a larger tribe, unless the application includes a Tribal resolution which clearly demonstrates the Tribe's support of the project and the Tribe's understanding that the other applicant's project supplants the Tribe's authority to submit an application under that specific competitive area for the duration of the approved grant period.
- Under each competitive area, ANA will only accept one application which serves or impacts a reservation, Tribe, or Native American community. If a Tribe, or Alaska Native village chooses not to submit an application under a specific competitive area, it may support another applicant's project (e.g., a tribal organization) which serves or impacts the reservation. In this case, the applicant must include a Tribal resolution which clearly demonstrates the Tribe's support of the project and the Tribe's understanding that the other applicant's project supplants the Tribe's authority to submit an application under that specific competitive area for the duration of the approved grant period.
- The application's Form 424 must be signed by the applicant's representative authorized to act with full authority on behalf of the applicant.
- The Administration for Native Americans recommends that the pages of the application be numbered sequentially and that a table of contents be provided. Simple tabbing of the sections of the application is also helpful to the reviewers.
- An application with an original signature and two additional copies are required.
- The Cover Page (included in the Kit) should be the first page of an application, followed by the one-page abstract.
- The Approach page (Section B of the ANA Program Narrative) for each Objective Work Plan proposed should be of sufficient detail to become a monthly staff guide for project responsibilities if the applicant is funded.
- The applicant should specify the entire project period length on the first page of the Form 424, Block 13, not the length of the first budget period. Should the application's contents propose one length of project period and the Form 424 specify a conflicting length of project period, ANA will consider the project period specified on the Form 424 as governing.
- Line 15a of the Form 424 must specify the Federal funds requested for the first Budget Period, not the entire project period.

- If a profit-making venture is being proposed, profits must be reinvested in the business in order to decrease or eliminate ANA's future participation. Such revenue must be reported as general program income. A decision will be made at the time of grant award regarding appropriate use of program income. (See 45 CFR Part 74 and Part 92.)
- Applicants may propose a 17 month project period. However, the project period for the first year of a multi-year project may only be 12 months.
- Applicants proposing multi-year projects must fully describe each year's project objectives and activities. Separate Objective Work Plans (OWPs) must be presented for each project year and a separate itemized budget of the Federal and non-Federal costs of the project for each budget period must be included.
- Applicants for multi-year projects must justify the entire time-frame of the project (i.e., why the project needs funding for more than one year) and clearly describe the results to be achieved for each objective by the end of each budget period of the total project period.
- The Administration for Native Americans will critically evaluate applications in which the acquisition of equipment is a major component of the Federal share of the budget. "Equipment is tangible, non-expendable personal property having a useful life of more than one year and an acquisition cost of $5,000 or more per unit." During negotiation, such expenditures may be deleted from the budget of an otherwise approved application, if not fully justified by the applicant and not deemed appropriate to the needs of the project by ANA.
- Applicants are encouraged to request a legibly dated receipt from a commercial carrier or U.S. Postal Service as proof of timely mailing.

3. Projects or Activities That Generally Will Not Meet the Purposes of This Announcement

- Projects in which a grantee would provide training and/or technical assistance (T/TA) to other tribes or Native American organizations which are otherwise eligible to apply to ANA ("third party T/TA"). However, the purchase of T/TA by a grantee for its own use or for its members' use (as in the case of a consortium), where T/TA is necessary to carry out project objectives, is acceptable. In addition, T/TA is an allowable activity for environmental regulatory enhancement projects submitted under Competitive Area 3, and Native American languages projects submitted under Competitive Area 4.
- Projects that request funds for feasibility studies, business plans, marketing plans or written materials, such as manuals, that are not an essential part of the applicant's long-range development plan. As an objective of a larger project, business plans are allowable. However, ANA is not interested in funding "wish lists" of business possibilities. ANA expects written evidence of the solid investment of time and consideration on the part of the applicant with regard to the development of business plans. Business plans should be developed based on market analysis and feasibility studies regarding the potential success to the business prior to the submission of the application.
- The support of on-going social service delivery programs or the expansion, or continuation, of existing social service delivery programs.
- Core administration functions, or other activities, which essentially support only the applicant's on-going administrative functions. However, under Competitive Area 2, ANA will consider funding core administrative capacity building projects at the village government level if the village does not have governing systems in place.
- Project goals which are not responsive to one or more of the funding competitive areas.
- Proposals from consortia of tribes that are not specific with regard to support from, and roles of, member tribes. ANA expects an application from a consortium to have goals and objectives that will create positive impacts and outcomes in the communities of its members. Proposals from consortia of tribes should have individual objectives which are related to the larger goal of the proposed project. Project objectives may be tailored to each consortia member, but within the context of a common goal for the consortia. In situations where both a consortia of tribes and the tribes who belong to the consortia receive ANA funding, ANA expects that consortia groups will not seek funding that duplicates activities being conducted by their member tribes.
- Projects that will not be completed, self-sustaining, or supported by other than ANA funds, at the end of the project period.
- ANA will not fund the purchase of real estate (see 45 CFR 1336.50 (e)) or construction (see ACF Grants Administration Manual § 3.12).
- ANA will not fund investment capital for purchase or takeover of an existing business, for purchase or acquisition of a franchise, or for purchase of stock or other similar investment instruments.
- Renovation or alteration unless it is essential for the project. Renovation or alteration costs may not exceed the lesser of $150,000 or 25 percent of the total direct costs approved for the entire budget period.
- Projects originated and designed by consultants who provide a major role for themselves in the proposed project and are not members of the applicant organization, tribe or village.

I. Paperwork Reduction Act of 1980

Under the Paperwork Reduction Act of 1980, Pub. Law 96–511, as amended in 1986, the Department is required to submit to the Office of Management and Budget (OMB) for review and approval any reporting and record keeping requirements in regulations, including program announcements. All information required by this is covered under the following OMB Approval Nos:

- SF 424 OMB Clearance No. 0348–0043 Application for Federal Assistance Standard Form 424
- SF 424A OMB Clearance No. 0348–0044 Budget Information
- SF 424B OMB Clearance No. 0348–0040 Assurances—Non Construction Programs
- OMB Clearance No. 0980–0204 ANA Program Narrative, Application for Federal Assistance

J. Receipt of Applications

Applications must either be hand delivered or mailed to the address in Section F, The Application Process: Application Submission. The Administration for Native Americans will not accept applications submitted via facsimile (FAX) equipment. Videotapes and cassette tapes may not be included as part of a grant application for panel review.

1. Deadlines

Applications mailed through the U.S. Postal Service or a commercial delivery service shall be considered as meeting an announced closing date if they are either:

- Received on or before the deadline date at the address specified in Section F2, Application Submission; or
- Sent on, or before, the deadline date and received in time for the ANA independent review. (Applicants are cautioned to request a legibly dated receipt from a commercial carrier or U.S. Postal Service or a legible postmark

date from the U.S. Postal Service. Private metered postmarks shall not be acceptable as proof of timely mailing.)

- No additional material will be accepted, or added to an application, unless it is postmarked by the deadline date.

2. Late applications

Applications which do not meet the criteria in the above paragraph of this section are considered late applications and will be returned to the applicant. The Administration for Children and Families shall notify each late applicant that its application will not be considered in the current competition.

3. Extension of deadlines

The Administration for Children and Families may extend the deadline for all applicants because of acts of God such as floods, hurricanes, etc., or when there is a widespread disruption of the mails. However, if ACF does not extend the deadline for all applicants, it may not waive or extend the deadline for any applicant.

BILLING CODE 4184–01–P

Administration for Children and Families

New Child Welfare Waiver Demonstration Project Proposals Submitted Pursuant to Section 1130 of the Social Security Act (the Act); Title IV–E and IV–B of the Act; Public Law 103–432

AGENCY: Administration for Children and Families, HHS.

ACTION: Notice.

SUMMARY: This notice lists new proposals for child welfare waiver demonstration projects submitted to the Department of Health and Human Services pursuant to **Federal Register**, Volume 60, No. 115, published Thursday, June 15, 1995. Federal approval for the proposals has been requested pursuant to section 1130 of the Social Security Act.

COMMENTS: We will accept written comments on these proposals. We will, if feasible, acknowledge receipt of all comments, but we will not provide written responses to comments. We will, however, neither approve nor disapprove any new proposal for at least 30 days after the date of this notice to allow time to receive and consider comments. Direct comments as indicated below.

ADDRESSES: For specific information or questions on the content of a project or requests for copies of a proposal, contact the State contact listed for that project.

Comments on a proposal should be addressed to:

Michael W. Ambrose, Administration on Children, Youth and Families, Children's Bureau, 330 C Street, SW.
Mary E. Switzer Building, Room 2068, Washington, D.C. 20201, FAX: (202) 205–9345

SUPPLEMENTARY INFORMATION:

I. Background

Under Section 1130 of the Social Security Act (the Act), the Secretary of Health and Human Services (HHS) may approve child welfare waiver demonstration project proposals with a broad range of policy objectives.

In exercising her discretionary authority, the Secretary has developed a number of policies and procedures for reviewing proposals. On June 15, 1995, we published a notice in the **Federal Register** (Volume 60, No 115, page 31478) that specified (1) the principles that we ordinarily will consider when approving or disapproving demonstration projects under the authority in section 1130 of the Act; (2) the procedures we expect States to use in involving the public in the development of proposed demonstration projects under section 1130; and (3) the procedures we ordinarily will follow in reviewing demonstration proposals. We are committed to a thorough and expeditious review of State requests to conduct such demonstrations.

II. Listing of New Proposals

As part of our procedures, we are publishing a notice in the **Federal Register** of all new proposals. This notice contains summaries of 14 proposals received by July 31, 1995, the date established for the first round of proposals. Each of the proposals contains an assurance that the proposed demonstration effort will be cost neutral to the federal government over the life of the proposed effort; and each proposal contains an evaluation component designed to assess the effectiveness of the project.

The June 15, 1995 **Federal Register** Announcement indicated the Department would give priority consideration to proposals received by July 31, 1995. Further, if ten states had not been approved, additional proposals would be accepted by September 30, 1995 and at the end of each calendar quarter thereafter until ten waiver demonstration projects have been approved. The next date for acceptance of any child welfare waiver demonstration proposals is changed to December 31, 1995.

STATE: CALIFORNIA.

DESCRIPTION: California proposes to extend, and broaden to include the use of federal funds, a planned State Partnership Demonstration Project that will provide direct funding to counties for the implementation of child welfare services. Participating counties would receive from the State a single allocation of funds for family and children's services, rather than using categorical funding streams.

The project would enhance the counties' abilities: to meet families' needs more comprehensively; to increase the focus on outcomes; to provide additional in-home services which will result in less need for out of home care; and to contain costs.

The State anticipates that enhanced flexibility in the use of federal funds, reduced administrative requirements and a new "outcome-oriented oversight role" will improve outcomes for children and families, including more effective prevention services that will reduce the need for out of home care. The State is particularly interested in promoting a whole family foster care program and long term options for children in kinship care.

The State proposes, potentially, to waive a large number of statutory (and regulatory) provisions, which would be based on negotiations among federal, State and local child welfare services officials regarding specific local waiver proposals. For each of many statutory provisions, the state proposes conditionally to "request waiver of this section to the extent necessary to implement the proposed demonstration project." Statutory items include certain title IV–E State plan requirements, title IV–E income eligibility requirements, statutory definitions (including definitions of eligible facilities), requirements regarding adoption assistance payments, required statistical reports, and Independent Living Program eligibility requirements. Regulatory items proposed for waiver include limitation on the sources of state match, cost allocation plan

requirements, general grant administration requirements, fiscal regulations, the State allotment determination formula, payment review and facility licensing standards, and regulations regarding the withholding of federal funds.

CONTACT PERSON: Marjorie Kelly, Deputy Director, Children and Families Services Division, California Department of Social Services, 744 P Street M.S. 19073, Sacramento, CA 95814, (916) 657–2614, (916) 653–1695 (FAX).

STATE: DELAWARE.

DESCRIPTION: Delaware proposes a wavier project which has two components. In the first, the State would use multi-disciplinary teams composed of social workers and substance abuse counselors to address the problem of parental substance abuse that creates risks for children and families. This aspect of the project is designed to reduce the number of children coming into out of home care; to delay entry into care; or to reduce the amount of time spent in foster care. The second component involves adding assisted guardianship to the permanency continuum when adoption is not possible and a family has made a long-term commitment to the child. This option is proposed as a cost saving alternative to placing children in foster care.

In establishing a multi-disciplinary team to address parental substance abuse issues, the State anticipates that the services will prevent placement or significantly reduce the duration of placement for 50% of the children in the demonstration units that would come into care because of parental substance abuse. In adding guardianship as a continuum of care option, the State projects that 10 children/youth per year who are currently maintained in long-term foster care will be moved to the guardianship program.

The State proposes to contract with local substance abuse treatment agencies to provide counselors to be co-located with child protective services staff. This effort would provide multi-disciplinary assessment and treatment services for approximately 180 families a year for a period of three years.

The second component of the proposal would make guardianship an available alternative to the caretaking families, thus enabling a child's case to be closed while still making financial and other services available to the family as needed. This option would be considered when adoption is not possible and a family has made a long-term commitment to the child/youth.

For the use of a multi-disciplinary team to provide assessment and treatment services, the State is proposing to waive the prohibition on the expenditure of title IV–E funds for services. For the guardianship component, the State seeks to waive provisions governing eligibility for title IV–E foster care maintenance payments, so that caretaking guardians of children formerly in placement might receive payments comparable to title IV–E foster care maintenance payments.

CONTACT PERSON: Kathryn J. Way, Director, Division of Family Services, Delaware Department of Services for Children and Their Families, 1825 Faukland Road, Wilmington, DE 19805, (302) 633–2650, (302) 995–8290 (FAX).

STATE: DISTRICT OF COLUMBIA.

DESCRIPTION: The District of Columbia proposes to develop a community-based therapeutic model of services to serve as an alternative to placing children in more restrictive institutional settings, as well as providing a transitional bridge for those children returning to the community upon discharge from institutional care.

The flexible use of title IV–E and IV–B funds would allow for the development and provision of a community-based model of therapeutic services to prevent foster home and institutional placement and would increase inter/intra agency and multi-system coordination of services.

The demonstration project would include the use of a "managed care" approach through the use of rate setting procedures to include articulated caps, and a system to provide comprehensive multi-system social and support services. The community-based therapeutic approach would include specialized emergency foster care homes; shared family care; in-home treatment; use of professional surrogate parents; and substance abuse treatment services.

The District of Columbia proposes title IV–E waivers to allow payment for services, and to permit the support of alternatives to foster home and institutional placement through use of a rate-setting process to be established under the demonstration project.

CONTACT PERSON: Ricardo Lyles, Acting Administrator, Family Services Administration, District of Columbia Department of Human Services, 609 H Street, NE, Washington, DC 20002, (202) 724–8756, (202) 727–9460 (FAX).

STATE: GEORGIA.

DESCRIPTION: Georgia proposes to use title IV–E funds to fund preventive and supportive services for children and families at risk, to eliminate the need for placement or reduce the time a child spends in out of home care. Additionally, Georgia seeks to place children in neighborhood settings; provide specialized living arrangements for adolescents, and obtain special adoption assistance to expedite the placement of children into adoptive homes.

The benefits for this demonstration project include removing systems barriers, decreasing or avoiding the amount of time a child spends in out of home care, providing more stable placements, expanding preventive and family support service systems and increasing adoptive placements by making resources available to adoptive families that otherwise would not qualify.

The services to be provided under the demonstration project include family support and prevention services, expansion of kinship care, and community placement services.

Georgia proposes to expand title IV–E coverage to include placement prevention and reunification services. The State also wishes to waive some provisions of title IV–E eligibility determination when a child comes into custody, provide a special waiver to provide adoption assistance to pay for the purchase of services to expedite adoptive placement, and provide funds for adoptive parents for one-time expenses related to the placement of a specific child in the home. Georgia also seeks a waiver to permit title IV–E funds to support a kinship care assistance subsidy, and a waiver of some provisions of title IV–A to allow families whose children are in foster care to continue receiving food stamps, when reunification is expected to occur within 180 days.

CONTACT PERSON: Doris Walker, Foster Care Unit Chief, Georgia Department of Human Resources, Division of Family and Children Services, Two Peachtree Street, NW., Suite 12–300, Atlanta, GA 30303–3180, (404) 657–3458, (404) 657–3415 (FAX)

STATE: ILLINOIS.

DESCRIPTION: Illinois is proposing a subsidized private guardianship as a permanency planning option which would meet the needs of the long-term kinship care population, in order to reduce the number of children in long-term foster care and to reduce the number of disrupted placements.

Illinois seeks to improve permanency outcomes for children in healthy kinship care arrangements in cases where reunification and adoption are not possible. The demonstration project would reduce government intrusion in family life while creating support and clinical management systems which minimize risk through annual reviews of subsidized private guardianship and continuous promotion of adoption options.

Illinois would provide a subsidized private guardianship program (which parallels the adoption subsidy program) for a random group of eligible caregivers.

The State proposes a waiver of title IV–E to permit withholding subsidized guardianship from a randomly selected control group; a waiver of certain provisions of the Adoption Assistance Program to authorize subsidized guardianship for children who meet the eligibility requirements of Section 673 and additional requirements set by the State, in order to authorize payment of nonrecurring guardianship expenses, and for guardianship assistance payments for children; a waiver of eligibility requirements to limit assistance to special needs children; a waiver that would permit federal financial participation in amounts expended as guardianship support payments pursuant to guardianship assistance agreements; and a waiver to authorize federal financial participation in amounts expended on training and administration for the subsidized guardianship program and a waiver of the provision defining "adoption agreement" to allow that term to include "guardianship assistance agreement."

CONTACT PERSON: Joe Loftus, Executive Deputy Director, Illinois Department of Children and and Family Services, 100 West Randolph, 6th Floor, Chicago, IL 60601, (312) 814–8741, (312) 814–6859 (FAX).

STATE: INDIANA.

DESCRIPTION: Indiana proposes to divert per diem funds from restrictive (primarily institutional) placements to more community-based services in order to create more home-based in-state placements for children, placements which would be more supportive of family unity.

The effort would result in fewer high cost, out of state child placements; fewer removals from home, and earlier reunification; improved family functioning; expeditious adoptions; timely transitions to independent living; and improved outcomes for children.

Indiana would modify existing interagency agreements between the Division of Family and Children Services and juvenile court judges to include community partners such as mental health, education and the Step Ahead Council. The local office of Family and Children Services, the county probation office, community mental health center or the school corporation seeking placement of a child would convene a meeting of partners to develop alternatives to restrictive placement.

Indiana proposes to waive title IV–E to permit payment of proposed services: even when a child has not been judicially removed from the home; in order to prevent the placement of a child in out of home care; and for the child in substitute care who is not categorically eligible for title IV–E foster care.

CONTACT PERSON: James Hmurovich, Director, Division of Family and Children, Family and Services Administration, Room W392, Government Center south, 402 West Randolph Street, Indianapolis, IN 46204, (317) 232–4705, (317) 232–4490 (FAX).

STATE: MARYLAND.

DESCRIPTION: Maryland proposes to add federal guardianship assistance as a permanency planning option which would more closely meet the needs of the kinship care population.

This effort would result in reduced average length of stay in out of home placement for children; increased stability for children, and empowerment/support for the caretaking family.

Under this demonstration project in order to be eligible a child would have to be committed to the local department of social services as a child in need of assistance and to have been in a successful out of home placement with the prospective guardian for a minimum of six months. Reunification and adoption would have to be appropriately ruled out as permanency planning options. Resources for the child (SSI, Social Security Survivor's Benefits, etc.) would be transferred to the guardian and deducted from the subsidy. Prospective guardians would be required to sign a guardianship agreement which would require annual renewal.

CONTACT PERSON: Fern Blake, Maryland Department of Human Resources, 311 West Saratoga Street, Baltimore, MD 21201–3521, (410) 767–7269, (410) 333–0099 (FAX).

STATE: MICHIGAN.

DESCRIPTION: Michigan proposes to increase its emphasis on family preservation and family support services and decrease the need for and reliance on out of home care by using title IV–E funds to provide services.

The effort would result in controlled growth of title IV–E maintenance expenditures; greater collaboration among federally-funded programs; increased ability to provide services for families; and decreased reliance on out of home care.

Michigan is proposing to treat title IV–E maintenance payments (other than those for adoption subsidy) as a capped entitlement. The State is proposing to use the funds for service provision, in some cases augmenting funds now being expended under title IV–B Subpart 1 (Child Welfare Services) and Subpart 2 (Family Preservation and Support). The funds would be used to expand grants to local communities and to implement family preservation and support services more quickly.

Michigan is proposing to waive those provisions of title IV–E which restrict States from expending these funds for the provision of services. Michigan excludes title IV–E adoption assistance from its waiver proposal.

CONTACT PERSON: David Berns, Director, Office of Children's Services, Michigan Department of Social Services, 235 South Grand Avenue, P. O. Box 30037, Lansing, MI 48909, (517) 335–6159, (517) 241–7047 (FAX).

STATE: MINNESOTA.

DESCRIPTION: Minnesota proposes to establish relative-based living arrangements as an alternative to out of home care.

The results of this project would be enhanced permanency for children including maintaining a continuity of relationships and a sense of belonging; protection for children who are at risk; lessened government intrusion into families; a greater connection for children with their families and communities; support for kinship placements; lessened time in substitute care; multiple placements will be reduced; and expenditures for out of home placement will be contained.

The proposed demonstration project focuses on placement with family members and would provide support for temporary relative guardianship; permanent relative guardianship; voluntary relative foster care; and court-ordered relative foster care.

Minnesota proposes waivers of provisions under title IV–E in order to exclude grandparents from the foster care licensing requirements; and approval of a financial support structure that allows differential payments based on need. Specific services under this waiver project would include guardianship subsidies, differential foster care support, and specialized training for relative caregivers.

The State also proposes waivers of certain provisions of title IV–A in order to apply the special child standard of assistance in situations where the child is living in one of a range of relative care arrangements; and flexibility to use emergency assistance funds to help relative caregivers meet minimum health and safety standards. Specific services under this waiver would include guardianship, subsidies and alternative care grants.

CONTACT PERSON: Robert DeNardo, Supervisor, Family and Children's Service Division, Minnesota Department of Human Services, 444 Lafayette Road North, St. Paul, MN 55112–3831, (612) 296–5288, (612) 297–1949 (FAX).

STATE: NEW YORK.

DESCRIPTION: New York proposes to use a managed care approach to child welfare services to recapture revenue for reinvestment in preventive and aftercare services in local communities.

The benefits of this effort would be an accelerated decline in the foster care population; an increase in the level of services; and a reduction in the length of stay in foster care.

New York proposes to apply the principles of managed care to its foster care and adoption assistance programs by identifying preset payments for a range of services for a specified population over a predetermined period of time (capitated payments) and adjusting treatment regimens in light of outcomes so that the client receives the necessary services to continue to make progress toward the stated goals of intervention (care management). The State also proposes to increase the availability of child welfare services so that pre-placement preventive and aftercare services can be intensified.

New York proposes to waive: title IV–E requirements regarding the eligibility of children and of foster care facilities; the definition of "special needs" for which title IV–E funds may be used; the circumstances under which these funds may be claimed; and certain requirements concerning title IV–E administration and training.

CONTACT PERSON: Fred Wulczyn, Office of Family and Children Services, Division of Services and Community Development, New York State Department of Social Services, 40 North Pearl Street, Albany, NY 12243–0001, (518) 486–3431, (518) 474–9004 (FAX).

STATE: NORTH CAROLINA.

DESCRIPTION: North Carolina proposes outcome-based management of foster care, in which foster care funding is tied to specific outcomes related to diverting children from foster care whenever possible and moving quickly to achieve permanence for children.

The benefits from this demonstration effort would: link funding and outcomes and measure the effect on service delivery system performance; demonstrate and evaluate the effectiveness of a comprehensive outcome-based approach; decrease the amount of time children spend in foster care, reduce the number of new entries into foster care, and promote collaborative planning and coordination of services with several other initiatives currently underway in the State.

The proposed demonstration effort has two parts. Part I is designed to encourage the development of effective community-based reunification, adoption and aftercare services. Part II is designed to achieve a paradigm shift that allows local programs to move resources from treatment to prevention.

The waiver requests the use of title IV–E foster care funds on behalf of children not presently eligible: to allow local social service agencies to use a capitated rate structure with incentives for achieving specified outcomes; to allow local social service agencies to contract with public, private non-profit and private for profit entities as needed to develop an effective community network of services; and to allow participating agencies to reinvest savings realized from performance excellence in child welfare services.

CONTACT PERSON: Chuck Harris, North Carolina Department of Human Resources, Division of Social Services, 325 Salisbury Street, Raleigh, NC 27603, (919) 733–9467, (919) 715–0024 (FAX).

STATE: OHIO.

DESCRIPTION: Ohio proposes to reduce child removals and/or time of children in placement and associated costs through the use of managed care technology to provide a broader array of services to children and their families.

The benefits of this effort would include decreasing placement costs, increasing the level and quality of services; strengthening local partnerships; and expediting the permanency planning process.

The proposed demonstration effort represents a partnership between public children's service agencies (PCSAs), the Ohio Department of Human Services (ODHS), and managed care entities (MCE). Decision making and risk will be shared among the PCSAs, ODHS and the MCE. ODHS's role is that of coordinator, facilitator and provider of training and technical assistance. The PCSAs' role is primarily as purchasers of services, and they may or may not provide all the direct service functions themselves. The MCE will be responsible for administrative and management functions, medical/clinical reviews, utilization management and service authorization, developing and operating a management information system, developing contracts with providers and payers, and consumer satisfaction-related duties.

The current system of services will continue but with managed care options being considered at decision making points. A policy consortium will be created to develop and implement policy and practices that support permanency planning and provide guidance to the local PCSAs. The terms and conditions developed by the Consortium will bind the provider agencies to uniformly implement the agreed upon practice criteria and to ensure consistency for evaluation purposes across the waiver sites.

Ohio proposes to waive a number of title IV–E provisions that relate to restrictions on child eligibility, and prohibitions on the use of title IV–E funds for the provision of services.

CONTACT PERSON: Isaac Palmer, Deputy Director, Office of Child Care and Family Services, Ohio Department of Human Services, 30 East Broad Street, Columbus, OH 43266–0423, (614) 466–1213, (614) 466–9247 (FAX).

STATE: OREGON.

DESCRIPTION: Oregon proposes to use title IV–E funds for services including but not limited to prevention and support services, protective services, crisis intervention and reunification services. The State also proposes to develop a kinship foster care rate that would be individually determined based on the needs of the child.

The demonstration project would provide flexible funding for abused and neglected children and their families and/or caregivers to receive individual services, regardless of where the chid is placed. Specific outcomes expected would include decreasing the length of foster care placement, increasing the number of children remaining safely in their homes, increasing the use of relative caretakers for children who must be placed out of the home, having more appropriate foster care resources and better utilization of community resources.

The proposed demonstration project would provide support to biological, foster and kinship caretakers through a myriad of services. The State proposes to shift toward a statewide system of in-home care services delivery, insure a match between the child's needs and the skill of the caretakers, establish mechanisms that will refocus the out of home care systems and move closer to implementation of a "first placement/

only placement" objective for children who are unable to remain with their parent(s).

Oregon proposes to waive those provisions of title IV–E: that require a State to make foster care maintenance payments; that require that foster care maintenance payments be made only on behalf of a child who resides in a foster family home or a child care institution; and that concern the conditions for federal reimbursement for voluntary placements.

CONTACT PERSON: Richard Schoonover, State Office of Services for Children and Families, Oregon Department of Human Resources, 500 Summer Street, NE, Salem, OR 98310–1017, (503) 945–6882, (503) 328–3800 (FAX).

STATE: WEST VIRGINIA.

DESCRIPTION: West Virginia will create a comprehensive, decentralized, specialized system to determine a child's potential eligibility for all funding resources for child welfare programs.

The proposed system would maximize the State's child welfare funds by identifying and accessing additional financial resources available to children in care. The new system would emphasize parental obligation and encourage parental participation.

A resource development unit will be created to identify, pursue and produce accurate claims for all sources of funds to which a child in care may be entitled, e.g., child support, SSI, Black Lung, Railroad Retirement, third party medical, SSA, Veterans's Benefits and titles IV–A, IV–B and IV–E.

West Virginia is requesting a waiver of the title IV–E limit of fifty percent for Federal Financial Participation in a State's administrative costs.

CONTACT PERSON: Mary Jarrett, West Virginia Department of Health and Human Resources, Office of Social Services, Bldg. 6, Room B–850, State Capitol Complex, Charleston, WV 25305, (304) 558–7980, (304) 558–8800 (FAX).

III. Requests for Copies of a Proposal

Requests for copies of a Child Welfare Waiver Demonstration Project proposal should be directed to the appropriate State at the telephone number given above. Questions concerning the content of a proposal should be directed to the State contact listed for the proposal.

Agency for Health Care Policy and Research

Meeting of the National Advisory Council for Health Care Policy, Research, and Evaluation

AGENCY: Agency for Health Care Policy and Research.

ACTION: Notice of public meeting.

SUMMARY: In accordance with section 10(a) of the Federal Advisory Committee Act, this notice announces a meeting of the National Advisory Council for Health Care Policy, Research, and Evaluation.

DATES: The meeting will be on Thursday, September 28, from 8:30 a.m. to 5:30 p.m.

ADDRESSES: The meeting will be held at the DoubleTree Hotel, 300 Army-Navy Drive, Arlington, VA 22202.

FOR FURTHER INFORMATION CONTACT: Deborah L. Queenan, Executive Secretary of the Advisory Council at the Agency for Health Care Policy and Research, 2101 East Jefferson Street, suite 603, Rockville, Maryland 20852, (301) 594–1459.

In addition, if sign language interpretation or other reasonable accommodation for a disability is needed, please contact Linda Reeves, the Assistant Administrator for Equal Opportunity, AHCPR, on (301) 594–6665 no later than September 20.

SUPPLEMENTARY INFORMATION:

I. Purpose

Section 921 of the Public Health Service Act (42 U.S.C. 299c) establishes the National Advisory Council for Health Care Policy, Research, and Evaluation. The Council provides advice to the Secretary and the Administrator, Agency for Health Care Policy and Research (AHCPR), on matters related to AHCPR activities to enhance the quality, appropriateness, and effectiveness of health care services and access to such services through scientific research and the promotion of improvements in clinical practice and in the organization, financing, and delivery of health care services.

The Council is composed of public members appointed by the Secretary. These members are: Robert A. Berenson, M.D.; F. Marian Bishop, Ph.D.; Linda Burnes Bolton, Dr.P.H.; John W. Danaher, M.D.; Helen Darling, M.A.; Nancy J. Kaufman, M.S.; William S. Kiser, M.D.; Robert M. Krughoff; Risa J. Lavizzo-Mourey, M.D.; W. David Leak, M.D.; Harold S. Luft, Ph.D.; Barbara J. McNeil, M.D.; Walter J. McNerney, M.H.A.; Edward B. Perrin, Ph.D.; Louis F. Rossiter, Ph.D.; Albert L. Siu, M.D.; and Ellen B. White, M.B.A.

There also are Federal ex officio members. These members are: Administrator, Substance Abuse and Mental Health Services Administration; Director, National Institutes of Health; Director, Centers for Disease Control and Prevention; Administrator, Health Care Financing Administration; Commissioner, Food and Drug Administration; Assistant Secretary of Defense (Health Affairs); and Chief Medical Director, Department of Veterans Affairs.

II. Agenda

On Thursday, September 28, 1995, the meeting will begin at 8:30 a.m. with the call to order by the Council Chairman. The Administrator, AHCPR, will update the status of current Agency issues and program initiatives followed by Council discussion. The meeting will adjourn at 5:30 p.m.

Agenda items are subject to change as priorities dictate.

Dated: August 30, 1995.

Clifton R. Gaus, D. Sc.,

Administrator.

BILLING CODE 4160–90–M

National Institutes of Health

Technology Assessment Conference on Integration of Behavioral and Relaxation Approaches Into the Treatment of Chronic Pain and Insomnia

Notice is hereby given of the NIH Technology Assessment Conference on "Integration of Behavioral and Relaxation Approaches Into the Treatment of Chronic Pain and Insomnia," which will be held October 16–18, 1995, in the Natcher Conference Center of the National Institutes of Health, 9000 Rockville Pike, Bethesda, Maryland 20892. The conference begins at 8:30 a.m. on October 16, at 8 a.m. on October 17, and at 9 a.m. on October 18.

Millions of Americans are afflicted with persistent medical disorders that involve behavioral and psychological components. Chronic pain and insomnia are two of the more common disorders with such involvement. Despite the acknowledged importance

of psychological and behavioral factors in these disorders, treatment strategies have tended to focus on medical interventions such as drugs and surgery. The purpose of this conference is to examine the benefits of more consistently integrating behavioral and relaxation approaches with biomedical interventions in clinical settings using chronic pain and insomnia as examples.

More consistent and effective integration of behavioral and relaxation approaches requires the development of precise definitions of the most frequently used techniques, which include hypnosis, meditation, biofeedback, and cognitive therapy. It is also necessary to examine how these interventions have been previously used with somatic therapies in the treatment of chronic pain and insomnia and to evaluate the efficacy of such integration to date. The conference will review the relative merits of specific behavioral and relaxation interventions as well as identify biophysical and psychological factors that might predict the outcome of applying these techniques. Finally, the conference will examine the mechanisms by which behavioral and relaxation approaches could lead to greater clinical efficacy.

The conference will bring together experts in behavioral medicine, pain medicine, insomnia, psychology, neurology, and behavioral and neurosciences as well as representatives from the public.

After 1½ days of presentations and audience discussion, an independent, non-Federal panel will weigh the scientific evidence and write a draft statement that it will present to the audience on the third day. The statement will address the following key questions:

- What behavioral and relaxation approaches are used for conditions such as chronic pain and insomnia?
- How successful are these approaches?
- How do these approaches work?
- Are there barriers to the appropriate integration of these approaches into health care?
- What are the significant issues for future research and applications?

The primary sponsors for this conference are the NIH Office of Alternative Medicine and the NIH Office of Medical Applications of Research. The conference is cosponsored by the National Cancer Institute; National Institute on Aging; National Institute of Arthritis and Musculoskeletal and Skin Diseases; National Institute of Dental Research; National Heart, Lung, and Blood Institute; National Institute of Mental Health; National Institute of Neurological Disorders and Stroke; and National Institute of Nursing Research.

Advance information on the conference program and conference registration materials may be obtained from: Laura Hazan, Technical Resources International, Inc., 3202 Tower Oaks Blvd., suite 200, Rockville, Maryland 20852, (301) 770–3153.

The technology assessment statement will be submitted for publication in professional journals and other publications. In addition, the statement will be available beginning October 18, 1995, from the NIH Consensus Program Information Service, P.O. Box 2577, Kensington, Maryland 20891, phone 1–800–NIH–OMAR (1–800–644–6627).

Dated: August 28, 1995.

Ruth L. Kirschstein,

Deputy Director, NIH.

BILLING CODE 4140–01–M

Public Health Service; Statement of Organization, Functions, and Delegations of Authority

Part H, Chapter HN (National Institutes of Health) of the Statement of Organization, Functions, and Delegations of Authority for the Department of Health and Human Services (40 FR 22859, May 27, 1975, as amended most recently at 60 FR 36299, July 14, 1995) is amended to reflect the reorganization and revision of function statements of the National Cancer Institute (NCI) (HNC) as follows: (1) Establish the Division of Basic Sciences (HNC7); Division of Clinical Sciences (HNC8); Division of Cancer Epidemiology and Genetics (HNC9); Division of Cancer Treatment, Diagnosis, and Centers (HNCB); Division of Cancer Biology (HNCC); and Office of Intramural Management (HNC17). (2) Abolish the Division of Cancer Biology, Diagnosis and Centers (HNC2); Division of Cancer Etiology (HNC3); and Division of Cancer Treatment (HNC6). (3) Retitle the Office of Administrative Management (HNC13) as the Office of Extramural Management. (4) Revise the functional statements for the Division of Cancer Prevention and Control (HNC4) and the Division of Extramural Activities (HNC5).

Section HN–B, Organization and Functions is amended as follows: (1) Under the heading *National Cancer Institute (HNC)*, insert the following:

Office of Extramural Management (HNC13)

(1) Plans, directs, and coordinates the administrative management activities of the Office of the Director and the extramural programs, with Institute wide responsibility for budget and grant and contract policy. Areas of management responsibility include grants management; contracts management; finance and budget; personnel; management analysis; financial data and statistics; office automation, automatic data processing, and management information systems; and other areas related to the general administration of the Institute; (2) advises the Institute Director and senior staff on the administrative management of the Institute and its programs; (3) develops and promulgates policies, guidelines, and procedures on matters relating to the administrative management of the Office of the Director and the extramural programs; and (4) formulates and executes action plans in response to administrative problems or initiatives, directives, regulations, legislation or anything else that might require administrative action or have administrative implications.

Office of Intramural Management (HNC17).

(1) Plans, directs, and coordinates the administrative management activities of the Office of Intramural Management and the intramural programs, with Institute wide responsibility for personnel and information resource management policy. Areas of management responsibility include contracts management; finance and budget; personnel; management analysis; financial data and statistics; office automation, automatic data processing, and management information systems; and other areas related to the general administration of the Institute; (2) advises the Institute Director and senior staff on the administrative management of the Institute and its programs (3) develops and promulgates policies, guidelines, and procedures on matters relating to the administrative management of the Intramural Program; and (4) formulates and executes action plans in response to administrative problems or initiatives, directives, regulations, legislation or other matters necessitating administrative action or having administrative implications.

Division of Basic Sciences (HNC7)

(1) Plans, directs, coordinates and evaluates the Institute's intramural programs in basic science relating to

cellular, molecular, genetic, biochemical and immunological mechanisms relevant to the understanding, diagnosis and treatment of cancer; (2) establishes program priorities, allocates, resources, integrates the projects of the various laboratories, evaluates program effectiveness and represents the division in management and scientific decision-making meetings within the Institute; (3) identifies the need for and establishes new intramural research activities; (4) supports training and research opportunities in the basic sciences for young investigators; (5) supports translation of research findings by integrating and coordinating the divisional research activities with other NCI divisions, with the institutes, centers, and divisions within the National Institutes of Health as well as with the private sector and the academic research community.

Division of Clinical Sciences (HNC8)

(1) Plans, directs, coordinates and evaluates patient care activities of the NCI; (2) conducts pioneering clinical research on cancer which translates fundamental research to the bedside in a bi-directional manner; (3) establishes program priorities, allocates clinical resources, integrates the projects of the various branches, evaluates program effectiveness and participants in pertinent management and scientific decision-making meetings within the Institute; (4) addresses clinical research issues requiring urgent attention that cannot readily be pursued through the extramural community; (5) through intramural studies and contracts, administers research in the diagnosis, treatment, and prevention of cancer; (6) develops novel models for carrying out translational research in an efficient and cost-effective manner; (7) develops state-of-the-art educational programs for the education and mentorship of clinical scientists and investigators; and (8) advises the Director of the National Cancer Institute, and supports the activities of the National Cancer Advisory Board and other scientific advisory committees.

Division of Cancer Epidemiology and Genetics (HNC9)

(1) Plans, directs, manages, and evaluates a program of epidemiologic, demographic, biostatistical, and population-based genetic research, as well as provides resources to support such research; (2) uses intramural, contract, interagency, cooperative agreement, and grant mechanisms to administer and manage research in epidemiology, genetics, biometry, and collaborative interdisciplinary approaches to clarify the distribution, causes, and natural history of cancer, as well as the means for its prevention; (3) establishes program priorities, allocates available resources, integrates the activities of various branches, evaluates program effectiveness, and participates in pertinent management and scientific decision-making meetings within the Institute; and (4) advises the Institute Director and supports the activities of the Board of Scientific Counselors, the National Cancer Advisory Board, and other advisory committees.

Division of Cancer Treatment, Diagnosis, and Centers (HNCB)

(1) Plans, directs and coordinates a program of extramural preclinical and clinical cancer treatment research as well as research conducted in cooperation with other Federal agencies with the objective of curing or controlling cancer in man by utilizing treatment modalities singly or in combination; (2) administers targeted research and development programs in areas of drug development, diagnosis, biological response modifiers and radiotherapy development; (3) serves as the national focal point for information and data on experimental and clinical studies related to cancer treatment and for the distribution of such information to appropriate scientists and physicians; and (4) plans, directs and coordinates an extramural program of basic and applied research conducted at cancer centers and through the organ systems program.

Division of Cancer Biology (HNCC)

(1) Plans, directs, coordinates and evaluates a contract and grant-supported program of extramural basic and applied research on cancer cell biology and cancer immunology including the biological and health effects of exposures to ionizing and non-ionizing radiation and the role of chemical or physical agents, acting separately or together, or in combination with biological agents in the inhibition or promotion of cancer; (2) plans, manages and monitors the research and research support activities of the contractor(s) at the government-owned contractor operated (GOCO) facilities at the Frederick Cancer Research and Development Center; (3) plans and administers an extramural program which supports and fosters cancer research training, cancer clinical education, and cancer research career development in order to assure the continuing existence of a national cadre of highly qualified individuals to work in the fields of cancer research, treatment and control; (4) administers a program of support for the construction, alteration, renovation, and equipping of extramural research facilities that house or will house cancer research and/or treatment activities; (5) establishes program priorities, allocates resources, integrates the projects of the various branches, evaluates program effectiveness and participates in pertinent management and scientific decision-making meetings within the Institute; and, (6) advises the Institute Director, and other Institute staff on extramural research in cancer biology and associated areas of science of interest to the Institute and supports the activities of the Board of Scientific Counselors, the National Cancer Advisory Board, and other advisory committees.

Division of Cancer Prevention and Control (HNC4)

(1) Plans and directs the extramural program of cancer prevention and control research for the Institute; (2) coordinates a number of geographically-based cancer surveillance systems and applies statistical, analytic, and other quantitative methods to monitor, evaluate, and report on cancer trends and the impact of cancer; (3) develops and supports research training and career development in cancer prevention and control; and (4) coordinates program activities with other Divisions, Institutes, or federal and state agencies, and establishes liaison with professional and voluntary health agencies, cancer centers, labor organizations, cancer organizations and trade associations.

Division of Extramural Activities (HNC5)

(1) Administers and directs the Institute's grant and contract review activities; (2) provides initial technical and scientific merit review of grants and contracts for the Institute; (3) represents the Institute on overall NIH extramural and collaborative program policy committees, coordinates such policy for the review and administration of grants and contracts; (4) coordinates the Institute's review of research grant and training programs with the National Cancer Advisory Board and the President's Cancer Panel; (5) coordinates the implementation of committee management policies within the Institute and provides the Institute's staff support for the National Cancer Advisory Board and the President's Cancer Panel; (6) monitors and coordinates the operation of the NCI Board of Scientific Counselors and its subcommittees to assure uniformity and quality of scientific review of, and advice concerning, the NCI intramural research program; (7) monitors and coordinates the operations of the NCI Board of Scientific Advisors to assure uniformity and quality of review of, and advice concerning, the NCI extramural program; (8) coordinates program planning and evaluation in the extramural area; (9) provides scientific reports and analyses to the Institute's grant and contract programs; and (10) administers programs to broaden participation by minorities in cancer-related research and training activities and to enhance the effectiveness of programs in cancer treatment and control in reaching the minority community and other historically underserved segments of the general population.

Dated: August 28, 1995.

Harold Varmus,

Director, NIH.

BILLING CODE 4140–01–M

Substance Abuse and Mental Health Services Administration

Center for Substance Abuse Treatment; Notice of Meeting

Pursuant to Public Law 92–463, notice is hereby given of a teleconference meeting of the Center for Substance Abuse Treatment (CSAT) National Advisory Council in September, 1995.

A portion of the meeting will be open and include a roll call, general announcements and a discussion of review procedures.

The meeting will also include the review, discussion, and evaluation of grant applications and contract proposals. Therefore, a portion of the meeting will be closed to the public as determined by the Administrator, SAMHSA, in accordance with Title 5 U.S.C. 522b(c) (3), (4) and (6) and 5 U.S.C. app. 2 10(d).

A summary of the meeting and a roster of Council members may be obtained from: Ms. Deloris Winstead, Committee Management Specialist, CSAT National Advisory Council, Rockwall II Building, room 8A141, 5600 Fishers Lane, Rockville, Maryland 20857. Telephone: (301) 443–8923.

Substantive program information may be obtained from the contact whose name and telephone number is listed below.

Committee Name: Center for Substance Abuse Treatment National Advisory Council.

Meeting Date: September 27, 1995.

Place: Center for Substance Abuse Treatment Rockwall II Building, 6th Floor Conference Room, 5600 Fishers Lane, Rockville, Marlyand 20857.

Open: September 27, 1995 12:00 p.m. to 12:30 p.m.

Closed: September 27, 1995 12:30 p.m. to 1:30 p.m.

Contact: Majorie Cashion, Rockwall II Building, room 8A139, Telephone: (301) 443–8923 and FAX: (301) 480–3144.

Dated: September 30, 1995.

Jeri Lipov,

Committee Management Officer, Substance Abuse and Mental Health Service Administration.

[FR Doc. 95–22221 Filed 9–6–95; 8:45 am]

BILLING CODE 4162–20–M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Availability of an Environmental Assessment and Receipt of an Application for an Incidental Take Permit for a Project Called Coquina Palms Townhomes Project, Located in the Central Beaches Area of Brevard County, Florida

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice.

SUMMARY: Joseph A. Hill (Applicant), is seeking an incidental take permit from the Fish and Wildlife Service pursuant to section 10(a)(1)(B) of the Endangered Species Act of 1973, as amended. The permit would authorize the take of two families of the threatened Florida scrub jay, *Aphelocoma coerulescens coerulescens* in Brevard County, Florida, for a period of 10 years. The proposed taking is incidental to construction of a 71-unit townhome project, including the necessary infrastructure, on approximately 12 acres (Project). Within the Project, 1.7 acres are occupied by Florida scrub jays and will be permanently altered. The Project is called Coquina Palms Townhomes, and it is located on Wallace Avenue at the water tower site, within Section 30, Township 27 South, Range 38 East, in the central beaches area of Brevard County, Florida.

The Service also announces the availability of an environmental assessment and habitat conservation plan for the incidental take application. Copies of the EA or HCP may be obtained by making a request to the Regional Office address below. Requests must be submitted in writing to be adequately processed. This notice is provided pursuant to section 10(c) of the Act and National Environmental Policy Act Regulations (40 CFR 1506.6).

DATES: Written comments on the permit application, EA and HCP should be received on or before October 10, 1995.

ADDRESSES: Persons wishing to review the application, HCP, and EA may obtain a copy by writing the Service's Southeast Regional Office, Atlanta, Georgia. Documents will also be available for public inspection by appointment during normal business hours at the Regional Office, or the Jacksonville, Florida, Field Office. Written data or comments concerning the application, EA, or HCP should be submitted to the Regional Office. Please reference permit under PRT–806150 in such comments.

Regional Permit Coordinator, U.S. Fish and Wildlife Service, 1875 Century Boulevard, Suite 200, Atlanta, Georgia 30345, (telephone 404/679–7110, fax 404/679–7081).

Field Supervisor, U.S. Fish and Wildlife Service, 6620 Southpoint Drive, South, Suite 310, Jacksonville, Florida 32216–0912, (telephone 904/232–2580, fax 904/232–2404).

FOR FURTHER INFORMATION CONTACT: Dawn Zattau at the Jacksonville, Florida, Field Office, or Rick G. Gooch at the Atlanta, Georgia, Regional Office.

SUPPLEMENTARY INFORMATION: *Aphelocoma coerulescens coerulescens* is geographically isolated from other subspecies of scrub jays found in Mexico and the Western United States. The Florida scrub jay is found almost exclusively in peninsular Florida and is restricted to scrub habitat. The total estimated population is between 7,000 and 11,000 individuals. Due to habitat loss and degradation throughout the State of Florida, it has been estimated that the Florida scrub jay population has been reduced by at least half in the last 100 years. Surveys have indicated that two families of Florida scrub jays inhabit the Project site. Construction of the Project's infrastructure and subsequent construction of the individual homesites will likely result in death of, or injury to, *Aphelocoma coerulescens coerulescens* incidental to the carrying out of these otherwise lawful activities. Habitat alteration associated with property development will reduce the availability of feeding, shelter, and nesting habitat.

The EA considers the environmental consequences of three alternatives. The no action alternative may result in loss of habitat for *Aphelocoma coerulescens coerulescens* and exposure of the Applicant under section 9 of the Act. The second alternative is the proposed Project that is designed with a different mitigation strategy. A third alternative, the proposed action alternative is issuance of the incidental take permit. This provides for restrictions of construction activity, purchase of offsite habitat for the Florida scrub jay, the establishment of an endowment fund for the offsite acquired habitat, and donation of additional offsite habitat. The HCP provides a funding mechanism for these mitigation measures.

Dated: August 30, 1995.

Noreen K. Clough,

Regional Director.

[FR Doc. 95–22143 Filed 9–6–95; 8:45 am]

BILLING CODE 4310–55–P

Availability of the Lepanthes Eltorensis and Cranichis Ricartii Recovery Plan Technical/Agency Draft for Review and Comment

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of document availability.

SUMMARY: The U.S. Fish and Wildlife Service announces availability for public review of a technical/agency draft recovery plan for *Lepanthes eltorensis* and *Cranichis ricartii*. *Lepanthes eltorensis* and *Cranichis ricartii* are orchids endemic to mountain forests in Puerto Rico. *Lepanthes eltorensis* is currently known from five discrete sites in the palo colorado and dwarf forests of the Caribbean National Forest. *Cranichis ricartii* has been found at only three locations in the Maricao Forest of western Puerto Rico. Both species are threatened by forest management practices, hurricane damage, and collection. The Service solicits review and comments from the public on this draft plan.

DATES: Comments on the draft recovery plan must be received on or before November 6, 1995 to receive consideration by the Service.

ADDRESSES: Persons wishing to review the draft recovery plan may obtain a copy by contacting Ms. Marelisa Rivera, Caribbean Field Office, PO. Box 491, Boquerón, Puerto Rico 00622. Comments and materials received are available on request for public inspection, by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Ms. Marelisa Rivera, Caribbean Field Office, PO. Box 491, Boquerón, P.R. 00622, Tel. 809–851–7297.

SUPPLEMENTARY INFORMATION:

Background

Restoring an endangered or threatened animal or plant to the point where it is again a secure, self-sustaining member of its ecosystem is a primary goal of the U.S. Fish and Wildlife Service's endangered species program. To help guide the recovery effort, the Service is working to prepare recovery plans for most of the listed species native to the United States. Recovery plans describe actions considered necessary for conservation of the species, establish them, and estimate time and cost for implementing the recovery measures needed.

The Endangered Species Act of 1973 (Act), as amended (16 U.S.C. 1531 *et seq.*) requires the development of recovery plans for listed species unless such a plan would not promote the conservation of a particular species. Section 4(f) of the Act, as amended in 1988, requires that public notice and an opportunity for public review and comment be provided during recovery plan development. The Service and other Federal agencies will also take these comments into account in the course of implementing approved recovery plans.

This Technical/Agency Draft is for *Lepanthes eltorensis* and *Cranichis ricartii*, which are endemic to mountain forests in Puerto Rico. *Lepanthes eltorensis* is an epiphytic orchid that is currently known from five discrete sites in the palo colorado and dwarf forests, all at elevations greater than 850 meters in the Caribbean National Forest. The species has been reported from several species of trees, all supporting abundant mosses and liverworth. *Cranichis ricartii* has been found at only three locations in the Maricao Forest of western Puerto Rico. The species has been found growing in humus of moist serpentine scrub forests of montane ridges at elevations above 680 meters. Both species are threatened by forest management practices, hurricane damage, and collection. The Service solicits review and comments from the public on this draft plan.

Public Comments Solicited

The Service solicits written comments on the recovery plan described. All comments received by the date specified above will be considered prior to approval of the plan.

Authority

The authority for this action is section 4(f) of the Endangered Species Act, 16 U.S.C. 1533(f).

Dated: August 29, 1995.

James P. Oland,

Field Supervisor.

Bureau of Land Management

[NV–030–1330–00]

Notice of Emergency Closure of Public Lands; Storey County, NV

AGENCY: Bureau of Land Management, Interior.

SUMMARY: Notice is hereby given that certain public lands in the vicinity of the Virginia City High School, Storey County, Nevada, are closed to the public. This closure is necessary to provide for public safety due to the recent collapse at the Osbiston mine shaft.

EFFECTIVE DATES: This closure goes into effect on August 28, 1995, and will remain in effect until the Carson City District Manager determines the closure is no longer needed.

FOR FURTHER INFORMATION CONTACT: John Matthiessen, Walker Resource Area Manager, Carson City District, 1535 Hot Springs Road, Carson City, Nevada 89706. Telephone (702) 885–6000.

SUPPLEMENTARY INFORMATION: The land affected by this closure is fenced and comprises less than one-quarter of an acre within the area described as:

Mount Diablo Meridian

T. 17 N., R. 21 E.,
  Sec. 29, S½NE¼SE¼, N½SE¼SE¼.

The authority for this closure is 43 CFR 8364.1. Any person who fails to comply with a closure order is subject to arrest and fines and/or imprisonment not to exceed 12 months in accordance with applicable provisions of 18 USC 3571. This closure applies to all persons excluding (1) public officials and emergency and law enforcement personnel engaged in official business and (2) any person expressly authorized in writing by the Carson City District Manager to enter the closed area.

A map of the closed area is posted in the Carson City District Office.

Dated: August 28, 1995.

John O. Singlaub,

District Manager, Carson City District.

Realty Action; Proposed Modified Competitive Sale

August 25, 1995.

The Notice of Realty Action published in the July 27, 1995, edition of the **Federal Register** (60 FR 38571) is hereby amended as follows:

The appraised fair market value of the three parcels is as follows:

Willamette Meridian, Oregon

T. 7 S., R. 3 W.,
  Sec. 18, Lot 3 (OR 51998)—$67.50
  Sec. 18, Lot 4 (OR 52165)—$207.00
  Sec. 18, Lot 5 (OR 52166)—$171.00

Sealed written bids, delivered or mailed, must be received by the Bureau of Land Management, Salem District Office, 1717 Fabry Road SE, Salem, Oregon 97306, prior to 11 a.m. on Wednesday, September 27, 1995.

All other conditions of the notice remain in effect.

John Bacho,

Marys Peak Area Manager.

[WY–989–1050–00–P]

Filing of Plats of Survey; Wyoming

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The plats of survey of the following described lands are scheduled to be officially filed in the Wyoming State Office, Cheyenne, Wyoming, thirty (30) calendar days from the date of this publication.

Sixth Principal Meridian, Wyoming

T. 49 N., R. 63 W., accepted August 17, 1995
T. 50 N., R. 68 W., accepted August 17, 1995
T. 48 N., R. 69 W., accepted August 17, 1995
T. 50 N., R. 69 W., accepted August 17, 1995
T. 47 N., R. 71 W., accepted August 17, 1995
T. 42 N., R. 72 W., accepted August 17, 1995
T. 25 N., R. 74 W., accepted August 17, 1995
T. 46 N., R. 76 W., accepted August 17, 1995
T. 47 N., R. 76 W., accepted August 17, 1995
T. 45 N., R. 77 W., accepted August 17, 1995
T. 46 N., R. 77 W., accepted August 17, 1995
T. 12 N., R. 78 W., accepted August 17, 1995
T. 18 N., R. 78 W., accepted August 17, 1995
T. 16 N., R. 84 W., accepted August 17, 1995

If protests against a survey, as shown on any of the above plats, are received prior to the official filing, the filing will be stayed pending consideration of the protest(s) and or appeal(s). A plat will not be officially filed until after disposition of protest(s) and or appeal(s). These plats will be placed in the open files of the Wyoming State Office, Bureau of Land Management, 2515 Warren Ave., Cheyenne, Wyoming, and will be available to the public as a matter of information only. Copies of the plats will be made available upon request and prepayment of the reproduction fee of $1.10 per copy.

A person or party who wishes to protest a survey must file with the State Director, Bureau of Land Management, Cheyenne, Wyoming, a notice of protest prior to thirty (30) calendar days from the date of this publication. If the protest notice did not include a statement of reasons for the protest, the protestant shall file such a statement with the State Director within thirty (30) calendar days after the notice of protest was filed.

The above-listed plats represent dependent resurveys, subdivision of sections.

FOR FURTHER INFORMATION CONTACT: Bureau of Land Management, P.O. Box 1828, 2515 Warren Avenue, Cheyenne, Wyoming 82003.

Dated: August 29, 1995.

BILLING CODE 4310–22–M

National Park Service

Notice of Public Meetings

SUMMARY: The National Seashore, working cooperatively with the public and with other agencies, will devise three separate management plans tailored to unique problems and needs at each of three sites: the William Floyd Estate in Mastic Beach, the Wilderness Area of Fire Island National Seashore (from Smith Point west to Watch Hill), and the western end of the Seashore (from Watch Hill to the Fire Island Lighthouse).

DATES: Although interested parties are invited to attend any or all of these initial preliminary planning meetings, those specifically interested in one area of the park may choose to attend only the meeting for that area. Those interested in deer management for the Wilderness Area plan can meet at the Patchogue Library, in Meeting Room B, at 7 P.M. on September 12. Those interested in the William Floyd Estate can attend a meeting at the Property Owners Association Club House at 31 Neighborhood Road at 7 P.M. on September 14. Those interested in the western end of Fire Island can attend a meeting at the Ocean Beach Community Center, at Ocean Beach on Fire Island, a 7 P.M. on September 23.

ADDRESSES: Inquiries on these meeting dates should be submitted to the Superintendent, Fire Island National Seashore, 120 Laurel Street, Patchogue, NY 11772, telephone (516) 289–4810.

SUPPLEMENTARY INFORMATION: As at many locations in the Northeast, increasing populations of white-tailed deer are causing concern about impacts to the natural areas of the Seashore along with various kinds of impacts within the communities that border Seashore property. To devise the safest, most practical, and least disruptive plans, the Seashore is seeking the input of all parties affected by the issue, such as Fire Island and Mastic Beach communities and public land managers. For example, both the Robert Moses State Park and the Smith Point County Park (both of which are located on Fire Island) will be invited to participate in the planning process. In addition, other interested members of the public will be needed to form task groups for each management plan.

At each meeting, members of the National Seashore's resource management staff will explain the planning process to be used. The criteria for the formation of task groups will be determined, and general time frames for the planning process will be established. It will be the charge of the task groups to actually begin to define the problem, set deer management objectives and develop alternatives and a recommended alternative for deer management for each of the three sites.

The National Seashore will use the objectives and alternatives developed by the task group to create its draft deer management plan and environmental assessment. The Environmental Assessment will analyze the impact of any management actions which the park may take.

For further information, please contact the superintendent at 516–289–4810 or by writing to: Superintendent, Fire Island National Seashore, 120 Laurel Street, Patchogue, New York, 11772.

Jack Hauptman,

Superintendent.

BILLING CODE 4310–70–M

Missouri National Recreational River Advisory Group

AGENCY: National Park Service, Interior.

ACTION: Notice of meeting.

SUMMARY: This notice sets the schedule for the forthcoming meeting of the Missouri National Recreational River Advisory Group. Notice of this meeting is required under the Federal Advisory Committee Act (Pub. L. 92–463).

MEETING DATE AND TIME: Thursday, September 28, 1995; 1:00 p.m.

ADDRESSES: Niobrara State Park, Group Lodge, Niobrara, Nebraska Agenda topics include:

1. Discussion of the most recent changes to the draft recreational river study and recommendations for changes to the study.
2. Selection of a preferred alternative.

3. Presentation by the Corps of Engineers on the Master Water Control Manual update.

4. The opportunity for public comment and proposed agenda, date, time, and location of the next Advisory Group meeting.

The meeting is open to the public. Interested persons may make oral/written presentation to the Commission or file written statements. Requests for time for making presentations may be made to the Superintendent prior to the meeting or to the Chair at the beginning of the meeting. In order to accomplish the agenda for the meeting, the Chair may want to limit or schedule public presentations.

The meeting will be recorded for documentation and a summary in the form of minutes will be transcribed for dissemination. Minutes of the meeting will be made available to the public after approval by the Commission members. Copies of the minutes may be requested by contacting the Superintendent. An audio tape of the meeting will be available at the headquarters office of the Niobrara/Missouri National Scenic Riverways in O'Neill, Nebraska.

SUPPLEMENTARY INFORMATION: The Advisory Group was established by the law that established the Missouri National Recreational River, Public Law 102–50. The purpose of the group, according to its charter, is to advise the Secretary of the Interior on matters pertaining to the development of a management plan, and management and operation of the Recreational River. The Missouri National Recreational River is the 39-mile free flowing segment of the Missouri from Fort Randall Dam to the vicinity of Springfield in South Dakota.

FOR FURTHER INFORMATION CONTACT: Warren Hill, Superintendent, Niobrara/Missouri National Scenic Riverways, P.O. Box 591, O'Neill, Nebraska 68763–0591, 402–336–3970.

Dated: August 28, 1995.

William W. Schenk,

Field Director.

BILLING CODE 4310–70–P

Sleeping Bear Dunes National Lakeshore Advisory Commission

AGENCY: National Park Service, Interior.

ACTION: Notice of meeting.

SUMMARY: This notice sets the schedule for the forthcoming meeting of the Sleeping Bear Dunes National Lakeshore Advisory Commission. Notice of this meeting is required under the Federal Advisory Committee Act (P.L. 92–463).

MEETING DATE AND TIME: Friday, October 20, 1995; 9:30 a.m. until 12 noon.

ADDRESSES: Lake Township Hall, 5153 Scenic Drive, Honor, Michigan.

The agenda for the meeting consists of the Chairman's welcome; minutes of the previous meeting; statement of purpose; public input; update on park activities; old business; new business; public input; next meeting date; adjournment. The meeting is open to the public.

SUPPLEMENTARY INFORMATION: The Advisory Commission was established by the law that established the Sleeping Bear Dunes National Lakeshore, Public Law 91–479. The purpose of the commission, according to its charter, is to advise the Secretary of the Interior with respect to matters relating to the administration, protection, and development of the Sleeping Bear Dunes National Lakeshore, including the establishment of zoning by-laws, construction, and administration of scenic roads, procurement of land, condemnation of commercial property, and the preparation and implementation of the land and water use management plan.

FOR FURTHER INFORMATION CONTACT: Ivan Miller, Superintendent, 9922 Front Street, Empire, Michigan 49630, 616–326–5134.

Dated: August 28, 1995.

William W. Schenk,

Field Director, Midwest Region.

BILLING CODE 4310–70–P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–371]

In the Matter of: Certain Memory Devices With Increased Capacitance and Products Containing Same

Notice is hereby given that the prehearing conference in this matter will commence at 10:00 a.m. on September 18, 1995, in Courtroom B (room 111), U.S. International Trade Commission Building, 500 E St. SW., Washington, DC, and the hearing will commence immediately thereafter.

The Secretary shall publish this notice in the **Federal Register**.

Issued: August 31, 1995.

Sidney Harris,

Administrative Law Judge.

[FR Doc. 95–22234 Filed 9–6–95; 8:45 am]

BILLING CODE 7020–02–P

[Investigation 332–364]

Certain Miscellaneous Products; Probable Effect of Certain Modifications to the North American Free Trade Agreement Rules of Origin

AGENCY: United States International Trade Commission.

ACTION: Addition to scope of investigation and request for written submissions.

EFFECTIVE DATE: September 1, 1995.

SUMMARY: In response to a request from the United States Trade Representative (USTR), the Commission has expanded the scope of its investigation No. 332–364, Certain Miscellaneous Products: Probable Effect of Certain Modifications to the North American Free Trade Agreement Rules of Origin, to include probable effects advice on a second list of proposed modifications to the North American Free Trade Agreement (NAFTA) rules of origin. The Commission's confidential report, which will contain advice on two lists of proposed modifications, will be submitted to the USTR on September 29, 1995.

FOR FURTHER INFORMATION: Information may be obtained from David Lundy, Office of Industries (202–205–3439) or Donita Marakovits, Office of Industries (202–205–3430); and on legal aspects, from William Gearhart, Office of the General Counsel (202–205–3091). The media should contact Margaret O'Laughlin, Office of Public Affairs (202–205–1819). Hearing impaired individuals are advised that information on this matter can be obtained by contacting the TDD terminal (202–205–1810).

Background

Chapter 4 and Annex 401 of the NAFTA, which entered into force on January 1, 1994, contain the rules of origin for application of the tariff provisions of the NAFTA to trade in goods.

Section 202(q) of the North American Free Trade Agreement Implementation Act (the Act) authorizes the President, subject to the consultation and layover requirements of section 103 of the Act, to proclaim such modifications to the rules as may from time to time be agreed to by the NAFTA countries. One of the requirements set out in section 103 of the Act is that the President obtain advice regarding any proposed modification in the Rules contained in Annex 401 of the Act from the United States International Trade Commission.

The Commission was requested by the USTR, in his letter received on July 17, 1995, to provide advice on the probable effect of the proposed modifications to the rules of origin that were attached to the letter. The Commission instituted investigation No. 332–364, Certain Miscellaneous Products: Probable Effect of Certain Modifications to the North American Free Trade Agreement Rules of Origin, under section 332(g) of the Tariff Act of 1930 (19 U.S.C. 1332(g)). The letter requested that the advice be forwarded to the USTR by September 15, 1995.

The Commission received a second letter from the USTR on August 31, 1995 requesting similar advice on a second set of proposed modifications, which was included as an attachment to the letter. The Commission will provide advice in response to both letters in one confidential report, which will be forwarded to the USTR by September 29, 1995. Copies of both sets of proposed modifications, which cover certain goods described in Chapters 1 through 97 of the Harmonized Tariff Schedule of the United States, are available from the Office of the Secretary at the Commission or from the Commission's Internet server (http://www.usitc.gov or ftp://ftp.usitc.gov).

Written Submissions

No public hearing is being scheduled in connection with the second set of proposed modifications. However, interested parties are invited to submit written statements (original and 14 copies) concerning the matters to be addressed by the Commission in its report on this investigation. Commercial or financial information that a submitter desires the Commission to treat as confidential must be submitted on separate sheets of paper, each clearly marked "Confidential Business Information" at the top. All submissions requesting confidential treatment must conform with the requirements of section § 201.6 of the Commission's *Rules of Practice and Procedure* (19 C.F.R. 201.6). All written submissions, except for confidential business information, will be made available in the Office of the Secretary of the Commission for inspection by interested parties. To be assured of consideration by the Commission, written statements relating to the Commission's report should be submitted to the Commission at the earliest practical date and should be received no later than the close of business on September 20, 1995. All submissions should be addressed to the Secretary, United States International Trade Commission, 500 E Street SW, Washington, DC 20436.

Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000.

Issued: September 1, 1995.

By order of the Commission.

Donna R. Koehnke,

Secretary.

[FR Doc. 95–22233 Filed 9–6–95; 8:45 am]

BILLING CODE 7020–02–P

INTERSTATE COMMERCE COMMISSION

[Docket No. AB–6 (Sub-No. 369X)]

Burlington Northern Railroad Company—Abandonment Exemption—in Big Stone and Traverse Counties, MN

Burlington Northern Railroad Company (BN) has filed a notice of exemption under 49 CFR 1152 Subpart F—*Exempt Abandonments* to abandon its 6.78-mile line of railroad between milepost 40.00 near Beardsley and milepost 46.78 near Browns Valley, in Big Stone and Traverse Counties, MN.

BN has certified that: (1) No local traffic has moved over the line for at least 2 years; (2) there is no overhead traffic on the line; (3) no formal complaint filed by a user of rail service on the line (or by a state or local government entity acting on behalf of such user) regarding cessation of service over the line either is pending with the Commission or with any U.S. District Court or has been decided in favor of the complainant within the 2-year period; and (4) the requirements at 49 CFR 1105.7 (service of environmental report on agencies), 49 CFR 1105.8 (service of historic report on State Historic Preservation Officer), 49 CFR 1105.11 (transmittal letter), 49 CFR 1105.12 (newspaper publication), and 49 CFR 1152.50(d)(1) (service of verified notice on governmental agencies) have been met.

As a condition to use of this exemption, any employee adversely affected by the abandonment shall be protected under *Oregon Short Line R. Co.—Abandonment—Goshen,* 360 I.C.C. 91 (1979). To address whether this condition adequately protects affected employees, a petition for partial revocation under 49 U.S.C. 10505(d) must be filed.

Provided no formal expression of intent to file an offer of financial assistance (OFA) has been received, this exemption will be effective on October 7, 1995, unless stayed pending reconsideration. Petitions to stay that do not involve environmental issues,[1] formal expressions of intent to file an OFA under 49 CFR 1152.27(c)(2),[2] and trail use/rail banking requests under 49 CFR 1152.29[3] must be filed by September 18, 1995. Petitions to reopen or requests for public use conditions under 49 CFR 1152.28 must be filed by September 27, 1995, with: Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

A copy of any pleading filed with the Commission should be sent to applicant's representative: Sarah J. Whitley, Assistant General Counsel, Burlington Northern Railroad Company, 3800 Continental Plaza, 777 Main Street, Fort Worth, TX 76102–5384.

If the notice of exemption contains false or misleading information, the exemption is void *ab initio.*

Applicant has filed an environmental report which addresses the abandonment's effects, if any, on the environment and historic resources. The Section of Environmental Analysis (SEA) will issue an environmental assessment (EA) by September 12, 1995. Interested persons may obtain a copy of the EA by writing to SEA (Room 3219, Interstate Commerce Commission, Washington, DC 20423) or by calling Elaine Kaiser, Chief of SEA, at (202) 927–6248. Comments on environmental and historic preservation matters must be filed within 15 days after the EA becomes available to the public.

Environmental, historic preservation, public use, or trail use/rail banking conditions will be imposed, where appropriate, in a subsequent decision.

Decided: August 31, 1995.

By the Commission, David M. Konschnik, Director, Office of Proceedings.

Vernon A. Williams,

Secretary.

[FR Doc. 95–22214 Filed 9–6–95; 8:45 am]

BILLING CODE 7035–01–M

---

[1] A stay will be issued routinely by the Commission in those proceedings where an informed decision on environmental issues (whether raised by a party or by the Commission's Section of Environmental Analysis in its independent investigation) cannot be made prior to the effective date of the notice of exemption. *See Exemption of Out-of-service Rail Lines,* 5 I.C.C.2d 377 (1989). Any entity seeking a stay on environmental concerns is encouraged to file its request as soon as possible in order to permit the Commission to review and act on the request before the effective date of this exemption.

[2] *See Exempt. of Rail Abandonment—Offers of Finan. Assist.,* 4 I.C.C.2d 164 (1987).

[3] The Commission will accept a late-filed trail use request as long as it retains jurisdiction to do so.

Availability of Environmental Assessments

Pursuant to 42 U.S.C. 4332, the Commission has prepared and made available environmental assessments for the proceedings listed below. Dates environmental assessments are available are listed below for each individual proceeding.

To obtain copies of these environmental assessments contact Ms. Tawanna Glover-Sanders, Interstate Commerce Commission, Section of Environmental Analysis, Room 3219, Washington, DC 20423, (202) 927–6203.

Comments on the following assessment are due 15 days after the date of availability:

AB–12 (Sub-No. 151X), Southern Pacific Transportation Co.—Abandonment Exemption—in Ventura County, CA. EA available 8/25/95.

AB–417 (Sub-No. 1X), Central New York Railway Corporation - Abandonment of its line of railroad in Oneida, Herkimer and Otsego Counties, New York. EA available 8/25/95.

AB–3 (Sub-No. 126X), Missouri Pacific Railraod Company—Abandonment Exemption—In Caddo Parish, Louisiana (Good Roads Lead). EA available 9/1/95.

Comments on the following assessment are due 30 days after the date of availability: None.

Vernon A. Williams,

Secretary.

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

[INS No. 1733–95]

Special Filing Instructions for ABC Class Members; Correction

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Notice; correction of form number.

SUMMARY: On Friday, July 7, 1995, the Immigration and Naturalization Service (the Service) published a notice at 60 FR 35424–35430, entitled "Special Filing Instructions for ABC Class Members." In that notice the Service provided special instructions for class members eligible for asylum benefits under the settlement agreement reached in *American Baptist Churches* v. *Thornburgh*, 760 F. Supp. 796 (N.D. Cal. 1991). That notice document 95–16771, erroneously referenced the Form I–855, *ABC* Change of Address Form.

Accordingly, on page 35424, under "Supplementary Information:" the entry for "Form I–855" where it is listed in the second, third and fourth paragraphs, should have read "Form M–426."

Dated: August 31, 1995.

Doris Meissner,

Commissioner, Immigration and Naturalization Service.

[FR Doc. 95–22222 Filed 9–6–95; 8:45 am]

BILLING CODE 4410–10–M

National Institute of Corrections

Announcement of Programs, Services, and Training

The National Institute of Corrections (NIC), U.S. Department of Justice, has published its Annual Program Plan—Fiscal Year 1996. The document describes the technical assistance, programs, and services to be available to the corrections field during the next fiscal year, which begins on October 1, 1995, and ends September 30, 1996.

A separate document, the NIC Schedule of Training Services for Fiscal Year 1996, describes the training programs and services to be provided by NIC for state and local corrections practitioners.

Both documents contain relevant application forms and may be obtained by contacting the National Institute of Corrections, 320 First Street, NW, Washington, D.C. 20534 (telephone: 202–307–3106 x144, fax 202–307–3361), or the NIC Longmont, Colorado, offices at 1960 Industrial Circle, Suite A, Longmont, Colorado, 80501 (telephone 303–682–0382, fax 303–682–0469). Both documents are also available on Internet. Connect to the Department of Justice gopher server, gopher.usdoj.gov. From the menu, select the National Institute of Corrections, then select the desired document. Application forms are not included in the Internet version of the Annual Program Plan.

Larry B. Solomon,

Acting Director.

BILLING CODE 4410–36–M

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice (95–085)]

Notice of Prospective Patent License

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of Prospective Patent License.

SUMMARY: NASA hereby gives notice that ACO, Inc., a corporation of the State of Oklahoma, has requested an exclusive license to practice the invention described and claimed in U.S. Patent No. 5,171,822, entitled "LOW TOXICITY HIGH TEMPERATURE PMR POLYIMIDE." This patent is assigned to the United States of America as represented by the Administrator of the National Aeronautics and Space Administration. Written objections to the prospective grant of a license should be sent to Mr. George F. Helfrich, Patent Counsel, NASA Langley Research Center.

DATES: Responses to this Notice must be received by November 6, 1995.

FOR FURTHER INFORMATION CONTACT: Mr. George F. Helfrich, Patent Counsel, NASA Langley Research Center, Mail Code 212, Hampton, VA 23681–0001; telephone (804) 864–3521.

Dated: August 30, 1995.

Edward A. Frankle,

General Counsel.

[FR Doc. 95–22213 Filed 9–6–95; 8:45 am]

BILLING CODE 7510–01–M

NUCLEAR REGULATORY COMMISSION

Seeks Qualified Candidates for Advisory Committee on Reactor Safeguards

AGENCY: U.S. Nuclear Regulatory Commission.

ACTION: Request for résumés.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is looking for qualified candidates for possible appointment to its Advisory Committee on Reactor Safeguards (ACRS). There are three openings expected on the Committee in 1996. One or two openings may be filled by reappointment of incumbents.

ADDRESSES: Submit résumés to: Ms. Jude Himmleberg, Office of Personnel, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

FOR APPLICATION MATERIALS, CALL: 1–800–952–9678. Please refer to Announcement Number 95–1000.

SUPPLEMENTARY INFORMATION: The ACRS was established by Congress to provide the Commission with independent expert advice on matters related to regulatory policy and the safety of existing and proposed nuclear power plants. The Committee work currently emphasizes safety issues associated with the operation of more than 100

nuclear units in the United States and technical and policy issues related to evolutionary and passive standard plant designs.

The ACRS membership includes individuals from national laboratories, academic and research institutions, industry, and consulting engineering firms who possess specific technical expertise along with a broad perspective in addressing safety concerns.

The members of the ACRS are selected from a variety of engineering and scientific disciplines such as nuclear power plant operations, nuclear engineering, mechanical engineering, electrical engineering, chemical engineering, metallurgical engineering, structural engineering, materials science, and instrumentation and process control systems. At this time, candidates are being sought with specific expertise in the areas of nuclear power plant operations and instrumentation and process control systems.

Criteria used to evaluate candidates include education and experience, demonstrated skills in nuclear safety matters, and the ability to apply one's skills to solve problems. Additionally, the Commission considers the need for specific expertise in relationship to current and future tasks, availability of candidates to serve, and possible conflicts of interest. Consistent with the requirements of the Federal Advisory Committee Act, the Commission seeks candidates with varying views so that the membership on the Committee will be fairly balanced terms of the point of views represented and the functions to be performed by the Committee.

Because conflict of interest regulations restrict the participation of members actively involved in the regulated aspects of the nuclear industry, the degree and nature of any such involvement will be considered. Each qualified candidate's financial interests must be reconciled with applicable Federal and NRC rules and regulations prior to final appointment to the Committee. This may result in the candidate being required to divest himself or herself of securities issued by nuclear industry entities, or discontinue or limit involvement in NRC or industry-funded research contracts or grants, based on a determination of possible conflict of interest.

Copies of résumé describing the educational and professional background of the candidate, including any special accomplishments, professional references, current address, and telephone number should be provided. All qualified candidates will receive full consideration. Appointment will be made without regard to such factors as race, color, religion, national origin, sex, age, or disabilities. Candidates must be citizens of the United States and be able to devote approximately 50–100 days per year to Committee business. Applications will be accepted until November 24, 1995.

Dated: August 31, 1995.

Andrew L. Bates,

Advisory Committee Management Officer.

[FR Doc. 95–22191 Filed 9–6–95; 8:45 am]

BILLING CODE 7590–01–M

[Docket No. 70–820]

Release of United Nuclear Corporation, Wood River Junction Site For Unrestricted Use and Removal From the Site Decommissioning Management Plan—Finding of No Significant Impact and Opportunity for a Hearing

The U.S. Nuclear Regulatory Commission has prepared an environmental assessment (EA) related to the release of the United Nuclear Corporation (UNC) Wood River Junction Site and the termination of Special Nuclear Materials License No. SNM–777, Docket No. 70–820.

On the basis of this EA, the NRC has concluded that the environmental impacts that could be caused by the proposed action would not be significant and do not warrant the preparation of an environmental impact statement. Accordingly, it has been determined that a Finding of No Significant Impact is appropriate.

The UNC site was listed in the NRC's Site Decommissioning Management Plan, but has now been removed.

Results of the radiological surveys and analyses performed indicate that, after remedial actions, residual radioactive material in building surfaces and in soils at the site is less than the criteria found in the NRC's "Guidelines for Decontamination of Facilities and Equipment Prior to Release for Unrestricted Use or Termination of Licenses for Byproduct, Source, or Special Nuclear Material," August 1967. However, non-radiological onsite groundwater contamination will be monitored on a continuing basis by the State of Rhode Island Department of Environmental Management and UNC. NRC concludes that further remedial action is not required, and that the site is suitable for unrestricted use with regard to any radiological hazards regulated by NRC under the authority of the Atomic Energy Act of 1954, as amended.

As noted in the Action Plan (57 FR 13389), this is the final action of the NRC on the UNC site. NRC will not require any additional decommissioning in response to future NRC criteria or standards, except in the event that additional contamination, or non-compliance with the decommissioning plans approved by NRC is found, indicating a significant threat to public health and safety. Non-compliance would occur if the licensee had not complied with an approved decommissioning plan, or had provided false information.

The NRC hereby provides notice of an opportunity for a hearing on the termination of the license under the provisions of 10 CFR Part 2, Subpart L, "Informal Hearing Procedures for Adjudications in Materials and Operator Licensing Proceedings." Pursuant to § 2.1205(a), any person whose interest may be affected by this proceeding may file a request for a hearing in accordance with § 2.1205(c). A request for a hearing must be filed within thirty (30) days of the date of publication of this **Federal Register** notice.

In addition to meeting other applicable requirements of 10 CFR Part 2 of the NRC's regulations, a request for a hearing filed by a person other than an applicant must describe in detail:

(1) The interest of the requestor in the proceeding;

(2) How that interest may be affected by the results of the proceeding, including the reasons why the requestor should be permitted a hearing, with particular reference to the factors set out in § 2.1205(g);

(3) The requestor's areas of concern about the licensing activity that is the subject matter of the proceeding; and

(4) The circumstances establishing that the request for a hearing is timely in accordance with § 2.1205(c).

In accordance with 10 CFR § 2.1205(e), each request for a hearing must also be served, by delivering it personally or by mail, to:

(1) The licensee, United Nuclear Corporation, Inc., 67 Sandy Desert Road, Uncasville, CT 06382; and

(2) The NRC staff, by delivery to the Executive Director for Operations, One White Flint North, 11555 Rockville Pike, Rockville, MD 20852 or by mail addressed to the Executive Director for Operations, U.S. Nuclear Regulatory Commission, Washington, DC 20555.

Any hearing that is requested and granted will be held in accordance with the NRC's "Informal Hearing Procedures for Adjudications in Material Licensing Proceedings" in 10 CFR Part 2, Subpart L.

For further details with respect to this action, see the EA and other documents related to this proposed action which are available for public inspection and copying at the NRC's Public Document Room, 2120 L Street, NW., Washington, DC 20555. For additional information, contact Jack Parrott, NRC Project Manager for the UNC site at (301) 415–6700 or Mail Stop T–8F37, Washington, DC 20555.

Dated at Rockville, Maryland this 9th day of August, 1995.

For the Nuclear Regulatory Commission.

Michael F. Weber,

Chief, Low-Level Waste and Decommissioning Projects Branch, Division of Waste Management, Office of Nuclear Material Safety and Safeguards.

[FR Doc. 95–22183 Filed 9–6–95; 8:45 am]

BILLING CODE 7590–01–M

[Docket No. 50–397]

Washington Public Power Supply System; Notice of Withdrawal of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has granted a request by Washington Public Power Supply System (the licensee) to withdraw its May 10, 1993, and supplement dated May 21, 1993, application for an amendment to Facility Operating License No. NPF–21 for operation of the Nuclear Project No. 2, located in Benton County, Washington.

The proposed amendment would have revised Section 6 (Administrative Controls) of the Technical Specifications (TS) to modify the composition, organizational assignments, and reporting relationship of the personnel performing the Independent Safety Engineering Group (ISEG) function in the current Nuclear Safety Assurance Division (NSAD). Also, the change would have modified the title of the Quality Assurance (QA) member of the Plant Operations Committee (POC) to reflect the new QA organization.

The Commission had previously issued a Notice of Consideration of Issuance of this amendment published in the **Federal Register** on August 18, 1993 (58 FR 43937). However, by letter dated September 8, 1993, the licensee withdrew the proposed change.

For further details with respect to this action, see the application for amendment dated May 10, 1993, and supplement dated May 21, 1993, and the licensee's letter dated September 8, 1993, which withdrew the application for license amendment.

The above documents are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room located at the Richland Public Library, 955 Northgate Street, Richland, Washington 99352.

Dated at Rockville, Maryland, this 29th day of August 1995.

For the Nuclear Regulatory Commission.

Brian E. Holian,

Senior Project Manager, Project Directorate IV–2, Division of Reactor Projects III/IV, Office of Nuclear Reactor Regulation.

[FR Doc. 95–22184 Filed 9–6–95; 8:45 am]

BILLING CODE 7590–01–P

[Docket 70–27]

Finding of No Significant Impact and Notice of Opportunity for a Hearing, Renewal of Special Nuclear Material License SNM–42, Babcock & Wilcox Company, Naval Nuclear Fuel Division, Lynchburg, VA

The U.S. Nuclear Regulatory Commission is considering the renewal of Special Nuclear Material License SNM–42 for the continued operation of the Babcock & Wilcox (B&W) Naval Nuclear Fuel Division (NNFD) and Lynchburg Technology Center (LTC) in Lynchburg, Virginia.

Summary of the Environmental Assessment

Identification of the Proposed Action:

B&W has requested the renewal of Special Nuclear Material License SNM–42 for the NNFD and LTC for a period of 10 years. In 1994, the NRC approved the consolidation of all activities authorized under LTC's License SNM–778 into NNFD's License SNM–42.

The B&W facility is located on a 212-hectare (525-acre) site in the northeastern corner of Campbell County, approximately 8 km (5 miles) east of Lynchburg, Virginia. This site is located in a generally rural area, consisting primarily of rolling hills with gentle slopes, farmland, and woodlands. The NNFD/LTC coexists on the site with the B&W Fuel Company plant which is separately licensed by the NRC. The combined NNFD/LTC facility is centrally located on the site with the main manufacturing complex contained in a 7.7-hectare (19-acre) fenced area and the LTC complex contained in a 5.5-hectare (13.6-acre) area for a combined total of 13.2 hectares (32.6 acres).

With this renewal, the combined NNFD/LTC activities will continue. The licensed activities include:

- The fabrication of unirradiated, highly enriched uranium into complete core assemblies for nuclear reactor fuel components for the U.S. Navy propulsion program and other government agencies, as well as university and other research reactors.
- The recovery of process uranium from scrap material.
- The continuation of existing research and development operations and non-nuclear process control research.
- The availability of analytical services for commercial power plants.
- The decontamination of reactor related hardware for inspection and evaluation.

The Need for The Proposed Action

The NNFD operation primarily supports the U.S. Navy propulsion program including fuel loading and subsequent refueling of ship reactors. The demand for this operation will continue in order to maintain at least the present fleet operation. If the operation of the NNFD is discontinued, another facility will have to be used in order to meet the national security needs of the U.S. Navy. In addition, this facility provides nuclear fuel modules to U.S. Department of Energy contractors and other research institutions. The LTC performs research and development necessary to create new products and processes, along with examining and improving those of the present generation.

Denial of license renewal for the NNFD/LTC facility would require that similar activities be undertaken at another site.

Environmental Impacts of the Proposed Action

Renewal of the combined NNFD/LTC license, involves a balance of positive and negative impacts. The positive impacts include contribution to national security, lessening of dependence on fossil fuels, and lessening of the negative environmental impacts related to production and utilization of fossil fuels. The negative impacts include releases of radioactive materials in the various environmental media associated with facility operation.

For the proposed action, renewal of the combined NNFD/LTC license, the continued handling of materials and conduct of operations at the facility poses a potential impact to the environment and public health and safety. For normal operations, the impact is related to the release of low levels of toxic or radioactive materials to the environment over extended periods of time. For accident conditions, the

hazard may involve release of higher concentrations of materials over relatively short periods of time.

The nonradioactive gaseous emissions from the combined NNFD/LTC are nitrogen oxides and fluoride compounds released from the process buildings and combustion products released from the steam plant. The state-issued air quality permit for the facility calls for the NO_X concentration at the site boundary to meet National Ambient Air Quality Standards (NAAQS). It has been determined that a maximum sector annual average NO_X concentration is approximately 0.8 percent of the NAAQS limit for NO_X. Consequently, it is concluded that NO_X emissions produce an insignificant environmental impact (NRC, 1991). The maximum hydrogen fluoride (HF) site boundary concentration is estimated as 0.04 $\mu g/m^3$. This concentration is approximately 1 percent of the time weighted average threshold limit value (TLV) proposed for workers by the American Conference of Governmental Industrial Hygienists (ACGIH) (ACGIH, 1986). Consequently, no significant impacts are expected.

Potential surface water impacts associated with operation of the combined NNFD/LTC include disruption of flow of the James River due to withdrawals and degradation of water quality of the river due to contaminant releases. The design capacity for withdrawal by the B&W facility is 0.02 m^3/s (0.67 ft^3/s). To date, this use of the James River by the B&W facility has had no adverse impact on the James River flow rate. The flow rates associated with future operations are expected to be similar or less than the historical flows; no additional impact is expected.

Degradation of surface water quality is prevented by enforcement of release limits and monitoring programs mandated under the facility National Pollution Discharge Elimination Systems (NPDES) permit. LTC liquid discharges are a small part of the combined discharges, which are monitored under this permit. NPDES permit conditions were exceeded twice during the 1989 through 1993 period. In the first instance, the discharge load for fluoride was exceeded during September 1993. In the second instance, the permit level for fecal coliform was exceeded at an internal monitoring point during July 1994 but was within limits at the final release monitoring point. This infrequent exceedance of NPDES levels does not indicate occurrence of a significant environmental impact.

Potential groundwater impacts include drawdown of the water table in the vicinity of facility wells and degradation of groundwater quality due to uncontrolled leakage to the subsurface soils. The B&W withdrawals of groundwater in the area of the James River are small in comparison to the capacity of the wells and the groundwater system.

There are no discharges of waste waters to ponds that could result in groundwater contamination from proposed operations except for those ponds that are used to manage the flow rate of discharges into the James River. The groundwater does have high levels of trichloroethylene (TCE) contamination from previous leaks which have been identified and eliminated.

On September 27, 1991, the Environmental Protection Agency (EPA) Region III issued a Final Order of Consent (Docket RCRA–III–050–CA) under Section 3008(h) of the Resource Conservation Reauthorization Act (RCRA), as amended. The Consent Order specified that B&W perform interim measures to prevent or relieve immediate threats to human health or the environment, perform a RCRA field investigation (RFI) to delineate the nature and extent of any releases of past raw products or wastes, and to perform a corrective measures study (CMS) to identify and evaluate alternatives for corrective action (B&W, 1995b).

On April 17, 1995, the draft RFI report was completed and submitted to EPA Region III. The RFI report identified three groundwater plumes which were contaminated with TCE, tetrachloroethylene (PCE), and related degradation constituents above the drinking water limit of 0.005 parts per million (ppm). The largest plume (Plume A) is located beneath the NNFD plant, extending 884 m (2,900 feet) from the upper road on the southwest portion of the site northeast to the James River. Plume A has a maximum width 365 m (1,200 feet), an approximate area of 28 hectares (70 acres), and an average concentration of 0.1 ppm TCE. The TCE source areas for plume A are the former TCE storage tank location where the maximum groundwater contamination is 145 ppm TCE, and a former zirconium chip burning area near the James River where the maximum groundwater contamination is 44.3 ppm TCE (B&W, 1995b).

The second largest plume (Plume C) is located beneath the Commercial Nuclear Fuel Plant (CNFP), extending 503 m (1,650 feet) from the upper side of the CNFP plant north towards the James River. Plume C has a maximum width of 190 m (625 feet), an approximate area of 10 hectare (24 acres) and an average concentration of 0.01 ppm TCE. The TCE source area for plume C is the former TCE storage tank location, and the maximum groundwater contamination is 0.397 ppm TCE (B&W, 1995b).

The third largest plume (Plume B) is located on the western portion of the site where the former uranium recovery building was buried. Plume B has a maximum length of 229 m (750 feet), a maximum width of 90 meters (300 feet), an approximate area of 2 hectares (5 acres), and an average concentration of 0.1 ppm TCE and 0.1 ppm PCE. The exact TCE and PCE source areas for plume B are unknown, but are most likely due to past waste disposal practices in the building disposal area. The maximum groundwater contamination is 3.4 ppm TCE and 58.6 ppm PCE. Upon EPA Region III approval of the RFI report, B&W will proceed with the CMS, where alternatives for corrective action will be evaluated (B&W, 1995b).

All but two of the underground tanks installed at the site have been removed and so the potential for accidental contamination of the groundwater is reduced. Remediation plans are being prepared for the cleanup of the TCE plume. The continued operation of the combined NNFD/LTC is not expected to result in any additional negative impact on the local groundwater.

Operation of the NNFD and LTC may pose risks to public health and safety due to release of radioactive material under normal operational or accident conditions. Radioactive materials released from the NNFD and LTC may reach the public through a variety of transport pathways contributing to both internal and external exposures. For atmospheric releases; internal exposures may occur through inhalation of radioactive material dispersed in the air or ingestion of crops and animal products which come in contact with radioactive material deposited from the air. External exposures may occur through direct radiation from an airborne plume or from particulates deposited onto the ground from the plume. For liquid releases, internal exposures from ingestion of water or irrigated crops may occur. External exposures from recreational activities, including swimming and boating may occur. For atmospheric releases, potentially exposed members of the public considered in the analysis include a maximally exposed individual located at the site boundary and the population out to a distance of 80 kilometers (50 miles). In order to provide a conservative evaluation of potential liquid pathway impacts, the analysis assumes that a maximally exposed individual downstream of the facility and the surrounding population obtain drinking water and irrigation water from the James River.

The NNFD releases radioactive material to the atmosphere from approximately 27 stacks while the LTC releases radioactive material from 2 stacks. The NNFD releases are primarily uranium while the LTC releases are mixed fission products, including H–3 and Kr-85. For internal exposures, uranium is the dominant radionuclide; inhalation exposures are greater than ingestion exposures, and the lung is the controlling organ.

Low-level liquid radioactive waste from the NNFD and the LTC are processed through the Waste Treatment Facility. The system effluent is monitored and released to the James River. Releases attributable to the NNFD are primarily uranium while those from the LTC are primarily tritium.

NRC regulations (10 CFR 20.1301) require that total effective dose equivalent (TEDE) for members of the public not exceed 1.0×10^{-3} Sv (100 mrem) per year. In addition, EPA regulations (40 CFR Part 190) require that for routine releases to the general environment, the annual dose equivalent not exceed 2.5×10^{-4} Sv (25 mrem) to the whole body, 7.5×10^{-4} Sv (75 mrem) to the thyroid, and 2.5×10^{-4} Sv (25 mrem) to any other organ (EPA, 1977). For releases to the atmosphere, EPA regulations (40 CFR Part 61) require that the annual effective dose equivalent not exceed 1.0×10^{-4} Sv (10 mrem) (EPA, 1991). Doses associated with NNFD and LTC operations are dominated by releases to the atmosphere. For the maximally exposed individual, TEDE is estimated as 2.4×10^{-7} Sv (0.024 mrem) while the largest dose to a tissue is estimated as 2.0×10^{-6} Sv (0.2 mrem) to the lung. The doses are small fractions of the limits established by the NRC and EPA and indicate that facility operations will have insignificant impact on public health and safety. Because conservative assumptions were used in the analysis, actual doses are expected to be lower.

The NNFD and LTC handle materials which could pose a risk to public health and safety if released during accidents. Prior NRC analysis of operation of the NNFD considered accidents including criticality, fire, and flood (NRC, 1978). This prior analysis is supplemented by consideration of the research and development, analytical, and decontamination operations conducted at the LTC. The initial step in the accident analysis is auditing of hazardous materials and potentially hazardous activities present or conducted at the facility. Other than radioactive materials, the LTC does not contain significant inventories of potentially hazardous materials. In addition, the facility does not fabricate or convert materials in any continuous process. Thus, the handling and examination of fuel assemblies and the management of effluents associated with these operations are the activities which may pose a risk to the public health and safety.

The NNFD conducts an environmental monitoring program which includes sediment, soil, vegetation, surface water, air, and groundwater media at 20 locations on or near the facility. The program is intended to identify trends in concentrations or accumulation of uranium or other contaminants in the environment. Action levels have been established for each media to provide a basis for response to potential problems. Actions triggered by exceedance of an action level may include resampling of the area, performance of isotopic analysis, investigation of the source of contamination, elimination of the source of contamination, or termination of operations pending identification of a method for reduction of contaminant levels. Environmental monitoring results are reviewed as part of the ALARA program.

The NRC staff has reviewed the location of the environmental monitoring program sampling points, the frequency of sample collection, and the trends of the sampling program results in conjunction with environmental pathway and exposure analysis and concluded that the monitoring program provides adequate protection of public health and safety.

Alternatives to the Proposed Action

Implementation of the license renewal alternative involves continued operation of the facility at levels consistent with past practice for both the NNFD and LTC. Data and analysis presented in this Environmental Assessment updates and supplements the data and analysis presented in an Environmental Assessment (NRC, 1991) prepared earlier in the license renewal process. No new major construction or introduction of new processes is contemplated. The nature of the manufacturing, research, and waste management operations is summarized in this section. The system description presented in this section is adapted from material contained in the prior B&W Environmental Assessment (NRC, 1991) and license renewal application (B&W, 1995a).

The alternative of denial of license renewal for the B&W combined NNFD/LTC facility at the Lynchburg, Virginia site implies cessation of manufacturing and commencement of decontamination and decommissioning (D&D) of the facility. Decontamination and decommissioning activities would be substantially the same as those described for the license renewal alternative in Section 2.1 of this environmental assessment. However, since the fuel utilization requirements of the naval propulsion program and the university training and research programs would remain unchanged, selection of this alternative implies transfer of fuel production activities to a new site.

Conclusion

The NRC staff concludes that the environmental impacts associated with the proposed license renewal for continued operation of B&W's NNFD/LTC facility are expected to be insignificant.

Finding of No Significant Impact

The Commission has prepared an Environmental Assessment related to the renewal of Special Nuclear Material License SNM–42. On the basis of the assessment, the Commission has concluded that environmental impacts that would be created by the proposed licensing action would not be significant and do not warrant the preparation of an Environmental Impact Statement. Accordingly, it has been determined that a Finding of No Significant Impact is appropriate.

The Environmental Assessment and the above documents related to this proposed action are available for public inspection and copying at the Commission's Public Document Room at the Gelman Building, 2120 L Street NW, Washington, DC.

Opportunity for a Hearing

Any person whose interest may be affected by the issuance of this renewal may file a request for a hearing. Any request for hearing must be filed with the Office of the Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555, within 30 days of the publication of this notice in the **Federal Register**; be served on the NRC staff (Executive Director for Operations, One White Flint North, 11555 Rockville Pike, Rockville, MD 20852); and on the licensee (Babcock & Wilcox Company, Naval Nuclear Fuel Division, Lynchburg, Virginia); and must comply with the requirements for requesting a hearing set forth in the Commission's regulation, 10 CFR Part 2, Subpart L, "Informal Hearing Procedures for Adjudications in Materials Licensing Proceedings."

These requirements, which the requestor must address in detail, are:

1. The interest of the requestor in the proceeding;
2. How that interest may be affected by the results of the proceeding, including the reasons why the requestor should be permitted a hearing;
3. The requestor's areas of concern about the licensing activity that is the subject matter of the proceeding; and
4. The circumstances establishing that the request for hearing is timely, that is, filed within 30 days of the date of this notice.

In addressing how the requestor's interest may be affected by the proceeding, the request should describe the nature of the requestor's right under the Atomic Energy Act of 1954, as amended, to be made a party to the proceeding; the nature and extent of the requestor's property, financial, or other (i.e.,health, safety) interest in the proceeding; and the possible effect of any order that may be entered in the proceeding upon the requestor's interest.

Dated at Rockville, Maryland, this 30th day of August 1995.

For the Nuclear Regulatory Commission.

Robert C. Pierson,

Chief, Licensing Branch, Division of Fuel Cycle Safety and Safeguards, NMSS.

BILLING CODE 7590–01–P

[Docket Nos. 50–424 and 50–425]

Georgia Power Company, et al.; Vogtle Electric Generating Plant, Units 1 and 2; Notice of Consideration of Issuance of Amendments to Facility Operating Licenses and Opportunity for a Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of amendments to Facility Operating License Nos. NPF–68 and NPF–84, issued to the Georgia Power Company, et al. (the licensee), for operation of the Vogtle Electric Generating Plant (VEGP, Vogtle), Units 1 and 2, located at the licensee's site in Burke County, Georgia.

The proposed amendments, requested by the licensee in a letter dated May 1, 1995, would represent a full conversion from the current Technical Specifications (TS) to a set of TS based on NUREG–1431, "Standard Technical Specifications, Westinghouse Plants," Revision 1, dated April, 1995. NUREG–1431 was developed through working groups composed of NRC staff members and industry representatives and has been endorsed by the staff as part of an industry-wide initiative to standardize and improve the TS. As part of this submittal, the licensee has applied the criteria contained in the Commission's Final Policy Statement on Technical Specification Improvements for Nuclear Power Reactors of July 22, 1993, to the current Vogtle TS, and, using NUREG–1431 as a basis, developed a proposed set of improved TS for Vogtle. The criteria in the Final Policy Statement were subsequently added to 10 CFR 50.36, "Technical Specifications," in a rule change which became effective on August 18, 1995 (60 FR 36953).

The licensee has categorized the proposed changes to the existing TS into four general groupings. These groupings are characterized as administrative changes, relocated changes, more restrictive changes, and less restrictive changes.

Non-technical, administrative changes were intended to incorporate human-factors principles into the form and structure of the improved plant TS so that they would be easier to use for plant operations personnel. Administrative changes are editorial in nature or involve the reorganization or reformatting of requirements without affecting technical content or operational requirements. The proposed changes include: (a) Providing the appropriate numbers, etc., for NUREG–1431 bracketed information (information which must be supplied on a plant-specific basis, and which may change from plant to plant), (b) identifying plant-specific wording for system names, etc:, and (c) changing NUREG–1431 section wording to conform to existing licensee practices.

Relocated changes, those current TS requirements which do not satisfy or fall within any of the four criteria specified in the Commission's policy statement, may be relocated to appropriate licensee-controlled documents. The licensee's application states that such requirements will be relocated from the TS to administratively controlled documents such as the Final Safety Evalution Report. Changes made to these documents will be made pursuant to 10 CFR 50.59 or other appropriate control mechanisms. These changes reduce the number of current TS requirements but the actual commitment to continue to perform the requirement will be unchanged upon implementation of the improved TS.

The licensee's proposed improved TS include certain more restrictive requirements than are contained in the current TS, which are either more conservative than corresponding requirements in the current TS, or are additional restrictions that are contained in NUREG–1431 but are not contained in the current TS. Examples of more restrictive requirements include: placing a limiting condition for operation (LCO) on plant equipment that is not required by the present TS to be operable; more restrictive requirements to restore inoperable equipment; and more restrictive surveillance requirements.

Less restrictive changes are those where current requirements are relaxed or eliminated, or new flexibility is provided. The more significant "less restrictive" requirements are justified on a case-by-case basis. When requirements have been shown to provide little or no safety benefit, their removal from the TS may be appropriate. In most cases, relaxations previously granted to individual plants on a plant-specific basis were the result of (a) generic NRC actions, (b) new NRC staff positions that have evolved from technological advancements and operating experience, or (c) resolution of the Owners Groups' comments on the improved Standard Technical Specifications. Generic relaxations contained in NUREG–1431 were reviewed by the staff and found to be acceptable because they are consistent with current licensing practices and NRC regulations. The licensee's design was reviewed to determine if the specific design basis and licensing basis are consistent with the technical basis for the model requirements in NUREG–1431 and thus provides a basis for these revised TS.

These administrative, relocated, more restrictive and less restrictive changes to the requirements of the current TS do not result in operations that will alter assumptions relative to mitigation of an analyzed accident or transient event.

In addition to the changes described above, the licensee proposed certain changes to the current TS that are both less restrictive and are not within the scope of application for conversion to the guidance of NUREG–1431. All of the differences will be reviewed by the NRC staff and a determination will be made regarding the approval or disapproval of each item as a part of this licensing action. Specifically, the licensee identified the following instances where their submittal varied from the provisions of NUREG–1431.

Shutdown margin requirements for Mode 2 with $K_{eff} < 1.0$ are deleted. The applicability of the TS requirements for shutdown bank insertion limits, the requirement to verify a nonindicating rod position immediately after movement of more than 24 steps, and the required actions and surveillance requirements for quadrant power tilt ratio are revised.

With regard to reactor trip system (RTS) instrumentation, revisions are made to: (1) Three NUREG–1431 surveillances based on Vogtle operating practices and vendor recommendations; (2) notes 1 and 2 to NUREG–1431 LCO 3.3.1 required actions for Condition T (one RTS channel inoperable); (3) the NUREG–1431 surveillance requirements for the P–7 interlock; (4) the completion time for required actions with one intermediate range neutron flux channel inoperable (LCO 3.3.1 Condition F); and, (5) the Applicable Modes or other specified conditions for the RTS Interlocks P–7, P–8, P–9, P–10, and P–13.

For the Engineered Safety Features Actuation System instrumentation, the surveillance intervals for the Channel Operational Test of the refueling water storage tank level Low-Low signal for Semi-Automatic Switchover to Containment Emergency Sump function and the surveillance interval for the Channel Operational Test of the low Reactor Coolant System (RCS) T_{avg} function are increased from monthly to quarterly.

For the RCS, the surveillance interval for the pressurizer heater capacity is revised from 92 days to 18 months. Also, the completion time for depressurizing the RCS in the event of an inoperable cold overpressure protection system is revised from 8 hours to 12 hours, and the requirements for performing RCS water inventory balances are revised. The lift setpoints for the residual heat removal suction relief valves, the RCS vent capacity for cold overpressure protection, and the pressurizer safety valve lift settings are moved to the Bases of the improved TS.

For the Emergency Core Cooling System, the requirements for seal water injection flow is revised to locate the limits for seal injection flow to the Bases. Also, the Mode 4 requirements are revised.

For containment systems, the current allowed outage time for the containment spray and cooling systems is revised from 72 hours to 14 days, and the air lock door interlock mechanism surveillance frequency is revised from the current frequency of 6 months to 18 months. An allowance to open the 14-inch purge valves for maintenance testing is added.

For other plant systems, the Condensate Storage Tank LCO is revised consistent with a planned design modification that will result in two 100% capacity tanks. The surveillance requirement to operate the Piping Penetration Area Filtration and Exhaust System (PPAFES) monthly for ≥10 continuous hours is revised to operate for ≥15 minutes and the heater capacity verification is deleted. The Completion Time to reduce the Power Range Neutron Flux High Trip setpoints is increased from 4 hours to 12 hours. The currently licensed footnote in the Control Room Emergency Filtration System (CREFS) LCO that requires Train B CREFS to be started whenever a CREFS train must be placed in service to comply with Actions is deleted. A Note is added to the current LCO for the engineered safety feature room coolers and the safety-related chiller system providing an exception to the LCO for surveillance testing.

For electrical systems, several revisions to the LCO for AC Sources—Operating were proposed to support the addition of a new Standby Auxiliary Transformer as a Unit 1 and Unit 2 common offsite circuit. Also, the diesel generator accelerated test frequency requirements in the AC Sources—Operating LCO are relocated outside of the TS.

Regarding administrative controls, the Ventilation Filter Testing Program is revised consistent with the proposed change in the Plant Systems Chapter for the deletion of the heater capacity test for the PPAFES. The reference to the ASTM standard in Paragraph 5.5.13.c is deleted.

Before issuance of the proposed license amendments, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

By October 10, 1995, the licensee may file a request for a hearing with respect to issuance of the amendments to the subject facility operating licenses and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for a hearing and a petition for leave to intervene. Requests for a hearing and a petition for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. Interested persons should consult a current copy of 10 CFR 2.714 which is available at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room located at the Burke County Library, 412 Fourth Street, Waynesboro, Georgia. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board

Panel, will rule on the request and/or petition; and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to 15 days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than 15 days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner shall provide a brief explanation of the bases of the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion. Petitioner must provide sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the amendment under consideration. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Services Branch, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, by the above date. Where petitions are filed during the last 10 days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1–(800) 248–5100 (in Missouri 1–(800) 342–6700). The Western Union operator should be given Datagram Identification Number N1023 and the following message addressed to Herbert N. Berkow, Director, Project Directorate II–2: petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Ernest L. Blake, Jr., Esquire, Shaw, Pittman, Potts, and Trowbridge, 2300 N Street, NW., Washington, DC 20037, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1) (i)–(v) and 2.714(d).

If a request for a hearing is received, the Commission's staff may issue the amendments after it completes its technical review and prior to the completion of any required hearing if it publishes a further notice for public comment of its proposed finding of no significant hazards consideration in accordance with 10 CFR 50.91 and 50.92.

For further details with respect to this action, see the application for amendments dated May 1, 1995, which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room located at the Burke County Library, 412 Fourth Street, Waynesboro, Georgia.

Dated at Rockville, Maryland, this 31st day of August 1995.

For the Nuclear Regulatory Commission.

L. A. Wiens,

Acting Director, Project Directorate II–2, Division of Reactor Projects—I/II, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-P

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Notice of Open Meeting of the Intergovernmental Policy Advisory Committee for Trade

AGENCY: Office of the United States Trade Representative.

ACTION: Notice.

SUMMARY: The September 22, 1995 meeting of the Intergovernmental Policy Advisory Committee will be open to the public. The meeting will include a review and discussion of current issues of U.S. trade policy.

DATES: The meeting is scheduled for September [illegible] 19[illegible] unless otherwise notified.

ADDRESSES: The meeting will be held at the Sheraton City Center Hotel, 1143 New Hampshire Avenue, N.W., Washington, D.C., from 11 a.m. to 2 p.m. unless otherwise notified.

FOR FURTHER INFORMATION CONTACT: Clayton Parker, Director of Intergovernmental Affairs, Office of the United States Trade Representative, Executive Office of the President at (202) 395–6120.

Jennifer Hillman,

Acting United States Trade Representative.

BILLING CODE 3190-01-M

Notice of Meeting of the Advisory Committee for Trade Policy and Negotiations

AGENCY: Office of the United States Trade Representative.

ACTION: Notice that the September 14, 1995 meeting of the Advisory Committee for Trade Policy and Negotiations will be held from 10 a.m. to 2 p.m. The meeting will be closed to the public.

SUMMARY: The Advisory Committee for Trade Policy and Negotiations will hold a meeting on September 14, 1995 from

10 a.m. to 2 p.m. The meeting will include a review and discussion of current issues which influence U.S. trade policy. Pursuant to Section 2155(f)(2) of Title 19 of the United States Code, I have determined that the meeting will be concerned with matters the disclosure of which would seriously compromise the development by the United States Government of trade policy, priorities, negotiating objectives or bargaining positions with respect to the operation of any trade agreement and other matters arising in connection with the development, implementation and administration of the trade policy of the United States.

DATES: The meeting is scheduled for September 14, 1995, unless otherwise notified.

ADDRESSES: The meeting will be held at the Indian Treaty Room at the Old Executive Office Building, Washington, D.C., unless otherwise notified.

FOR FURTHER INFORMATION CONTACT: Michaelle Burstin, Director of Public Liaison, Office of the United States Trade Representative, (202) 395–6120.

Michael Kantor,

United States Trade Representative.

BILLING CODE 3190–01–M

Country-by-Country Reallocations of the Tariff-Rate Quota for Sugar

AGENCY: Office of the United States Trade Representatives.

ACTION: Notice.

SUMMARY: The Office of the United States Trade Representative (USTR) is providing notice of two sets of country-by-country reallocations of part of the in-quota quantity of the tariff-rate quota for imported sugar for the period that ends September 30, 1995.

EFFECTIVE DATES: June 13 and July 13, 1995, respectively.

ADDRESSES: Inquiries may be mailed or delivered to Tom Perkins, Senior Economist, Office of the U.S. Trade Representative, 600 17th Street N.W., Office of Agricultural Affairs (Room 421), Washington, DC 20508.

FOR FURTHER INFORMATION CONTACT: Tom Perkins, Office of Agricultural Affairs, 202–395–6127.

SUPPLEMENTARY INFORMATION: On June 13, 1995, and again on July 13, 1995, the United States Trade Representative determined and announced that countries to which an allocation had been made of the in-quota quantity under the sugar tariff-rate quota (TRQ) provided for in Additional U.S. Note 5 to chapter 17 of the Harmonized Tariff Schedule of the United States (HTS) would not be filling their allocations and that the amount of this shortfall would be reallocated to other supplying countries or areas. This notice documents these earlier announcements. Following is information on the quota shortfall and reallocation amounts for the June 13 and July 13 announcements, respectively.

June 13, 1995, Reallocation

On June 13, 1995, the United States Trade Representative determined and announced that five countries would not be filling their allocations under the tariff-rate quota for sugar. These countries are: Barbados, Congo, Gabon, Papua New Guinea, and St. Kitts & Nevis. The amount of the total shortfall is 92,427 metric tons (101,883 short tons). The shortfall amount for each country is: Barbados 23,763 MT, Congo 14,584 MT, Gabon 21,840 MT, Papua New Guinea 13,999 MT, and St. Kitts & Nevis 18,241 MT.

This amount has been reallocated among supplying countries in the following amounts (metric tons, raw value):

Country	Reallocated amount
Argentina	4,035
Australia	7,788
Belize	1,032
Bolivia	750
Brazil	13,606
Colombia	2,252
Costa Rica	1,407
Dominican Republic	16,515
Ecuador	1,032
El Salvador	2,440
Fiji	845
Guatemala	4,504
Guyana	1,126
Honduras	938
India	750
Jamaica	1,032
Malawi	938
Mauritius	1,126
Mozambique	1,220
Nicaragua	1,971
Panama	2,721
Peru	3,848
Philippines	12,668
South Africa	2,158
Swaziland	1,502
Taiwan	1,126
Thailand	1,314
Trinidad-Tobago	657
Zimbabwe	1,126
Total	92,427

July 13, 1995, Reallocation

On July 13, 1995, the United States Trade Representative determined and announced that five countries would not be filling their allocations of the tariff-rate quota for sugar, including the amounts reallocated to them in the June 13, 1995, reallocation announcement. Accordingly, their remaining quota balances are being reallocated. This is in addition to the reallocation announced on June 13, 1995.

The five countries which will not utilize their remaining quota balances are: India, Madagascar, the Philippines, Taiwan, and Thailand. The total amount of the 1994/1995 sugar TRQ reallocated for purposes of the July 13 reallocation is 17,923 metric tons (19,757 short tons). The following amounts are reallocated from each country (in MT raw value): India, 750 MT; Madagascar, 2,066 MT; the Philippines, 12,668 MT; Taiwan, 1,126 MT; and Thailand, 1,314 MT.

This amount has been reallocated among supplying countries in the following amounts (metric tons, raw value):

Country	Reallocated amount
Argentina	522
Australia	1,009
Belize	134
Bolivia	97
Brazil	1,762
Columbia	292
Costa Rica	183
Dominican Republic	2,139
Ecuador	134
El Salvador	316
Fiji	109
Guatemala	583
Guyana	146
Honduras	121
Jamaica	134
Malawi	121
Mauritius	146
Mozambique	158
Nicaragua	255
Panama	353
Papua New Guinea	8,005
Peru	499
South Africa	279
Swaziland	195
Trinidad-Tobago	85
Zimbabwe	146
Total	17,923

Barbados, India, Madagascar, Philippines, Taiwan and Thailand were also excluded from this reallocation based on reported lack of shipment intentions for the June 13 reallocation quantity.

The reallocation of the 17,923 MT includes reinstating to Papua New Guinea 8,005 MT of the 13,999 MT reallocated from it in the June 13 announcement. This amount was reinstated due to a confirmed delivery contract for quota entry into the United States by September 30, 1995.

Note: In both announcements, the reallocation amount is zero for the ten minimum quota-holding countries including: Congo, Cote d'Ivoire, Gabon, Haiti, Madagascar, Mexico, Papua New Guinea, Paraguay, St. Kitts & Nevis, and Uruguay, since the previously announced minimum allocation for these countries already exceeds the base import quota plus any reallocation adjustment.

Both reallocations apply to the period ending September 30, 1995, only.

Jennifer A. Hillman,

Acting United States Trade Representative.

BILLING CODE 3190–01–M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–36168; File No. SR–Amex–94–38]

Self-Regulatory Organizations; American Stock Exchange, Inc.; Order Approving Proposed Rule Change and Notice of Filing and Order Granting Accelerated Approval of Amendments No. 1, 2, 3, 4 and 5 to Proposed Rule Change Relating to the Establishment of Uniform Listing and Trading Guidelines for Stock Index, Currency and Currency Index Warrants

August 29, 1995.

I. Introduction

On September 12, 1994, the American Stock Exchange, Inc. ("Amex" or "Exchange") submitted to the Securities and Exchange Commission ("SEC" or "Commission"), pursuant to Section 19(b) ("Section 19(b)") of the Securities Exchange Act of 1934 ("Act"),[1] and Rule 19b–4 thereunder,[2] a proposed rule change to establish uniform rules for the listing and trading of broad-based stock index ("index" or "stock index"), currency ("currency") and currency index ("currency index") warrants (collectively "warrants"). Notice of the proposed rule change appeared in the **Federal Register** on December 20, 1994.[3] One comment letter was received in response to the proposal.[4]

The Exchange subsequently filed five Amendments to the proposal.[5] Amendment No. 1 brought several of Amex's proposed rules and policies into conformity with those previously filed by other markets. Amendment No. 2 primarily addressed surveillance and margin issues related to the trading of warrants. Amendment No. 3 addressed the issues of settlement methodology, currency index warrant margin and reporting requirements. Amendment No. 4 deletes a transaction reporting requirement which will be revised and incorporated into the Exchange's surveillance procedures and also makes minor changes requested by the staff. Amendment No. 5 clarifies the settlement procedures for index warrants which are exercised at or prior to expiration. This order approves the proposal, as amended.

II. Description of the Proposal

The Amex proposes to establish uniform rules for the listing and trading of stock index, currency and currency index warrants.[6] Section 106 of the Amex Company Guide, Currency and Index Warrants, would be amended to provide uniform listing criteria for broad-based stock index, currency, and currency index warrants.[7] First, issuers would be expected to exceed minimum issuer listing standards. In particular, the Exchange proposes that issuers be required to have a minimum tangible net worth in excess of $250 million or, in the alternative, have a minimum tangible net worth in excess of $150 million and provided that the issuer does not have (including as a result of the proposed issuance) issued outstanding warrants where the aggregate original issue price of such warrant offerings (combined with offerings by its affiliates) listed on a national securities exchange or that are National Market securities traded through NASDAQ exceeds 25% of the issuer's net worth.[8]

Second, the proposal, as amended requires that unexercised in-the-money warrants provide for automatic exercise on their expiration date or on or promptly following their delisting date (if the issue is not listed upon another organized securities market). Third, the proposal provides that for warrant offerings where U.S. stocks constitute 25% or more of the index value ("domestic index"), issuers shall use opening prices ("a.m. settlement") for U.S. stocks to determine index warrant settlement values on the final determination of settlement value date ("valuation date") for the warrants as well as during the two business days prior to the valuation date.[9] Fourth, Section 106 has been amended to provide that foreign country securities or American Depositary Receipts ("ADRs") thereon that are not subject to a comprehensive surveillance sharing agreement with the Exchange and that have less than 50% of their global trading volume (in dollar value) within the U.S., shall not represent more than 20% of the weight of the index.[10]

The Exchange also proposes adding a provision to Section 106 which is designed to assist in the surveillance of index warrant trading. Specifically, the Exchange will require issuers of stock index warrants to notify the Exchange of any early exercises. For domestic index warrants, this notice must occur no later than 4:30 p.m. (New York time) on the day that the settlement value for the warrants is determined.[11]

Rule 462 ("Rule 462"), the Amex margin rule, is being amended to apply the current customer margin requirements for broad based stock index and currency options to stock index, currency and currency index warrants. Thus, all purchases of warrants will require payment in full, and short sales of stock index warrants will require initial margin of: (i) 100 percent of the current value of the warrant plus (ii) 15 percent of the current value of the underlying broad stock index less the amount by which the warrant is out of the money, but with a minimum of ten percent of the index value. Short sales of currency warrants will follow the margin requirements currently applicable to listed currency options. Specifically, the Exchange proposes that short sales of warrants on the German Mark, French Franc, Swiss Franc, Japanese Yen, British Pound, Australian Dollar and European Currency Unit shall be subject to a margin level of 100% of the current market value of each such warrant plus a four percent "add-on." [12] The margin required on currency index warrants would be an amount as determined by the Exchange and approved by the Commission.[13] The Exchange also proposes that its stock index, currency and currency index warrant customer margin requirements be permitted offset treatment for spread and straddle positions. In this regard, the Exchange proposes that index, currency and currency index warrants may be offset with either warrants or Options Clearing Corporation ("OCC") issued options on the same index, currency or currency index, respectively. Furthermore, the Exchange has proposed that Rules 462(d)(2) (F) and (G), to the extent that such rules concern spread and straddle positions in warrants, be subject to a one year pilot basis.[14] Finally, proposed Rule 462 will also permit the use of escrow receipts to cover a short call position in a broad-based stock index warrant.[15]

[4] *See* Letter from Paul M. Gottlieb, Seward & Kissel, to Jonathan G. Katz, Secretary, Commission, dated January 10, 1995 ("Comment Letter" or "Seward & Kissel Letter").

[5] *See* Letters from William Floyd-Jones, Assistant General Counsel, Amex, to Michael Walinskas, SEC, dated May 12, 1995 ("Amendment No. 1"), May 12, 1995 ("Amendment No. 2"), June 26, 1995 ("Amendment No. 3"), July 28, 1995 ("Amendment No. 4") and August 16, 1995 ("Amendment No. 5").

[6] The proposed rules would apply to both American-style warrants (which may be exercised at any time prior to expiration) and European-style warrants (which may only be exercised during a specified period before expiration).

[7] Sections 106 (b)–(d), which require issuances of warrants to: have a term of one to five years; have a minimum public distribution of 1,000,000 warrants together with a minimum of 400 public holders and an aggregate market value of $4,000,000 and; be cash-settled in U.S. dollars would remain unchanged.

[8] *See* Amendment No. 1. The Exchange amended this provision in response to the Seward & Kissell Letter.

[9] *See* Amendment No. 3. The Exchange amended its proposal in response to the Seward & Kissell Letter and notes that a warrant based upon a domestic U.S. stock index may be settled using closing prices ("p.m. settlement") for the underlying stocks at all times except for the warrant's valuation date and the two business days immediately preceding the valuation date.

[10] *See* Amendment No. 1.

[11] *See* Amendment No. 2.

The Exchange proposes that Part VI of its rules, Trading of Stock Index and Currency Warrants, be applicable solely to the trading of warrants. Proposed Rule 1100 provides that, unless the context otherwise requires or a specific rule in Part VI applies, the provisions of the Constitution and all other rules and policies of the Exchange apply to trading of such securities. Furthermore, proposed Rule 1100 provides that warrants listed on the Exchange prior to SEC approval of this filing shall continue to be governed by those provisions of the Exchange's rules that were applicable to such warrants at the time of their listing. Finally, prior to trading index, currency or currency index warrants, the Exchange will distribute circulars to its membership providing guidance regarding member firm compliance responsibilities (including suitability recommendations) when handling transactions in warrants.

Proposed Rule 1101 states that no member or member organization shall accept an order from a customer for the purchase or sale of warrants unless the customer's account has been approved for options trading pursuant to Exchange Rule 921. Accordingly, the Exchange will rescind Commentaries .01 and .02 to Rule 411, its current suitability standard applicable to warrants, which currently provide that the Exchange "recommends" that index and currency warrants only be sold to investors whose accounts have been approved for options trading. Furthermore, proposed Rules 1102–1105 require that the option rules pertaining to suitability, discretionary account trading, supervision of accounts and customer complaints be applied to warrants.

Proposed Rule 1106 requires approval by a Compliance Registered Options Principal of all advertisements, sales literature and educational material issued by a member organization pertaining to warrants. The rule further requires Exchange approval of all advertisements and educational materials pertaining to warrants.

Proposed Rule 1107 provides that position limits for stock index warrants on the same index with original issue prices of ten dollars or less will be fifteen million warrants covering all such issues. In addition, with respect to warrants on the Standard & Poor's MidCap 400 Index, the position limit will be seven and one half million warrants covering all such issues, provided the original issue prices of the warrants are not greater than ten dollars. The rule provides that warrants with an original issue price of greater than ten dollars will be weighted more heavily than warrants with an original issue price of ten dollars or less in calculating position limits.[16] The rule also gives the Exchange the authority to require the liquidation of a position in stock index warrants that is in excess of the position limits set forth in the rule, and Commentary V to the rule provides procedures for allowing limited exceptions to the position limits.

Proposed Rule 1108 provides for exercise limits on stock index warrants analogous to those found in stock index options and states that such limits are distinct from any exercise limits that may be imposed by the issuers of stock index warrants. Accordingly, no member may exercise a long position in warrants over a five consecutive day period in excess of the permissible position limit.

In order to facilitate its review of compliance with position and exercise limits, the Exchange has proposed Rule 1110 which establishes reporting requirements for large warrant positions. Under the terms of the Rule, members will be required to file a report with the Exchange whenever any account in which the member has an interest has established an aggregate position of 100,000 warrants overlying the same index, currency or currency index. For purposes of this rule, the Exchange proposes that long positions inputs be combined with short positions in call warrants, and that short positions inputs be combined with long positions in call warrants.[17] Finally, proposed Rule 1109 requires that the trading halt provisions in Rule 918C(b) shall be applied to the trading of stock index warrants.

Upon Commission approval of the foregoing rule amendments, the Exchange proposes that it will only file rule changes for specific stock index warrant issuances where there is no corresponding option or warrant on the same underlying stock index already listed on a national securities exchange or included for quotation on NASDAQ. Accordingly, when a listed option overlies a particular broad based index, the Exchange proposes it be allowed to list warrants on that index without further Commission review and approval pursuant to Section 19(b) of the Act, as long as the listing complies with the warrant listing standards as approved in this Order.[18]

III. Comments Received

The Commission received one letter in response to its request for comments on the Amex proposal.[19] The Comment Letter was generally supportive of the Amex's proposal, however, it recommended several changes in the proposed regulatory structure applicable to stock index, currency and currency index warrants. The Comment Letter was submitted on behalf of the Firms, all of whom are represented to be major participants in the issuance, underwriting and trading of warrants. Because the proposed regulatory regime applicable to warrants will, to some extent, be based upon the rules governing standardized options, the

---

[12] *See* Amendment No. 3. Consistent with the treatment of options on foreign currencies, warrants on the Canadian Dollar will be subject to a one percent "add-on". The margin required on any other foreign currency would be subject to approval by the Commission. *See infra* note 28.

[13] *See infra* note 28.

[14] Three months prior to the expiration of the pilot program, the Exchange will submit a report to SEC staff analyzing the price relationship between listed warrants and options on similar stock indexes. *See* Amendment No. 1. The Exchange has also requested no action relief from the Commission in order to permit certain short positions in stock index call and put warrants to be treated as covered for margin purposes.

[15] *See* Amendment No. 1. The Exchange notes that this treatment is consistent with the rules that allow for the use of escrow receipts to cover a short call position in broad-based stock index options.

[16] For example, if an investor held 100,000 warrants based upon the Standard & Poor's 500 Index offered originally at $20 per warrant, the size of this position for the purpose of calculating position limits would be 200,000.

[17] *See* Amendment Nos. 1 and 3.

[18] *See infra* note 28.

[19] See supra note 4. The Seward & Kissel Letter was submitted on behalf of PaineWebber Inc., Bear, Stearns & Co. Inc., Lehman Brothers Inc., Smith Barney Inc., Salomon Brothers Inc., Morgan Stanley & Co. Inc., and Hambrecht & Quist Inc. (collectively the "Firms").

Comment Letter states that the Firms comments are driven, in part, by the fact that fundamental differences exist between warrants and standardized options which necessitate disparate regulatory treatment in certain situations.[20]

First, the Comment Letter suggested amending the Issuer Listing Standards to eliminate the 25% test or, in the alternative, to adopt hedging and/or netting standards designed to more accurately reflect issuer-specific risk.[21] Because warrants are sold by means of a registration statement, the Firms believe that adequate disclosure of the amount of an issuer's outstanding securities could be included in the prospectus. Furthermore, the Comment Letter points out that issuers of warrants are traditionally subject to outside evaluation by certain credit rating agencies, which should assist investors in determining undue issuer credit risk. Finally, the Firms do not believe the 25% test bears any resemblance to an issuer's risk exposure since exposure fluctuates with market changes at any given time and also because the proposal provides no recognition for offsetting hedges or for warrants subject to netting.

In response to the Seward & Kissel Letter's comments respecting issuer listings standards, the Amex amended the filing to add an alternative issuer qualification criteria.[22] Under the new criteria, an issuer will be required to either: (a) have a minimum tangible net worth of $250 million; or (b) meet the existing criteria (*i.e.*, tangible net worth of $150 million and meet the 25% test).

The Comment Letter also recommended allowing the use of p.m. settlement for all American-style warrants exercised anytime except 48 hours prior to expiration, at which time a.m. settlement would be required. According to the Comment Letter unlike with listed options (where OCC is the issuer and runs a balanced book), a warrant issuer must hedge its exposure to maintain offsetting positions. Upon early exercise of the warrants, the issuer that has hedged its exposure will have to take action to "unwind" the portion of its hedge relating to the exercised warrants. The Firms believe that requiring a.m. settlement on the first day after an investor exercises the warrant will place additional market risk upon them due to the difficulty in managing the hedge. This increased hedging cost, the Firm's argue, could result in a higher issuance price for the warrant or could require that the warrant settlement value date be postponed an additional day, with warrant holders bearing additional market risk during this period.

In response to the Comment Letter, the Amex amended its filing to include a provision permitting p.m. settlement for stock index warrants except for a short period before expiration.[23] Under the terms of the amendment, stock index warrants for which 25% or more of the value of the underlying index is represented by securities that are traded primarily in the U.S. shall, by their terms, provide that, on valuation date, as well as for the two business days prior to valuation date, the value of the stocks traded primarily in the U.S. which underlie such warrants shall be determined by reference to the opening prices of such underlying U.S. securities. For example, if the valuation date for an issuance of index warrants occurs on a Friday, a.m. settlement must be utilized for warrants that are valued on the preceding Wednesday or Thursday, as well as on the valuation date.

Third, the Comment Letter recommended creating a special category of "warrant eligible" customers (separate and distinct from options eligibility criteria), who are authorized to trade warrants even if not approved to trade options. The Firms believe it is inappropriate to apply an options regulatory regime to warrants and that doing so may prevent institutional customers who are not permitted to purchase options products, yet who nevertheless meet all of the options eligibility criteria, from purchasing warrants. In this regard, the Firms propose to create a "warrant eligible" category with standards mimicking those currently required for options approved accounts. As such, "warrant-approved" accounts could purchase warrants, however, they could not purchase options or other products requiring options account approval. The Amex did not amend its filing in response to this comment.

Fourth, the Comment Letter urges the adoption of a rule permitting firms to approve for warrant trading those accounts managed by an investment adviser ("IA") based upon the IA's representation concerning the eligibility status of its customers to engage in warrant trading, even if the underlying documentation relating to the managed accounts is not provided to the brokerage firms. The Amex has amended its proposal to allow member firms to accept the representation of an investment adviser registered under the Investment Advisers Act of 1940 concerning the eligibility status of its customers to engage in warrant trading, even if the underlying documentation relating to the managed accounts is not provided to the member firm, where the managed account is for an institutional customer or the investment advisor account represents the collective investment of a number of persons. The Amex states that this will conform the handling of warrant accounts to the current practice with respect to listed options accounts.[24]

Finally, the Comment Letter addressed the proposed position limits applicable to warrants. Specifically, the Comment Letter noted that position limits for warrants would be set at levels that are approximately 75% of that allowed for similar broad-based indexes. The Comment Letter recommended establishing position limits for warrants that were equivalent to those established for listed options, allowing a hedge exemption similar to listed option procedures and providing a mechanism for specific waivers or exemptions of warrant position limits for hedgers, market-makers and broker-dealers comparable to the procedures in place for listed options. The Amex did not amend its filing in response to this comment.

IV. Discussion

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of Section 6(b)(5).[25] Specifically, the Commission finds that the Exchange's proposal to establish uniform listing standards for broad-based stock index, currency and currency index warrants strikes a reasonable balance between the Commission's mandates under Section 6(b)(5) to remove impediments to and perfect the mechanism of a free and open market and a national market system, while protecting investors and the public interest. In addition, the Amex's proposed listing standards for warrants are consistent with the Section 6(b)(5) requirements that rules of an exchange be designed to prevent fraudulent and manipulative acts, to promote just and equitable principles of trade, and are not designed to permit unfair discrimination among issuers.

---

[20] The Comment Letter lists several differences which it perceives exist between warrants and standardized options. Chief among these are: (1) Warrants are separately registered, unsecured obligations of their issuer while options are issued and guaranteed by the Options Clearing Corp. ("OCC"); (2) during the prospectus delivery period, warrant purchasers receive a product-specific prospectus while options customers receive an options disclosure document ("ODD") at the time the account is opened; (3) each warrant creates a fixed number of outstanding warrants while there is theoretically no limit to the number of options that may be issued by OCC; and (4) warrants are traded on an exchange in a manner similar to stocks which, therefore, translates into superior price transparency than for listed options.

[21] As originally proposed, an issuer would have been required to have a tangible net worth of at least $150 million and the aggregate original issue price of all of a particular issuer's warrant offerings (combined with such offerings by its affiliates) that are listed on a national securities exchange or that are national market securities traded through NASDAQ may not exceed 25% of the issuer's net worth ("25% test).

[22] *See* Amendment No. 1.

[23] *See* Amendments No. 3 and 5.

[24] *See* Amendment No. 1.

[25] 15 U.S.C. § 78f(b)(5) (1982).

The Amex's proposed generic listing standards for broadbased stock index warrants, currency and currency indexes set forth a regulatory framework for the listing of such products.[26] Generally, listing standards serve as a means for an exchange to screen issuers and to provide listed status only to *bona fide* issuances that will have sufficient public float, investor base, and trading interest to ensure that the market has the depth and liquidity necessary to maintain fair and orderly markets. Adequate standards are especially important for warrant issuances given the leveraged and contingent liability they represent. Once a security has been approved for initial listing, maintenance criteria allow an exchange to monitor the status and trading characteristics of that issue to ensure that it continues to meet the exchange's standards for market depth and liquidity so that fair and orderly markets can be maintained.

In reviewing listing standards for derivative-based products, the Commission also must ensure that the regulatory requirements provide for adequate trading rules, sales practice requirements, margin requirements, position and exercise limits and surveillance procedures. These rules minimize the potential for manipulation and help to ensure that derivatively-priced products will not have a negative market impact. In addition, these standards should address the special risks to customers arising from the derivative products.[27] For the reasons discussed below, the Commission believes the Amex's proposal will provide it with significant flexibility to list index, currency and currency index warrants, without compromising the effectiveness of the Exchange's listing standards or regulatory program for such products.[28]

A. Issuer Listing Standards and Product Design

As a general matter, the Commission believes that the trading of warrants on a stock index, currency or currency index permits investors to participate in the price movements of the underlying assets, and allows investors holding positions in some or all of such assets to hedge the risks associated with their portfolios. The Commission further believes that trading warrants on a stock index, currency or currency index provides investors with an important trading and hedging mechanism that is designed to reflect accurately the overall movement of the component securities.

Warrants, unlike standardized options, however, do not have a clearinghouse guarantee but are instead dependent upon the individual credit of the issuer. This heightens the possibility that an exerciser of warrants may not be able to receive full cash settlement upon exercise. This additional credit risk, to some extent, is reduced by the Exchange's issuer listing standards that require an issuer to have either; (a) a minimum tangible net worth of $250 million; or (b) a minimum tangible net worth of $150 million, provided that the issuer does not have (including as a result of the proposed issuance) issued outstanding warrants where the aggregate original issue price of all such stock index, currency and currency index warrant offerings (or affiliates) that are listed on a national securities exchange or traded through the facilities of NASDAQ is in excess of 25% of the warrant issuer's net worth. Furthermore, financial information regarding the issuers of warrants will be disclosed or incorporated in the prospectus accompanying the offering of the warrants. Moreover, the alternative test addresses the Comment Letter's concerns on the 25% standard.

The Amex's proposal will provide issuers flexibility by allowing them to utilize either a.m. or p.m. settlement, provided, however, domestic index warrants (*i.e.*, warrants based on indexes for which 25% or more of the index value is represented by securities traded primarily in the U.S.) ("domestic index warrants") are required to utilize a.m. settlement for expiring warrants as well as during the last two business days prior to valuation date.[29] The Commission continues to believe that a.m. settlement significantly improves the ability of the market to alleviate and accommodate large and potentially destabilizing order imbalances associated with the unwinding of index-related positions. Nevertheless, in accordance with the Comment Letter's suggestions, the use of p.m. settlement except during the last two business days prior to a domestic index warrant's valuation date, as well as the valuation date, strikes a reasonable balance between ameliorating the price effects associated with expirations of derivative index products and providing issuers with flexibility in designing their products.[30] In this context, the Commission notes that unlike standardized index options whose settlement times are relatively uniform, index warrants are issuer-based products, whose terms are individually set by the issuer. In addition, while options may have unlimited open interest, the number of warrants on a given index is fixed at the time of issuance. Accordingly, it is not certain that there will be a significant number of warrants in indexes with similar components expiring on the same day. This may reduce the pressure from liquidation of warrant hedges at

---

[26] The Commission notes that warrants issued prior to this approval order will continue to be governed by the rules applicable to them at the time of their listing.

[27] Pursuant to Section 6(b)(5) of the Act, the Commission is required to find, among other things, that trading in warrants will serve to protect investors and contribute to the maintenance of fair and orderly markets. In this regard, the Commission must predicate approval of any new derivative product upon a finding that the introduction of such derivative instrument is in the public interest. Such a finding would be difficult for a derivative instrument that served no hedging or other economic function, because any benefits that might be derived by market participants likely would be outweighed by the potential for manipulation, diminished public confidence in the integrity of the markets, and other valid regulatory concerns. As discussed below, the Commission believes warrants will serve an economic purpose by providing an alternative product that will allow investors to participate in the price movements of the underlying securities in addition to allowing investors holding positions in some or all of such securities to hedge the risks associated with their portfolios.

[28] Issuances of warrants overlying a single currency may currently be listed for trading without a rule filing provided that the underlying currency is one of the original seven foreign currencies approved for options trading: the Australian Dollar, British Pound, Canadian Dollar, French Franc, German Mark, Japanese Yen, Swiss Franc and European Currency Unit. Issuances of currency warrants overlying any other foreign currency would require a rule filing pursuant to Section 19(b) of the Act. The Commission notes that currency index warrants may only be established without a further rule filing upon an index that has been previously approved by the Commission pursuant to a Section 19(b) filing. To date, the only currency index approved pursuant to Section 19(b) is an equal-weighted index comprised of the British Pound, Japanese Yen and German Deutsche Mark. *See* Securities Exchange Act Release No. 31627 (Dec. 21, 1992), 57 FR 62399 (Dec. 30, 1992). Accordingly, any other currency index (as well as a broad-based stock index) not previously approved by the Commission would require approval pursuant to Section 19(b).

[29] Currency and currency index warrants are not limited to a.m. or p.m. settlement.

[30] Foreign stock market based index warrants may utilize p.m. settlement throughout their duration.

settlement. Nevertheless, the Commission expects the Exchange to monitor this issue and, should significant market effects occur as a result of early exercises from p.m. settled index warrants, would expect it to make appropriate changes including potentially limiting the number of index warrants with p.m. settlement.

B. Customer Protection

Due to their derivative and leveraged nature, and the fact that they are a wasting asset, many of the risks of trading in warrants are similar to the risks of trading standardized options. Accordingly, the Amex has proposed to apply its options customer protection rules to warrants. In particular, the Commission notes that warrants may only be sold to options approved accounts capable of evaluating and bearing the risks associated with trading in these instruments, in accordance with Amex Rule 921, and that adequate disclosure of the risks of these products must be made to investors.[31] In addition, the Amex will apply the options rules for suitability, discretionary accounts, supervision of accounts and customer complaints to transactions in warrants. By imposing the special suitability and disclosure requirements noted above, the Commission believes the Amex has addressed adequately several of the potential customer protection concerns that could arise from the options-like nature of warrants.

The ODD, which all options approved accounts must receive, generally explains the characteristics and risks of standardized options products. Although many of the risks to the holder of an index warrant and option are substantially similar, however, because warrants are issuer-based products, some of the risks, such as the lack of a clearinghouse guarantee and certain terms for index warrants, are different. The Amex has adequately addressed this issue by proposing to distribute a circular to its members that will call attention to the specific risks associated with stock index, currency and currency index warrants that should be highlighted to potential investors. In addition, the issuer listing guidelines described above will ensure that only substantial companies capable of meeting their warrant obligations will be eligible to issue warrants. These requirements will help to address, to a certain extent, the lack of a clearinghouse guarantee for index warrants. Finally, warrant purchasers will receive a prospectus during the prospectus delivery period. The Commission believes that this will ensure that certain information about the particular issuance and issuer is publicly available.

As noted above, the Comment Letter indicates that applying the options disclosure framework to warrants is inappropriate. However, the Commission believes that the combined approach of making available general derivative product information (the ODD), product specific information (the Exchange circular), and issuer specific information (the prospectus) should provide an effective disclosure mechanism for these products.

At this time, the Commission does not agree with the proposal contained in the Comment Letter to create a special "warrant eligible" classification of purchasers. As noted above, index, currency and currency index warrants are very similar to standardized options. They are so similar that a customer precluded from trading options should not avoid the restriction indirectly by being designated by Exchange rules as eligible for stock index, currency or currency index warrants. Nevertheless, as the range of exchange-traded derivative products increases, the SROs might consider in the future as to whether a new derivatives eligibility classification is appropriate.

C. Surveillance

In evaluating proposed rule changes to list derivative instruments, the Commission considers the degree to which the market listing the derivative product has the ability to conduct adequate surveillance. In this regard the Commission notes that the Exchange has developed adequate surveillance procedures for the trading of index and currency warrants. First, new issues of currency warrants will be subject to the Amex's existing surveillance procedures applicable to foreign currency warrants, which the Commission previously has found to be adequate to surveil for manipulation and other abuses involving the warrant market and the underlying foreign currencies.[32]

Second, the Exchange has developed enhanced surveillance procedures to apply to domestic stock index warrants which the Commission believes are adequate to surveil for manipulation and other abuses involving the warrant market and component securities.[33] Among these enhanced surveillance procedures, the Commission notes that issuers will be required to report to the Exchange on settlement date the number and value of domestic index warrants subject to early exercise the previous day. The Commission believes that this information will aid the Amex in its surveillance capacity and help it to detect and deter market manipulation and other trading abuses.

Third, the Exchange has developed adequate surveillance procedures to apply to foreign stock index warrants (*i.e.*, less than 25% of the index value is derived from stocks traded primarily in the U.S.).[34] The Commission believes that the ability to obtain information regarding trading in the stocks underlying an index warrant is important to detect and deter market manipulation and other trading abuses. Accordingly, the Commission generally requires that there be a surveillance sharing agreement [35] in place between an exchange listing or trading a derivative product and the exchange(s) trading the stocks underlying the derivative contract that specifically enables the relevant markets to surveil trading in the derivative product and its underlying stocks.[36] Such agreements provide a necessary deterrent to manipulation because they facilitate the availability of information needed to fully investigate a potential manipulation if it were to occur.[37] In this regard, the Amex will require that no more than 20% of an Index's weight may be comprised (upon issuance and thereafter) of foreign securities (or ADRs thereon) that do not satisfy one of the following tests: (1) The Exchange has in place an effective surveillance agreement[38] with the primary exchange in the home country in which the security underlying the ADR is traded; or (2) meets an existing alternative standard available for standardized options trading (*e.g.*, satisfy the 50% U.S. trading volume test).[39] The Commission believes that this standard will ensure that index warrants are not listed upon foreign indexes whose underlying securities trade on exchanges with whom the Amex has no surveillance sharing agreement.

---

[31] Pursuant to Amex Rule 921, all options approved accounts must receive an ODD, which discusses the characteristic and risks of standardized options.

[32] *See* Securities Exchange Act Release No. 24555 (June 5, 1987), 52 FR 22570 (June 12, 1987), and Securities Exchange Act Release No. 26152 (Oct. 3, 1988), 53 FR 39832 (Oct. 12, 1988). The Commission notes that these surveillance procedures only apply to the issuance of warrants overlying one of the approved foreign currencies. *See supra* note 28. The issuance of warrants upon any other foreign currency would necessitate a Section 19(b) rule filing which, among other things, details applicable surveillance procedures.

[33] In addition, the Commission notes that issuers will be required to report to the Exchange all trades to unwind a warrant hedge that are effected as a result of the early exercise of domestic index warrants. This will enable the Exchange to monitor the unwinding activity to determine if it was effected in a manner that violates Exchange or Commission rules.

[34] Each prior issuance of a foreign stock market based index warrant is subject to specific surveillance procedures. These procedures are generally tailored to the individual warrant issuance and are based upon several factors involving the primary foreign market, including the existence of surveillance or information sharing agreements.

[35] The Commission believes that a surveillance sharing agreement should provide the parties with the ability to obtain information necessary to detect and deter market manipulation and other trading abuses. Consequently, the Commission generally requires that a surveillance sharing agreement require that the parties to the agreement provide each other, upon request, information about market trading activity, clearing activity, and the identity of the ultimate purchasers for securities. *See e.g.*, Securities Exchange Act Release No. 31529 (Nov. 27, 1992).

[36] The ability to obtain relevant surveillance information, including, among other things, the identity of the ultimate purchasers and sellers of securities, is an essential and necessary component of a comprehensive surveillance sharing agreement.

D. Market Impact

The Commission believes that the listing and trading of index warrants, currency warrants and currency index warrants will not adversely affect the U.S. securities markets or foreign currency markets. First, with respect to currency and currency index warrants, the Commission notes that the interbank foreign currency spot market is an extremely large, diverse market comprised of banks and other financial institutions worldwide. That market is supplemented by equally deep and liquid markets for standardized options and futures on foreign currencies and options on those futures. An active over-the-counter market also exists in options, forwards and swaps for foreign currencies. This minimizes the possibility that Exchange listed warrants would be used to manipulate the spot currency markets. In addition, the surveillance procedures for these products should allow the Exchange to detect and deter potential manipulation involving currency warrants and currency index warrants.

Second, with respect to index warrants, the Commission notes that warrants may only be established upon indexes the Commission has previously determined to be broad-based in the context of index options or warrant trading. As part of its review of a proposal to list an index derivative product, the Commission must find that the trading of index options or warrants will serve to protect investors, promote the public interest, and contribute to the maintenance of fair and orderly markets. Accordingly, the Commission does not believe that the issuance of index warrants upon previously approved broad based stock index options or warrants will adversely impact the underlying component securities. In addition, because index warrants are issued by various individual issuers who set their own terms, it is likely that expirations among similar index products will be varied, thereby reducing the likelihood that unwinding hedge activities would adversely affect the underlying cash market. Finally, as discussed above, the Commission believes the Amex's enhanced surveillance procedures applicable to stock index warrants are adequate to surveil for manipulation and other abuses involving the warrant market, component securities and issuer hedge unwinding transactions.

Third, the Exchange has proposed margin levels for stock index and currency warrants equivalent to those in place for stock index and currency options. The Commission believes these requirements will provide adequate customer margin levels sufficient to account for the potential volatility of these products. In addition, options margin treatment is appropriate given the options-like market risk posed by warrants. The Commission notes that the customer spread margin treatment applicable to warrants is subject to a one year pilot program. This will allow the Exchange to analyze the pricing relationships between listed options and warrants on the same index in order to determine whether to revise or approve on a permanent basis the proposed spread margin rules.[40]

Fourth, the Amex has established reasonable position and exercise limits for stock index warrants, which will serve to minimize potential manipulation and other market impact concerns.[41] Contrary to the views expressed in the Comment Letter, the Commission believes that in the absence of trading experience with domestic index warrants, it would be imprudent to establish position limits for positions greater than those currently applicable to domestic stock index options on the same index.[42]

V. Conclusion

The Commission believes that the adoption of these uniform listing and trading standards covering index, currency and currency index warrants will provide an appropriate regulatory framework for these products. These standards will also benefit the Exchange by providing them with greater flexibility in structuring warrant issuances and a more expedient process for listing warrants without further Commission review pursuant to Section 19(b) of the Act. As noted above, additional Commission review of specific warrant issuances will generally only be required for warrants overlying any non-approved broad-based index or a non-approved currency or currency index. If Commission review of a particular warrant issuance is required, the Commission expects that, to the extent that the warrant issuance complies with the uniform criteria adopted herein, its review should generally be limited to issues concerning the newly proposed index. This should help ensure that such additional Commission review could be completed in a prompt manner without causing any unnecessary delay in listing new warrant products.

The Commission finds good cause for approving Amendments No. 1, 2, 3, 4 and 5 to the proposed rule change prior to the thirtieth day after the date of publication of notice of filing thereof in the **Federal Register** for the following reasons. As discussed below, the changes are either (1) minor and technical in nature; (2) responsive to the Comment Letter; (3) designed to conform to warrant proposals from other markets; or (4) modifications to Exchange surveillance procedures. Accordingly, the amendments do not raise new significant regulatory issues or are responsive to prior comments. In order to enable the Exchange to list new index, currency or currency index warrants as soon as possible, the Commission believes it is necessary and appropriate to approve the amendments on an accelerated basis.

Amendment No. 1 makes several changes to the filing which are designed to bring it into conformity with the other options exchanges. It also revises Section 106 of the Company Guide, Currency and Index Warrants, in several respects to provide uniform issuer listing standards. The first two changes permit the use of p.m. settlement for domestic index warrants (except during the last 48 hours preceding valuation date) and provide an alternative issuer listing qualification criteria (as discussed above under *Issuer Listing Standards and Product Design*). The Commission notes that these changes were made in response to comments received from the Seward & Kissell Letter and further believes these changes provide added flexibility to issuers without compromising investor protection concerns.

Amendment No. 1 also revises Section 106 in two other respects: by limiting the number of foreign securities that may comprise an underlying stock index and by adding a provision requiring an issuer to notify the listing Exchange of early exercises of domestic index warrants. Taken together, the Commission believes these changes further strengthen the issuer listing standards and the Exchange's surveillance procedures to the benefit of warrant investors.

Amendment No. 1 also revises Rule 462 to provide that the proposed spread and straddle margin treatment for stock index warrants will be effected as part of a one year pilot program, and to provide that escrow receipts will be accepted to cover short positions in stock index warrants. The Commission notes that these changes conform the margin treatment afforded options and warrants and provide a basis for evaluating pricing correlations between warrants and options overlying the same index, currency or currency index.

Finally, Amendment No. 1 provides that the Exchange will distribute an information circular to its members upon new warrant listings and that it will permit member firms to accept an IA's representation concerning the options eligibility status of its customers, as described above. The Commission notes that both of these practices are consistent with the treatment of options and, therefore, raise no new or unique regulatory issues. Accordingly for the reasons discussed above relating to each proposed revision of the Amendment, the Commission believes it is appropriate to approve amendment No. 1 to the Exchange's proposal on an accelerated basis.

Amendment No. 2 primarily addresses surveillance related matters. In particular, it provides that issuers must report all hedge unwinding transactions related to the early exercise of domestic index warrants to the listing exchange by the business day following trade date ("T+1").[43] Also, the Amendment requires issuers to notify the listing exchange of any early exercises of index warrants by 4:30 p.m. (New York time) on settlement date for the warrants. Amendment No. 2 also makes minor changes to Rule 462 to clarify which currencies are subject to a four percent "add-on" for margin purposes. The Commission believes these changes to the Amex's surveillance procedures strengthen the Exchange's monitoring of index warrants. Furthermore, the Commission believes this change to Rule 462 is minor and that it does not raise any new or unique regulatory issues. Accordingly, the Commission believes it is appropriate to approve Amendment No. 2 on an accelerated basis.

Amendment No. 3 to the proposal clarifies several issues relating to a.m. settlement, currency index warrant margin, previously issued warrants and position reporting for currency warrants. First, the Amendment clarifies in Amex Rule 106(e) that a.m. settlement will be used during the 48 hour period prior to expiration of index warrants. The Commission notes that this change simply codifies a provision the Amex previously agreed to in Amendment No. 2.[44] Second, the Amendment clarifies that the applicable margin level for currency index warrants will be a percentage as specified by the exchange and approved by the Commission. The Commission notes that this revision is consistent with the treatment afforded currency index options, where margin levels are established on a case by case basis. Third, the Amendment clarifies that warrants issued prior to the approval of these uniform listing and trading guidelines will continue to be subject to the rules applicable to them at the time of their listing. The Commission believes this "grandfather clause" ensures that the rules applicable to previously issued warrants will not change prior to their expiration, and therefore, that the establishment of uniform rules will have little impact on their pricing. Finally, the Amendment establishes that currency and currency index warrants will be subject to the same reporting levels as stock index warrants. The Commission notes that this revision helps to provide uniformity in the regulatory treatment of warrants. Furthermore, because currency and currency index warrants are not subject to position and exercise limits, the Commission believes that requiring investors to report to the Exchange when their holdings exceed specified levels should aid the Exchange in its monitoring for potential trading abuses involving currency and currency index warrants. Accordingly, the Commission believes it is appropriate to approve Amendment No. 3 on an accelerated basis.

Amendment No. 4 deletes a transaction reporting requirement which will be revised and incorporated into the Exchange's surveillance procedures and also makes other minor changes. As such, the Commission does not believe the Amendment raises any new or unique regulatory issues. Accordingly, the Commission believes it is appropriate to approve Amendment No. 4 on an accelerated basis.

Amendment No. 5 clarifies the settlement procedures for index warrants which are exercised prior to expiration. Specifically, the Amendment clarifies that a.m. settlement will be required on valuation date as well as during the last two business days prior to an index warrant's valuation date. As discussed above, the Commission believes that the use of a.m. settlement during this period will help to ameliorate any potential price effects associated with expirations of derivative index products. Accordingly, the Commission believes it is appropriate to approve Amendment No. 5 on an accelerated basis. Therefore, the Commission believes it is consistent with Sections 6(b)(5) and 19(b)(2) of the Act to approve Amendments No. 1, 2, 3, 4 and 5 to the Amex's proposal on an accelerated basis.

VI. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning Amendments No 1, 2, 3, 4 and 5. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, N.W., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by September 28, 1995.

---

[37] In the context of domestic index warrants, the Commission notes that the U.S. exchanges are members of the Intermarket Surveillance Group ("ISG"), which was formed to, among other things, coordinate more effectively surveillance and investigative information sharing arrangements in the stock and options markets. *See* Intermarket Surveillance Group Agreement, July 14, 1983. The most recent amendment to the ISG Agreement, which incorporates the original agreement and all the amendments made thereafter, was signed by ISG members on January 29, 1990. *See* Second Amendment to the ISG Agreement.

[38] *See supra* note 35.

[39] *See* Securities Exchange Act Release Nos. 31529, 57 FR 57248 (Dec. 3, 1992) and 33555, 59 FR 5619 (Feb. 7, 1994).

[40] The Commission notes that the margin levels for currency index warrants will be set at a level determined by the Exchange and approved by the SEC. *See* Amendment No. 4. Issuances of warrants listed prior to the approval of this order will continue to apply the margin level applicable to them at the time of their listing.

[41] The Commission notes that there are no position or exercise limits applicable to currency or currency index warrants, although reporting requirements do apply. Nevertheless, the Commission may review the need to establish foreign currency position limits if the size of the currency or currency index warrant market increases significantly.

[42] With respect to the Comment Letter's suggestion that a hedge exemption rule be established in order to allow participants to readily acquire exemptions from the Exchange as needed, the Commission does not believe that such an approach is appropriate at this time. The hedge exemption for index options was adopted after several years experience with index options trading. Until the SROs gain some experience with domestic index warrant trading, it is difficult to determine the need for a hedge exemption (*i.e.*, that speculative limits are insufficient to meet hedging needs).

[43] The Commission notes that Amendment No. 4 removes this transaction reporting requirement which will be incorporated into the Exchange's surveillance procedures.

[44] Amendment No. 5 subsequently changes the language of this provision to require a.m. settlement be used during the two business days prior to valuation date.

It therefore is ordered, pursuant to Section 19(b)(2) of the Act,[45] that the proposed rule change (SR–Amex–94–38) is approved, as amended, with the portion of the rule change relating to spread margin treatment being approved on a one year pilot program basis ending August 29, 1996.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[46]

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 95–22107 Filed 9–6–95; 8:45 am]

BILLING CODE 8010–01–M

[Release No. 34–36169; File No. SR–CBOE–94–34]

Self-Regulatory Organizations; Chicago Board Options Exchange, Inc.; Order Approving Proposed Rule and Notice of Filing and Order Granting Accelerated Approval of Amendments No. 1, 2, 3, 4 and 5 to Proposed Rule Change Relating to the Establishment of Uniform Listing and Trading Guidelines for Stock Index, Currency and Currency Index Warrants

August 29, 1995.

I. Introduction

On September 29, 1994, the Chicago Board Options Exchange, Inc. ("CBOE" or "Exchange") submitted to the Securities and Exchange Commission ("SEC" or "Commission"), pursuant to Section 19(b) of the Securities Exchange Act of 1934 ("Act"),[1] and Rule 19b–4 thereunder,[2] a proposed rule change to establish uniform rules for the listing and trading of broad-based stock index ("stock index" or "index"), currency ("currency") and currency index ("currency index") warrants (collectively "warrants"). Notice of the proposed rule change appeared in the **Federal Register** on January 9, 1995.[3] One comment letter was received in response to the proposal.[4]

The Exchange subsequently filed five Amendments to the proposal. Amendment No. 1 ("Amendment No. 1") brought several of CBOE's proposed rules and policies into conformity with those previously filed by other markets.[5] Amendment No. 2 ("Amendment No. 2") imposes a reporting requirement for positions in currency and currency index warrants.[6] Amendment No. 3 ("Amendment No. 3") addresses issues relating to settlement methodology, surveillance of issuer hedge transactions, early exercise notification and reporting requirements for index warrants.[7] Amendment No. 4 ("Amendment No. 4") addresses surveillance issues related to the trading of index warrants.[8] Amendment No. 5 clarifies the settlement procedures for index warrant which are exercised at or prior to expiration.[9] This order approves the proposal, as amended.

II. Description of the Proposal

The CBOE proposes to establish uniform rules for the listing and trading of stock index, currency and currency index warrants.[10] This filing incorporates the results of numerous communications with the Commission staff and other exchanges, including comments contained in a letter from Sharon Lawson to Joanne Moffic-Silver dated January 28, 1993 ("Lawson letter"). This filing also makes certain changes in the listing criteria for stock index and currency warrants and makes clear that certain rules applicable to currency warrants would apply equally to currency index warrants.

Exercise and Position Limits

The Exchange is proposing position limits for stock index warrants that, in general, are approximately 75%, in terms of underlying dollar value, of the current position limits for index options. Accordingly, proposed Rule 30.35(a) provides that position limits for stock index warrants on the same index with original issue prices of ten dollars or less will be fifteen million warrants covering all such issues.[11] In addition, with respect to warrants on the Russell 2000 Index, the position limit will be twelve and one half million warrants covering all such issues, provided the original issue prices of the warrants are not greater than ten dollars. The rule provides that warrants with an original issue price of greater than ten dollars will be weighted more heavily than warrants with an original issue price of ten dollars or less in calculating position limits.[12]

Proposed Rule 30.35(d) also gives the Exchange the authority to require the liquidation of a position in stock index warrants that is in excess of the position limits set forth in the rule.[13]

Proposed Rule 30.35(b) also establishes exercise limits on stock index warrants which are analogous to those found in stock index options. The rule prohibits holders from exercising, within any five consecutive business days, long positions in warrants in excess of the base position limit established in Rule 30.35(a).

In order to facilitate its review of compliance with position and exercise limits, proposed rule 30.35(d) establishes reporting requirements for large warrant positions. Under the terms of the Rule, members will be required to file a report with the Exchange whenever any account in which the member has an interest has established an aggregate position of 100,000 warrants overlying the same index, currency or currency index.[14] For purposes of this rule, the Exchange proposes that positions on the same side of the market be aggregated together (*e.g.*, long positions in puts be combined with short positions in call warrants, and short positions in puts be combined with long positions in call warrants).[15]

Margin

The Exchange's proposed margin requirements for customers having positions in index warrants, currency index warrants and currency warrants are included in proposed new Rule 30.52. In general, the proposed margin requirements for long and short positions in stock index warrants are the same as margin requirements for positions in stock index options and the margin requirements for long and short positions in currency warrants are the same as those for corresponding currency options. Thus, all purchases of warrants will require payment in full, and short sales of stock index warrants will require initial margin of: (i) 100 percent of the current value of the warrant plus (ii) 15 percent of the current value of the underlying broad stock index less the amount by which the warrant is out of the money, but with a minimum of ten percent of the index value. Short sales of currency warrants will follow the margin requirements currently applicable to listed currency options. Specifically, the Exchange proposes that short sales of warrants on the German Mark, French Franc, Swiss Franc, Japanese Yen, British Pound, Australian Dollar and European Currency Unit shall each be subject to margin level of 100% of the current market value of each such warrant plus a four percent "add-on."[16] The margin required on currency index warrants would be an amount as determined by the Exchange and approved by the Commission.[17] The Exchange also proposes that its stock index, currency and currency index warrant margin requirements be permitted offset treatment for spread and straddle positions. In this regard, the Exchange proposes that index, currency and currency index warrants may be offset with either warrants or Options Clearing Corporation ("OCC") issued options on the same index, currency or currency index, respectively. Furthermore, the Exchange has proposed that Rules 30.35(d)(i), (ii) and (iii), to the extent that such rules concern spread and straddle positions in warrants, be subject to a one year pilot basis.[18] Finally, proposed Rule 30.53(d)(iv) will permit the use of escrow receipts to cover a short position in a broad-based stock index warrant.[19]

CBOE believes that a broker-dealer carrying positions in warrants must bear in mind that special characteristics of warrants—such as pricing differences, the necessity of borrowing to make delivery on short sales, and the issuer credit risk associated with long warrants—may cause these margin requirements to be insufficient to fully cover the risk of such positions in certain circumstances, and broker-dealers must therefore be prepared to call for additional margin when appropriate. CBOE further believes that each exchange listing stock index, currency index or currency warrants should draw the attention of its member firms to this issue in connection with the adoption of these margin rules.

In accordance with the Lawson letter, the proposed rules would be applicable only to warrants issued after the effective date of this filing. Warrants issued prior to that date would remain subject to the rules in effect at the time of their listing.

Customer Protection

Modifications are proposed to Exchange Rule 30.50, Doing Business With the Public, to incorporate references to proposed new Rule 30.52. Proposed Rule 30.52(c) states that no member or member organization shall accept an order from a customer for the purchase or sale of warrants unless the customer's account has been approved for options trading pursuant to Exchange Rule 9.7. Accordingly, the Exchange will rescind Interpretation .02 to Rule 30.52, its current suitability standard applicable to warrants, which currently provides that the Exchange "recommends" that index and currency warrants only be sold to investors whose accounts have been approved for options trading. Appendix A to Chapter XXX, which is a cross-reference table to other rules of the Exchange that are applicable to securities otherwise covered in Chapter XXX, is being updated to reflect the applicability of certain options rules (*i.e.*, customer protection rules including, but not limited to, account supervision, suitability, etc.) to warrants:

Rule 4.13	Reports Related to Position Limits
Rule 4.14	Liquidation of Positions
Rule 9.2	Registration of Options Principals
Rule 9.6	Registration of Branch Offices
Rule 9.7	Account Approval Requirements
Rule 9.8	Supervision Requirements
Rule 9.9	Suitability Requirements
Rule 9.10	Discretionary Account Requirements
Rule 9.21	Requirements for Customer Communications
Rule 9.23	Record-keeping Requirements for Customer Complaints

Listing Criteria

The listing criteria for stock index warrants and currency warrants are being amended to reflect the comments contained in the Lawson letter and to make clear that they apply to currency index warrants. In particular, proposed Rule 31.5(E) (1) and (4) provide that issuers are required to have a minimum tangible net worth in excess of $250 million or, in the alternative, have a minimum tangible net worth in excess of $150 million, provided that the issuer does not have (including as a result of the proposed issuance) issued outstanding warrants where the aggregate original issue price of all such warrant offerings (combined with offerings by its affiliates) listed on a national securities exchange or that are National Market securities traded through NASDAQ exceeds 25% of the issuer's net worth.[20]

Second, proposed Rule 31.5(E)(6) requires that unexercised in-the-money warrants be automatically exercised on either the delisting date (if the issue is not listed upon another organized securities market) or upon expiration. Third, proposed Rule 31.5(E)(5) provides that for warrant offerings where U.S. stocks constitute 25% or more of the index value ("domestic index"), issuers shall use opening prices ("a.m. settlement") for U.S. stocks to determine index warrant settlement values on the final determination of settlement value date ("valuation date") as well as during the two business days prior to valuation date.[21] Fourth, Rule 31.5(E)(7) has been amended to provide that foreign country securities or American Depositary Receipts ("ADRs") thereon that are not subject to a comprehensive surveillance sharing agreement with the Exchange and that have less than 50% of their global trading volume (in dollar value) within the U.S., shall not represent more than 20% of the weight of the index.[22] Finally, the Exchange proposes to add Rule 31.5(E)(8) in order to assist in the surveillance of index warrant trading. Specifically, the Exchange will require issuers of stock index warrants to notify the Exchange of any early exercises by no later than 3:30 p.m. (Chicago time) on the day that the settlement value for the warrants is determined.[23]

[5] Letter from Janet Angstadt, Schiff Hardin & Waite, to Michael Walinskas, SEC, dated March 2, 1995.

[6] Letter from Timothy Thompson, CBOE, to Michael Walinskas, SEC, dated May 8, 1995.

[7] Letter from James R. McDaniel, Schiff Hardin & Waite, to Michael Walinskas, SEC, dated June 23, 1995.

[8] Letter from Janet Angstadt, Schiff Hardin & Waite, to Michael Walinskas, SEC, dated August 4, 1995.

[9] Letter from Janet Angstadt, Schiff Hardin & Waite, to Michael Walinskas, SEC, dated August 18, 1995.

[10] The proposed rules would apply to both American-style warrants (which may be exercised at any time prior to expiration) and European-style warrants (which may be exercised only during a specified period before expiration).

[11] *See infra* note 47.

[12] For example, if an investor held 100,000 warrants based upon the Standard & Poor's 500 Index offered originally at $20 per warrant, the size of this position for the purpose of calculating position limits would be 200,000.

[13] Proposed Rule 30.35(d) makes Rule 4.14 (Liquidation of Positions) applicable to index warrants.

[14] *See* Amendment No. 2. In the original filing, the CBOE proposed establishing a reportable limit for stock index warrants at 20,000 warrants. Amendment No. 2 extended the reporting requirement to currency and currency index warrants at a level of 100,000 warrants (on the same side of the market). Finally, Amendment No. 3 proposed raising the reporting requirement for stock index warrants from 20,000 to 100,000 warrants (on the same side of the market).

[15] *See* Amendment Nos. 2 and 3.

[16] *See* Amendment No. 3. Consistent with the treatment of options on foreign currencies, warrants on the Canadian Dollar will be subject to a one percent "add-on." The margin required on any other foreign currency would be subject to approval by the Commission. *See infra* note 34.

[17] *See infra* note 17.

[18] Three months prior to the expiration of the pilot program, the Exchange will submit a report to SEC staff analyzing the price relationship between listed warrants and options on similar stock indexes. *See* Amendment No. 1. The Exchange has also requested no-action relief from the Commission in order to permit certain short positions in stock index call and put warrants to be treated as covered for margin purposes.

[19] *See* Amendment No. 1. The Exchange notes that this treatment is consistent with the rules that allow for the use of escrow receipts to cover a short call position in broad-based stock index options.

[20] *See* Amendments No. 1 and 3. The Exchange amended this provision in response to the Seward & Kissell Letter.

Trading Halts or Suspensions

Proposed new Rule 30.36 makes the provisions in Rule 24.7 concerning trading halts or suspensions in stock index options applicable to stock index warrants.

Specific Warrant Issues

Upon Commission approval of the foregoing rule amendments, the Exchange proposes that it will only file rule changes for specific stock index warrant issuances where there is no corresponding option or warrant on the same underlying stock index already listed on a national securities exchange or included for quotation on NASDAQ. Accordingly, when a listed option overlies a particular broad based index, the Exchange proposes it be allowed to list warrants on that index without further Commission review and approval pursuant to Section 19(b) of the Act as long as the listing complies with the warrant listing standards as approved in this Order.[24] Finally, prior to trading stock index or currency warrants, the Exchange will distribute circulars to its membership providing guidance regarding member firm compliance responsibilities (including suitability recommendations) when handling transactions in warrants.

III. Comments Received

The Commission received one letter in response to its request for comments on the CBOE proposal.[25] The Comment Letter was generally supportive of the CBOE's proposal, however, it recommended several changes in the proposed regulatory structure applicable to stock index, currency and currency index warrants. The Comment Letter was submitted on behalf of the Firms, all of whom are represented to be major participants in the issuance, underwriting and trading of warrants. Because the proposed regulatory regime applicable to warrants will, to some extent, be based upon the rules governing standardized options, the Comment Letter states that the Firms' comments are driven, in part, by the fact that fundamental differences exist between warrants and standardized options which necessitate disparate regulatory treatment in certain situations.[26]

First, the Comment Letter suggested amending the issuer Listing Standards to eliminate the 25% test or, in the alternative, to adopt hedging and/or netting standards designed to more accurately reflect issuer-specific risk.[27] Because warrants are sold by means of a registration statement, the Firms believe that adequate disclosure of the amount of an issuer's outstanding securities could be included in the prospectus. Furthermore, the Comment Letter points out that issuers of warrants are traditionally subject to outside evaluation by certain credit rating agencies, which should assist investors in determining undue issuer credit risk. Finally, the Firms do not believe the 25% test bears any resemblance to an issuer's risk exposure since exposure fluctuates with market changes at any given time and also because the proposal provides no recognition for offsetting hedges or for warrants subject to netting.

In response to the Seward & Kissel Letters's comments respecting issuer listings standards, the CBOE amended the filing to add an alternative issuer qualification criteria.[28] Under the new criteria, an issuer will be required to either: (a) have a minimum tangible net worth of $250 million; or (b) meet the existing criteria (*i.e.*, tangible net worth of $150 million and meet the 25% test).

The Comment Letter also recommended allowing the use of p.m. settlement for all American-style warrants exercised anytime except 48 hours prior to expiration, at which time a.m. settlement would be required. According to the Comment Letter, unlike with listed options (where OCC is the issuer and runs a balanced book), a warrant issuer must hedge its exposure to maintain offsetting positions. Upon early exercise of the warrants, the issuer that has hedged its exposure will have to take action to "unwind" the portion of its hedge relating to the exercised warrants. The Firms believe that requiring a.m. settlement on the first day after an investor exercises the warrant will place additional market risk upon them due to the difficulty in managing the hedge. This increased hedging cost, the Firm's argue, could result in a higher issuance price for the warrant or could require that the warrant settlement value date be postponed an additional day, with warrant holders bearing additional market risk during this period.

In response to the Comment Letter, the CBOE amended its filing to include a provision permitting p.m. settlement for stock index warrants except for a short period before expiration.[29] Under the terms of the amendment, stock index warrants for which 25% or more of the value of the underlying index is represented by securities that are traded primarily in the U.S. shall, by their terms, provide that, on valuation date, as well as for the two business days prior to valuation date, the value of the stocks traded primarily in the U.S. which underlie such warrants shall be determined by reference to the opening prices of such underlying U.S. securities. For example, if the valuation date for an issuance of index warrants occurs on a Friday, a.m. settlement must be utilized for warrants that are valued on the preceding Wednesday or

---

[21] *See* Amendment No. 5. The Exchange amended its proposal in response to the Seward & Kissell Letter and notes that a warrant based upon a domestic U.S. stock index may be settled using closing prices ("p.m. settlement") for the underlying stocks at all times except for the warrants valuation day and the two business days immediately preceding valuation date.

[22] *See* Amendment No. 1.

[23] *See* Amendment No. 3.

[24] *See infra* note 34.

[25] *See supra* note 4. The Seward & Kissel Letter was submitted on behalf of PainWebber Inc., Bear, Stearns & Co. Inc., Lehman Brothers Inc., Smith Barney Inc., Salomon Brothers Inc., Morgan Stanley & Co. Inc., and Hambrecht & Quist Inc. (collectively the "Firms").

[26] The Comment Letter lists several differences which it perceives exist between warrants and standardized options. Chief among these are: (1) warrants are separately registered, unsecured obligations of their issuer while options are issued and guaranteed by the Options Clearing Corp. ("OCC"); (2) during the prospectus delivery period, warrant purchasers receive a product-specific prospectus while options customers receive an options disclosure document ("ODD") at the time the account is opened; (3) each warrant creates a fixed number of outstanding warrants while there is theoretically no limit to the number of options that may be issued by OCC; and (4) warrants are traded on an exchange in a manner similar to stocks which, therefore, translates into superior price transparency than for listed options.

[27] As originally proposed, an issuer would have been required to have a tangible net worth of at least $150 million and the aggregate original issue price of all of a particular issuer's warrant offerings (combined with such offerings by its affiliates) that are listed on a national securities exchange or that are national market securities traded through NASDAQ was not to exceed 25% of the issuer's net worth ("25% test).

[28] *See* Amendment No. 1.

[29] *See* Amendments No. 3 and 5.

Thursday, as well as on the valuation date.

Third, the Comment Letter recommended creating a special category of "warrant eligible" customers (separate and distinct from options eligibility criteria), who are authorized to trade warrants even if not approved to trade options. The Firms believe it is inappropriate to apply an options regulatory regime to warrants and that doing so may prevent institutional customers who are not permitted to purchase options products, yet who nevertheless meet all of the options eligibility criteria, from purchasing warrants. In this regard, the Firms propose to create a "warrant eligible" category with standards mimicking those currently required for options approved accounts. As such, "warrant-approved" accounts could purchase warrants, however, they could not purchase options or other products requiring options account approval. The CBOE did not amend its filing in response to this comment.

Fourth, the Comment Letter urges the adoption of a rule permitting firms to approve for warrant trading those accounts managed by an investment adviser ("IA") based upon the IA's representation concerning the eligibility status of its customers to engage in warrant trading, even if the underlying documentation relating to the managed accounts is not provided to the brokerage firms. The CBOE has amended its proposal to allow member firms to accept the representation of an investment adviser registered under the Investment Advisers Act of 1940 concerning the eligibility status of its customers to engage in warrant trading, even if the underlying documentation relating to the managed account is not provided to the member firm, where the managed account is for an institutional customer or the investment advisor account represents the collective investment of a number of persons. The CBOE states that this will conform the handling of warrant accounts to the current practice with respect to listed options accounts.[30]

Finally, the Comment Letter addressed the proposed position limits applicable to warrants. Specifically, the Comment Letter noted that position limits for warrants would be set at levels that are approximately 75% of that allowed for similar broad-based indexes. The Comment Letter recommended establishing position limits for warrants that were equivalent to those established for listed options, allowing a hedge exemption similar to listed option procedures and providing a mechanism for specific waivers or exemptions of warrant position limits for hedgers, market-makers and broker-dealers comparable to the procedures in place for listed options. The CBOE did not amend its filing in response to this comment.

IV. Discussion

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of Section 6(b)(5).[31] Specifically, the Commission finds that the Exchange's proposal to establish uniform listing standards for broad-based stock index, currency and currency index warrants strikes a reasonable balance between the Commission's mandates under Section 6(b)(5) to remove impediments to and perfect the mechanism of a free and open market and a national market system, while protecting investors and the public interest. In addition, the CBOE's proposed listing standards for warrants are consistent with the Section 6(b)(5) requirements that rules of an exchange be designed to prevent fraudulent and manipulative acts, to promote just and equitable principles of trade, and are not designed to permit unfair discrimination among issuers.

The CBOE's proposed generic listing standards for broad-based stock index warrants, currency and currency indexes set forth a regulatory framework for the listing of such products.[32] Generally, listing standards serve as a means for an exchange to screen issuers and to provide listed status only to *bona fide* issuances that will have sufficient public float, investor base, and trading interest to ensure that the market has the depth and liquidity necessary to maintain fair and orderly markets. Adequate standards are especially important for warrant issuances given the leverage and contingent liability they represent. Once a security has been approved for initial listing, maintenance criteria allow an exchange to monitor the status and trading characteristics of that issue to ensure that it continues to meet the exchange's standards for market depth and liquidity so that fair and orderly markets can be maintained.

In reviewing listing standards for derivative-based products, the Commission also must ensure that the regulatory requirements provide for adequate trading rules, sales practice requirements, margin requirements, position and exercise limits and surveillance procedures. These rules minimize the potential for manipulation and help to ensure that derivatively-priced products will not have a negative market impact. In addition, these standards should address the special risks to consumers arising from the derivative products.[33] For the reasons discussed below, the Commission believes the CBOE's proposal will provide it with significant flexibility to list index, currency and currency index warrants, without compromising the effectiveness of the Exchange's listing standards or regulatory program for such products.[34]

A. Issuer Listing Standards and Product Design

As a general matter, the Commission believes that the trading of warrants on a stock index, currency or currency index permits investors to participate in the price movements of the underlying assets, and allows investors holding positions in some or all of such assets to hedge the risks associated with their portfolios. The commission further believes that trading warrants on a stock index, currency or currency index provides investors with an important trading and hedging mechanism that is designed to reflect accurately the overall movement of the component securities.

---

[30] *See* Amendment No. 1.

[31] 15 U.S.C. 78f(b)(5) (1982).

[32] The Commission notes that warrants issued prior to this approval order will continue to be governed by the rules applicable to them at the time of their listing.

[33] Pursuant to Section 6(b)(5) of the Act, the Commission is required to find, among other things, that trading in warrants will serve to protect investors and contribute to the maintenance of fair and orderly markets. In this regard, the Commission must predicate approval of any new derivative product upon a finding that the introduction of such derivative instrument is in the public interest. Such a finding would be difficult for a derivative instrument that served no hedging or other economic function, because any benefits that might be derived by market participants likely would be outweighed by the potential for manipulation, diminished public confidence in the integrity of the markets, and other valid regulatory concerns. As discussed below, the Commission believes warrants will serve an economic purpose by providing an alternative product that will allow investors to participate in the price movements of the underlying securities in addition to allowing investors holding positions in some or all of such securities to hedge the risk associated with their portfolios.

[34] Issuances of warrants overlying a single currency may currently be listed for trading without a rule filing provided that the underlying currency is one of the original seven foreign currencies approved for options trading: the Australian Dollar, British Pound, Canadian Dollar, French Franc, German Mark, Japanese Yen, Swiss Franc and the European Currency Unit. Issuances of currency warrants overlying any other foreign currency would require a rule filing pursuant to Section 19(b) of the Act. The Commission notes that currency index warrants may only be established without a further rule filing upon an index that has been previously approved by the Commission pursuant to a Section 19(b) filing. To date, the only currency index approved pursuant to Section 19(b) is an equal-weighted index comprised of the British Pound, Japanese Yen and German Deutsche Mark. *See* Securities Exchange Act Release No. 31627 (Dec. 21, 1992), 57 FR 62399 (Dec. 30, 1992). Accordingly, anv other currency index (as well as a broad-based stock index) not previously approved by the Commission would require approval pursuant to Section 19(b).

Warrants, unlike standardized options, however, do not have a clearinghouse guarantee but are instead dependent upon the individual credit of the issuer. This heightens the possibility that an exerciser of warrants may not be able to receive full cash settlement upon exercise. This additional credit risk, to some extent, is reduced by the Exchange's issuer listing standards that require an issuer to have either; (a) a minimum tangible net worth of $250 million; or (b) a minimum tangible net worth of $150 million, provided that the issuer does not have (including as a result of the proposed issuance) issued outstanding warrants where the aggregate original issue price of all such stock index, currency or currency index warrant offerings (or affiliates) that are listed on a national securities exchange or traded through the facilities of NASDAQ is in excess of 25% of the warrant issuer's net worth. Furthermore, financial information regarding the issuers of warrants will be disclosed or incorporated in the prospectus accompanying the offering of the warrants. Moreover, the alternative test addresses the Comment Letter's concerns on the 25% standard.

The CBOE's proposal will provide issuers flexibility by allowing them to utilize either a.m. or p.m. settlement, provided, however, domestic index warrants (*i.e.*, warrants based on indexes for which 25% or more of the index value is represented by securities traded primarily in the U.S.) ("domestic index warrants") are required to utilize a.m. settlement for warrants on valuation date as well as during the last two business days prior to valuation date.[35] The Commission continues to believe that a.m. settlement significantly improves the ability of the market to alleviate and accommodate large and potentially destabilizing order imbalances associated with the unwinding of index-related positions. Nevertheless, in accordance with the Comment Letter's suggestions, the use of p.m. settlement except during the last two business days prior to a domestic index warrant's valuation date, as well as the valuation date, strikes a reasonable balance between ameliorating the price effects associated with expirations of derivative index products and providing issuers with flexibility in designing their products.[36] In this context, the Commission notes that unlike standardized index options whose settlement times are relatively uniform, index warrants are issuer-based products, whose terms are individually set by the issuer. In addition, while options may have unlimited open interest, the number of warrants on a given index is fixed at the time of issuance. Accordingly, it is not certain that there will be a significant number of warrants in indexes with similar components expiring on the same day. This may reduce the pressure from liquidation of warrant hedges at settlement. Nevertheless, the Commission expects the Exchange to monitor this issue and, should significant market effects occur as a result of early exercises from p.m. settled index warrants, would expect it to make appropriate changes including potentially limiting the number of index warrants with p.m. settlement.

B. Customer Protection

Due to their derivative and leveraged nature, and the fact that they are a wasting asset, many of the risks of trading in warrants are similar to the risks of trading standardized options. Accordingly, the CBOE has proposed to apply its options customer protection rules to warrants. In particular, the Commission notes that warrants may only be sold to options approved accounts capable of evaluating and bearing the risks associated with trading in these instruments, in accordance with CBOE Rule 9.7, and that adequate disclosure of the risks of these products must be made to investors.[37] In addition, the CBOE will apply the options rules for suitability, discretionary accounts, supervision of accounts and customer complaints to transactions in warrants. By imposing the special suitability and disclosure requirements noted above, the Commission believes the CBOE has addressed adequately several of the potential customer protection concerns that could arise from the options-like nature of warrants.

The ODD, which all options approved accounts must receive, generally explains the characteristics and risks of standardized options products. Although many of the risks to the holder of an index warrant and option are substantially similar, however, because warrants are issuer-based products, some of the risks, such as the lack of a clearinghouse guarantee and certain terms for index warrants, are different. The CBOE has adequately addressed this issue by proposing to distribute a circular to its members that will call attention to the specific risks associated with stock index, currency and currency index warrants that should be highlighted to potential investors. In addition, the issuer listing guidelines described above will ensure that only substantial companies capable of meeting their warrant obligations will be eligible to issue warrants. These requirements will help to address, to a certain extent, the lack of a clearinghouse guarantee for index warrants. Finally, warrant purchasers will receive a prospectus during the prospectus delivery period. The Commission believes that this will ensure that certain information about the particular issuance and issuer is publicly available.

As noted above, the Comment Letter indicates that applying the options disclosure framework to warrants is inappropriate. However, the Commission believes that the combined approach of making available general derivative product information (the ODD), product specific information (the Exchange circular), and issuer specific information (the prospectus) should provide an effective disclosure mechanism for these products.

At this time, the Commission does not agree with the proposal contained in the Comment Letter to create a special "warrant eligible" classification of purchasers. As noted above, index, currency and currency index warrants are very similar to standardized options. They are so similar that a customer precluded from trading options should not avoid the restriction indirectly by being designated by Exchange rules as eligible for stock index, currency or currency index warrants. Nevertheless, as the range of exchange-traded derivative products increases, the SROs might consider in the future as to whether a new derivatives eligibility classification is appropriate.

C. Surveillance

In evaluating proposed rule changes to list derivative instruments, the Commission considers the degree to which the market listing the derivative product has the ability to conduct adequate surveillance. In this regard the Commission notes that the Exchange has developed adequate surveillance procedures for the trading of index and currency warrants. First, new issues of

---

[35] Currency and currency index warrants are not limited to a.m. or p.m. settlement.

[36] Foreign stock market based index warrants may utilize p.m. settlement throughout their duration.

[37] Pursuant to CBOE Rule 9.7, all options approved accounts must receive an ODD, which discusses the characteristic and risks of standardized options.

currency warrants will be subject to the CBOE's existing surveillance procedures applicable to foreign currency warrants, which the Commission previously has found to be adequate to surveil for manipulation and other abuses involving the warrant market and the underlying foreign currencies.[38]

Second, the Exchange has developed enhanced surveillance procedures to apply to domestic stock index warrants which the Commission believes are adequate to surveil for manipulation and other abuses involving the warrant market and component securities.[39] Among these enhanced surveillance procedures, the Commission notes that issuers will be required to report to the Exchange on settlement date the number and value of domestic index warrants subject to early exercise the previous day. The Commission believes that this information will aid the CBOE in its surveillance capacity and help it to detect and deter market manipulation and other trading abuses.

Third, the Exchange had developed adequate surveillance procedures to apply to foreign stock index warrants (*i.e.*, less than 25% of the index value is derived from stocks traded primarily in the U.S.).[40] The Commission believes that the ability to obtain information regarding trading in the stocks underlying an index warrant is important to detect and deter market manipulation and other trading abuses. Accordingly, the Commission generally requires that there be a surveillance sharing agreement[41] in place between an exchange listing or trading a derivative product and the exchange(s) trading the stocks underlying the derivative contract that specifically enables the relevant markets to surveil trading in the derivative product and its underlying stocks.[42] Such agreements provide a necessary deterrent to manipulation because they facilitate the availability of information needed to fully investigate a potential manipulation if it were to occur.[43] In this regard, the CBOE will require that no more than 20% of an Index's weight may be comprised (upon issuance and thereafter) of foreign securities (or ADRs thereon) that do not satisfy one of the following tests: (1) The Exchange has in place an effective surveillance agreement[44] with the primary exchange in the home country in which the security underlying the ADR is traded; or (2) meets an existing alternative standard available for standardized options trading (*e.g.*, satisfy the 50% U.S. trading volume test).[45] The Commission believes that this standard will ensure that index warrants are not listed upon foreign indexes whose underlying securities trade on exchanges with whom the CBOE has no surveillance sharing agreement.

D. Market Impact

The Commission believes that the listing and trading of index warrants, currency warrants and currency index warrants will not adversely affect the U.S. securities markets or foreign currency markets. First, with respect to currency and currency index warrants, the Commission notes that the interbank foreign currency spot market is an extremely large, diverse market comprised of banks and other financial institutions worldwide. That market is supplemented by equally deep and liquid markets for standardized options and futures on foreign currencies and options on those futures. An active over-the-counter market also exists in options, forwards and swaps for foreign currencies. This minimizes the possibility that Exchange listed warrants would be used to manipulate the spot currency markets. In addition, the surveillance procedures for these products should allow the Exchange to detect and deter potential manipulation involving currency warrants and currency index warrants.

Second, with respect to index warrants, the Commission notes that warrants may only be established upon indexes the Commission has previously determined to be broad-based in the context of index options or warrant trading. As part of its review of a proposal to list an index derivative product, the Commission must find that the trading of index options or warrants will serve to protect investors, promote the public interest, and contribute to the maintenance of fair and orderly markets. Accordingly, the Commission does not believe that the issuance of index warrants upon previously approved broad based stock index options or warrants will adversely impact the underlying component securities. In addition, because index warrants are issued by various individual issuers who set their own terms, it is likely that expirations among similar index products will be varied, thereby reducing the likelihood that unwinding hedge activities would adversely affect the underlying cash market. Finally, as discussed above, the Commission believes the CBOE's enhanced surveillance procedures applicable to stock index warrants are adequate to surveil for manipulation and other abuses involving the warrant market, component securities and issuer hedge unwinding transactions.

Third, the Exchange has proposed margin levels for stock index and currency warrants equivalent to those in place for stock index and currency options. The Commission believes these requirements will provide adequate customer margin levels sufficient to account for the potential volatility of these products. In addition, options margin treatment is appropriate given the options-like market risk posed by warrants. The Commission notes that the customer spread margin treatment applicable to warrants is subject to a one year pilot program. This will allow the Exchange to analyze the pricing relationships between listed options and warrants on the same index in order to determine whether to revise or approve on a permanent basis the proposed spread margin rules.[46]

---

[38] *See* Securities Exchange Act Release No. 24555 (June 5, 1987), 52 FR 22570 (June 12, 1987), and Securities Exchange Act Release No. 26152 (Oct. 3, 1988), 53 FR 39832 (Oct. 12, 1988). The Commission notes that these surveillance procedures only apply to the issuance of warrants overlying one of the approved foreign currencies. *See supra* note 34. The issuance of warrants upon any other foreign currency would necessitate a Section 19(b) rule filing which, among other things, details applicable surveillance procedures.

[39] In addition, the Commission notes that issuers will be required to report to the Exchange all trades to unwind a warrant hedge that are effected as a result of the early exercise of domestic index warrants. This will enable the Exchange to monitor the unwinding activity to determine if it was effected in a manner that violates Exchange or Commission rules.

[40] Each prior issuance of a foreign stock market-based index warrant is subject to specific surveillance procedures. These procedures are generally tailored to the individual warrant issuance and are based upon several factors involving the primary foreign market, including the existence of surveillance or information sharing agreements.

[41] The Commission believes that a surveillance sharing agreement should provide the parties with the ability to obtain information necessary to detect and deter market manipulation and other trading abuses. Consequently, the Commission generally requires that a surveillance sharing agreement require that the parties to the agreement provide each other, upon request, information about market trading activity, clearing activity, and the identity of the ultimate purchasers for securities. *See e.g.*, Securities Exchange Act Release No. 31529 (Nov. 27, 1992).

[42] The ability to obtain relevant surveillance information, including, among other things, the identity of the ultimate purchasers and sellers of securities, is an essential and necessary component of a comprehensive surveillance sharing agreement.

[43] In the context of domestic index warrants, the Commission notes that the U.S. exchanges are members of the Intermarket Surveillance Group ("ISG"), which was formed to, among other things, coordinate more effectively surveillance and investigative information sharing arrangements in the stock and options markets. *See* Intermarket Surveillance Group Agreement, July 14, 1983. The most recent amendment to the ISG Agreement, which incorporates the original agreement and all the amendments made thereafter, was signed by ISG members on January 29, 1990. *See* Second Amendment to the ISG Agreement.

[44] *See supra* note 41.

[45] *See* Securities Exchange Act Release Nos. 31529, 57 FR 57248 (Dec. 3, 1992) and 33555, 59 FR 5619 (Feb. 7, 1994).

Fourth, the CBOE has established reasonable position and exercise limits for stock index warrants, which will serve to minimize potential manipulation and other market impact concerns.[47] Contrary to the views expressed in the Comment Letter, the Commission believes that in the absence of trading experience with domestic index warrants, it would be imprudent to establish position limits for positions greater than those currently applicable to domestic stock index options on the same index.[48]

V. Conclusion

The Commission believes that the adoption of these uniform listing and trading standards covering index, currency and currency index warrants will provide an appropriate regulatory framework for these products. These standards will also benefit the Exchange by providing them with greater flexibility in structuring warrant issuances and a more expedient process for listing warrants without further Commission review pursuant to Section 19(b) of the Act. As noted above, additional Commission review of specific warrant issuances will generally only be required for warrants overlying any non-approved broad-based index or a non-approved currency or currency index. If Commission review of a particular warrant issuance is required, the Commission expects that, to the extent that the warrant issuance complies with the uniform criteria adopted herein, its review should generally be limited to issues concerning the newly proposed index. This should help ensure that such additional Commission review could be completed in a prompt manner without causing any unnecessary delay in listing new warrant products.

The Commission finds good cause for approving Amendments No. 1, 2, 3, 4 and 5 to the proposed rule change prior to the thirtieth day after the date of publication of notice of filing thereof in the **Federal Register** for the following reasons. As discussed below, the changes are either (1) minor and technical in nature; (2) responsive to the Comment Letter; (3) designed to conform to warrant proposals from other markets; or (4) modifications to Exchange surveillance procedures. Accordingly, the amendments do not raise new significant regulatory issues or are responsive to prior comments. In order to enable the Exchange to list new index, currency or currency index warrants as soon as possible, the Commission believes it is necessary and appropriate to approve the amendments on an accelerated basis.

Amendment No. 1 makes several changes to the filing which are designed to bring it into conformity with the other options exchanges. First, it revises Rule 31.5(E) in several respects to provide uniform issuer listing standards. The first two changes provide an alternative issuer listing qualification criteria (as discussed above under *Issuer Listing Standards and Product Design*) and limit the number of foreign securities that may comprise an underlying stock index. The Commission notes that the first change was made in response to comments received from the Seward & Kissell Letter and further believes it will provide added flexibility to issuers without compromising investor protection concerns. The Commission believes the second change strengthens the issuer listing standards to the benefit of warrant investors.

Amendment No. 1 also revises Rule 462 to provide that the proposed spread and straddle margin treatment for stock index warrants will be effected as part of a one year pilot program, and to provide that escrow receipts will be accepted to cover short positions in stock index warrants. The Commission notes that these changes conform the margin treatment afforded options and warrants and provide a basis for evaluating pricing correlations between warrants and options overlying the same index, currency or currency index.

Finally, Amendment No. 1 provides that the Exchange will permit member firms to accept an IA's representation concerning the options eligibility status of its customers, as described above. The Commission notes this practice is consistent with the treatment of options and, therefore, raises no new or unique regulatory issues. Accordingly, for the reasons discussed above relating to each proposed revision of the Amendment, the Commission believes it is appropriate to approve Amendment No. 1, to the Exchange's proposal on an accelerated basis.

Amendment No. 2 establishes that currency and currency index warrants will be subject to reporting levels in the same manner as stock index warrants. The Commission notes that this revision helps to provide uniformity in the regulatory treatment of warrants. Furthermore, because currency and currency index warrants are not subject to position and exercise limits, the Commission believes that requiring investors to report to the Exchange when their holdings exceed specified levels should aid the Exchange in its monitoring for potential trading abuses involving currency and currency index warrants.[49] Accordingly, the Commission believes it is appropriate to approve Amendment No. 2 on an accelerated basis.

Amendment No. 3 to the proposal clarifies several issues relating to a.m. settlement, position reporting for index warrants, and other surveillance related matters. In particular, it provides that issuers must report all hedge unwinding transactions related to the early exercise of domestic index warrants to the listing exchange by the business day following trade date ("T+1").[50] Also, the Amendment requires issuers to notify the listing exchange of any early exercises of index warrants by 3:30 p.m. (Chicago time) on settlement date for the warrants. The Commission believes these changes to the CBOE's surveillance procedures strengthen the Exchange's monitoring of index warrants. Also, the Amendment clarifies that a.m. settlement will be used during the 48 hour period prior to expiration of index warrants. The Commission notes that this change simply codifies a provision the CBOE previously agreed to in Amendment No. 2.[51] Finally, the Amendment raises the reporting level requirement for index warrants from 20,000 warrants to 100,000 warrants on the same side of the market. The Commission notes that this change

---

[46] The Commission notes that the margin levels for currency index warrants will be set at a level determined by the Exchange and approved by the SEC. *See* Amendment No. 4. Issuances of warrants listed prior to the approval of this order will continue to apply the margin level applicable to them at the time of their listing.

[47] The Commission notes that there are no position or exercise limits applicable to currency or currency index warrants, although reporting requirements do apply. Nevertheless, the Commission may review the need to establish foreign currency position limits if the size of the currency or currency index warrant market increases significantly.

[48] With respect to the Comment Letter's suggestion that a hedge exemption rule be established in order to allow participants to readily acquire exemptions from the Exchange as needed, the Commission does not believe that such an approach is appropriate at this time. The hedge exemption for index options was adopted after several years experience with index options trading. Until the SROs gain some experience with domestic index warrant trading, it is difficult to determine the need for a hedge exemption (*i.e.*, that speculative limits are insufficient to meet hedging needs).

[49] Amendment No. 3 proposes to raise the reporting requirement for stock index warrants from 20,000 to 100,000 warrants.

[50] The Commission notes that Amendment No. 4 removes this transaction reporting requirement which will be incorporated into the Exchange's surveillance procedures.

[51] Amendment No. 5 subsequently changes the language of this provision to require a.m. settlement be used during the two business days prior to valuation date.

provides uniform treatment to index, currency and currency index warrants and should aid the Exchange's surveillance procedures. Accordingly, the Commission believes it is appropriate to approve Amendment No. 3 on an accelerated basis.

Amendment No. 4 deletes a transaction reporting requirement which will be revised and incorporated into the Exchange's surveillance procedures and also makes other minor changes. As such, the Commission does not believe the Amendment raises any new or unique regulatory issues. Second, the Amendment clarifies that the applicable margin level for currency index warrants will be a percentage as specified by the exchange and approved by the Commission. The Commission notes that this revision is consistent with the treatment afforded currency index options, where margin levels are established on a case by case basis. Accordingly, the Commission believes it is appropriate to approve Amendment No. 4 on an accelerated basis.

Amendment No. 5 clarifies the settlement procedures for index warrants which are exercised prior to expiration. Specifically, the Amendment clarifies that a.m. settlement will be required on valuation date as well as during the last two business days prior to an index warrant's valuation date. As discussed above, the Commission believes that the use of a.m. settlement during this period will help to ameliorate any potential price effects associated with expirations of derivative index products. Accordingly, the Commission believes it is appropriate to approve Amendment No. 5 on an accelerated basis.

Therefore, the Commission believes it is consistent with Sections 6(b)(5) and 19(b)(2) of the Act to approve Amendments No. 1, 2, 3, 4 and 5 to the CBOE's proposal on an accelerated basis.

VI. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning Amendments No. 1, 2, 3, 4 and 5. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, N.W., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by September 28, 1995.

It therefore is ordered, pursuant to Section 19(b)(2) of the Act,[52] that the proposed rule change (SR–CBOE–94–34) is approved, as amended, with the portion of the rule change relating to spread margin treatment being approved on a one year pilot program basis, ending August 29, 1996.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[53]

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 95–22108 Filed 9–6–95; 8:45 am]

BILLING CODE 8010–01–M

[Release No. 34–36171; File No. SR–NASD–55–35]

Self-Regulatory Organizations; Notice of Filing and Order Granting Accelerated Approval of Proposed Rule Change by the National Association of Securities Dealers, Inc. Relating to the Date of Implementation of the NASD's Primary Market Maker Standards and the Duration of the Pilot Program for the NASD's Short Sale Rule

August 30, 1995.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] notice is hereby given that on August 24, 1995, the National Association of Securities Dealers, Inc. ("NASD" or "Association") filed with the Securities and Exchange Commission ("Commission" or "SEC") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the NASD. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons. As discussed below, the Commission has also granted accelerated approval of the proposal.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Pursuant to Section 19(b)(1) of the Act, the NASD is proposing to delay, from September 6, 1995 to December 1, 1995, the implementation date of the Primary Market Maker standards to be used to determine the eligibility of market makers to an exemption from the NASD's short-sale rule. The NASD also proposes to extend the termination date for the pilot period to June 3, 1996 instead of March 5, 1996. The text of the proposed rule change is as follows (additions are underlined; deletions are bracketed).

RULES OF FAIR PRACTICE

ARTICLE III

Short Sale Rule

Sec. 48

* * * * *

(1)(3) *Until December 1, 1995, t*[T]he term "qualified market maker [,]" [for a period of one year after the effective date of this section,] shall mean a registered Nasdaq market maker that has maintained, without interruption, quotations in the subject security for the preceding 20 business days.

* * * * *

For purposes of this subsection, a market maker will be deemed to have maintained quotations without interruption if the market maker is registered in the security and has continued publication of quotations in the security through the Nasdaq system on a continuous basis; provided however, that if a market maker is granted an excused withdrawal pursuant to the requirements of Part VI, Schedule D to the By-Laws, the 20 business day standard will be considered uninterrupted and will be calculated without regard to the period of the excused withdrawal. *Beginning December 1, 1995,* [One year after effectiveness of this section,] the term "qualified market maker" shall mean a registered Nasdaq market maker that meets the criteria for a Primary Nasdaq Market Maker as set forth in Article III, Section 49 of the Rules of Fair Practice.

* * * * *

(m) This section shall be in effect until *June 3, 1996* [March 6, 1996].

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission. the NASD included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The NASD has prepared summaries, set forth in Sections A., B., and C. below, of the most significant aspects of such statements.

---

[52] 15 U.S.C. 78s(b)(2) (1988).

[53] 17 CFR 200.30–3(a)(12) (1994).

[1] 15 U.S.C. 78s(b)(1) (1988).

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

On June 29, 1994, the SEC approved the NASD's short-sale rule applicable to short sales in Nasdaq National Market securities on an eighteen-month pilot basis through March 5, 1996.[2] The NASD's short-sale rule prohibits member firms from effecting short sales at or below the current inside bid as disseminated by the Nasdaq system whenever that bid is lower than the previous inside bid.[3] The rule is in effect during normal domestic market hours (9:30 a.m. to 4:00 p.m., Eastern Time). As approved by the Commission, during the first year that the rule is in effect (*i.e.*, September 6, 1994 through September 5, 1995), Nasdaq market makers who maintain a quotation in a particular Nasdaq National Market security for 20 consecutive business days without interruption are exempt from the rule for short sales in that security, provided that the short sales are made in connection with bona fide market making activity (the "20-day" test). For the next six months of the 18-month pilot period (*i.e.*, September 6, 1995 through March 5, 1996), the "20-day" test for market maker exemption from the rule was scheduled to be replaced with a four-part quantitative test known as the Primary Market Maker ("PMM") Standards.

Under the PMM standards, to be eligible for an exemption from the short-sale rule, a market maker must satisfy at least two of the following four criteria: (1) The market maker must be at the best bid or best offer as shown on the Nasdaq system no less than 35 percent of the time; (2) the market maker must maintain a spread no greater than 102 percent of the average dealer spread; (3) no more than 50 percent of the market maker's quotation updates may occur without being accompanied by a trade execution of at least one unit of trading; or (4) the market maker executes 1½ times its "proportionate" volume in stock.[4] If a market maker is a PMM for a particular stock, there will be a "P" indicator next to its quote in that stock. In addition, market makers will be able to review their status as PMMs through their Nasdaq Workstation. The review period for satisfaction of the PMM performance standards is one calendar month. If a PMM has not satisfied the threshold standards after a particular review period, the PMM designation will be removed commencing on the next business day following notice of failure to comply with the standards. Market makers may requalify for designation as a PMM by satisfying the threshold standards for the next review period.

Because of unforeseen delays in the programming of the PMM standards, however, the NASD is proposing that the effective date of the PMM standards be delayed until December 1, 1995. With the proposed delay, a market maker's trading activity during the month of November will be evaluated according to the PMM standards to determine if it can retain its exemption for December 1995. Until November 30th, the 20-day test will continue to be used to evaluate market makers' eligibility for an exemption from the rule. Thus, after December 1, 1995, a "P" indicator will be delayed next to every PMM that is exempt from the rule according to the new PMM standards.

Because implementation of the PMM standards will be delayed under the proposal, the NASD is also proposing to extend the pilot period for the rule so that there is sufficient time to evaluate the effectiveness and impact of the PMM standards and the effectiveness of the short sale rule with the PMM standards in place. Specifically, the NASD proposes to extend the termination date for the pilot program until June 3, 1996.

The NASD believes the proposed rule change is consistent with Sections 15A(b)(6) and 11A(c)(1)(F) of the Act. Section 15A(b)(6) requires that the rules of a national securities association be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, and to remove impediments to and perfect the mechanism of a free and open market. Section 11A(c)(1)(F) assures equal regulation of all markets for qualified securities and all exchange members, brokers, and dealers effecting transactions in such securities. Specifically, the NASD believes that continuing the operation of the present "20-day" test until the PMM standards are in place will ensure that the liquidity provided to the market by virtue of the market maker exemption will not be diminished. In addition, the NASD believes that continuation of the "20-day" test until the PMM standards are in place would avoid the confusion in the marketplace that would result if the market maker exemption were to lapse for two months and then be reinstated. Finally, the NASD believes that extending the pilot period for the short-sale rule will enhance the quality of studies analyzing the effectiveness of the rule and help to ensure that future regulatory action taken with respect to the rule is based on a greater knowledge and understanding of the rule.

B. Self-Regulatory Organization's Statement on Burden on Competition

The NASD believes that the proposed rule change will not result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

Comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

A. By order approved such propose rule change, or

B. Institute proceedings to determine whether the proposed rule change should be disapproved.

The NASD has requested, however, that the Commission find good cause pursuant to Section 19(b)(2) for approving the proposed rule change prior to the 30th day after publication in the **Federal Register**.

---

[2] *See* Securities Exchange Act Release No. 34277 (June 29, 1994), 59 FR 34885 (July 7, 1994) ("Original Approval Order").

[3] A short sale is a sale of a security which the seller does not own or any sale which is consummated by the delivery of a security borrowed by, or for the account of, the seller.

[4] Specifically, the proportionate volume test requires a market maker to account for volume of at least one-and-a-half times its proportionate share of overall volume in the security for the review period. For example, if a security has 10 market makers, each has a proportionate share of 10 percent. Therefore, the proportionate share volume is one-and-a-half times 10, or 15 percent of overall volume.

As discussed below, the Commission finds that the proposed rule change is consistent with the requirements of the Act. Further, the Commission finds good cause for approving the proposal prior to the 30th day after the date of publication of notice of filing in the **Federal Register**. The Commission believes that accelerated approval of the proposal is appropriate in that it will permit the NASD to provide interested persons adequate notice that implementation of the PMM standards will be delayed until December 1, 1995 and that the expiration of the short sale rule, including the PMM standards, will be extended until June 3, 1996.

IV. Commission's Findings and Order Granting Accelerated Approval of Proposed Rule Change

As discussed in the Original Approval Order, the Commission believed and continues to believe that the imposition for a limited time of a short sale rule and accompanying PMM standards applicable to Nasdaq National Market securities is consistent with the requirements of Sections 15A(b)(6), 15A(b)(9) and 15A(b)(11) of the Act.[5] As discussed below, the Commission believes that delayed implementation of the PMM standards until December 1, 1995 and limited extension of the short sale rule until June 3, 1996 (rather than March 6, 1996) is consistent with the Act and the rules and regulations promulgated thereunder.[6]

Maintaining the current operation of the short sale rule until the NASD has completed and tested the systems necessary to provide market participants adequate notice of a market maker's PPM status will avoid confusion in the marketplace and assure consistency in the application of NASD rules. Moreover, extension of the short sale rule until June 3, 1996 will maintain the effectiveness of the PMM standards for six months, as envisioned by the Commission's Original Approval Order. As noted in the Original Approval Order, this will provide the Commission and the NASD the opportunity to study the effects of the rule and its exemptions and to determine whether these are practicable and necessary on an ongoing basis, or whether other alternatives would be more appropriate.

V. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. § 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of such filing will also be available for inspection and copying at the principal office of the NASD. All submissions should refer to the file number in the caption above and should be submitted by September 28, 1995.

VI. Conclusion

For the reasons stated above, the Commission believes the rule change is consistent with the Act and, therefore, has determined to approve it.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the rule change SR–NASD–95–35 be, and hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[7]

Margaret H. McFarland,

Deputy Secretary.

Self-Regulatory Organizations; New York Stock Exchange, Inc.; Order Approving Proposed Rule Change and Notice of Filing and Order Granting Accelerated Approval of Amendment No. 1 to Proposed Rule Change Relating to the Establishment of Uniform Listing and Trading Guidelines for Stock Index, Currency and Currency Index Warrants

August 29, 1995.

I. Introduction

On November 9, 1994, the New York Stock Exchange, Inc. ("NYSE" or "Exchange") submitted to the Securities and Exchange Commission ("SEC" or "Commission"), pursuant to Section 19(b) ("Section 19(b)") of the Securities Exchange Act of 1934 ("Act"),[1] and Rule 19b–4 thereunder,[2] a proposed rule change to establish uniform rules for the listing and trading of stock index ("index" or "stock index"), currency ("currency") and currency index ("currency index") warrants (collectively "warrants"). Notice of the proposed rule change appeared in the **Federal Register** on December 20, 1994.[3] One comment letter was received in response to the proposal.[4]

The Exchange subsequently filed Amendment No. 1 ("Amendment No. 1") to the proposal on August 25, 1995. Amendment No. 1 proposes to amend the filing in order to respond to the Comment Letter, the Commission's comments and to conform certain of the Exchange's proposed rules and policies to those filed by other securities markets. This order approves the proposal, as amended.

II. Description of the Proposal

The NYSE proposes to establish uniform rules for the listing and trading of stock index, currency and currency index warrants.[5] Paragraphs 703.15 (Foreign Currency Warrants and Currency Index Warrants) and 703.17 (Stock Index Warrants Listing Standards) of the *Listed Company Manual* would be amended to provide uniform listing criteria for index, currency and currency index warrants. First, warrant issuers would be expected to exceed minimum issuer listing standards. In particular, the Exchange proposes that issuers be required to have a minimum tangible net worth in excess of $250 million or, in the alternative, have a minimum tangible net worth in excess of $150 million, provided that the issuer does not have (including as a result of the proposed issuance) issued outstanding warrants where the aggregate original issue price of all such warrant offerings (combined with offerings by its affiliates) listed on a national securities exchange or that are National Market securities traded through NASDAQ exceeds 25% of the issuer's net worth.[6]

---

[1] 15 U.S.C. 78s(b)(1) (1988 & Supp. V 1993).

[2] 17 CFR § 240.19b–4 (1994).

[3] *See* Securities Exchange Act Release No. 35095 (Dec. 12, 1994), 59 FR 65552.

[4] *See* Letter from Paul M. Gottlieb, Seward & Kissell, to Jonathan G. Katz, Secretary, Commission, dated January 10, 1995 ("Comment Letter" or "Seward & Kissell Letter").

[5] The proposed rules would apply to both American-style warrants (which may be exercised at any time prior to expiration) and European-style warrants (which may only be exercised during a specified period before expiration).

Second, the proposal requires that each unexercised in-the-money warrant be automatically exercised on either the delisting date (if the issue is not listed upon another organized securities market) or upon expiration. Third, the proposal provides that for warrant offerings where U.S. stocks constitute 25% or more of the index value ("domestic index"), issuers shall use opening prices ("a.m. settlement") for U.S. stocks to determine index warrant settlement values at expiration of the warrants, as well as the two business days preceding expiration.[7] Fourth, a new paragraph has been added to Para. 703.17 of the *Listed Company Manual* to prohibit "non-U.S. component securities" from constituting more than 20 percent of the weighted value of an index stock group that underlies a stock index warrant. For purposes of this provision, the term "non-U.S. component security" means, the stock, or an American Depositary Receipt on the stock, of a company that is organized outside of the United States, where more than 50 percent of the dollar value of the global trading volume of the security occurs outside of the United States and that are not subject to a comprehensive surveillance agreement with the primary foreign market.[8] Finally, the Exchange proposes to add Rule 414(n), which is designed to assist in the surveillance of index warrant trading. Specifically, the Exchange will require issuers of stock index warrants to notify the Exchange of any early exercises. For domestic index warrants, this notice must occur by 4:30 p.m. (New York time) on the day that the settlement value for the warrants is determined.[9]

Rule 431 ("Rule 431"), the NYSE margin rule, is being amended to apply the current customer margin requirements for broad based stock index and currency options to stock index, currency and currency index warrants. Thus, all purchases of warrants will require payment in full, and short sales of stock index warrants will require initial margin of: (i) 100 percent of the current value of the warrant plus (ii) 15 percent of the current value of the underlying broad stock index less the amount by which the warrant is out of the money, but to a minimum of ten percent of the index value. Short sales of currency warrants will follow the margin requirements currently applicable to listed currency options. Specifically, the Exchange proposes that short sales of warrants on the German Mark, French Franc, Swiss Franc, Japanese Yen, British Pound, Australian Dollar and European Currency Unit shall each be subject to a margin level of 100% of the current market value of each such warrant plus a four percent "add-on." [10] The margin required on currency index warrants would be an amount as determined by the Exchange and approved by the Commission.[11] The Exchange also proposes that its stock index, currency and currency index warrant margin requirements be permitted offset treatment for spread and straddle positions. In this regard, the Exchange proposes that index, currency and currency index warrants may be offset with either warrants or Options Clearing Corporation ("OCC") issued options on the same index, currency or currency index, respectively. Furthermore, the Exchange has proposed that subsections (f)(2)(F)(i), (f)(2)(G)(ii) and (f)(2)(G)(iii) of Rule 431, to the extent that such rules concern spread and straddle positions in warrants, be subject to a one year pilot basis.[12]

Paragraph (f)(2)(H)(iv) of Rule 431 would be amended to permit the carrying of "short" option positions against the use of letters of guarantee or (in the case of a call) "escrow receipts," without the need for margin. The amendment proposes to expand that provision to include stock index warrants as well as options. The use of "escrow receipts" to offset a short call option or warrant position would be new to the Exchange's margin rules, which currently only allow the use of letters of guarantee. However, the margin rules of other U.S. options exchanges provide that no margin is required on a short call option where a customer has delivered to the firm carrying the customer's account a satisfactory escrow receipt. Amendment No. 1 would add the escrow receipt concept to the Exchange's margin rules in respect of margin on options, as well as on stock index warrants, and would do so in a way that generally parallels the permissible use of letters of guarantee under the Exchange's margin rules.

Proposed Rule 414(f) states that no member or member organization shall accept an order from a customer for the purchase or sale of warrants unless the customer's account has been approved for options trading pursuant to Exchange Rule 721. Furthermore, proposed Rules 414(g)–(k) require that the option rules pertaining to supervision of accounts, suitability, discretionary account trading, customer complaints and communications to customers be applied to transactions in warrants. Finally, prior to trading index, currency or currency index warrants, the Exchange will distribute circulars to its membership providing guidance regarding member firm compliance responsibilities (including suitability recommendations) when handling transactions in warrants.

Proposed Rule 414(c) provides that position limits for stock index warrants on the same index with original issue prices of ten dollars or less will be fifteen million warrants covering all such issues.[13] The rule provides that warrants with an original issue price of greater than ten dollars will be weighted more heavily than warrants with an original issue price of ten dollars or less in calculating position limits.[14] The rule also gives the Exchange the authority to require the liquidation of a position in stock index warrants that is in excess of the position limits set forth in the rule, and Commentary to the rule establishes procedures for allowing limited exceptions to the position limits.

---

[6] *See* Amendment No. 1. The Exchange amended this provision in response to the Seward & Kissell Letter.

[7] *See* Amendment No. 1. The Exchange amended its proposal in response to the Seward & Kissell Letter and will require the use of opening prices in calculating index warrant settlement values during the 48 hours prior to expiration. Before then, an issuer may use either opening or closing prices.

[8] *See infra* note 37 and accompanying text.

[9] *See* Amendment No. 3.

[10] *See* Amendment No. 2. Consistent with the treatment of options on foreign currencies, warrants on the Canadian Dollar will be subject to a one percent "add-on." The margin required on any other foreign currency would be subject to approval by the Commission. *See infra* note 26.

[11] *See infra* note 26.

[12] Three months prior to the expiration of the pilot program, the Exchange will submit a report to SEC staff analyzing the price relationship between listed warrants and options on similar stock indexes. *See* Amendment No. 1. The Exchange has also requested no-action relief from the Commission in order to permit certain short positions in stock index call and put warrants to be treated as covered for margin purposes.

[13] *See infra* note 39.

[14] For example, if an investor held 100,000 warrants based upon the Standard & Poor's 500 Index offered originally at $20 per warrant, the size of this position for the purpose of calculating position limits would be 200,000.

Proposed Rule 414(d) provides for exercise limits on stock index warrants analogous to those found in stock index options and states that such limits are distinct from any exercise limits that may be imposed by the issuers of stock index warrants. Accordingly, no member may exercise a long position in warrants over a five consecutive day period in excess of the permissible position limit.

In order to facilitate its review of compliance with position and exercise limits, the Exchange has proposed Rule 414(c)(v) which establishes reporting requirements for large warrant positions. Under the terms of the rule, members will be required to file a report with the Exchange whenever any account in which the member has an interest has established an aggregate position of 100,000 warrants overlying the same index, currency or currency index. For purposes of this rule, the Exchange proposes that long positions in puts be combined with short positions in call warrants, and that short positions in puts be combined with long positions in call warrants.[15] Finally, proposed Rule 414(e) requires that the trading halt provisions of Rule 717 shall be applied to the trading of stock index warrants.

Upon Commission approval of the foregoing rule amendments, the Exchange proposes that it will only file rule changes for specific stock index warrant issuances where there is no corresponding option or warrant on the same underlying stock index already listed on a national securities exchange or included for quotation on NASDAQ. Accordingly, when a listed option overlies a particular broad based index, the Exchange proposes it be allowed to list warrants on that index without further Commission review and approval pursuant to Section 19(b) of the Act, as long as the listing complies with the warrant listing standards as approved in this Order.[16]

III. Comments Received

The Commission received one letter in response to its request for comments on the NYSE proposal.[17] The Comment Letter was generally supportive of the NYSE's proposal, however, it recommended several changes in the proposed regulatory structure applicable to stock index, currency and currency index warrants. The Comment Letter was submitted on behalf of the Firms, all of whom are represented to be major participants in the issuance, underwriting and trading of warrants. Because the proposed regulatory regime applicable to warrants will, to some extent, be based upon the rules governing standardized options, the Comment Letter states that the Firms' comments are driven, in part, by the fact that fundamental differences exist between warrants and standardized options which necessitate disparate regulatory treatment in certain situations.[18]

First, the Comment Letter suggested amending the Issuer Listing Standards to eliminate the 25% test or, in the alternative, to adopt hedging and/or netting standards designed to more accurately reflect issuer-specific risk.[19] Because warrants are sold by means of a registration statement, the Firms believe that adequate disclosure of the amount of an issuer's outstanding securities could be included in the prospectus. Furthermore, the Comment Letter points out that issuers of warrants are traditionally subject to outside evaluation by certain credit rating agencies, which should assist investors in determining undue issuer credit risk. Finally, the Firms do not believe the 25% test bears any resemblance to an issuer's risk exposure since exposure fluctuates with market changes at any given time and also because the proposal provides no recognition for offsetting hedges or for warrants subject to netting.

In response to the Seward & Kissel Letter's comments respecting issuer listings standards, the NYSE amended the filing to add an alternative issuer qualification criteria.[20] Under the new criteria, an issuer will be required to either: (a) have a minimum tangible net worth of $250 million; or (b) meet the existing criteria (*i.e.*, tangible net worth of $150 million and meet the 25% test).

The Comment Letter also recommended allowing the use of p.m. settlement for all American-style warrants exercised anytime except 48 hours prior to expiration, at which time a.m. settlement would be required. According to the Comment Letter, unlike with listed options (where OCC is the issuer and runs a balanced book), a warrant issuer must hedge its exposure to maintain offsetting positions. Upon early exercise of the warrants, the issuer that has hedged its exposure will have to take action to "unwind" the portion of its hedge relating to the exercised warrants. The Firms believe that requiring a.m. settlement on the first day after an investor exercises the warrant will place additional market risk upon them due to the difficulty in managing the hedge. This increased hedging cost, the Firm's argue, could result in a higher issuance price for the warrant or could require that the warrant settlement value date be postponed an additional day, with warrant holders bearing additional market risk during this period.

In response to the Comment Letter, the NYSE amended its filing to include a provision permitting p.m. settlement for stock index warrants except for a short period before expiration.[21] Under the terms of the amendment, stock index warrants for which 25% or more of the value of the underlying index is represented by securities that are traded primarily in the U.S. shall, by their terms, provide that, on valuation date, as well as for the two business days prior to valuation date, the value of the stocks traded primarily in the U.S. which underlie such warrants shall be determined be reference to the opening prices of such underlying U.S. securities. For example, if the valuation date for an issuance of index warrants occurs on a Friday, a.m. settlement must be utilized for warrants that are valued on the preceding Wednesday or Thursday, as well as on the valuation date.

Third, the Comment Letter recommended creating a special category of "warrant eligible" customers (separate and distinct from options eligibility criteria), who are authorized to trade warrants even if not approved to trade options. The Firms believe it is inappropriate to apply an options regulatory regime to warrants and that doing so may prevent institutional customers who are not permitted to purchase options products, yet who nevertheless meet all of the options eligibility criteria, from purchasing warrants. In this regard, the Firms propose to create a "warrant eligible" category with standards mimicking those currently required for options approved accounts. As such, "warrant-approved" accounts could purchase warrants, however, they could not purchase options or other products requiring options account approval. The NYSE did not amend its filing in response to this comment.

---

[15] *See* Amendment No. 1.

[16] *See infra* note 26.

[17] *See supra* note 4. The Seward & Kissel Letter was submitted on behalf of PaineWebber Inc., Bear, Stearns & Co. Inc., Lehman Brothers Inc., Smith Barney Inc., Salomon Brothers Inc., Morgan Stanley & Co. Inc., and Hambrecht & Quist Inc. (correctively the "Firms").

[18] The Comment Letter lists several differences which it perceives exist between warrants and standardized options. Chief among these are: (1) warrants are separately registered, unsecured obligations of their issuer while options are issued and guaranteed by the Options Clearing Corp. ("OCC"); (2) during the prospectus delivery period, warrant purchasers receive a product-specific prospectus while options customers receive an options disclosure document ("ODD") at the time the account is opened; (3) each warrant creates a fixed number of outstanding warrants while there is theoretically no limit to the number of options that may be issued by OCC; and (4) warrants are traded on an exchange in a manner similar to stocks which, therefore, translates into superior price transparency than for listed options.

[19] As originally proposed, an issuer would have been required to have a tangible net worth of at least $150 million and the aggregate original issue price of all of a particular issuer's warrant offerings (combined with such offerings by its affiliates) that are listed on a national securities exchange or that are national market securities traded through NASDAQ were not to exceed 25% of the issuer's net worth ("25% test).

[20] *See* Amendment No. 1.

[21] *See* Amendment No. 1.

Fourth, the Comment Letter urges the adoption of a rule permitting firms to approve for warrant trading those accounts managed by an investment adviser ("IA") based upon the IA's representation concerning the eligibility status of its customers to engage in warrant trading, even if the underlying documentation relating to the managed accounts is not provided to the brokerage firms. The NYSE has amended its proposal to allow member firms to accept the representation of an investment adviser registered under the Investment Advisers Act of 1940 concerning the eligibility status of its customers to engage in warrant trading, even if the underlying documentation relating to the managed account is not provided to the member firm, where the managed account is for an institutional customer or the investment advisor represents the collective investment of a number of persons. The NYSE states that this will conform the handling of warrant accounts to the current practice with respect to listed options accounts.[22]

Finally, the Comment Letter Addressed the proposed position limits applicable to warrants. Specifically, the Comment Letter noted that position limits for warrants would be set at levels that are approximately 75% of that allowed for similar broad-based indexes. The Comment Letter recommended establishing position limits for warrants that were equivalent to those established for listed options, allowing a hedge exemptions similar to listed option procedures and providing a mechanism for specific waivers or exemptions of warrant position limits for hedgers, market-makers and broker-dealers comparable to the procedures in place for listed options. The NYSE did not amend its filing in response to this comment.

IV. Discussion

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of Section 6(b)(5).[23] Specifically, the Commission finds that the Exchange's proposal to establish uniform listing standards for broad-based stock index, currency and currency index warrants strikes a reasonable balance between the Commission's mandates under Section 6(b)(5) to remove impediments to and perfect the mechanism of a free and open market and a national market system, while protecting investors and the public interest. In addition, the NYSE's proposed listing standards for warrants are consistent with the Section 6(b)(5) requirements that rules of an exchange be designed to prevent fraudulent and manipulative acts, to promote just and equitable principles of trade, and are not designed to permit unfair discrimination among issuers.

The NYSE's proposed generic listing standards for broad-based stock index warrants, currency and currency indexes set forth a regulatory framework for the listing of such products.[24] Generally, listing standards serve as a means for an exchange to screen issuers and to provide listed status only to *bona fide* issuances that will have sufficient public float, investor base, and trading interest to ensure that the market has the depth and liquidity necessary to maintain fair and orderly markets. Adequate standards are especially important for warrant issuances given the leveraged and contingent liability they represent. Once a security has been approved for initial listing, maintenance criteria allow an exchange to monitor the status and trading characteristics of that issue to ensure that it continues to meet the exchange's standards for market depth and liquidity so that fair and orderly markets can be maintained.

In reviewing listing standards for derivative-based products, the Commission also must ensure that the regulatory requirements provide for adequate trading rules, sales practice requirements, margin requirements, position and exercise limits and surveillance procedures. These rules minimize the potential for manipulation and help to ensure that derivatively-priced products will not have a negative market impact. In addition, these standards should address the special risks to customers arising from the derivative products.[25] For the reasons discussed below, the Commission believes the NYSE's proposal will provide it with significant flexibility to list index, currency and currency index warrants, without compromising the effectiveness of the Exchange's listing standards or regulatory program for such products.[26]

A. Issuer Listing Standards and Product Design

As a general matter, the Commission believes that the trading of warrants on a stock index, currency or currency index permits investors to participate in the price movements of the underlying assets, and allows investors holding positions in some or all of such assets to hedge the risks associated with their portfolios. The Commission further believes that trading warrants on a stock index, currency or currency index provides investors with an important trading and hedging mechanism that is designed to reflect accurately the overall movement of the component securities.

---

[22] *See* Amendment No. 1.

[23] 15 U.S.C. 78f(b)(5) (1982).

[24] The Commission notes that warrants issued prior to this approval order will continue to be governed by the rules applicable to them at the time of their listing.

[25] Pursuant to Section 6(b)(5) of the Act, the Commission is required to find, among other things, that trading in warrants will serve to protect investors and contribute to the maintenance of fair and orderly markets. In this regard, the Commission must predicate approval of any new derivative product upon a finding that the introduction of such derivative instrument is in the public interest. Such a finding would be difficult for a derivative instrument that served no hedging or other economic function, because any benefits that might be derived by market participants likely would be outweighed by the potential for manipulation, diminished public confidence in the integrity of the markets, and other valid regulatory concerns. As discussed below, the Commission believes warrants will serve an economic purpose by providing an alternative product that will allow investors to participate in the price movements of the underlying securities in addition to allowing investors holding positions in some or all of such securities to hedge the risks associated with their portfolios.

[26] Issuances of warrants overlying a single currency may currently be listed for trading without a rule filing provided that the underlying currency is one of the original seven foreign currencies approved for options trading: the Australian Dollar, British Pound, Canadian Dollar, French Franc, German Mark, Japanese Yen, Swiss Franc and the European Currency Unit. Issuances of currency warrants overlying any other foreign currency would require a rule filing pursuant to Section 19(b) of the Act. The Commission notes that currency index warrants may only be established without a further rule filing upon an index that has been previously approved by the Commission pursuant to a Section 19(b) filing. To date, the only currency index approved pursuant to Section 19(b) is an equal-weighted index comprised of the British Pound, Japanese Yen and German Deutsche Mark. *See* Securities Exchange Act Release No. 31627 (Dec. 21, 1992), 57 FR 62399 (Dec. 30, 1992). Accordingly, any other currency index (as well as a broad-based stock index) not previously approved by the Commission would require approval pursuant to Section 19(b).

Warrants, unlike standardized options, however, do not have a clearinghouse guarantee but are instead dependent upon the individual credit of the issuer. This heightens the possibility that an exerciser of warrants may not be able to receive full cash settlement upon exercise. This additional credit risk, to some extent, is reduced by the Exchange's issuer listing standards that require an issuer to have either; (a) a minimum tangible net worth of $250 million; or (b) a minimum tangible net worth of $150 million, provided that the issuer does not have (including as a result of the proposed issuance) issued outstanding warrants where the aggregate original issue price of all such stock index, currency and currency index warrant offerings (or affiliates) that are listed on a national securities exchange or traded through the facilities of NASDAQ is in excess of 25% of the warrant issuer's net worth. Furthermore, financial information regarding the issuers of warrants will be disclosed or incorporated in the prospectus accompanying the offering of the warrants. Moreover, the alternative test addresses the Comment Letter's concerns on the 25% standard.

The NYSE's proposal will provide issuers flexibility by allowing them to utilize either a.m. or p.m. settlement, provided, however, domestic index warrants (*i.e.*, warrants based on indexes for which 25% or more of the index value is represented by securities traded primarily in the U.S.) ("domestic index warrants") are required to utilize a.m. settlement for expiring warrants as well as during the last two business days prior to valuation date.[27] The Commission continues to believe that a.m. settlement significantly improves the ability of the market to alleviate and accommodate large and potentially destabilizing order imbalances associated with the unwinding of index-related positions. Nevertheless, in accordance with the Comment Letter's suggestions, the use of p.m. settlement except during the last two business days prior to a domestic index warrant's valuation date, as well as the valuation date, strikes a reasonable balance between ameliorating the price effects associated with expirations of derivative index products and providing issuers with flexibility in designing their products.[28] In this context, the Commission notes that unlike standardized index options whose settlement times are relatively uniform, index warrants are issuer-based products, whose terms are individually set by the issuer. In addition, while options may have unlimited open interest, the number of warrants on a given index is fixed at the time of issuance. Accordingly, it is not certain that there will be a significant number of warrants in indexes with similar components expiring on the same day. This may reduce the pressure from liquidation of warrant hedges at settlement. Nevertheless, the Commission expects the Exchange to monitor this issue and, should significant market effects occur as a result of early exercises from p.m. settled index warrants, would expect it to make appropriate changes including potentially limiting the number of index warrants with p.m. settlement.

B. Customer Protection

Due to their derivative and leveraged nature, and the fact that they are a wasting asset, many of the risks of trading in warrants are similar to the risks of trading standardized options. Accordingly, the NYSE has proposed to apply its options customer protection rules to warrants. In particular, the Commission notes that warrants may only be sold to options approved accounts capable of evaluating and bearing the risks associated with the trading in these instruments, in accordance with NYSE Rule 721, and that adequate disclosure of the risks of these products must be made to investors.[29] In addition, the NYSE will apply the options rules for suitability, discretionary accounts, supervision of accounts and customer complaints to transactions in warrants. By imposing the special suitability and disclosure requirements noted above, the Commission believes the NYSE had addressed adequately several of the potential customer protection concerns that could arise from the options-like nature of warrants.

The ODD, which all options approved accounts must receive, generally explains the characteristics and risks of standardized options products. Although many of the risks to the holder of an index warrant and option are substantially similar, however, because warrants are issuer-based products, some of the risks, such as the lack of a clearinghouse guarantee and certain terms for index warrants, are different. The NYSE had adequately addressed this issue by proposing to distribute a circular to its members that will call attention to the specific risks associated with stock index, currency and currency index warrants that should be highlighted to potential investors. In addition, the issuer listing guidelines described above will ensure that only substantial companies capable of meeting their warrant obligations will be eligible to issue warrants. These requirements will help to address, to a certain extent, the lack of a clearinghouse guarantee for index warrants. Finally, warrant purchasers will receive a prospectus during the prospectus delivery period. The Commission believes that this will ensure that certain information about the particular issuance and issuer is publicly available.

As noted above, the Comment Letter indicates that applying the options disclosure framework to warrants is inappropriate. However, the Commission believes that the combined approach of making available general derivative product information (the ODD), product specific information (the Exchange circular), and issuer specific information (the prospectus) should provide an effective disclosure mechanism for these products.

At this time, the Commission does not agree with the proposal contained in the Comment Letter to create a special "warrant eligible" classification of purchasers. As noted above, index, currency and currency index warrants are very similar to standardized options. They are so similar that a customer precluded from trading options should not avoid the restriction indirectly by being designated by Exchange rules as eligible for stock index, currency or currency index warrants. Nevertheless, as the range of exchange-traded derivative products increases, the SROs might consider in the future as to whether a new derivatives eligibility classification is appropriate.

C. Surveillance

In evaluating proposed rule changes to list derivative instruments, the Commission considers the degree to which the market listing the derivative product has the ability to conduct adequate surveillance. In this regard the Commission notes that the Exchange has developed adequate surveillance procedures for the trading of index and currency warrants. First, new issues of currency warrants will be subject to the NYSE's existing surveillance procedures applicable to foreign currency warrants, which the Commission previously has found to be adequate to surveil for manipulation and other abuses involving the warrant market and the underlying foreign currencies.[30]

---

[27] Currency and currency index warrants are not limited to a.m. or p.m. settlement.

[28] Foreign stock market based index warrants may utilize p.m. settlement throughout their duration.

[29] Pursuant to NYSE Rule 726, all options approved accounts must receive an ODD, which discusses the characteristic and risks of standardized options.

Second, the Exchange has developed enhanced surveillance procedures to apply to domestic stock index warrants which the Commission believes are adequate to surveil for manipulation and other abuses involving the warrant market and component securities.[31] Among these enhanced surveillance procedures, the Commission notes that issuers will be required to report to the Exchange on settlement date the number and value of domestic index warrants subject to early exercise the previous day. The Commission believes that this information will aid the NYSE in its surveillance capacity and help it to detect and deter market manipulation and other trading abuses.

Third, the Exchange has developed adequate surveillance procedures to apply to foreign stock index warrants (*i.e.*, less than 25% of the index value is derived from stocks traded primarily in the U.S.).[32] The Commission believes that the ability to obtain information regarding trading in the stocks underlying an index warrant is important to detect and deter market manipulation and other trading abuses. Accordingly, the Commission generally requires that there be a surveillance sharing agreement [33] in place between an exchange listing or trading a derivative product and the exchange(s) trading the stocks underlying the derivative contract that specifically enables the relevant markets to surveil trading in the derivative product and its underlying stocks.[34] Such agreements provide a necessary deterrent to manipulation because they facilitate the availability of information needed to fully investigate a potential manipulation if it were to occur.[35] In this regard, the NYSE will require that no more than 20% of an Index's weight may be comprised (upon issuance and thereafter) of foreign securities (or ADRs thereon) that do not satisfy one of the following tests: (1) The Exchange has in place an effective surveillance agreement [36] with the primary exchange in the home country in which the security underlying the ADR is traded; or (2) meets an existing alternative standard available for standardized options trading (*e.g.*, satisfy the 50% U.S. trading volume test).[37] The Commission believes that this standard will ensure that index warrants are not listed upon foreign indexes whose underlying securities trade on exchanges with whom the NYSE has no surveillance sharing agreement.

D. Market Impact

The Commission believes that the listing and trading of index warrants, currency warrants and currency index warrants will not adversely affect the U.S. securities markets or foreign currency markets. First, with respect to currency and currency index warrants, the Commission notes that the interbank foreign currency spot market is an extremely large, diverse market comprised of banks and other financial institutions worldwide. That market is supplemented by equally deep and liquid markets for standardized options and futures on foreign currencies and option on those futures. An active over-the-counter market also exists in options, forwards and swaps for foreign currencies. This minimizes the possibility that Exchange listed warrants would be used to manipulate the spot currency markets. In addition, the surveillance procedures for these products would allow the Exchange to detect and deter potential manipulation involving currency warrants and currency index warrants.

Second, with respect to index warrants, the Commission notes that warrants may only be established upon indexes the Commission has previously determined to be broad-based in the context of index options or warrant trading. As part of its review of a proposal to list an index derivative product, the Commission must find that the trading of index options or warrants will serve to protect investors, promote the public interest, and contribute to the maintenance of fair and orderly markets. Accordingly, the Commission does not believe that the issuance of index warrants upon previously approved broad based stock index options or warrants will adversely impact the underlying component securities. In addition, because index warrants are issued by various individual issuers who set their own terms, it is likely that expirations among similar index products will be varied, thereby reducing the likelihood that unwinding hedge activities would adversely affect the underlying cash market. Finally, as discussed above, the Commission believes that NYSE's enhanced surveillance procedures applicable to stock index warrants are adequate to surveil for manipulation and other abuses involving the warrant market, component securities and issuer hedge unwinding transactions.

Third, the Exchange has proposed margin levels for stock index and currency warrants equivalent to those in place for stock index and currency options. The Commission believes these requirements will provide adequate customer margin levels sufficient to account for the potential volatility of these products. In addition, options margin treatment is appropriate given the options-like market risk posed by warrants. The Commission notes that the customer spread margin treatment applicable to warrants is subject to a one year pilot program. This will allow the Exchange to analyze the pricing relationships between listed options and warrants on the same index in order to determine whether to revise or approve on a permanent basis the proposed spread margin rules.[38]

---

[30] *See* Securities Exchange Act Release No. 24555 (June 5, 1987), 52 FR 22570 (June 12, 1987), and Securities Act Release No. 26152 (Oct. 3, 1988), 53 FR 39832 (Oct. 12, 1988). The Commission notes that these surveillance procedures only apply to the issuance of warrants overlying one of the approved foreign currencies. *See supra* note 26. The issuance of warrants upon any other foreign currency would necessitate a Section 19(b) rule filing which, among other things, details applicable surveillance procedures.

[31] In addition, the Commission notes that issuers will be required to report to the Exchange all trades to unwind a warrant hedge that are effected as a result of the early exercise of domestic index warrants. This will enable the Exchange to monitor the unwinding activity to determine if it was effected in a manner that violates Exchange or Commission rules.

[32] Each prior issuance of a foreign stock market based index warrant is subject to specific surveillance procedures. These procedures are generally tailored to the individual warrant issuance and are based upon several factors involving the primary foreign market, including the existence of surveillance or information sharing agreements.

[33] The Commission believes that a surveillance sharing agreement should provide the parties with the ability to obtain information necessary to detect and deter market manipulation and other trading abuses. Consequently, the Commission generally requires that a surveillance sharing agreement require that the parties to the agreement provide each other, upon request, information about market trading activity, clearing activity, and the identity of the ultimate purchasers for securities. *See e.g.*, Securities Exchange Act Release No. 31529 (Nov. 27, 1992).

[34] The ability to obtain relevant surveillance information, including, among other things, the identity of the ultimate purchasers and sellers of securities, is an essential and necessary component of a comprehensive surveillance sharing agreement.

[35] In the context of domestic index warrants, the Commission notes that the U.S. exchanges are members of the Intermarket Surveillance Group ("ISG"), which was formed to, among other things, coordinate more effectively surveillance and investigative information sharing arrangements in the stock and options markets. *See* Intermarket Surveillance Group Agreement, July 14, 1983. The most recent amendment to the ISG Agreement, which incorporates the original agreement and all the amendments made thereafter, was signed by ISG members on January 29, 1990. *See* Second Amendment to the ISG Agreement.

[36] *See supra* note 33.

[37] *See* Securities Exchange Act Release Nos. 31529, 57 FR 57248 (Dec. 3, 1992) and 33555, 59 FR 5619 (Feb. 7, 1994).

[38] The Commission notes that the margin levels for currency index warrants will be set at a level determined by the Exchange and approved by the

Fourth, the NYSE has established reasonable position and exercise limits for stock index warrants, which will serve to minimize potential manipulation and other market impact concerns.[39] Contrary to the views expressed in the Comment Letter, the Commission believes that in the absence of trading experience with domestic index warrants, it would be imprudent to establish position limits for positions greater than those currently applicable to domestic stock index options on the same index.[40]

V. Conclusion

The Commission believes that the adoption of these uniform listing and trading standards covering index, currency and currency index warrants will provide an appropriate regulatory framework for these products. These standards will also benefit the Exchange by providing them with greater flexibility in structuring warrant issuances and a more expedient process for listing warrants without further Commission review pursuant to Section 19(b) of the Act. As noted above, additional Commission review of specific warrant issuances will generally only be required for warrants overlying any non-approved broad-based index or a non-approved currency or currency index. If Commission review of a particular warrant issuance is required, the Commission expects that, to the extent that the warrant issuance complies with the uniform criteria adopted herein, its review should generally be limited to issues concerning the newly proposed index. This should help ensure that such additional Commission review could be completed in a prompt manner without causing any unnecessary delay in listing new warrant products.

The Commission finds good cause for approving Amendment No. 1 to the proposed rule change prior to the thirtieth day after the date of publication of notice of filing thereof in the **Federal Register** for the following reasons. As discussed below, the changes are either (1) minor and technical in nature; (2) responsive to the Comment Letter; (3) designed to conform to warrant proposals from other markets; or (4) modifications to Exchange surveillance procedures. Accordingly, the amendments do not raise new significant regulatory issues or are responsive to prior comments. In order to enable the Exchange to list new index, currency or currency index warrants as soon as possible, the Commission believes it is necessary and appropriate to approve the amendment on an accelerated basis.

Amendment No. 1 proposes to make the following changes to the Index Warrant Filing:

Changes to Trading Rules

- A definition of "cross currency" would be added to Rule 414(a)(ii).
- The position limit rule (Rule 414(c)(i)) would be amended to provide that, in determining compliance with position limits, "aggregate stock index warrant position" refers to warrants "on the same side of the market".
- A new paragraph 414(c)(v) ("Reports of Index Warrant Positions") would be added to require members and member organizations to report aggregate positions in excess of 100,000 warrants.
- The Index Warrant Filing prescribes the use of opening prices in determining settlement values for all settlement dates. This Amendment No. 1 would amend Paragraph 414(l) ("Settlement Values") to require the use of opening prices in respect of the calculation of settlement values on the day of expiration or on the two business days prior to expiration. Before then, an issuer may use either opening or closing prices in calculating settlement values.
- A new paragraph 414(n) would be added to require the reporting of changes in the number of outstanding warrants due to early warrant exercises.

Changes to Margin Rules

- A new paragraph would be added to Paragraph (f)(2)(C) of Rule 431 ("Margin Requirements") in order to define "call" and "put" in the currency, currency index and stock index warrant context.
- A new element would be added to the definition of "index group value" (*see* Paragraph (f)(2)(C) of Rule 431): In calculating the index group value, one must multiply by the index value (as in the Index Warrant Filing), and divide by any applicable divisor for which the warrant's prospectus may provide (a new addition).
- Paragraph (f)(2)(D)(i) of Rule 431 contains a chart of initial, maintenance and minimum margin requirements. The currency warrant section of that chart would be amended so as to list the margin requirements for specific currencies. The currency index warrant section would be amended to provide that the Exchange will determine currency index warrant margin requirements on a case-by-case basis.
- The Index Warrant Filing proposes to provide margin advantages to certain option and warrant positions (*i.e.*, certain spread and straddle positions) by adding second and third paragraphs to Paragraph (f)(2)(F)(1). This Amendment No. 1 would revise the permissible offset positions and restate those paragraphs to make them easier to read.
- Two paragraphs would be deleted from Paragraph (f)(2)(H). The Index Warrant Filing proposes those paragraphs for the purpose of addressing margin on "short" stock index warrant positions where the holder of the position has hedged by replicating the underlying index with appropriate positions in the component securities. The paragraphs would be replaced by the "letter of guarantee" and "escrow receipt" provisions discussed in the next three bullets.
- Paragraph (f)(2)(H)(iv) (which the Index Warrant Filing proposes to renumber as (f)(2)(H)(v)) of Rule 431) would be amended (although it was not amended in the Index Warrant Filing). That paragraph permits the carrying of "short" option positions against the use of letters of guarantee or (in the case of a call) escrow receipts, without the need for margin. The amendment proposes to expand that provision to include stock index warrants as well as options.
- The use of "escrow receipts" to offset a position carried short would be new to the Exchange's margin rules, which currently only allow the use of letters of guarantee. However, the margin rules of other United States options exchanges provide that no margin is required on a call option where a customer has delivered to the firm carrying the customer's account a satisfactory escrow receipt. Amendment No. 1 would add the escrow receipt concept to the Exchange's margin rules in respect of margin on options, as well as on stock index warrants, and would do so in a way that generally parallels the permissible use of letters of

---

SEC. *See* Amendment No. 1. Issuances of warrants listed prior to the approval of this order will continue to apply the margin level applicable to them at the time of their listing.

[39] The Commission notes that there are no position or exercise limits applicable to currency or currency index warrants, although reporting requirements do apply. Nevertheless, the Commission may review the need to establish foreign currency position limits if the size of the currency or currency index warrant market increases significantly.

[40] With respect to the Comment Letter's suggestion that a hedge exemption rule be established in order to allow participants to readily acquire exemptions from the Exchange as needed, the Commission does not believe that such an approach is appropriate at this time. The hedge exemption for index options was adopted after several years experience with index options trading. Until the SROs gain some experience with domestic index warrant trading, it is difficult to determine the need for a hedge exemption (*i.e.*, that speculative limits are insufficient to meet hedging needs).

guarantee under the Exchange's margin rules.

- The definition of two terms that are found in existing paragraph (f)(2)(H)(iv) of Rule 431 would be amended. The changed definitions would apply in the "letter of guarantee" context, as well as in the "escrow receipt" context.
- The definition of "qualified security" would change to "a security listed on a national securities exchange", rather than "a security that meets the listing criteria of the Exchange or of the American Stock Exchange".
- The definition of "cash equivalents" would change to "securities issued or guaranteed by the United States and having a maturity of two years or less", rather than "those instruments referred to in section 220.8(a)(3)(ii) of Regulation T".

The changes to both definitions follow similar changes that the American Stock Exchange has heretofore effected.

- Paragraph (f)(2)(K) of Rule 431 would be amended to specify that the Exchange may specify higher margin for "warrants" (stated generically) if the Exchange deems circumstances to warrant higher margin.
- New Supplementary Material .20 would be added to Rule 431 to specify that the Exchange will subject the spread and straddle margin rules that the Index Warrant Filing proposes to add to paragraphs (f)(2)(F)(i), (f)(2)(G)(ii) and (f)(2)(G)(iii) of Rule 431 to a one-year pilot program. The Exchange would submit to the Commission three months prior to the expiration of the pilot programs a report analyzing the price relationship between listed warrants and options on similar stock indexes.

Changes to Listing Standards

- The "net worth"/"asset" test applicable to issuers of currency, currency index or stock index warrants would be amended. (*See* paragraph (a) of Para. 703.15 of the *Listed Company Manual* in respect of currency and currency index warrants and paragraph (a) of Para. 703.17 of the *Listed Company Manual* in respect of stock index warrants.) Under the new test, an issuer may satisfy the test if it has minimum tangible net worth in excess of $250 million. Alternatively, as in the Index Warrant Filing, the issuer may have minimum tangible net worth in excess of $150 million if its total currency, currency index and stock index warrants do not exceed 25 percent of its net worth.
- Para. 703.15 and Para. 703.17 of the *Listed Company Manual* would limit the term of currency, currency index and stock index warrants to between one and five years.
- A new paragraph would be added to Para. 703.17 of the *Listed Company Manual* to prohibit "non-United States component securities" that are not subject to comprehensive surveillance agreements from constituting more than 20 percent of the weighted value of an index stock group that underlies a stock index warrant.

Finally, the Index Warrant Filing proposes to introduce Rule 414(h) ("Suitability"), which would limit trading by customers in currency, currency index or stock index warrants to options-approved accounts. In the case of an institutional account or an investment club or other collective account, the Exchange would allow a member organization to accept the representation of a registered investment adviser as to the eligibility of the institution or collective investment group, even if the managed account is lacking the underlying documentation.

As mentioned above, because the changes are either (1) minor and technical in nature; (2) responsive to the Comment Letter; (3) designed to conform to warrant proposals from other markets; or (4) modifications to Exchange surveillance procedures, the Commission believes it is appropriate to approve Amendment No. 1 on an accelerated basis.

Therefore, the Commission believes it is consistent with Sections 6(b)(5) and 19(b)(2) of the Act to approve Amendment No. 1 to the NYSE's proposal on an accelerated basis.

VI. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning Amendment No. 1. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by September 28, 1995.

It therefore is ordered, pursuant to Section 19(b)(2) of the Act,[41] that the proposed rule change (SR–NYSE–94–41) is approved, as amended, with the portion of the rule change relating to spread margin treatment being approved on a one year pilot program basis, ending August 29, 1996.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[42]

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 95–22109 Filed 9–6–95; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 34–36166; File No. SR–PSE–94–28]

Self-Regulatory Organizations; Pacific Stock Exchange, Inc.; Order Approving Proposed Rule Change and Notice of Filing and Order Granting Accelerated Approval of Amendments No. 1, 2, 3, 4 and 5 to Proposed Rule Change Relating to the Establishment of Uniform Listing and Trading Guidelines for Stock Index, Currency and Currency Index Warrants

August 29, 1995.

I. Introduction

On September 22, 1994, the Pacific Stock Exchange, Inc. ("PSE" or "Exchange") submitted to the Securities and Exchange Commission ("SEC" or "Commission"), pursuant to Section 19(b) ("Section 19(b)") of the Securities Exchange Act of 1934 ("Act"),[1] and Rule 19b–4 thereunder,[2] a proposed rule change to establish uniform rules for the listing and trading of stock index ("index" or "stock index"), currency ("currency") and currency index ("currency index") warrants (collectively "warrants"). Notice of the proposed rule change appeared in the **Federal Register** on December 20, 1994.[3] One comment letter was received in response to the proposal.[4]

The Exchange subsequently filed five Amendments to the proposal.[5]

Amendment No. 1 brings several of PSE's proposed rules and policies into conformity with those previously filed by other markets. Amendment No. 2 addresses currency and currency index warrant margin levels. Amendment No. 3, in addition to responding to several technical changes requested by the staff, addresses issues relating to spread margin, reporting requirements and notification of early exercises. Amendment No. 4 removes certain surveillance procedures from the PSE's rules. Amendment No. 5 clarifies the settlement procedures for index warrants which are exercised at or prior to expiration. This order approves the proposal, as amended.

II. Description of the Proposal

The PSE proposes to establish uniform rules for the listing and trading of stock index, currency and currency index warrants.[6] Rule 8.3, Listing of Currency and Index Warrants, would be amended to provide uniform listing criteria for index, currency and currency index warrants. First, issuers would be expected to exceed minimum issuer listing standards. In particular, the Exchange proposes that issuers be required to have a minimum tangible net worth in excess of $250 million or, in the alternative, have a minimum tangible net worth in excess of $150 million, provided that the issuer does not have (including as a result of the proposed issuance) issued outstanding warrants where the aggregate original issue price of all such warrant offerings (combined with offerings by its affiliates) listed on a national securities exchange or that are National Market securities traded through NASDAQ exceeds 25% of the issuer's net worth.[7]

Second, the proposal requires that unexercised in-the-money warrants be automatically exercised on either the delisting date (if the issue is not listed upon another organized securities market) or upon expiration. Third, the proposal provides that for warrant offerings where U.S. stocks constitute 25% or more of the index value ("domestic index"), issuers shall use opening prices ("a.m. settlement") for U.S. stocks to determine index warrant settlement values during the 48 hour period prior to expiration of the warrants.[8] Fourth, Rule 8.3(a)(7) has been amended to provide that foreign country securities or American Depositary Receipts ("ADRs") thereon that are not subject to a comprehensive surveillance sharing agreement with the Exchange and that have less than 50% of their global trading volume (in dollar value) within the U.S., shall not represent more than 20% of the weight of the index.[9] Finally, the Exchange proposes to add Rule 8.3(a)(8), which is designed to assist in the surveillance of index warrant trading. Specifically, the Exchange will require issuers of stock index warrants to notify the Exchange of any early exercises by 1:30 p.m. (Pacific time) on the day that the settlement for the warrants is determined.[10]

Rule 2.16(d)(2) ("Rule 2.16(d)(2)"), the PSE margin rule, is being amended to apply the current customer margin requirements for broad based stock index and currency options to stock index, currency and currency index warrants. Thus, all purchases of warrants will require payment in full, and short sales of stock index warrants will require initial margin of: (i) 100 percent of the current value of the warrant plus (ii) 15 percent of the current value of the underlying broad stock index less the amount by which the warrant is out of the money, up to a maximum of five percent of the index value. Short sales of currency warrants will follow the margin requirements currently applicable to listed currency options. Specifically, the Exchange proposes that short sales of warrants on the German Mark, French Franc, Swiss Franc, Japanese Yen, British Pound, Australian Dollar and European Currency Unit shall each be subject to margin level of 100% of the current market value of each such warrant plus a four percent "add-on."[11] The margin required on currency index warrants would be an amount as determined by the Exchange and approved by the Commission.[12] The Exchange also proposes that its stock index, currency and currency index warrant margin requirements be permitted offset treatment for spread and straddle positions. In this regard, the Exchange proposes that index, currency and currency index warrants may be offset with either warrants or Options Clearing Corporation ("OCC") issued options on the same index, currency or currency index, respectively. Furthermore, the Exchange has proposed that subsections (F)(3), (F)(4), and (G)(4)–(7) to Rule 2,16(d)(2), to the extent that such rules concern spread and straddle positions in warrants, be subject to a one year pilot basis.[13] Finally, proposed Rule 2.16(d)(2)(H)(6) will also permit the use of escrow receipts to cover a short call position in a broad-based stock index warrant.[14]

Proposed Rule 8.4 states that no member or member organization shall accept an order from a customer for the purchase or sale of warrants unless the customer's account has been approved for options trading pursuant to Exchange Rule 9.18(b). Furthermore, proposed Rules 8.5–8.8 require that the option rules pertaining to suitability, discretionary account trading, supervision of accounts and customer complaints be applied to warrants.

Proposed Rule 8.9 requires approval by a Compliance Registered Options Principal of all advertisements, sales literature and educational material issued by a member organization pertaining to warrants. The rule further requires Exchange approval of all advertisements and educational materials pertaining to warrants. Finally, prior to trading index, currency or currency index warrants, the Exchange will distribute circulars to its membership providing guidance regarding member firm compliance responsibilities (including suitability recommendations) when handling transactions in warrants.

Proposed Rule 8.10 provides that position limits for stock index warrants on the same index with original issues prices of ten dollars or less will be fifteen million warrants covering all such issues.[15] The rule provides that warrants with an original issue price of greater than ten dollars will be weighted

---

("Amendment No. 1"), June 8, 1995 ("Amendment No. 2"), June 23, 1995 ("Amendment No. 3"), August 1, 1995 ("Amendment No. 4"), and August 22, 1995 ("Amendment No. 5").

[6] The proposed rules would apply to both American-style warrants (which may be exercised at any time prior to expiration) and European-style warrants (which may only be exercised during a specified period before expiration).

[7] *See* Amendments No. 1 and 3. The Exchange amended this provision in response to the Seward & Kissell Letter.

[8] *See* Amendment No. 3. The Exchange amended its proposal in response to the Seward & Kissell Letter and notes that a warrant based upon a domestic U.S. stock index may be settled using closing prices ("p.m. settlement") for the underlying stocks at all times except for valuation day and the two business days immediately preceding valuation day.

[9] *See* Amendment No. 1.

[10] *See* Amendment No. 3.

[11] *See* Amendment No. 2. Consistent with the treatment of options on foreign currencies, warrants on the Canadian Dollar will be subject to a one percent "add-on." The margin required on any other foreign currency would be subject to approval by the Commission. *See infra* note 28.

[12] *See infra* note 28.

[13] Three months prior to the expiration of the pilot program, the Exchange will submit a report to SEC staff analyzing the price relationship between listed warrants and options on similar stock indexes. *See* Amendment No. 1. The Exchange has also requested no-action relief from the Commission in order to permit certain short positions in stock index call and put warrants to be treated as covered for margin purposes.

[14] *See* Amendment No. 1. The Exchange notes that this treatment is consistent with the rules that allow for the use of escrow receipts to cover a short call position in broad-based stock index options.

[15] *See infra* note 41.

more heavily than warrants with an original issue price of ten dollars or less in calculating position limits.[16] The rule also gives the Exchange the authority to require the liquidation of a position in stock index warrants that is in excess of the position limits set forth in the rule, and Commentary to the rule establishes procedures for allowing limited exceptions to the position limits.

Proposed Rule 8.11 provides for exercise limits on stock index warrants analogous to those found in stock index options and states that such limits are distinct from any exercise limits that may be imposed by the issuers of stock index warrants. Accordingly, no member may exercise a long position in warrants over a five consecutive day period in excess of the permissible position limit.

In order to facilitate its review of compliance with position and exercise limits, the Exchange has proposed Rule 8.17 which establishes reporting requirements for large warrant positions. Under the terms of the rule, members will be required to file a report with the Exchange whenever any account in which the member has an interest has established an aggregate position of 100,000 warrants overlying the same index, currency or currency index. For purposes of this rule, the Exchange proposes that long positions in puts be combined with short positions in call warrants, and that short positions in puts be combined with long positions in call warrants.[17] Finally, proposed Rule 8.12 requires that the trading halt provisions in Rule 7.11 shall be applied to the trading of stock index warrants.

Upon Commission approval of the foregoing rule amendments, the Exchange proposes that it will only file rule changes for specific stock index warrant issuances where there is no corresponding option or warrant on the same underlying stock index already listed on a national securities exchange or included for quotation on NASDAQ. Accordingly, when a listed option overlies a particular broad based index, the Exchange proposes it be allowed to list warrants on that index without further Commission review and approval pursuant to Section 19(b) of the Act, as long as the listing complies with the warrant listing standards as approved in this Order.[18]

III. Comments Received

The Commission received one letter in response to its request for comments on the PSE proposal.[19] The Comment Letter was generally supportive of the PSE's proposal, however, it recommended several changes in the proposed regulatory structure applicable to stock index, currency and currency index warrants. The Comment Letter was submitted on behalf of the Firms, all of whom are represented to be major participants in the issuance, underwriting and trading of warrants. Because the proposed regulatory regime applicable to warrants will, to some extent, be based upon the rules governing standardized options, the Comment Letter states that the Firms' comments are drive, in part, by the fact that fundamental differences exist between warrants and standardized options which necessitate disparate regulatory treatment in certain situations.[20]

First, the Comment Letter suggested amending the Issuer Listing Standards to eliminate the 25% test or, in the alternative, to adopt hedging and/or netting standards designed to more accurately reflect issuer-specific risk.[21] Because warrants are sold by means of a registration statement, the Firms believe that adequate disclosure of the amount of an issuer's outstanding securities could be included in the prospectus. Furthermore, the Comment Letter points out that issuers of warrants are traditionally subject to outside evaluation by certain credit rating agencies, which should assist investors in determining undue issuer credit risk. Finally, the Firms do not believe that 25% test bears any resemblance to an issuer's risk exposure since exposure fluctuates with market changes at any given time and also because the proposal provides no recognition for offsetting hedges or for warrants subject to netting.

In response to the Seward & Kissel Letter's comments respecting issuer listings standards, the PSE amended the filing to add an alternative issuer qualification criteria.[22] Under the new criteria, an issuer will be required to either: (a) have a minimum tangible net worth of $250 million; or (b) meet the existing criteria (*i.e.*, tangible net worth of $150 million and meet the 25% test).

The Comment Letter also recommended allowing the use of p.m. settlement for all American-style warrants exercised anytime except 48 hours prior to expiration, at which time a.m. settlement would be required. According to the Comment Letter, unlike the listed options (where OCC is the issuer and runs a balanced book), a warrant issuer must hedge its exposure to maintain offsetting positions. Upon early exercise of the warrants, the issuer that has hedged its exposure will have to take action to "unwind" the portion of its hedge relating to the exercised warrants. The Firms believe that requiring a.m. settlement on the first day after an investor exercises the warrant will place additional market risk upon them due to the difficulty in managing the hedge. This increased hedging cost, the Firm's argue, could result in a higher issuance price for the warrant or could require that the warrant settlement value date be postponed an additional day, with warrant holders hearing additional market risk during this period.

In response to the Comment Letter, the PSE amended its filing to include a provision permitting p.m. settlement for stock index warrants except for a short period before expiration.[23] Under the terms of the amendment, stock index warrants for which 25% or more of the value of the underlying index is represented by securities that are traded primarily in the U.S. shall, by their terms, provide that, on valuation date, as well as for the two business days prior to valuation date, the value of the stocks traded primarily in the U.S. which underlie such warrants shall be determined by reference to the opening prices of such underlying U.S. securities. For example, if the valuation date for an issuance of index warrants occurs on a Friday, a.m. settlement must be utilized for warrants that are valued on the preceding Wednesday or Thursday, as well as on the valuation date.

Third, the Comment Letter recommended creating a special category of "warrant eligible" customers (separate and distinct from options eligibility criteria), who are authorized to trade warrants even if not approved to trade options. The Firms believe it is inappropriate to apply an options regulatory regime to warrants and that doing so may prevent institutional customers who are not permitted to purchase options products, yet who nevertheless meet all of the options eligibility criteria, from purchasing warrants. In this regard, the Firms propose to create a "warrant eligible" category with standards mimicking those currently required for options approved accounts. As such, "warrant-approved" accounts could purchase warrants, however, they could not purchase options or other products requiring options account approval. The PSE did not amend its filing in response to this comment.

Fourth, the Comment Letter urges the adoption of a rule permitting firms to approve for warrant trading those accounts managed by an investment adviser ("IA") based upon the IA's representation concerning the eligibility status of its customers to engage in warrant trading, even if the underlying documentation relating to the managed accounts is not provided to the brokerage firms. The PSE has amended its proposal to allow member firms to accept the representation of an investment adviser registered under the Investment Advisers Act of 1940 concerning the eligibility status of its customers to engage in warrant trading, even if the underlying documentation relating to the managed account is not provided to the member firm, where the managed account is for an institutional customer or the investment adviser account represents the collective investment of a number of persons. The PSE states that this will conform the handling of warrant accounts to the current practice with respect to listed options accounts.[24]

Finally, the Comment Letter addressed the proposed position limits applicable to warrants. Specifically, the Comment Letter noted that position limits for warrants would be set at levels that are approximately 75% of that allowed for similar broad-based indexes. The Comment Letter recommended establishing position limits for warrants that were equivalent to those established for listed options, allowing a hedge exemption similar to listed option procedures and providing a mechanism for specific waivers or exemptions of warrant position limits for hedgers, market-makers and broker-dealers comparable to the procedures in place for listed options. The PSE did not amend its filing in response to this comment.

IV. Discussion

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of Section 6(b)(5).[25] Specifically, the Commission finds that the Exchange's proposal to establish uniform listing standards for broad-based stock index, currency and currency index warrants strikes a reasonable balance between the Commission's mandates under Section 6(b)(5) to remove impediments to and perfect the mechanism of a free and open market and a national market system, while protecting investors and the public interest. In addition, the PSE's proposed listing standards for warrants are consistent with the Section 6(b)(5) requirements that rules of an exchange be designed to prevent fraudulent and manipulative acts, to promote just and equitable principles of trade, and are not designed to permit unfair discrimination among issuers.

The PSE's proposed generic listing standards for broad-based stock index warrants, currency and currency indexes set forth a regulatory framework for the listing of such products.[26] Generally, listing standards serve as a means for an exchange to screen issuers and to provide listed status only to *bona fide* issuances that will have sufficient public float, investor base, and trading interest to ensure that the market has the depth and liquidity necessary to maintain fair and orderly markets. Adequate standards are especially important for warrant issuances given the leveraged and contingent liability they represent. Once a security has been approved for initial listing, maintenance criteria allow an exchange to monitor the status and trading characteristics of that issue to ensure that it continues to meet the exchange's standards for market depth and liquidity so that fair and orderly markets can be maintained.

In reviewing listing standards for derivative-based products, the Commission also must ensure that the regulatory requirements provide for adequate trading rules, sales practice requirements, margin requirements, position and exercise limits and surveillance procedures. These rules minimize the potential for manipulation and help to ensure that derivatively-priced products will not have a negative market impact. In addition, these standards should address the special risks to customers arising from the derivative products.[27] For the reasons discussed below, the Commission believes the PSE's proposal will provide it with significant flexibility to list index, currency and currency index warrants, without compromising the effectiveness of the Exchange's listing standards or regulatory program for such products.[28]

A. Issuer Listing Standards and Product Design

As a general matter, the Commission believes that the trading of warrants on a stock index, currency or currency index permits investors to participate in the price movements of the underlying assets, and allows investors holding positions in some or all of such assets to hedge the risks associated with their portfolios. The Commission further believes that trading warrants on a stock index, currency or currency index provides investors with an important trading and hedging mechanism that is designed to reflect accurately the overall movement of the component securities.

---

[16] For example, if an investor held 100,000 warrants based upon the Standard & Poor's 500 Index offered originally at $20 per warrant, the size of this position for the purpose of calculating position limits would be 200,000.

[17] *See* Amendment No. 3.

[18] *See infra* note 28.

[19] *See supra* note 4. The Seward & Kissel Letter was submitted on behalf of PaineWebber Inc., Bear, Stearns & Co. Inc., Lehman Brothers Inc., Smith Barney Inc., Salomon Brothers Inc., Morgan Stanley & Co. Inc., and Hambrecht & Quist Inc. (collectively the "Firms").

[20] The Comment Letter lists several differences which it perceives exist between warrants and standardized options. Chief among these are: (1) Warrants are separately registered, unsecured obligations of their issuer while options are issued and guaranteed by the Options Clearing Corp. ("OCC"); (2) during the prospectus delivery period, warrant purchasers received a product-specific prospectus while options customers receive an options disclosure document ("ODD") at the time the account is opened; (3) each warrant creates a fixed number of outstanding warrants while there is theoretically no limit to the number of options that may be issued by OCC; and (4) warrants are traded on an exchange in a manner similar to stocks which, therefore, translates into superior price transparency than for listed options.

[21] As originally proposed, an issuer would have been required to have a tangible net worth of at least $150 million and the aggregate original issue price of all of a particular issuer's warrant offerings (combined with such offerings by its affiliates) that are listed on a national securities exchange or that are national market securities traded through NASDAQ were not to exceed 25% of the issuer's net worth ("25% test).

[22] *See* Amendment No. 3.

[23] *See* Amendments No. 3 and 5.

[24] *See* Amendment No. 1.

[25] 15 U.S.C. 78f(b)(5) (1982).

[26] The Commission notes that warrants issued prior to this approval order will continue to be governed by the rules applicable to them at the time of their listing.

[27] Pursuant to Section 6(b)(5) of the Act, the Commission is required to find, among other things, that trading in warrants will serve to protect investors and contribute to the maintenance of fair and orderly markets. In this regard, the Commission must predicate approval of any new derivative product upon a finding that the introduction of such derivative instrument is in the public interest. Such a finding would be difficult for a derivative instrument that served no hedging or other economic function, because any benefits that might be derived by market participants likely would be outweighed by the potential for manipulation, diminished public confidence in the integrity of the markets, and other valid regulatory concerns. As discussed below, the Commission believes warrants will serve an economic purpose by providing an alternative product that will allow investors to participate in the price movements of the underlying securities in addition to allowing investors holding positions in some or all of such securities to hedge the risks associated with their portfolios.

[28] Issuances of warrants overlying a single currency may currently be listed for trading without a rule filing provided that the underlying currency is one of the original seven foreign currencies approved for options trading: the Australian Dollar, British Pound, Canadian Dollar, French Franc, German Mark, Japanese Yen, Swiss Franc and the European Currency Unit. Issuances of currency warrants overlying any other foreign currency would require a rule filing pursuant to Section 19(b) of the Act. The Commission notes that currency index warrants may only be established without a further rule filing upon an index that has been previously approved by the Commission pursuant to a Section 19(b) filing. To date, the only currency index approved pursuant to Section 19(b) is an equal-weighted index comprised of the British Pound, Japanese Yen and German Deutsche Mark. *See* Securities Exchange Act Release No. 31627 (Dec. 21, 1992), 57 FR 62399 (Dec. 30, 1992). Accordingly, any other currency index (as well as a broad-based stock index) not previously approved by the Commission would require approval pursuant to Section 19(b).

Warrants, unlike standardized options, however, do not have a clearinghouse guarantee but are instead dependent upon the individual credit of the issuer. This heightens the possibility that an exerciser of warrants may not be able to receive full cash settlement upon exercise. This additional credit risk, to some extent, is reduced by the Exchange's issuer listing standards that require an issuer to have either; (a) a minimum tangible net worth of $250 million; or (b) a minimum tangible net worth of $150 million, provided that the issuer does not have (including as a result of the proposed issuance) issued outstanding warrants where the aggregate original issue price of all such stock index, currency and currency index warrant offerings (or affiliates) that are listed on a national securities exchange or traded through the facilities of NASDAQ is in excess of 25% of the warrant issuer's net worth. Furthermore, financial information regarding the issuers of warrants will be disclosed or incorporated in the prospectus accompanying the offering of the warrants. Moreover, the alternative test addresses the Comment Letter's concerns on the 25% standard.

The PSE's proposal will provide issuers flexibility by allowing them to utilize either a.m. or p.m. settlement, provided, however, domestic index warrants (*i.e.*, warrants based on indexes for which 25% or more of the index value is represented by securities traded primarily in the U.S.) ("domestic index warrants") are required to utilize a.m. settlement for expiring warrants as well as during the last two business days prior to valuation date.[29] The Commission continues to believe that a.m. settlement significantly improves the ability of the market to alleviate and accommodate large and potentially destabilizing order imbalances associated with the unwinding of index-related positions. Nevertheless, in accordance with the Comment Letter's suggestions, the use of p.m. settlement except during the last two business days prior to a domestic index warrant's valuation date, as well as the valuation date, strikes a reasonable balance between ameliorating the price effects associated with expirations of derivative index products and providing issuers with flexibility in designing their products.[30] In this context, the Commission notes that unlike standardized index options whose settlement times are relatively uniform, index warrants are issuer-based products, whose terms are individually set by the issuer. In addition, while options may have unlimited open interest, the number of warrants on a given index is fixed at the time of issuance. Accordingly, it is not certain that there will be a significant number of warrants in indexes with similar components expiring on the same day. This may reduce the pressure from liquidation of warrant hedges at settlement. Nevertheless, the Commission expects the Exchange to monitor this issue and, should significant market effects occur as a result of early exercises from p.m. settled index warrants, would expect it to make appropriate changes including potentially limiting the number of index warrants with p.m. settlement.

B. Customer Protection

Due to their derivative and leveraged nature, and the fact that they are a wasting asset, many of the risks of trading in warrants are similar to the risks of trading standardized options. Accordingly, the PSE has proposed to apply its options customer protection rules to warrants. In particular, the Commission notes that warrants may only be sold to options approved accounts capable of evaluating and bearing the risks associated with trading in these instruments, in accordance with PSE Rule 9.18(b), and that adequate disclosure of the risks of these products must be made to investors.[31] In addition, the PSE will apply the options rules for suitablilty, discretionary accounts, supervision of accounts and customer complaints to transactions in warrants. By imposing the special suitability and disclosure requirements noted above, the Commission believes the PSE has addressed adequately several of the potential customer protection concerns that could arise from the options-like nature of warrants.

The ODD, which all options approved accounts must receive, generally explains the characteristics and risks of standardized options products. Although many of the risks to the holder of an index warrant and option are substantially similar, however, because warrants are issuer-based products, some of the risks, such as the lack of a clearinghouse guarantee and certain terms for index warrants, are different. The PSE has adequately addressed this issue by proposing to distribute a circular to its members that will call attention to the specific risks associated with stock index, currency and currency index warrants that should be highlighted to potential investors. In addition, the issuer listing guidelines described above will ensure that only substantial companies capable of meeting their warrant obligations will be eligible to issue warrants. These requirements will help to address, to a certain extent, the lack of a clearinghouse guarantee for index warrants. Finally, warrant purchasers will receive a prospectus during the prospectus delivery period. The Commission believes that this will ensure that certain information about the particular issuance and issuer is publicly available.

As note above, the Comment Letter indicates that applying the options disclosure framework to warrants is inappropriate. However, the Commission believes that the combined approach of making available general derivative product information (the ODD), product specific information (the Exchange circular), and issuer specific information (the prospectus) should provide an effective disclosure mechanism for these products.

At this time, the Commission does not agree with the proposal contained in the Comment Letter to create a special "warrant eligible" classification of purchasers. As noted above, index, currency and currency index warrants are very similar to standardized options. They are so similar that a customer precluded from trading options should not avoid the restriction indirectly by being designated by Exchange rules as eligible for stock index, currency or currency index warrants. Nevertheless, as the range of exchange-traded derivative products increases, the SROs might consider in the future as to whether a new derivatives eligibility classification is appropriate.

C. Surveillance

In evaluating proposed rule changes to list derivative instruments, the Commission considers the degree to which the market listing the derivative product has the ability to conduct adequate surveillance. In this regard the Commission notes that the Exchange has developed adequate surveillance procedures for the trading of index and currency warrants. First, new issues of currency warrants will be subject to the PSE's existing surveillance procedures applicable to foreign currency warrants, which the Commission previously has found to be adequate to surveil for manipulation and other abuses involving the warrant market and the underlying foreign currencies.[32]

Second, the Exchange has developed enhanced surveillance procedures to apply to domestic stock index warrants which the Commission believes are adequate to surveil for manipulation and other abuses involving the warrant market and component securities.[33] Among these enhanced surveillance procedures, the Commission notes that issuers will be required to report to the Exchange on settlement date the number and value of domestic index warrants subject to early exercise the previous day. The Commission believes that this information will aid the PSE in its surveillance capacity and help it to detect and deter market manipulation and other trading abuses.

Third, the Exchange has developed adequate surveillance procedures to apply to foreign stock index warrants *i.e.*, less than 25% of the index value is derived from stocks traded primarily in the U.S.).[34] The Commission believes that the ability to obtain information regarding trading in the stocks underlying an index warrant is important to detect and deter market manipulation and other trading abuses. Accordingly, the Commission generally requires that there be a surveillance sharing agreement [35] in place between an exchange listing or trading a derivative product and the exchange(s) trading the stocks underlying the derivative contract that specifically enables the relevant markets to surveil trading in the derivatives product and its underlying stocks.[36] Such agreements provide a necessary deterrent to manipulation because they facilitate the availability of information needed to fully investigate a potential manipulation if it were to occur.[37] In this regard, the PSE will require that no more than 20% of an Index's weight may be comprised (upon issuance and thereafter) of foreign securities (or ADRs thereon) that do not satisfy one of the following tests: (1) The Exchange has in place an effective surveillance agreement [38] with the primary exchange in the home country in which the security underlying the ADR is traded; or (2) meets an existing alternative standard available for standardized options trading (*e.g.*, satisfy the 50% U.S. trading volume test).[39] The Commission believes that this standard will ensure that index warrants are not listed upon foreign indexes whose underlying securities trade on exchanges with whom the PSE has no surveillance sharing agreement.

D. Market Impact

The Commission believes that the listing and trading of index warrants, currency warrants and currency index warrants will not adversely affect the U.S. securities markets or foreign currency markets. First, with respect to currency and currency index warrants, the Commission notes that the interbank foreign currency spot market is an extremely large, diverse market comprised of banks and other financial institutions worldwide. That market is supplemented by equally deep and liquid markets for standardized options and futures on foreign currencies and options on those futures. An active over-the-counter market also exists in options, forwards and swaps for foreign currencies. This minimizes the possibility that Exchange listed warrants would be used to manipulate the spot currency markets. In addition, the surveillance procedures for these products should allow the Exchange to detect and deter potential manipulation involving currency warrants and currency index warrants.

Second, with respect to index warrants, the Commission notes that warrants may only be established upon indexes the Commission has previously determined to be broad-based in the context of index options or warrant trading. As part of its review of a proposal to list an index derivative product, the Commission must find that the trading of index options or warrants will serve to protect investors, promote the public interest, and contribute to the maintenance of fair and orderly markets. Accordingly, the Commission does not believe that the issuance of index warrants upon previously approved broad based stock index options or warrants will adversely impact the underlying component securities. In addition, because index warrants are issued by various individual issuers who set their own terms, it is likely that expirations among similar index products will be varied, thereby reducing the likelihood that unwinding hedge activities would adversely affect the underlying cash market. Finally, as discussed above, the Commission believes the PSE's enhanced surveillance procedures applicable to stock index warrants are adequate to surveil for manipulation and other abuses involving the warrant market, component securities and issuer hedge unwinding transactions.

Third, the Exchange has proposed margin levels for stock index and currency warrants equivalent to those in place for stock index and currency options. The Commission believes these requirements will provide adequate customer margin levels sufficient to account for the potential volatility of these products. In addition, options margin treatment is appropriate given the options-like market risk posed by warrants. The Commission notes that the customer spread margin treatment applicable to warrants is subject to a one year pilot program. This will allow the

---

[29] Currency and currency index warrants are not limited to a.m. or p.m. settlement.

[30] Foreign stock market based index warrants may utilize p.m. settlement throughout their duration.

[31] Pursuant to PSE Rule 9.18(b), all options approved accounts must receive an ODD, which discusses the characteristic and risks of standardized options.

[32] *See* Securities Exchange Act Release No. 24555 (June 5, 1987), 52 FR 22570 (June 12, 1987), and Securities Exchange Act Release No. 26152 (Oct. 3, 1988), 53 FR 39832 (Oct. 12, 1988). The Commission notes that these surveillance procedures only apply to the issuance of warrants overlying one of the approved foreign currencies. *See supra* note 28. The issuance of warrants upon any other foreign currency would necessitate a Section 19(b) rule filing which, among other things, details applicable to surveillance procedures.

[33] In addition, the Commission notes that issuers will be required to report to the Exchange all trades to unwind a warrant hedge that are effected as a result of the early exercise of domestic index warrants. This will enable the Exchange to monitor the unwinding activity to determine if it was effected in a manner that violates Exchange or Commission rules.

[34] Each prior issuance of a foreign stock market based index warrant is subject to specific surveillance procedures. These procedures are generally tailored to the individual warrant issuance and are based upon several factors involving the primary foreign market, including the existence of surveillance or information sharing agreements.

[35] The Commission believes that a surveillance sharing agreement should provide the parties with the ability to obtain information necessary to detect and deter market manipulation and other trading abuses. Consequently, the Commission generally requires that a surveillance sharing agreement require that the parties to the agreement provide each other, upon request, information about market trading activity, clearing activity, and the identity of the ultimate purchasers for securities. *See e.g.*, Securities Exchange Act Release No. 31529 (Nov. 27, 1992).

[36] The ability to obtain relevant surveillance information, including, among other things, the identity of the ultimate purchasers and sellers of securities, is an essential and necessary component of a comprehensive surveillance sharing agreement.

[37] In the context of domestic index warrants, the Commission notes that the U.S. exchanges are members of the Intermarket Surveillance Group ("ISG"), which was formed to, among other things, coordinate more effectively surveillance and investigative information sharing arrangements in the stock and options markets. *See* Intermarket Surveillance Group Agreement, July 14, 1983. The most recent amendment to the ISG Agreement, which incorporates the original agreement and all the amendments made thereafter, was signed by ISG members on January 29, 1990. *See* Second Amendment to the ISG Agreement.

[38] *See supra* note 35.

[39] *See* Securities Exchange Act Release Nos. 31529, 57 FR 57248 (Dec. 3, 1992) and 33555, 59 FR 5619 (Feb. 7, 1994).

Exchange to analyze the pricing relationships between listed options and warrants on the same index in order to determine whether to revise or approve on a permanent basis the proposed spread margin rules.[40]

Fourth, the PSE has established reasonable position and exercise limits for stock index warrants, which will serve to minimize potential manipulation and other market impact concerns.[41] Contrary to the views expressed in the Comment Letter, the Commission believes that in the absence of trading experience with domestic index warrants, it would be imprudent to establish position limits for positions greater than those currently applicable to domestic stock index options on the same index.[42]

V. Conclusion

The Commission believes that the adoption of these uniform listing and trading standards covering index, currency or currency index warrants will provide an appropriate regulatory framework for these products. These standards will also benefit the Exchange by providing them with greater flexibility in structuring warrant issuances and a more expedient process for listing warrants without further Commission review pursuant to Section 19(b) of the Act. As noted above, additional Commission review of specific warrant issuances will generally only be required for warrants overlying any non-approved broad-based index or a non-approved currency or currency index. If Commission review of a particular warrant issuance is required, the Commission expects that, to the extent that the warrant issuance complies with the uniform criteria adopted herein, its review should generally be limited to issues concerning the newly proposed index. This should help ensure that such additional Commission review could be completed in a prompt manner without causing any unnecessary delay in listing new warrant products.

The Commission finds good cause for approving Amendments No. 1, 2, 3, 4 and 5 to the proposed rule change prior to the thirtieth day after the date of publication of notice of filing thereof in the **Federal Register** for the following reasons. As discussed below, the changes are either (1) Minor and technical in nature; (2) responsive to the Comment Letter; (3) designed to conform to warrant proposals from other markets; or (4) modifications to Exchange surveillance procedures. Accordingly, the amendments do not raise new significant regulatory issues or are responsive to prior comments. In order to enable the Exchange to list new index, currency or currency index warrants as soon as possible, the Commission believes it is necessary and appropriate to approve the amendments on an accelerated basis.

Amendment No. 1 makes several changes to the filing which are designed to bring it into conformity with the other options exchanges. First, it revises Rule 8.3, Listing of Currency and Index Warrants, in several respects to provide uniform issuer listing standards. The first two changes permit the use of p.m. settlement for domestic index warrants (except during the last 48 hours preceding valuation date) and provide an alternative issuer listing qualification criteria (as discussed above under *Issuer Listing Standards and Product Design*). The Commission notes that these changes were made in response to comments received from the Seward & Kissell Letter and further believes these changes provide added flexibility to issuers without compromising investor protection concerns.

Amendment No. 1 also revises Rule 8.3 in two other respects: by limiting the number of foreign securities that may comprise an underlying stock index and by adding a provision requiring an issuer to notify the listing Exchange of early exercises of domestic index warrants. Taken together, the Commission believes these changes further strengthen the issuer listing standards and the Exchange's surveillance procedures to the benefit of warrant investors.

Amendment No. 1 also revises Rule 2.16 to provide that the proposed spread and straddle margin treatment for stock index warrants will be effected as part of a one year pilot program, and to provide that escrow receipts will be accepted to cover short positions in stock index warrants. The Commission notes that these changes conform the margin treatment afforded options and warrants and provide a basis for evaluating pricing correlations between warrants and options overlying the same index, currency or currency index.

Finally, Amendment No. 1 provides that the Exchange will permit member firms to accept an IA's representation concerning the options eligibility status of its customers; as described above. The Commission notes that this practice is consistent with the treatment of options and, therefore, raises no new or unique regulatory issues. Accordingly, for the reasons discussed above relating to each proposed revision of the Amendment, the Commission believes it is appropriate to approve Amendment No. 1 to the Exchange's proposal on an accelerated basis.

Amendment No. 2 addresses currency or currency index warrant margin to clarify which currencies are subject to a four percent "add-on" for margin purposes. The Commission notes that this revision simply harmonizes the treatment afforded currency options and warrants. Second, the amendment states that the applicable margin level for currency index warrants will be a percentage as specified by the exchange and approved by the Commission. This change is also consistent with the treatment afforded currency index options, where margin levels are established on a case by case basis. Accordingly, the Commission believes it is appropriate to approve Amendment No. 2 on an accelerated basis.

Amendment No. 3 to the proposal clarifies several issues relating to a.m. settlement, position reporting and notification of early exercise of warrants. First, the Amendment clarifies in PSE Rule 8.3(a)(5) that a.m. settlement will be used during the 48-hour period prior to expiration of index warrants. The Commission notes that this change simply codifies a provision the PSE previously agreed to in Amendment No. 1.[43] Next, the Amendment establishes that warrant positions will be subject to reporting levels, initially set at 100,000 warrants. The Commission believes that requiring investors to report to the Exchange when their holdings exceed specified levels should aid the Exchange in its monitoring for potential trading abuses involving index, currency and currency index warrants. Also, the Amendment addresses surveillance related matters. In particular, it provides that issuers must report all hedge unwinding transactions related to the early exercise of domestic index warrants to the listing exchange by the business day following trade date ("T+1").[44] In addition, it requires issuers to notify the listing exchange of any early exercises of index warrants by 4:30 p.m. (New York time) on settlement date for the warrants. The Commission believes this change to the PSE's surveillance procedures strengthens the Exchange's monitoring of index warrants. Accordingly, the Commission believes it is appropriate to approve Amendment No. 3 on an accelerated basis.

Amendment No. 4 deletes a transaction reporting requirement which will be revised and incorporated into the Exchange's surveillance procedures and also makes other minor changes. As such, the Commission does not believe the Amendment raises any new or unique regulatory issues. Accordingly, the Commission believes it is appropriate to approve Amendment No. 4 on an accelerated basis.

Amendment No. 5 clarifies the settlement procedures for index warrants which are exercised at or prior to expiration. Specifically, the Amendment clarifies that a.m. settlement will be required on valuation date as well as during the last two business days prior to an index warrant's valuation date. As discussed above, the Commission believes that the use of a.m. settlement during this period will help to ameliorate any potential price effects associated with expirations of derivative index products. Accordingly, the Commission believes it is appropriate to approve Amendment No. 5 on an accelerated basis. Therefore, the Commission believes it is consistent with Sections 6(b)(5) and 19(b)(2) of the Act to approve Amendments No. 1, 2, 3, 4 and 5 to the PSE's proposal on an accelerated basis.

VI. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning Amendments No. 1, 2, 3, 4 and 5. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by September 28, 1995.

It therefore is ordered, pursuant to Section 19(b)(2) of the Act,[45] that the proposed rule change (SR–PSE–94–28) is approved, as amended, with the portion of the rule change relating to spread margin treatment being approved on a one year pilot program basis, ending August 29, 1996.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[46]

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 95–22194 Filed 9–6–95; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 34–36167; File No. SR–Phlx–94–49]

Self-Regulatory Organizations; Philadelphia Stock Exchange, Inc.; Order Approving Proposed Rule Change and Notice of Filing and Order Granting Accelerated Approval of Amendments No. 1, 2, 3, and 4 to Proposed Rule Change Relating to the Establishment of Uniform Listing and Trading Guidelines for Stock Index, Currency and Currency Index Warrants

August 29, 1995.

I. Introduction

On November 30, 1994, the Philadelphia Stock Exchange, Inc. ("Phlx" or "Exchange") submitted to the Securities and Exchange Commission ("SEC" or "Commission"), pursuant to Section 19(b) ("Section 19(b)") of the Securities Exchange Act of 1934 ("Act"),[1] and Rule 19b-4 thereunder,[2] a proposed rule change to establish uniform rules for the listing and trading of stock index ("index" or "stock index"), currency ("currency") and currency index ("currency index") warrants (collectively "warrants"). Notice of the proposed rule change appeared in the **Federal Register** on December 20, 1994.[3] One comment letter was received in response to the proposal.[4]

The Exchange subsequently filed four Amendments to the proposal.[5] Amendment No. 1 brings several of Phlx's proposed rules and policies into conformity with those previously filed by other markets. Amendment No. 2, in addition to responding to several technical changes requested by the staff, addresses currency and currency index warrant margin levels and settlement methodology. Amendment No. 3, in addition to addressing issues relating to reporting requirements and notification of early exercises, removes certain surveillance procedures from the Phlx's rules. Amendment No. 4 clarifies the settlement procedures for index warrants which are exercised at or prior to expiration. This order approves the proposal, as amended.

II. Description of the Proposal

The Phlx proposes to establish uniform rules for the listing and trading of stock index, currency and currency index warrants.[6] Rule 803, Criteria for Listing, would be amended to provide uniform listing criteria for index, currency and currency index warrants. First, issuers would be expected to exceed minimum issuer listing standards. In particular, the Exchange proposes that issuers be required to have a minimum tangible net worth in excess of $250 million or, in the alternative, have a minimum tangible net worth in excess of $150 million, provided that the issuer does not have (including as a result of the proposed issuance) issued outstanding warrants where the aggregate original issue price of all such warrant offerings (combined with offerings by its affiliates) listed on a national securities exchange or that are National Market securities traded through NASDAQ exceeds 25% of the issuer's net worth.[7]

---

[40] The Commission notes that the margin levels for currency index warrants will be set at a level determined by the Exchange and approved by the SEC. *See* Amendment No. 2. Issuances of warrants listed prior to the approval of this order will continue to apply the margin level applicable to them at the time of their listing.

[41] The Commission notes that there are no position or exercise limits applicable to currency or currency index warrants, although reporting requirements do apply. Nevertheless, the Commission may review the need to establish foreign currency position limits if the size of the currency or currency index warrant market increases significantly.

[42] With respect to the Comment Letter's suggestion that a hedge exemption rule be established in order to allow participants to readily acquire exemptions from the Exchange as needed, the Commission does not believe that such an approach is appropriate at this time. The hedge exemption for index options was adopted after several years experience with index options trading. Until the SROs gain some experience with domestic index warrant trading, it is difficult to determine the need for a hedge exemption (*i.e.*, that speculative limits are insufficient to meet hedging needs).

[43] Amendment No. 5 subsequently changes the language of this provision to require a.m. settlement be used during the two business days prior to valuation date.

[44] The Commission notes that Amendment No. 4 removes this transaction reporting requirement which will be incorporated into the Exchange's surveillance procedures.

[4] *See* Letter from Paul M. Gottlieb, Seward & Kissel, to Jonathan G. Katz, Secretary, Commission, dated January 10, 1995 ("Comment Letter" or "Seward & Kissel Letter").

[5] *See* Letters from Michele R. Weisbaum, Phlx, to Michael Walinskas, SEC, dated May 24, 1995, ("Amendment No. 1") and to Stephen M. Youhn, SEC, dated June 26, 1995 ("Amendment No. 2"), August 4, 1995 ("Amendment No. 3"), and August 25, 1995 ("Amendment No. 4").

[6] The proposed rules would apply to both American-style warrants (which may be exercised at any time prior to expiration) and European-style warrants (which may only be exercised during a specified period before expiration).

Second, the proposal requires that unexercised in-the-money warrants be automatically exercised on either the delisting date (if the issue is not listed upon another organized securities market) or upon expiration. Third, the proposal provides that for warrant offerings where U.S. stocks constitute 25% or more of the index value ("domestic index"), issuers shall use opening prices ("a.m. settlement") for U.S. stocks to determine index warrant settlement values during the 48 hour period prior to expiration of the warrants.[8] Fourth, Rule 803(e)(5) has been amended to provide that foreign country securities or American Depositary Receipts ("ADRs") thereon that are not subject to a comprehensive surveillance sharing agreement with the Exchange and that have less than 50% of their global trading volume (in dollar value) within the U.S., shall not represent more than 20% of the weight of the index.[9] Finally, the Exchange proposes to add Rule 803(e)(6), which is designed to assist in the surveillance of index warrant trading. Specifically, the Exchange of any early exercises by 4:30 p.m. (New York time) on the day that the settlement value for the warrants is determined.[10]

Proposed Rule 722 ("Rule 22"), the Phlx margin rule, is being amended to apply the current customer margin requirements for broad based stock index and currency options to stock index, currency and currency index warrants. Thus, all purchases of warrants will require payment in full, and short sales of stock index warrants will require initial margin of: (i) 100 percent of the current value of the warrant plus (ii) 15 percent of the current value of the underlying broad stock index less the amount by which the warrant is out of the money, but to a minimum of ten percent of the index value. Short sales of currency warrants will follow the margin requirements currently applicable to listed currency options. Specifically, the Exchange proposes that short sales of warrants on the German Mark, French Franc, Swiss Franc, Japanese Yen, British Pound, Australian Dollar and European Currency Unit shall each be subject to a margin level of 100% of the current market value of each such warrant plus a four percent "add-on."[11] The margin required on currency index warrants would be an amount as determined by the Exchange and approved by the Commission.[12] The Exchange also proposes that its stock index, currency and currency index warrant margin requirements be permitted offset treatment for spread and straddle positions. In this regard, the Exchange proposes that index, currency and currency index warrants may be offset with either warrants or Options clearing Corporation ("OCC") issued options on the same index, currency or currency index, respectively. Furthermore, the Exchange has proposed that subsection (c)(2)(F)(i) of Rule 722, to the extent that such rules concern spread and straddle positions in warrants, be subject to a one year pilot basis.[13] Finally, proposed Rule 722(c)(2)(G)(v) will also permit the use of escrow receipts to cover a short call position in a broad-based stock index warrant.[14]

Proposed Rule 1024 states that no member or member organization shall accept an order from a customer for the purchase or sale of warrants unless the customer's account has been approved for options trading. Furthermore, Rules 1025–1027 and 1070, pertaining to suitability, discretionary account trading, supervision of accounts and customer complaints will be applied to transactions in warrants.

Existing Rule 1049 will apply to warrants and require approval by a Compliance Registered Options Principal of all advertisements, sales literature and educational material issued by a member organization pertaining to warrants. The rule further requires Exchange approval of all advertisements and educational materials pertaining to warrants. Finally, prior to trading index, currency or currency index warrants, the Exchange will distribute circulars to its membership providing guidance regarding member firm compliance responsibilities (including suitability recommendations) when handling transactions in warrants.

Phlx Rule 1001 is being amended to provide that position limits for stock index warrants on the same index with original issue prices of ten dollars or less will be fifteen million warrants covering all such issues.[15] The rule also provides that warrants with an original issue price of ten dollars or more will be weighted more heavily than warrants with an original issue price of ten dollars or less in calculating position limits.[16] The rule also gives the Exchange the authority to require the liquidation of a position in stock index warrants that is in excess of the position limits set forth in the rule, and Commentary to the rule establishes procedures for allowing limited exceptions to the position limits.

Rule 1002 is being amended to provide for exercise limits on stock index warrants that are analogous to those found in stock index options and states that such limits are distinct from any exercise limits that may be imposed by the issuers of stock index warrants. Accordingly, no member may exercise a long position in warrants over a five consecutive day period in excess of the permissible position limit.

In order to facilitate its review of compliance with position and exercise limits, the Exchange is amending Rule 1003 to establish reporting requirements for large warrant positions. Under the terms of the rule, members will be required to file a report with the Exchange whenever any account in which the member has an interest has established an aggregate position of 100,000 warrants overlying the same index, currency or currency index. For purposes of this rule, the Exchange proposes that long positions in puts be combined with short positions in call warrants, and that short positions in puts be combined with long positions in call warrants.[17] Finally, Rule 1047A regarding trading halt provisions is being amended to indicate that it also will apply to the trading of warrants.

Upon Commission approval of the foregoing rule amendments, the Exchange proposes that it will only file rule changes for specific stock index

---

[7] *See* amendments No. 1 and 2. The Exchange amended this provision in response to the Seward & Kissell Letter.

[8] *See* Amendments No. 2. The Exchange amended its proposal in response to the Seward & Kissell Letter and notes that a warrant based upon a domestic U.S. stock index may be settled using closing prices ("p.m. settlement") for the underlying stocks at all times except for valuation day and the two business days immediately preceding valuation day.

[9] *See* Amendments No. 1 and 2.

[10] *See* Amendment No. 3.

[11] *See* Amendment No. 2. Consistent with the treatment of options on foreign currencies, warrants on the Canadian Dollar will be subject to a one percent "add-on." The margin required on any other foreign currency would be subject to approval by the Commission. *See infra* note 28.

[12] *See infra* note 28.

[13] Three months prior to the expiration of the pilot program, the Exchange will submit a report to SEC staff analyzing the price relationship between listed warrants and options on similar stock indexes. *See* Amendment No. 1. The Exchange has also requested no-action relief from the Commission in order to permit certain short positions in stock index call and put warrants to be treated as covered for margin purposes.

[14] *See* Amendment No. 1. The Exchange notes that this treatment is consistent with the rules that allow for the use of escrow receipts to cover a short call position in broad-based stock index options.

[15] *See infra* note 41.

[16] For example, if an investor held 100,000 warrants based upon the Standard & Poor's 500 Index offered originally at $20 per warrant, the size of this position for the purpose of calculating position limits would be 200,000.

[17] *See* Amendment No. 2.

warrant issuances where there is no corresponding option or warrant on the same underlying stock index already listed on a national securities exchange or NASDAQ. Accordingly, when a listed option overlies a particular broad based index, the Exchange proposes it be allowed to list warrants on that index without further Commission review and approval pursuant to Section 19(b) of the Act, as long as the listing complies with the warrant listing standards as approved in this Order.[18]

III. Comments Received

The Commission received one letter in response to its request for comments on the Phlx proposal.[19] The Comment Letter was generally supportive of the Phlx's proposal, however, it recommended several changes in the proposed regulatory structure applicable to stock index, currency and currency index warrants. The Comment Letter was submitted on behalf of the Firms, all of whom are represented to be major participants in the issuance, underwriting and trading of warrants. Because the proposed regulatory regime applicable to warrants will, to some extent, be based upon the rules governing standardized options, the Comment Letter states that the Firms' comments are driven, in part, by the fact that fundamental differences exist between warrants and standardized options which necessitate disparate regulatory treatment in certain situations.[20]

First, the Comment Letter suggested amending the Issuer Listing Standards to eliminate the 25% test or, in the alternative, to adopt hedging and/or netting standards designed to more accurately reflect issuer-specific risk.[21] Because warrants are sold by means of a registration statement, the Firms believe that adequate disclosure of the amount of an issuer's outstanding securities could be included in the prospectus. Furthermore, the Comment Letter points out that issuers of warrants are traditionally subject to outside evaluation by certain credit rating agencies, which should assist investors in determining undue issuer credit risk. Finally, the Firms do not believe the 25% test bears any resemblance to an issuer's risk exposure since exposure fluctuates with market changes at any given time and also because the proposal provides no recognition for offsetting hedges or for warrants subject to netting.

In response to the Seward & Kissell Letter's comments respecting issuer listings standards, the Phlx amended the filing to add an alternative issuer qualification criteria.[22] Under the new criteria, an issuer will be required to either: (a) have a minimum tangible net worth of $250 million; or (b) meet the existing criteria (*i.e.*, tangible net worth of $150 million and meet the 25% test).

The Comment Letter also recommended allowing the use of p.m. settlement for all American-style warrants exercised anytime except 48 hours prior to expiration, at which time a.m. settlement would be required. According to the Comment Letter, unlike with listed options (where OCC is the issuer and runs a balanced book), a warrant issuer must hedge its exposure to maintain offsetting positions. Upon early exercise of the warrants, the issuer that has hedged its exposure will have to take action to "unwind" the portion of its hedge relating to the exercised warrants. The Firms believe that requiring a.m. settlement on the first day after an investor exercises the warrant will place additional market risk upon them due to the difficulty in managing the hedge. This increased hedging cost, the Firms argue, could result in a higher issuance price for the warrant or could require that the warrant settlement value date be postponed an additional day, with warrant holders bearing additional market risk during this period.

In response to the Comment Letter, the Phlx amended its filing to include a provision permitting p.m. settlement for stock index warrants except for a short period before expiration.[23] Under the terms of the amendment, stock index warrants for which 25% or more of the value of the underlying index is represented by securities that are traded primarily in the U.S. shall, by their terms, provide that, on valuation date, as well as for the two business days prior to valuation date, the value of the stocks traded primarily in the U.S. which underlie such warrants shall be determined by reference to the opening prices of such underlying U.S. securities. For example, if the valuation date for an issuance of index warrants occurs on a Friday, a.m. settlement must be utilized for warrants that are valued on the preceding Wednesday or Thursday, as well as on the valuation date.

Third, the Comment Letter recommended creating a special category of "warrant eligible" customers (separate and distinct from options eligibility criteria), who are authorized to trade warrants even if not approved to trade options. The Firms believe it is inappropriate to apply an options regulatory regime to warrants and that doing so may prevent institutional customers who are not permitted to purchase options products, yet who nevertheless meet all of the options eligibility criteria, from purchasing warrants. In this regard, the Firms propose to create a "warrant eligible" category with standards mimicking those currently required for options approved accounts. As such, "warrant-approved" accounts could purchase warrants, however, they could not purchase options or other products requiring options account approval. The Phlx did not amend its filing in response to this comment.

Fourth, the Comment Letter urges the adoption of a rule permitting firms to approve for warrant trading those accounts managed by an investment adviser ("IA") based upon the IA's representation concerning the eligibility status of its customers to engage in warrant trading, even if the underlying documentation relating to the managed accounts is not provided to the brokerage firms. The Phlx has amended its proposal to allow member firms to accept the representation of an investment adviser registered under the Investment Advisers Act of 1940 concerning the eligibility status of its customers to engage in warrant trading, even if the underlying documentation relating to the managed account is not provided to the member firm, where the managed account is for an institutional customer or the investment advisor account represents the collective investment of a number of persons. The Phlx states that this will conform the handling of warrant accounts to the current practice with respect to listed options accounts.[24]

---

[18] *See infra* note 28.

[19] *See supra* note 4. The Seward & Kissel Letter was submitted on behalf of PaineWebber Inc., Bear, Stearns & Co. Inc., Lehman Brothers Inc., Smith Barney Inc., Salomon Brothers Inc., Morgan Stanley & Co. Inc., and Hambrecht & Quist Inc. (collectively the "Firms").

[20] The Comment Letter lists several differences which it perceives exist between warrants and standardized options. Chief among these are: (1) warrants are separately registered, unsecured obligations of their issuer while options are issued and guaranteed by the Options Clearing Corp. ("OCC"); (2) during the prospectus delivery period, warrant purchasers receive a product-specific prospectus while options customers receive an options disclosure document ("ODD") at the time the account is opened; (3) each warrant creates a fixed number of outstanding warrants while there is theoretically no limit to the number of options that may be issued by OCC; and (4) warrants are traded on an exchange in a manner similar to stocks which, therefore, translates into superior price transparency than for listed options.

[21] As originally proposed, an issuer would have been required to have a tangible net worth of at least $150 million and the aggregate original issue price of all of a particular issuer's warrant offerings (combined with such offerings by its affiliates) that are listed on a national securities exchange or that are national market securities traded through NASDAQ were not to exceed 25% of the issuer's net worth ("25% test").

[22] *See* Amendment No. 1.

[23] *See* Amendments No. 2 and 4.

Finally, the Comment Letter addressed the proposed position limits applicable to warrants. Specifically, the Comment Letter noted that position limits for warrants would be set at levels that are approximately 75% of that allowed for similar broad-based indexes. The Comment Letter recommended establishing position limits for warrants that were equivalent to those established for listed options, allowing a hedge exemption similar to listed option procedures and providing a mechanism for specific waivers or exemptions of warrant position limits for hedgers, market-makers and broker-dealers comparable to the procedures in place for listed options. The Phlx did not amend its filing in response to this comment.

IV. Discussion

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of Section 6(b)(5).[25] Specifically, the Commission finds that the Exchange's proposal to establish uniform listing standards for broad-based stock index, currency and currency index warrants strikes a reasonable balance between the Commission's mandates under Section 6(b)(5) to remove impediments to and perfect the mechanism of a free and open market and a national market system, while protecting investors and the public interest. In addition, the Phlx's proposed listing standards for warrants are consistent with the Section 6(b)(5) requirements that rules of an exchange be designed to prevent fraudulent and manipulative acts, to promote just and equitable principles of trade, and are not designed to permit unfair discrimination among issuers.

The Phlx's proposed generic listing standards for broad-based stock index warrants, currency and currency indexes set forth a regulatory framework for the listing of such products.[26] Generally, listing standards serve as a means for an exchange to screen issuers and to provide listed status only to *bona fide* issuances that will have sufficient public float, investor base, and trading interest to ensure that the market has the depth and liquidity necessary to maintain fair and orderly markets. Adequate standards are especially important for warrant issuances given the leveraged and contingent liability they represent. Once a security has been approved for initial listing, maintenance criteria allow an exchange to monitor the status and trading characteristics of that issue to ensure that it continues to meet the exchange's standards for market depth and liquidity so that fair and orderly markets can be maintained.

In reviewing listing standards for derivative-based products, the Commission also must ensure that the regulatory requirements provide for adequate trading rules, sales practice requirements, margin requirements, position and exercise limits and surveillance procedures. These rules minimize the potential for manipulation and help to ensure that derivatively-priced products will not have a negative market impact. In addition, these standards should address the special risks to customers arising from the derivative products.[27] For the reasons discussed below, the Commission believes the Phlx's proposal will provide it with significant flexibility to list index, currency and currency index warrants, without compromising the effectiveness of the Exchange's listing standards or regulatory program for such products.[28]

A. Issuer Listing Standards and Product Design

As a general matter, the Commission believes that the trading of warrants on a stock index, currency or currency index permits investors to participate in the price movements of the underlying assets, and allows investors holding positions in some or all of such assets to hedge the risks associated with their portfolios. The Commission further believes that trading warrants on a stock index, currency or currency index provides investors with an important trading and hedging mechanism that is designed to reflect accurately the overall movement of the component securities.

Warrants, unlike standardized options, however, do not have a clearinghouse guarantee but are instead dependent upon the individual credit of the issuer. This heightens the possibility that an exerciser of warrants may not be able to receive full cash settlement upon exercise. This additional credit risk, to some extent, is reduced by the Exchange's issuer listing standards that require an issuer to have either; (a) a minimum tangible net worth of $250 million; or (b) a minimum tangible net worth of $150 million, provided that the issuer does not have (including as a result of the proposed issuance) issued outstanding warrants where the aggregate original issue price of all such stock index, currency and currency index warrant offerings (or affiliates) that are listed on a national securities exchange or traded through the facilities of NASDAQ is in excess of 25% of the warrant issuer's net worth. Furthermore, financial information regarding the issuers of warrants will be disclosed or incorporated in the prospectus accompanying the offering of the warrants. Moreover, the alternative test addresses the Comment Letter's concerns on the 25% standard.

The Phlx's proposal will provide issuers flexibility by allowing them to utilize either a.m. or p.m. settlement, provided, however, domestic index warrants (*i.e.*, warrants based on indexes for which 25% or more of the index value is represented by securities traded primarily in the U.S.) ("domestic index warrants") are required to utilize a.m. settlement for expiring warrants as well as during the last two business

---

[24] *See* Amendment No. 1.

[25] 15 U.S.C. §78f(b)(5) (1982).

[26] The Commission notes that warrants issued prior to this approval order will continue to be governed by the rules applicable to them at the time of their listing.

[27] Pursuant to Section 6(b)(5) of the Act, the Commission is required to find, among other things, that trading in warrants will serve to protect investors and contribute to the maintenance of fair and orderly markets. In this regard, the Commission must predicate approval of any new derivative product upon a finding that the introduction of such derivative instrument is in the public interest. Such a finding would be difficult for a derivative instrument that served no hedging or other economic function, because any benefits that might be derived by market participants likely would be outweighed by the potential for manipulation, diminished public confidence in the integrity of the markets, and other valid regulatory concerns. As discussed below, the Commission believes warrants will serve an economic purpose by providing an alternative product that will allow investors to participate in the price movements of the underlying securities in addition to allowing investors holding positions in some or all of such securities to hedge the risks associated with their portfolios.

[28] Issuances of warrants overlying a single currency may currently be listed for trading without a rule filing provided that the underlying currency is one of the original seven foreign currencies approved for options trading: the Australian Dollar, British Pound, Canadian Dollar, French Franc, German Mark, Japanese Yen, Swiss Franc and the European Currency Unit. Issuances of currency warrants overlying any other foreign currency would require a rule filing pursuant to Section 19(b) of the Act. The Commission notes that currency index warrants may only be established without a further rule filing upon an index that has been previously approved by the Commission pursuant to a Section 19(b) filing. To date, the only currency index approved pursuant to Section 19(b) is an equal-weighted index comprised of the British Pound, Japanese Yen and German Deutsche Mark. *See* Securities Exchange Act Release No. 31627 (Dec. 21, 1992), 57 FR 62399 (Dec. 30, 1992). Accordingly, any other currency index (as well as a broad-based stock index) not previously approved by the Commission would require approval pursuant to Section 19(b).

days prior to valuation date.[29] The Commission continues to believe that a.m. settlement significantly improves the ability of the market to alleviate and accommodate large and potentially destabilizing order imbalances associated with the unwinding of index-related positions. Nevertheless, in accordance with the Comment Letter's suggestions, the use of p.m. settlement except during the last two business days prior to a domestic index warrant's valuation date, as well as the valuation date, strikes a reasonable balance between ameliorating the price effects associated with expirations of derivative index products and providing issuers with flexibility in designing their products.[30] In this context, the Commission notes that unlike standardized index options whose settlement times are relatively uniform, index warrants are issuer-based products, whose terms are individually set by the issuer. In addition, while options may have unlimited open interest, the number of warrants on a given index is fixed at the time of issuance. Accordingly, it is not certain that there will be a significant number of warrants in indexes with similar components expiring on the same day. This may reduce the pressure from liquidation of warrant hedges at settlement. Nevertheless, the Commission expects the Exchange to monitor this issue and, should significant market effects occur as a result of early exercises from p.m. settled index warrants, would expect it to make appropriate changes including potentially limiting the number of index warrants with p.m. settlement.

B. Customer Protection

Due to their derivative and leveraged nature, and the fact that they are a wasting asset, many of the risks of trading in warrants are similar to the risks of trading standardized options. Accordingly, the Phlx has proposed to apply its options customer protection rules to warrants. In particular, the Commission notes that warrants may only be sold to options approved accounts capable of evaluating and bearing the risks associated with trading in these instruments, in accordance with Phlx Rule 1024, and that adequate disclosure of the risks of these products must be made to investors.[31] In addition, the Phlx will apply the options rules for suitability, discretionary accounts, supervision of accounts and customer complaints to transactions in warrants. By imposing the special suitability and disclosure requirements noted above, the Commission believes the Phlx has addressed adequately several of the potential customer protection concerns that could arise from the options-like nature of warrants.

The ODD, which all options approved accounts must receive, generally explains the characteristics and risks of standardized options products. Although many of the risks to the holder of an index warrant and option are substantially similar, however, because warrants are issuer-based products, some of the risks, such as the lack of a clearinghouse guarantee and certain terms for index warrants, are different. The Phlx has adequately addressed this issue by proposing to distribute a circular to its members that will call attention to the specific risks associated with stock index, currency and currency index warrants that should be highlighted to potential investors. In addition, the issuer listing guidelines described above will ensure that only substantial companies capable of meeting their warrant obligations will be eligible to issue warrants. These requirements will help to address, to a certain extent, the lack of a clearinghouse guarantee for index warrants. Finally, warrant purchasers will receive a prospectus during the prospectus delivery period. The Commission believes that this will ensure that certain information about the particular issuance and issuer is publicly available.

As noted above, the Comment Letter indicates that applying the options disclosure framework to warrants is inappropriate. However, the Commission believes that the combined approach of making available general derivative product information (the ODD), product specific information (the Exchange circular), and issuer specific information (the prospectus) should provide an effective disclosure mechanism for these products.

At this time, the Commission does not agree with the proposal contained in the Comment Letter to create a special "warrant eligible" classification of purchasers. As noted above, index, currency and currency index warrants are very similar to standardized options. They are so similar that a customer precluded from trading options should not avoid the restriction indirectly by being designated by Exchange rules as eligible for stock index, currency or currency index warrants. Nevertheless, as the range of exchange-traded derivative products increases, the SROs might consider in the future as to whether a new derivatives eligibility classification is appropriate.

C. Surveillance

In evaluating proposed rule changes to list derivative instruments, the Commission considers the degree to which the market listing the derivative product has the ability to conduct adequate surveillance. In this regard the Commission notes that the Exchange has developed adequate surveillance procedures for the trading of index and currency warrants. First, new issues of currency warrants will be subject to the Phlx's existing surveillance procedures applicable to foreign currency warrants, which the Commission previously has found to be adequate to surveil for manipulation and other abuses involving the warrant market and the underlying foreign currencies.[32]

Second, the Exchange has developed enhanced surveillance procedures to apply to domestic stock index warrants which the Commission believes are adequate to surveil for manipulation and other abuses involving the warrant market and component securities.[33] Among these enhanced surveillance procedures, the Commission notes that issuers will be required to report to the Exchange on settlement date the number and value of domestic index warrants subject to early exercise the previous day. The Commission believes that this information will aid the Phlx in its surveillance capacity and help it to detect and deter market manipulation and other trading abuses.

Third, the Exchange has developed adequate surveillance procedures to apply to foreign stock index warrants (*i.e.*, less than 25% of the index value is derived from stocks traded primarily in the U.S.).[34] The Commission believes

---

[29] Currency and currency index warrants are not limited to a.m. or p.m. settlement.

[30] Foreign stock market based index warrants may utilize p.m. settlement throughout their duration.

[31] Pursuant to Phlx Rule 1024, all options approved accounts must receive an ODD, which discusses the characteristic and risks of standardized options.

[32] *See* Securities Exchange Act Release No. 24555 (June 5, 1987), 52 FR 22570 (June 12, 1987), and Securities Exchange Act Release No. 26152 (Oct. 3, 1988), 53 FR 39832 (Oct. 12, 1988). The Commission notes that these surveillance procedures only apply to the issuance of warrants overlying one of the approved foreign currencies. *See supra* note 28. The issuance of warrants upon any other foreign currency would necessitate a Section 19(b) rule filing which, among other things, details applicable surveillance procedures.

[33] In addition, the Commission notes that issuers will be required to report to the Exchange all trades to unwind a warrant hedge that are effected as a result of the early exercise of domestic index warrants. This will enable the Exchange to monitor the unwinding activity to determine if it was effected in a manner that violates Exchange or Commission rules.

[34] Each prior issuance of a foreign stock market based index warrant is subject to specific

Continued

that the ability to obtain information regarding trading in the stocks underlying an index warrant is important to detect and deter market manipulation and other trading abuses. Accordingly, the Commission generally requires that there be a surveillance sharing agreement [35] in place between an exchange listing or trading a derivative product and the exchange(s) trading the stocks underlying the derivative contract that specifically enables the relevant markets to surveil trading in the derivative product and its underlying stocks.[36] Such agreements provide a necessary deterrent to manipulation because they facilitate the availability of information needed to fully investigate a potential manipulation if it were to occur.[37] In this regard, the Phlx will require that no more than 20% of an Index's weight may be comprised (upon issuance and thereafter) of foreign securities (or ADRs thereon) that do not satisfy one of the following tests: (1) The Exchange has in place an effective surveillance agreement [38] with the primary exchange in the home country in which the security underlying the ADR is traded; or (2) meets an existing alternative standard for standardized options trading (*e.g.*, satisfy the 50% U.S. trading volume test).[39] The Commission believes that this standard will ensure that index warrants are not listed upon foreign indexes whose underlying securities trade on exchanges with whom the Phlx has no surveillance sharing agreement.

D. Market Impact

The Commission believes that the listing and trading of index warrants, currency warrants and currency index warrants will not adversely affect the U.S. securities markets or foreign currency markets. First, with respect to currency and currency index warrants, the Commission notes that the interbank foreign currency spot market is an extremely large, diverse market comprised of banks and other financial institutions worldwide. That market is supplemented by equally deep and liquid markets for standardized options and futures on foreign currencies and options on those futures. An active over-the-counter market also exists in options, forwards and swaps for foreign currencies. This minimizes the possibility that Exchange listed warrants would be used to manipulate the spot currency markets. In addition, the surveillance procedures for these products should allow the Exchange to detect and deter potential manipulation involving currency warrants and currency index warrants.

Second, with respect to index warrants, the Commission notes that warrants may only be established upon indexes the Commission has previously determined to be broad-based in the context of index options or warrant trading. As part of its review of a proposal to list an index derivative product, the Commission must find that the trading of index options or warrants will serve to protect investors, promote the public interest, and contribute to the maintenance of fair and orderly markets. Accordingly, the Commission does not believe that the issuance of index warrants upon previously approved broad based stock index options or warrants will adversely impact the underlying component securities. In addition, because index warrants are issued by various individual issuers who set their own terms, it is likely that expirations among similar index products will be varied, thereby reducing the likelihood that unwinding hedge activities would adversely affect the underlying cash market. Finally, as discussed above, the Commission believes the Phlx's enhanced surveillance procedures applicable to stock index warrants are adequate to surveil for manipulation and other abuses involving the warrant market, component securities and issuer hedge unwinding transactions.

Third, the Exchange has proposed margin levels for stock index and currency warrants equivalent to those in place for stock index and currency options. The Commission believes these requirements will provide adequate customer margin levels sufficient to account for the potential volatility of these products. In addition, options margin treatment is appropriate given the options-like market risk posed by warrants. The Commission notes that the customer spread margin treatment applicable to warrants is subject to a one year pilot program. This will allow the Exchange to analyze the pricing relationships between listed options and warrants on the same index in order to determine whether to revise or approve on a permanent basis the proposed spread margin rules.[40]

Fourth, the Phlx has established reasonable position and exercise limits for stock index warrants, which will serve to minimize potential manipulation and other market impact concerns.[41] Contrary to the views expressed in the Comment Letter, the Commission believes that in the absence of trading experience with domestic index warrants, it would be imprudent to establish position limits for positions greater than those currently applicable to domestic stock index options on the same index.[42]

V. Conclusion

The Commission believes that the adoption of these uniform listing and trading standards covering index, currency and currency index warrants will provide an appropriate regulatory framework for these products. These standards will also benefit the Exchange by providing them with greater

---

surveillance procedures. These procedures are generally tailored to the individual warrant issuance and are based upon several factors involving the primary foreign market, including the existence of surveillance or information sharing agreements.

[35] The Commission believes that a surveillance sharing agreement should provide the parties with the ability to obtain information necessary to detect and deter market manipulation and other trading abuses. Consequently, the Commission generally requires that a surveillance sharing agreement require that the parties to the agreement provide each other, upon request, information about market trading activity, clearing activity, and the identity of the ultimate purchasers for securities. *See e.g.*, Securities Exchange Act Release No. 31529 (Nov. 27, 1992).

[36] The ability to obtain relevant surveillance information, including, among other things, the identify of the ultimate purchasers and sellers of securities, is an essential and necessary component of a comprehensive surveillance sharing agreement.

[37] In the context of domestic index warrants, the Commission notes that the U.S. exchanges are members of the Intermarket Surveillance Group ("ISG"), which was formed to, among other things, coordinate more effectively surveillance and investigative information sharing arrangements in the stock and options markets. *See* Intermarket Surveillance Group Agreement, July 14, 1983. The most recent amendment to the ISG Agreement, which incorporates the original agreement and all the amendments made thereafter, was signed by ISG members on January 29, 1990. *See* Second Amendment to the ISG Agreement.

[38] *See supra* note 35.

[39] *See* Securities Exchange Act Release Nos. 31529, 57 FR 57248 (Dec. 3, 1992) and 33555, 59 FR 5619 (Feb. 7, 1994).

[40] The Commission notes that the margin levels for currency index warrants will be set at a level determined by the Exchange and approved by the SEC. *See* Amendment No. 2. Issuances of warrants listed prior to the approval of this order will continue to apply the margin level applicable to them at the time of their listing.

[41] The Commission notes that there are no position or exercise limits applicable to currency or currency index warrants, although reporting requirments do apply. Nevertheless, the Commission may review the need to establish foreign currency position limits if the size of the currency or currency index warrant market increases significantly.

[42] WIth respect to the Comment Letter's suggestion that a hedge exemption rule be established in order to allow participants to readily acquire exemptions from the Exchange as needed, the Commission does not believe that such an approach is appropriate at this time. The hedge exemption for index options was adopted after several years experience with index options trading. Until the SROs gain some experience with domestic index warrant trading, it is difficult to determine the need for a hedge exemption (*i.e.*, that speculative limits are insufficient to meet hedging needs).

flexibility in structuring warrant issuances and a more expedient process for listing warrants without further Commission review pursuant to Section 19(b) of the Act. As noted above, additional Commission review of specific warrant issuances will generally only be required for warrants overlying any non-approved broad-based index or a non-approved currency or currency index. If Commission review of a particular warrant issuance is required, the Commission expects that, to the extent that the warrant issuance complies with the uniform criteria adopted herein, its review should generally be limited to issues concerning the newly proposed index. This should help ensure that such additional Commission review could be completed in a prompt manner without causing any unnecessary delay in listing new warrant products.

The Commission finds good cause for approving Amendments No. 1, 2, 3 and 4 to the proposed rule change prior to the thirtieth day after the date of publication of notice of filing thereof in the **Federal Register** for the following reasons. As discussed below, the changes are either: (1) Minor and technical in nature; (2) responsive to the Comment Letter; (3) designed to conform to warrant proposals from other markets; or (4) modifications to Exchange surveillance procedures. Accordingly, the amendments do not raise new significant regulatory issues or are responsive to prior comments. In order to enable the Exchange to list new index, currency or currency index warrants as soon as possible, the Commission believes it is necessity and appropriate to approve the amendments on an accelerated basis.

Amendment No. 1 makes several changes to the filing which are designed to bring it into conformity with the other options exchanges. First, it revises Rule 803, Criteria for Listing, to permit alternative issuer listing qualification criteria (as discussed above under *Issuer Listing Standards and Product Design*). Second, it limits the number of foreign securities that may comprise an underlying stock index. The Commission notes that the issuer qualification amendment was made in response to comments received from the Seaward & Kissell Letter and further believes that both changes provide added flexibility to issuers without compromising investor protection concerns.

Amendment No. 1 also revises Rule 722 to provide that the proposed spread and straddle margin treatment for stock index warrants will be effected as part of a one year pilot program, and to provide that escrow receipts will be accepted to cover short positions in stock index warrants. The Commission notes that these changes conform the margin treatment afforded options and warrants and provide a basis for evaluating pricing correlations between warrants and options overlying the same index, currency or currency index.

Finally, Amendment No. 1 provides that the Exchange will distribute an information circular to its members upon new warrant listings and that it will permit member firms to accept an IA's representation concerning the options eligibility status of its customers, as described above. The Commission notes that both of these practices are consistent with the treatment of options and, therefore, raise no new or unique regulatory issues. Accordingly, for the reasons discussed above relating to each proposed revision of the Amendment, the Commission believes it is appropriate to approve Amendment No. 1 to the Exchange's proposal on an accelerated basis.

Amendment No. 2 to the proposal clarifies several issues relating to a.m. settlement, currency index warrant margin and position reporting for currency warrants. First, the Amendment clarifies that a.m. settlement will be used during the 48 hour period prior to expiration of index warrants.[43] Second, the Amendment clarifies that the applicable margin level for currency index warrants will be a percentage as specified by the Exchange and approved by the Commission. The Commission notes that this revision is consistent with the treatment afforded currency index options, where margin levels are established on a case by case basis. Finally, the Amendment establishes that index, currency and currency index warrants will be subject to the same reporting levels. The Commission notes that this revision helps to provide uniformity in the regulatory treatment of warrants. Furthermore, because currency and currency index warrants are not subject to position and exercise limits, the Commission believes that requiring investors to report to the Exchange when their holdings exceed specified levels should aid the Exchange in its monitoring for potential trading abuses involving currency and currency index warrants. Accordingly, the Commission believes it is appropriate to approve Amendment No. 2 on an accelerated basis.

Amendment No. 3 requires issuers to notify the listing exchange of any early exercises of index warrants by 4:30 p.m. (New York time) on settlement date for the warrants. The Commission believes this changes to the Phlx's surveillance procedures strengthens the Exchange's monitoring of index warrants. Accordingly, the Commission believes it is appropriate to approve Amendment No. 3 on an accelerated basis.

Amendment No. 4 clarifies the settlement procedures for index warrants which are exercised prior to expiration. Specifically, the Amendment clarifies that a.m. settlement will be required on valuation date as well as during the last two business days prior to an index warrant's valuation date. As discussed above, the Commission believes that the use of a.m. settlement during this period will help to ameliorate any potential price effects associated with expirations of derivative index products. Accordingly, the Commission believes it is appropriate to approve Amendment No. 4 on an accelerated basis.

Therefore, the Commission believes it is consistent with Sections 6(b)(5) and 19(b)(2) of the Act to approve Amendments No. 1, 2, 3 and 4 to the Phlx's proposal on an accelerated basis.

VI. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning Amendments No. 1, 2, 3 and 4. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by September 28, 1995.

---

[43] Amendment No. 4 subsequently changes the language of this provision to require a.m. settlement be used during the two business days prior to valuation date.

It therefore is ordered, pursuant to Section 19(b)(2) of the Act,[44] that the proposed rule change (SR–Phlx–94–49) is approved, as amended.[45] Furthermore, the portion of the rule change relating to spread margin treatment is approved on a one year pilot program basis, effective from the date of this Order.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[46]

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 95–22106 Filed 9–6–95; 8:45 am]

BILLING CODE 8010–01–M

[Rel. No. IC–21330; File No. 812–9468]

Keyport Life Insurance Company, et al.

August 31, 1995.

AGENCY: Securities and Exchange Commission ("SEC" or "Commission").

ACTION: Notice of Application for an Order under the Investment Company Act of 1940 ("1940 Act").

APPLICANTS: Keyport Life Insurance Company ("Keyport"), KMA Variable Account ("KMA Account"), Keyport Variable Account I ("Variable Account I"), Independence Life and Annuity Company (formerly, Keyport America Life Insurance Company, "Keyport America"),[1] Independence Variable Annuity Separate Account (formerly, Keyport America Variable Annuity Separate Account, "KA VA Account"), Independence Variable Life Separate Account (formerly, Keyport America Variable Life Separate Account, "KA VLI Account"), Liberty Life Assurance Company of Boston ("Liberty Life") and Variable Account-K ("Account K").

RELEVANT 1940 ACT SECTIONS: Approval requested under Section 26(b) and exemption requested under Section 17(b) from Section 17(a).

SUMMARY OF APPLICATION: Applicants seek an order approving the substitution of shares of the Managed Assets Fund ("MAF") for shares of the Strategic Managed Assets Fund ("SMAF"), each of which is a portfolio of SteinRoe Variable Investment Trust ("SteinRoe Trust"); shares of SteinRoe Trust's Mortgage Securities Income Fund ("MSIF") for shares of the Colonial-Keyport U.S. Government Fund ("USGF") of Keyport Variable Investment Trust ("Keyport Trust"); and shares of Keyport Trust's Colonial-Keyport Strategic Income Fund ("SIF") for shares of SteinRoe Trust's Managed Income Fund ("MIF") (the "Substitution").

FILING DATE: The application was filed on February 6, 1995 and amended on August 30, 1995.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the Commission orders a hearing. Interested persons may request a hearing on the application by writing to the Commission's Secretary and serving Applicants with a copy of the request, personally or by mail. Hearing requests must be received by the Commission by 5:30 p.m., on September 25, 1995, and should be accompanied by proof of service on Applicants in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons may request notification of a hearing by writing to the Secretary of the Commission.

ADDRESSES: Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Applicants, c/o James Klopper, Esq., Keyport Life Insurance Company, 125 High Street, Boston, Massachusetts 02110.

FOR FURTHER INFORMATION CONTACT: Joyce Merrick Pickholz, Senior Counsel, or Wendy Finck Friedlander, Deputy Chief, at (202) 942–0670, Office of Insurance Products, Division of Investment Management.

SUPPLEMENTARY INFORMATION: Following is a summary of the application. The complete application is available for a fee from the SEC's Public Reference Branch.

Applicants' Representations

1. Keyport is a stock life insurance company and an indirect majority-owned subsidiary of Liberty Mutual Insurance Company ("Liberty Mutual"). Among Liberty Mutual's other indirect subsidiaries are the investment advisory firm of SteinRoe & Farnham Incorporated ("SteinRoe"), which is the adviser to SteinRoe Trust, and Keyport Advisory Services Corp. ("Keyport Advisory"), which is the adviser to Keyport Trust. Keyport offers fixed individual life insurance and individual and group fixed and variable immediate and deferred annuity contracts on a non-participating basis. Keyport currently is not offering new variable life insurance policies.

2. Keyport America is a stock life insurance company and a wholly-owned subsidiary of Keyport. Keyport America is authorized to transact life insurance and annuity business in all states, except New York, and in the District of Columbia. Keyport America is not currently offering new variable annuity contracts or variable life insurance policies.

3. Liberty Life is a stock life insurance company and a wholly-owned subsidiary of Liberty Mutual and Liberty Mutual Fire Insurance Company. Liberty Life offers individual life insurance and group life and health insurance and individual and group annuity contracts.

4. MAF, MSIF and SIF (collectively, "Substitute Funds") and SMAF, USGF and MIF, together with other portfolios of SteinRoe Trust and Keyport Trust, serve as eligible funding vehicles ("Eligible Funds") for certain flexible premium variable annuity contracts ("Contracts") offered by KMA Account and Account-K and previously offered by KA VA Account and certain single premium variable life insurance policies ("Policies") previously offered by Variable Account I and KA VLI Account (collectively, "Accounts").

5. The Accounts are segregated investment accounts registered under the 1940 Act as unit investment trusts. Each Account is divided into sub-accounts ("Sub-accounts") each of which invests in the corresponding portfolio of SteinRoe Trust (including MAF, SMAF, MSIF, and MIF), or Keyport Trust (including USGF and SIF). KMA Account serves as the funding medium for certain variable annuity Contracts issued and administered by Keyport. Variable Account I was established to fund certain individual single premium variable life insurance Policies previously offered by Keyport. KA VA Account was established to fund certain variable annuity Contracts previously offered by Keyport America. KA VLI Account was established to fund certain individual single premium variable life insurance Policies previously offered by Keyport America. Account-K serves as the funding medium for certain variable annuity Contracts issued and administered by Liberty Life. Keyport Financial Services Corp., a subsidiary of Keyport, serves as principal underwriter for the Contracts and Policies.

6. The Contracts offered by KMA Account and the Contracts previously offered by KA VA Account provide for allocation to the Sub-accounts that invest in each of the portfolios of SteinRoe Trust and each of the portfolios of Keyport Trust. The Contracts offered by Account-K provide for investment in the Sub-Accounts that invest in each of the portfolios of SteinRoe Trust and five of the portfolios of Keyport Trust, including USGF and SIF. Keyport America is not actively offering the Contracts funded through KA VA Account.

7. The Policies previously offered by Variable Account I and by KA VLI Account provide for allocation to the Sub-accounts that invest in each of the portfolios of SteinRoe Trust and each of the portfolios of Keyport Trust. Neither Keyport nor Keyport America is actively offering the Policies funded through Variable Account I or KA VLI Account, respectively.

8. Established in connection with the sale of Keyport to Liberty Mutual by the Travelers Insurance Company of Hartford, Connecticut, the SteinRoe Trust is a series type investment company registered with the Commission on Form N–1A. SteinRoe Trust currently has seven investment portfolios ("SteinRoe Trust's Funds") that have differing investment objectives, policies and restrictions.

9. Keyport Trust is a registered series type investment company that currently has six investment portfolios (collectively, with SteinRoe Trust's Funds, "Funds"), that have differing investment objectives, policies and restrictions.

10. Applicants state that SMAF, USGF and MIF, as individual investment alternatives, have not generated the interest of owners of Contracts ("Contract Owners") or owners of Policies ("Policy Owners") (collectively "Owners") that was anticipated at the time of their creation. Also, overall variable product sales by Keyport, Keyport America and Liberty Life have not generated the volume of assets sufficient to make every investment alternative viable. According to the Applicants, in the one-year period ended December 31, 1994, the assets of SMAF attributable to Owners only increased by approximately $2.0 million, the assets of USFG attributable to Owners decreased by approximately $1.6 million, and the assets of MIF attributable to Owners decreased by approximately $10.7 million.

11. MAF, MSIF and SIF are currently available in connection with new purchases and transfers under the Contracts offered by KMA Account and Account-K, the Contracts previously offered by KA VA Account, and the Policies previously offered by Variable Account I and KA VLI Account. Applicants represent that Owners have received current prospectuses or prospectus supplements for the SteinRoe Trust and the Keyport Trust that include information concerning all Eligible Funds, including MAF, MSIF and SIF.

12. Applicants state that, on December 31, 1994, the assets attributable to Owners of each of the Funds expected to be eliminated were relatively small, i.e., approximately $59.1 million in SMAF, approximately $29.2 million in USGF and approximately $42.4 million in MIF. In addition, none of these Funds have generated a sufficient level of Owner interest to justify their high expense ratios. Applicants state that the assets of USGF and MIF declined during the year ended December 31, 1994 and the assets of SMAF increased by only approximately $2.0 million. Moreover, Applicants further state that none of these Funds have generated sufficient Owner interest to justify the expense reimbursements that SteinRoe and Keyport Advisory have assumed with respect to the Funds. Applicants believe that it is not in the public interest to continue to utilize SMAF, USGF and MIF as funding vehicles for the Contracts and Policies and that they can better serve the interests of Owners by utilizing investment alternatives that they believe may be better suited to the needs and interests of Owners.

13. Keyport, Keyport America and Liberty Life, on their own behalf and on behalf of the Accounts, propose to effect a substitution of shares of MAF for all shares of SMAF, shares of MSIF for all shares of USGF, and shares of SIF for all shares of MIF attributable to the Contracts and Policies. Keyport, Keyport America and Liberty Life have undertaken to pay all expenses and transaction costs associated with the Substitution, including any applicable brokerage commissions. On February 7, 1995, Keyport, Keyport America and Liberty Life supplemented the prospectuses of their respective Accounts to reflect the proposed Substitution ("Supplements"). The Supplements were sent to Owners. Keyport, Keyport America and Liberty Life will schedule the Substitution to occur as soon as practicable following the issuance of the order so as to maximize the benefits to be realized from the Substitution. Within five days after the Substitution, Keyport, Keyport America and Liberty Life will send to Owners written notice of the Substitution (the "Notice") that identifies the shares of the Funds that have been eliminated and the shares of the Funds that have been substituted. Keyport, Keyport America and Liberty Life will include in such mailing the supplements to the prospectuses for the Accounts that disclose the completion of the Substitution.

14. Owners will be advised in the Notice that for a period of thirty days from the mailing of the Notice, Owners may transfer all assets, as substituted, to any other available Sub-account, without limitation and without charge. Moreover, any transfers of all available assets from SMAF, USGF and MIF from the date of the Supplements will not be counted as transfer requests under any contractual provisions of the Contracts or Policies that limit allowable transfers. The period from the date of the Supplements to thirty days from the mailing of the Notice is referred to herein as the "Free Transfer Period." Following the Substitution, Owners will be afforded the same contract rights, including surrender and other transfer rights with regard to amounts invested under the Contracts and Policies as they currently have. Immediately following the Substitution, Keyport, Keyport America and Liberty Life, as appropriate, will combine: (i) The Sub-account invested in SMAF with the continuing Sub-account invested in MAF; (ii) the Sub-account invested in USGF with the continuing Sub-account invested in MSIF; and (iii) the Sub-account invested in MIF with the continuing Sub-account invested in SIF. Keyport, Keyport America and Liberty Life each will reflect this treatment in disclosure documents for their respective Accounts, the Financial Statements of their respective Accounts, the Financial Statements of their respective Accounts and the Form N–SAR annual reports filed by their respective Accounts.

15. Keyport, Keyport America and Liberty Life each will redeem for cash and securities all shares of SMAF, USGF and MIF they currently hold on behalf of the Accounts at the close of business on the effective date of the Substitution. The redemption of shares of SMAF, USGF and MIF will be effected partly for cash and partly for securities as a partial "redemption-in-kind." SteinRoe Trust and Keyport Trust will effect the redemptions-in-kind in a manner that is consistent with the investment objectives and policies and diversification requirements applicable to each Substitute Fund. Keyport, Keyport America and Liberty Life each will review the securities selected by SteinRoe and Keyport Advisory for redemption-in-kind to assure that such securities are suitable investments for

[44] 15 U.S.C. § 78s(b)(2) (1988).

[45] The Commission notes that prior to listing any stock index, currency or currency index warrants, the Exchange will be required to obtain approval from the staff of the Commission concerning the Exchange's surveillance procedures applicable to the trading of warrants.

[46] 17 CFR § 200.30–3(a)(12) (1994).

[1] Keyport America Variable Life Insurance Company changed its name on July 13, 1995. To avoid confusion and effect a smooth transition, the company and its separate accounts may continue to use the name "Keyport America" for a period of time.

each Substitute Fund. Prior to effecting the Substitution, SteinRoe Trust and Keyport Trust will take all actions necessary to comply with the requirements of Rule 18f-1 of the 1940 Act. The securities redeemed in kind will be used together with the cash proceeds to purchase the shares of each Substitute Fund. Applicants have determined that partially effecting the redemption of shares of SMAF, USGF and MIF in kind is appropriate based on the current similarity of the portfolio investments of SMAF, USGF and MIF to those of MAF, MSIF and SIF, respectively. The valuation of any in kind redemptions will be made on a basis consistent with the normal valuation procedures of SMAF, USGF, MIF and the Substitute funds. In all cases, Keyport, Keyport America and Liberty Life on behalf of their respective Accounts will simultaneously place the redemption requests with SMAF, USGF and MIF and the purchase orders with MAF, MSIF and SIF, respectively, so that the purchases will be for the exact amount of the redemption proceeds. As a result, at all times, monies attributable to Owners currently invested in SMAF, USGF and MIF will be fully invested.

16. The full net asset value of the redeemed shares held by the Accounts will be reflected in the Owners' accumulation unit values following the Substitution. Keyport, Keyport America and Liberty Life have undertaken to assume all transaction costs and expenses relating to the Substitution, including any direct or indirect costs of liquidating the assets of SMAF, USGF and MIF so that the full net asset value of redeemed shares of SMAF, USGF and MIF held by the Accounts will be reflected in the Owners' accumulation unit values following the Substitution.

17. SteinRoe and Keyport Advisory have been fully advised of the terms of the Substitution. Keyport, Keyport America and Liberty Life anticipate that SteinRoe and Keyport Advisory, to the extent appropriate, will conduct the trading of portfolio securities in a manner that provides for the anticipated redemptions of shares held by Keyport and the Accounts.

Applicants' Legal Analysis and Conditions

1. Section 26(b) of the 1940 Act provides, in pertinent part that "[i]t shall be unlawful for any depositor or trustee of a registered unit investment trust holding the security of a single issuer to substitute another security for such security unless the Commission shall have approved such substitution." The purpose of Section 26(b) is both to protect the expectation of investors in a unit investment trust that the unit investment trust will accumulate the shares of a particular issuer and to prevent unscrutinized substitutions which might, in effect, force shareholders dissatisfied with a substituted security to redeem their shares, thereby incurring either a loss of the sales load deducted from initial purchase payments, an additional sales load upon reinvestment of the redemption proceeds, or both. Section 26(b) affords this protection to investors by preventing a depositor or trustee of a unit investment trust holding the shares of one issuer from substituting for those shares the shares of another issuer, unless the Commission approves that substitution.

2. Applicants represent that the purposes, terms and conditions of the Substitution are consistent with the principles and purposes of Section 26(b) and do not entail any of the abuses it is designed to prevent. Applicants submit that the Substitution is an appropriate solution to the limited Owner interest and investment in SMAF, USGF and MIF and consistent with the alternative funding plans for the Contracts and Policies through the corresponding Substitute Funds. Applicants assert that the Substitution is being proposed in order to provide a consolidation of assets of Funds that currently are, and in the future are expected to be, of insufficient size to promote consistent investment performance or to reduce operating expenses.

3. Applicants represent that the Substitution will not result in the type of costly forced redemption that Section 26(b) was intended to guard against and is consistent with the protection of investors and the purposes fairly intended by the 1940 Act for the following reasons: (a) The Substitution is of shares of the Substitute Funds whose objectives, policies and restrictions are sufficiently similar to the objectives of the Funds to be eliminated so as to continue fulfilling the Owner's objectives and risk expectations; (b) if an Owner so requests, during the Free Transfer Period, assets will be reallocated for investment in an Owner-selected Fund or Portfolio. Applicants represent that the Free Transfer Period is sufficient time for Owners to reconsider the Substitution; (c) the Substitution, in all cases, will be at the net asset value of the respective shares, without the imposition of any transfer or similar charge; (d) Keyport, Keyport America and Liberty Life have undertaken to assume the expenses and transaction costs, including among others, legal and accounting fees and any brokerage commissions, relating to the Substitution and are effecting the redemption of shares of USGF and MIF in a manner that attributes all transaction costs to Keyport. The partial redemptions-in-kind contemplated for appropriate securities of SMAF, USGF and MIF are expected to contribute to the reduction of such costs; (e) the Substitution will not be counted as a transfer under any contractual provisions of the Contracts or Policies that limit allowable transfers; (f) the Substitution in no way will alter the insurance benefits to Owners or the contractual obligations of Keyport, Keyport America and Liberty Life; (g) the Substitution in no way will alter the tax benefits to Owners; (h) Owners may choose simply to withdraw amounts credited to them following the Substitution, under the conditions that currently exist, subject to any applicable declining sales load; and (i) the Substitution is expected to confer certain modest economic benefits to Owners by virtue of the enhanced asset size of the Substitute Funds. Applicants consent to be bound by the terms and conditions listed immediately above in this paragraph.

4. Applicants represent that, on the basis of the facts and circumstances described both in the application and below, they have determined that it is in the best interests of Owners to substitute shares of MAF, MSIF and SIF for shares of SMAF, USGF and MIF, respectively. Each of the Funds is an existing portfolio of either SteinRoe Trust or Keyport Trust. SteinRoe, the adviser of SteinRoe Trust, and Keyport Advisory, the adviser of Keyport Trust, are both indirect subsidiaries of Liberty Mutual. The Independent Accounts and distributor are the same for each of the Funds. Applicants have determined that: (i) The investment objective and related investments of MAF are significantly similar to those of SMAF; (ii) the investment objective and related investments of MSIF are significantly similar to those of USGF; and (iii) the investment objectives and related investments of SIF are significantly similar to those of MIF. Applicants represent that both SMAF and MAF are portfolios that use asset allocation across the asset categories of stocks, bonds and money market securities to seek to achieve high total returns. Applicants further represent that both USGF and MSIF are income-oriented portfolios that primarily use debt securities issued or guaranteed by the U.S. Government, its agencies or instrumentalities to seek to achieve a high level of current income. Finally, they represent that MIF and SIF are income-oriented portfolios that seek to achieve high current income, although SIF is a portfolio that uses more foreign sovereign debt obligations and more higher-yielding, lower-quality corporate debt securities to achieve its objectives than MIF is permitted to use. Applicants submit that, although MIF is a somewhat more conservatively managed portfolio whose use of foreign debt securities and high-yielding corporate bonds is permitted but more limited than in SIF, the average maturity and duration of both MIF's and SIF's portfolio securities are very similar.

5. In reviewing the Funds to form an opinion as to which Fund or Portfolio was an appropriate alternative to SMAF, USGF and MIF, Applicants submit that they were faced with a different economic environment than when SMAF, USGF and MIF were first established. Therefore, Applicants concluded that the selection of a Fund or Portfolio that shared the overall investment objective(s) of the Funds to be eliminated and that involved a comparable investment strategy or risk exposure would best serve the interests of Owners. Applicants state that they considered the fact that the investment performance of each Substitute Fund in which Owners will be indirectly invested following the Substitution is similar or superior to the investment performance of the substituted fund or Portfolio.

6. Applicants represent that SteinRoe Trust's adviser and administrator, SteinRoe, and Keyport Trust's adviser, Keyport Advisory, have agreed to reimburse each of the Funds for their operating expenses in excess of certain specified percentages until April 30, 1995. For the year ended December 31, 1994, for example, SteinRoe reimbursed SMAF and MIF for their operating expenses $17,691 and $38,790, respectively. USGF received no reimbursement for its operating expenses during that period. Applicants further represent that, after April 30, 1995, SteinRoe has determined to continue, if necessary, to voluntarily reimburse MAF and MSIF for their operating expenses in excess of .75% and .70%, respectively, of each such Fund's average daily net assets until April 30, 1996. In addition, Applicants represent that, after April 30, 1995, Keyport Advisory and its affiliates have voluntarily agreed to increase the reimbursement to SIF for its operating expenses so that all operating expenses in excess of .80% of its average daily net assets will be reimbursed until April 30, 1996. Applicants believe, that, starting with the one-year period beginning on May 1, 1995, the anticipated expenses for each of the Funds to be eliminated are expected to be higher than or approximately the same as the anticipated or actual expenses of each of the corresponding Substitute Funds. Thus, on an annual basis, give or take one or two basis points, Owners will not be exposed to higher expenses, following the substitution and may, in fact, benefit from the lower expense ratios that should result from the consolidation of assets following the substitution. With respect to SMAF and USGF, Applicants state that the substitution will result in the consolidation of the assets of those Funds with substantially larger and more stable Funds. With respect to MIF, Applicants represent that the substitution will result in the assets in SIF (which commenced operation on July 14, 1994) increasing to over $55.7 million. Applicants believe that these consolidations of assets should promote greater economies of scale that may help to lower each Fund's expense ratio and, thereby, increase each Fund's performance.

7. Section 17(a)(1) of the 1940 Act prohibits any affiliated person of a registered investment company, or an affiliated person of such affiliated person, from selling any security or other property to such registered investment company. Section 17(a)(2) of the 1940 Act prohibits any of the persons described above from purchasing any security or other property from such registered investment company. As explained above, immediately following the substitution, Keyport, Keyport America and Liberty Life, as appropriate, will combine: (i) the Sub-account invested in SMAF with the continuing Sub-account invested in MAF; (ii) the Sub-account invested in USGF with the continuing Sub-account invested in MSIF; and (iii) the Sub-account invested in MIF with the continuing Sub-account invested in SIF. Sub-accounts of a registered separate account are to be treated as separate investment companies in connection with substitution transactions. Therefore, Keyport, Keyport America and Liberty Life could be said to be transferring unit values between their Sub-accounts, and that the transfer of unit values could be said to involve purchases and sale transactions between Sub-accounts that are affiliated persons. For example, the Sub-account investing in SMAF could be said to be selling shares of such Fund to a Sub-account investing in MAF in return for units of such Sub-account. Conversely, it could be said that a Sub-account investing in MAF was purchasing shares of SMAF. The sale and purchase transactions between Sub-accounts could be said to come within the scope of Sections 17(a)(1) and 17(a)(2) of the 1940 Act, respectively.Therefore, the substitution may require an exemption from section 17(a) of the 1940 Act, pursuant to section 17(b) of the 1940 Act.

8. Section 17(b) of the 1940 Act provides that the Commission may grant an order exempting transactions prohibited by section 17(a), upon application, if evidence establishes that: (a) the terms of the proposed transaction, including the consideration to be paid or received, are reasonable and fair and do not involve over-reaching on the part of any person concerned; (b) the proposed transaction is consistent with the investment policy of each registered investment company concerned, as recited in its registration statement and reports filed under the 1940 Act; and (c) the proposed transaction is consistent with the general purposes of the 1940 Act. Applicants represent that the terms of the proposed transactions, as described in the application, are reasonable and fair, including the consideration to be paid and received; do not involve over-reaching; are consistent with the policies of the Funds of SteinRoe Trust and Keyport Trust; and are consistent with the general purposes of the 1940 Act.

9. Applicants represent that, for all the reasons stated above, with regard to Section 26(b) of the 1940 Act, the Substitution is reasonable and fair. Applicants expect that existing and future Owners will benefit from the consolidation of assets in the corresponding Substitute Funds. Applicants state that the transactions effecting the Substitution, including the redemption of the shares of SMAF, USGF and MIF and the purchase of shares of MAF, MSIF and SIF, respectively, will be effected in conformity with Section 22(c) of the 1940 Act and Rule 22c–1 thereunder, as described above. Moreover, Applicants state that the partial redemptions-in-kind of shares of the Funds will be effected in conformity with Rule 18f-1 and Rule 17a–7 under the 1940 Act and the procedures of SteinRoe Trust and Keyport Trust established pursuant to Rule 17a–7. Applicants submit that owner interests after the Substitution, in practical economic terms, will not differ in any measurable way from such interests immediately prior to the Substitution. In each case, Applicants assert that the consideration to be received and paid is, therefore,

reasonable and fair. Keyport, Keyport America and Liberty Life each believe, based on their review of existing federal income tax laws and regulrtions and advice of counsel, that the Substitution will not give rise to any taxable income for Owners.

Applicants' Conclusions

Applicants submit, for all of the reasons stated herein, that their requests meet the standards set out in Sections 17(b) and 26(b) of the 1940 Act and that an order should, therefore, be granted. Accordingly, Applicants request an order pursuant to Sections 17(b) and 26(b) of the 1940 Act approving the substitution of shares of MAF for shares of SMAF, the substitution of shares of MSIF for shares of USGS, and the substitution of shares of SIF for shares of MIF, respectively.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

[Rel. No. IC–21331/812–9662]

Van Kampen Merritt Equity Trust et al.; Notice of Application

August 31, 1995.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of Application for Exemption under the Investment Company Act of 1940 (the "Act").

APPLICANTS: Van Kampen Merritt Equity Trust (the "VK Trust"), American Capital Utilities Income Fund, Inc. (the "AC Fund"), Van Kampen American Capital Investment Advisory Corp. (the "VK Adviser"), Van Kampen American Capital Asset Management, Inc. (the "AC Adviser"), and Van Kampen American Capital Distributors, Inc. (the "Distributor").

RELEVANT ACT SECTIONS: Order requested under section 17(b) granting an exemption from section 17(a).

SUMMARY OF APPLICATION: Applicants request an order to permit the VK Fund, a sub-trust of the VK Trust, to acquire all of the assets of the AC Fund. Because of certain affiliations, the two funds may not rely on rule 17a–8 under the Act.

FILING DATE: The application was filed on July 12, 1995. Applicants have agreed to file an amendment during the notice period, the substance of which is included in this notice.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving applicant with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on September 25, 1995, and should be accompanied by proof of service on applicant, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 Fifth Street, N.W., Washington, D.C. 20549. Applicants, One Parkview Plaza, Oakbrook Terrace, Illinois 60181.

FOR FURTHER INFORMATION CONTACT: Sarah A. Wagman, Staff Attorney, at (202) 942–0654, or Alison E. Baur, Branch Chief, at (202) 942–0564 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee at the SEC's Public Reference Branch.

Applicants' Representations

1. The Van Kampen Merritt Utility Fund (the "VK Fund") is a sub-trust of the VK Trust, an open-end management investment company organized as a Massachusetts business trust. The AC Fund is an open-end management investment company organized as a Maryland corporation (the VK Fund and the AC Fund are collectively referred to as the "Funds"). The VK Adviser advises the VK Fund, and the AC Adviser advises the AC Fund. As of May 31, 1995, the AC Adviser owned 9.25% of the outstanding voting shares of the AC Fund.

2. On December 20, 1994, The Van Kampen Merritt Companies, Inc. acquired from The Travelers Inc. all of the outstanding capital stock of American Capital Management & Research, Inc., which at that time was the parent company of the AC Adviser. Immediately following this acquisition, American Capital Management & Research, Inc. was merged into The Van Kampen Merritt Companies, Inc. and the combined entity was renamed Van Kampen American Capital, Inc. The VK Adviser, the AC Adviser, and the Distributor are wholly-owned subsidiaries of Van Kampen American Capital, Inc., and are organized as Delaware corporations.

3. Van Kampen American Capital, Inc. is a wholly-owned subsidiary of VK/AC Holding, Inc. VK/AC Holding, Inc., in turn, is controlled by The Clayton & Dubilier Private Equity Fund IV Limited Partnership ("C&D L.P."), which owned, as of August 29, 1995, approximately 86 percent of the common stock of VK/AC Holding, Inc. C&D L.P. is managed by Clayton, Dubilier & Rice, Inc., a New York-based private investment firm. The general partner of C&D L.P. is Clayton & Dubilier Associates IV Limited Partnership.

4. The investment objectives of the Funds are essentially the same. The investment objective of the VK Fund is to provide its shareholders with capital appreciation and current income. The VK Fund seeks to achieve its objective by investing in a diversified portfolio of common stocks and income securities issued by companies engaged in the utilities industry. Under normal market conditions, at least 80% of the VK fund's assets are invested in securities issued by companies engaged in the utilities industry. As of May 31, 1995, the net assets of the VK Fund were $134,753,821.

5. The primary investment objective of the AC Fund is to provide its shareholders with current income. Capital appreciation is a secondary objective which is sought only when consistent with the primary objective. The AC Fund seeks to achieve its investment objective by investing in a diversified portfolio of common stocks and income securities issued by companies engaged in the utilities industry. Under normal market conditions, at least 65% of the AC Fund's assets are invested in securities issued by companies engaged in the utilities industry. As of May 31, 1995, the net assets of the AC Fund were $26,996,393.

6. Each fund offers three classes of shares. Class A shares of the Funds generally are sold with a front-end sales charge. Purchases of Class A shares in excess of $1,000,000 are not subject to a front-end sales charge but are subject to a contingent deferred sales charge ("CDSC") of 1.00% if redeemed within one year from the date of purchase. Class B shares of the Funds are sold without a front-end sales charge but are subject to a CDSC payable upon redemption. Class C shares of the Funds are sold without a front-end sales charge and are subject to a CDSC of 1.00% if redeemed within one year of purchase.

7. The VK Fund proposes to acquire all of the assets of the AC Fund, in exchange for shares of beneficial interest in the VK Fund and the assumption by the VK Fund of all of the liabilities of

the AC Fund. The number of shares of each class of the VK Fund to be issued to shareholders of the AC Fund will be determined on the basis of the Funds' relative net asset values for each class of shares, computed as of 5:00 p.m. Eastern time on the closing date. Class A, Class B, and Class C shareholders of the AC Fund will receive, respectively, Class A, Class B, and Class C shares of the VK Fund. After this distribution and the AC Fund's winding up of its affairs, the AC Fund will be terminated.

8. In anticipation of the proposed reorganization, on April 7, 1995, the board of trustees of the VK Trust (the "VK Board") unanimously approved a consolidation plan (the "Consolidation Plan") which provided for: (a) merging certain funds advised by the VK Adviser and the AC Adviser, including the Funds, in order to achieve certain economies of scale and efficiency; (b) permitting exchangeability of shares between funds advised by the VK Adviser and the AC Adviser; (c) selecting a common transfer agent; (d) consolidating the VK Board and the board of directors of the AC Fund (the "AC Board") into a combined board;[1] and (e) reorganizing most of the funds advised by the VK Adviser and the AC Adviser, including the Funds, as Delaware business trusts. On May 11, 1995, the AC Board unanimously approved the Consolidation Plan. Shareholder approval of the actions proposed in the Consolidation Plan was obtained, or will be obtained, where necessary.

9. In anticipation of the proposed reorganization, the VK Board and the AC Board, including the non-interested trustees/directors, unanimously approved an agreement and plan of reorganization (the "Reorganization Agreement"). Applicants intend that the Reorganization Agreement will be submitted to the shareholders of the AC Fund for approval at a meeting to be held on or about September 15, 1995. A registration statement on Form N–14 containing a combined proxy statement/prospectus was filed with the Commission on May 25, 1995. The AC Fund began mailing the proxy statement/prospectus to its shareholders on August 4, 1995. Assuming that the required shareholder vote is obtained at the AC Fund's shareholder meeting, the closing of the proposed reorganization is expected to be shortly thereafter, but not before applicants' receipt of the requested order.

10. In considering the Reorganization Agreement, the VK Board and the AC Board, including the non-interested trustees/directors of each board, considered a number of factors in concluding that the Funds' participation in the reorganization is in the best interests of each fund and that the interests of existing shareholders of the Funds will not be diluted. The factors considered by the boards included: (a) the capabilities and the resources of the VK Adviser and other service providers to the VK Fund; (b) the advisory fees and expenses of the Funds, the expense ratios of the Funds, and the anticipated expense ratio of the combined fund; (c) comparative investment performance of the VK Fund and the AC Fund; (d) the terms and conditions of the reorganization; (e) the potential benefits of the reorganization to affiliates of the Funds; (f) the similarity of the Funds; (g) the costs of the reorganization to the Funds; and (h) the fact that the reorganization will be effected on a tax-free basis. The VK Fund, as the surviving fund after the reorganization and merger of the VK Fund and the AC Fund, will be responsible for the expenses incurred by the AC Fund and the VK Fund in connection with the reorganization, and the VK Adviser, the AC Adviser, and the Distributor will be responsible for their respective expenses incurred in connection with the reorganization.

11. The consummation of the reorganization is subject to a number of conditions set forth in the Reorganization Agreement, including: (a) The shareholders of the AC Fund shall have approved the Reorganization Agreement; and (b) the parties shall have received all necessary approvals, registrations, and exemptions (including the requested order) under federal and state securities laws with respect to the proposed reorganization. Any provision of the Reorganization Agreement may be waived, amended, modified, or supplemented by the mutual written agreement of the parties; provided, however, that the parties will not make any material changes to the Reorganization Agreement that affect the application without the prior approval of the SEC. Applicants also agree not to waive, amend, or modify any provision of the Reorganization Agreement that is required by state or Federal law to effect the reorganization.

Applicants' Legal Analysis

1. Section 17(a) of the Act, in pertinent part, prohibits an affiliated person of a registered investment company, or any affiliated person of such a person, acting as principal, from selling to or purchasing from such registered company, any security or other property. Section 17(b) provides that the SEC may exempt a transaction from section 17(a) if evidence establishes that the terms of the proposed transaction, including the consideration to be paid, are reasonable and fair and do not involve overreaching on the part of any person concerned, and that the proposed transaction is consistent with the policy of each registered investment company concerned and with the general purposes of the Act.

2. Rule 17a–8 under the Act exempts from the prohibitions of section 17(a) mergers, consolidations, or purchases or sales of substantially all the assets of registered investment companies that may be affiliated persons, or affiliated persons of an affiliated person, solely by reason of having a common investment adviser, common directors/trustees, and/or common officers provided that certain conditions are satisfied. The proposed reorganization may not be exempt from the prohibitions of section 17(a) by reason of rule 17a–8 because the AC Adviser owns more than 5% of the outstanding voting securities of the AC Fund.

3. Applicants believe that the terms of the proposed reorganization satisfy the standards of section 17(b). The AC Board and the VK Board, respectively, including their disinterested trustees and directors, have reviewed the terms of the proposed reorganization, including the consideration to be paid or received, and have found that participation in the proposed reorganization as contemplated by the Reorganization Agreement is in the best interests of the VK Fund and the AC Fund, and that the interests of existing shareholders of the Funds will not be diluted as a result of the reorganization. In addition, the AC Board and the VK Board found that the proposed reorganization is consistent with the Funds' policies and the general purposes of the Act.

For the Commission, by the Division of Investment Management, under delegated authority.

Margaret H. McFarland,

Deputy Secretary.

[1] The AC Fund will comply with section 15(f) of the Act with respect to the composition of the AC Board. Section 15(f) provides, in relevant part, that an investment adviser of a registered investment company may receive a benefit in connection with a sale of an interest in such investment company which results in an assignment of the investment company's advisory contract if, for a three-year period following the sale, 75% of the directors of the investment company are not interested persons of the adviser or its predecessor.

DEPARTMENT OF STATE

[Public Notice No. 2252]

Notice of Advisory Committee Study Group Meeting on Proposed Rules for Secured Interests in International Transactions

A meeting of a new Study Group on International Secured Interests, co-hosted by the Secretary of State's Advisory Committee on Private International Law (ACPIL) and the Subcommittee on International Commercial Law, Section of Business Law of the American Bar Association (ABA), will be held on Monday, September 18, 1995 in New York at the Brooklyn Law School from 9:30–5:00. The focus of the meeting will be on various efforts by international organizations and others to establish rules for, or unify laws on, secured interests and receivables financing in the context of international transactions. A seminar on international and domestic credit enhancement will take place the following day at Brooklyn Law School, and attendees at the Study Group meeting will be invited to the following day's sessions.

The primary focus for the Study Group will be projects under way at UNCITRAL (United Nations Commission on International Trade Law) and UNIDROIT (International Institute for the Unification of Private Law).

UNIDROIT, an intergovernmental organization of which the United States is a member, is in the process of preparing an initial draft of Uniform Rules on the recognition and enforcement of international interests in mobile equipment. The proposed Rules will need to define what constitutes an international security interest, whether the convention itself should create or only recognize such interests, whether such interests may secure future as well as present obligations, the scope of equipment to be covered, the appropriate registry or registries, remedies and enforcement, basic priority rules and possibly jurisdiction. Consideration will also be given to drafting the rules in the form of a convention (multilateral treaty), rather than as a uniform law. UNIDROIT will hold its next drafting session in October 1995; the meeting of the Study Group will provide guidance for U.S. participants. Documents available include UNIDROIT reports contained in Study LXXII, reports of U.S. participants in prior preliminary drafting meetings of UNIDROIT, and reports prepared for the Aviation Working Group.

UNCITRAL is in the preliminary stages of drafting model law rules on "receivables financing", which focuses on the assignment of rights to payment for goods and services in a broad range of commercial goods. Various types of trade financing mechanisms may be relevant, such as secured transactions, factoring, forfeiting, secondary financing, etc. The preliminary draft rules cover forms of assignment and transfer of security rights, the relationship between assignor and assignee, warranties, applicable law, enforcement and defenses, effect of assignments toward third parties, and priorities. The rules are intended to encompass bulk assignments and general inventory, as well as identifiable goods. UNCITRAL will hold its first working group meeting on this topic in November, 1995; the meeting of the Study Group will provide guidance for U.S. participants. Documents available include reports prepared by the UNCITRAL Secretariat on the legal aspects of receivables financing, U.N. Docs. A/CN.9/397 and 412.

Discussion of the above-referenced projects will take into account the already completed UNIDROIT conventions on International Financial Leasing and International Factoring, both of which are expected to be submitted to the U.S. Senate for advice and consent to United States ratification.

The review of these and other international projects will take into account proposed revisions to the Uniform Commercial Code which are presently under consideration by the National Conference of Commissioners on Uniform State Laws, as well as work being done by the American Law Institute, the American Bar Association and others. In addition, the status of other related projects will be discussed, including current projects on secured interests laws by the World Bank and the National Law Center for Inter-American Free Trade (CIFT) in Tucson, Arizona.

The meeting will be open to the public up to the capacity of the meeting room and all attendees can participate subject to rulings of the Chair. The meeting will be held at Brooklyn Law School, 250 Joralemon Street (downtown Brooklyn), New York 11201. Location of the meeting will be posted at the Law School for participants. Persons wishing to attend or who want further information should contact Peter Winship, International Commercial Law Subcommittee, at (202) 822–8633, fax (202) 785–5185, or Harold Burman, Advisory Committee Executive Director, (202) 776–8421, fax (202) 776–8482.

Copies of all documents referred to above can be obtained on request from the Advisory Committee. Persons unable to attend the meeting may submit their comments in writing to the Advisory Committee by fax at (202) 776–8482 or to the Office of the Legal Adviser (L/PIL), Suite 203 South Building, 2430 E Street, NW., Washington, DC 20037–2800. For information on arrangements at Brooklyn Law School, contact Judy Cohn at (718) 780–7987, fax (718) 780–0393.

Peter H. Pfund,

Assistant Legal Adviser for Private International Law, Vice-Chair, Secretary of State's Advisory Committee on Private International Law.

BILLING CODE 4710–08–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[Summary Notice No. PE–95–32]

Petitions for Exemption; Summary of Petitions Received; Dispositions of Petitions Issued

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of petitions for exemption received and of dispositions of prior petitions.

SUMMARY: Pursuant to FAA's rulemaking provisions governing the application, processing, and disposition of petitions for exemption (14 CFR Part 11), this notice contains a summary of certain petitions seeking relief from specified requirements of the Federal Aviation Regulations (14 CFR Chapter I), dispositions of certain petitions previously received, and corrections. The purpose of this notice is to improve the public's awareness of, and participation in, this aspect of FAA's regulatory activities. Neither publication of this notice nor the inclusion or omission of information in the summary is intended to affect the legal status of any petition or its final disposition.

DATES: Comments on petitions received must identify the petition docket number involved and must be received on or before September 27, 1995.

ADDRESSES: Send comments on any petition in triplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rule Docket (AGC–200), Petition Docket No. ______, 800 Independence Avenue, SW., Washington, DC 20591.

Comments may also be sent electronically to the following internet address: nprmcmts@mail.hq.faa.gov.

The petition, any comments received, and a copy of any final disposition are filed in the assigned regulatory docket and are available for examination in the Rules Docket (AGC–200), Room 915G, FAA Headquarters Building (FOB 10A), 800 Independence Avenue, SW., Washington, DC 20591; telephone (202) 267–3132.

FOR FURTHER INFORMATION CONTACT: Mr. D. Michael Smith, Office of Rulemaking (ARM–1), Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone (202) 267–7470.

This notice is published pursuant to paragraphs (c), (e), and (g) of § 11.27 of Part 11 of the Federal Aviation Regulations (14 CFR Part 11).

Issued in Washington, D.C., on September 1, 1995.

Donald P. Byrne,

Assistant Chief Counsel for Regulations.

Petitions For Exemption

Docket No.: 28030
Petitioner: Taquan Air Service, Inc.
Sections of the FAR Affected: 14 CFR 43.3(g)
Description of Relief Sought: To permit appropriately trained pilots employed by Taquan Air Service, Inc., (TAS) to perform daily compressor turbine washes on the Pratt & Whitney engine installed on the Cessna 208 Caravan I that TAS operates under part 135.

Dispositions of Petitions

Docket No.: 18599
Petitioner: T.B.M., Inc.
Sections of the FAR Affected: 14 CFR 36.1581(c)
Description of Relief Sought/Disposition: To amend Exemption No. 2745, as amended, which permits the amendment of the landing weight operating limitations imposed on specified DC–6 and DC–7 aircraft to allow landings at weights at or below the applicable maximum landing weight during firefighting operations. The amendment deletes a DC–7B (Registration No. N848D) from this exemption, because it was destroyed in an accident.
GRANT, July 24, 1995, Exemption No. 2745B

Docket No.: 25089
Petitioner: Hawkins & Powers Aviation, Inc.
Sections of the FAR Affected: 14 CFR 137.53(c)(2)
Description of Relief Sought/Disposition: To extend Exemption No. 5075, as amended, which permits Hawkins & Powers Aviation, Inc., to conduct aerial application of insecticide from C–118A (DC–6) aircraft over congested areas without the aircraft being equipped with a device capable of jettisoning at least one-half of the aircraft's maximum authorized load of agricultural materials within 45 seconds.
GRANT, August 3, 1995, Exemption No. 5075C

Docket No.: 25794
Petitioner: Air Transport Association of America
Sections of the FAR Affected: 14 CFR 47.49 and 91.203
Description of Relief Sought/Disposition: To extend and amend Exemption No. 5318, as amended, which permits Air Transport of America member airlines to operate their U.S.-registered aircraft on a temporary basis following the incidental loss or mutilation of a certificate of airworthiness, registration, or both. The amendment removes references to § 47.49. The original grant reflected that this section was not necessary to the issuance of the exemption; however, § 47.49 was nevertheless inadvertently included.
GRANT, July 24, 1995, Exemption No. 5318D

Docket No.: 27117
Petitioner: Paragators, Inc.
Sections of the FAR Affected: 14 CFR 105.43
Description of Relief Sought/Disposition: To extend Exemption No. 5659, which permits Paragators, Inc., (Paragators) to allow nonstudent parachutists who are foreign nationals to participate in Paragators-sponsored parachute-jumping events at Paragators' facilities, using parachutes that have not been approved by the FAA, but have been accepted or approved for use by the proper authorities in the foreign parachutist's own country.
GRANT, June 30, 1995, Exemption No. 5659A

Docket No.: 27140
Petitioner: Hi Line Helicopters, Inc.
Sections of the FAR Affected: 14 CFR 135.143(c)(2)
Description of Relief Sought/Disposition: To extend Exemption No. 5715, which allows Hi Line Helicopters, Inc., to operate part 135 aircraft without a TSO–C112 (Mode S) transponder installed on its aircraft.
GRANT, July 19, 1995, Exemption No. 5715A

Docket No.: 27153
Petitioner: Kachina Aviation
Sections of the FAR Affected: 14 CFR 135.143(c)(2)
Description of Relief Sought/Disposition: To extend Exemption No. 5701, which allows Kachina Aviation to operate its part 135 aircraft without a TSO–C112 (Mode S) transponder installed on its aircraft.
GRANT, May 24, 1995, Exemption No. 5701A

Docket No.: 27167
Petitioner: Corporate Aviation Services, Inc.
Sections of the FAR Affected: 14 CFR 135.143(c)(2)
Description of Relief Sought/Disposition: To extend Exemption No. 5756, which allows Corporate Aviation Services, Inc., to operate part 135 aircraft without a TSO–C112 (Mode S) transponder installed on its aircraft.
GRANT, July 19, 1995, Exemption No. 5756A

Docket No.: 27306
Petitioner: NockAir Helicopters, Inc.
Sections of the FAR Affected: 14 CFR 133.43 (a) and (b)
Description of Relief Sought/Disposition: To extend Exemption No. 5708, which permits NockAir Helicopters, Inc., to use its helicopters to perform aerial trapeze acts without using an approved external-load attachment or a quick-release device for carrying a person on a trapeze bar.
GRANT, August 3, 1995, Exemption No. 5708A

Docket No.: 27310
Petitioner: Purdue University
Sections of the FAR Affected: 14 CFR 61.55(b)(2); 61.56(c)(1); 61.57 (c) and (d); 61.58 (c)(1) and (d); 61.63 (c)(2) and (d) (2) and (3); 61.65 (c), (e) (2) and (3), and (g); 61.67(d)(2); 61.157 (d)(1) and (2) and (e) (1) and (2); 61.191(c); and appendix A, part 61
Description of Relief Sought/Disposition: To extend Exemption No. 5706, which permits Purdue University to use FAA-approved simulators to meet certain flight experience requirements of part 61.
GRANT, July 19, 1995, Exemption No. 5706A

Docket No.: 28068
Petitioner: Bombardier, Inc., Canadair
Sections of the FAR Affected: 14 CFR 91.211(b)(1)(ii)
Description of Relief Sought/Disposition: To allow operation of Canadair Global Express (GX) aircraft at altitudes above 41,000 feet mean sea level (MSL) without requiring that at least one pilot at the controls of the airplane wear an oxygen mask.
DENIAL, August 3, 1995, Exemption No. 6141

Docket No.: 28079
Petitioner: General Electric Aircraft Engines

Sections of the FAR Affected: 14 CFR 21.325(b) (1) and (3)
Description of Relief Sought/ Disposition: To allow export airworthiness approvals to be issued for Class I products that have been assembled, inspected, and tested at the Universal Maintenance Center (UMC) in Bandung, Indonesia. Additionally, this exemption allows export airworthiness approvals to be issued for Class II and Class III export that are U.S.-manufactured under the control of General Electric Aircraft Engines quality control system but exported from its facilities located in other countries.
PARTIAL GRANT, July 25, 1995, Exemption No. 6139

Docket No.: 28219
Petitioner: IRZ Infrascan
Sections of the FAR Affected: 14 CFR 135.143(c)(2)
Description of Relief Sought/ Disposition: To permit IRZ Infrascan to operate without a TSO–C112 (Mode S) transponder installed on its aircraft operating under the provisions of part 135.
GRANT, July 14, 1995, Exemption No. 6138

Docket No.: 28282
Petitioner: Raytheon Aircraft Company
Sections of the FAR Affected: 14 CFR 21.183(c) and 21.325(b)(1)
Description of Relief Sought/ Disposition: To permit the Raytheon Aircraft Company to obtain standard airworthiness certificates for its Hawker Models 800, 800XP, and 1000 aircraft, type certificated in accordance with § 21.21 instead of § 21.29, and to permit Raytheon to obtain export certificates of airworthiness for those model aircraft from a manufacturing facility located outside of the United States.
GRANT, August 3, 1995, Exemption No. 6142

BILLING CODE 4910–13–M

Federal Highway Administration

[FHWA Docket No. 95–20]

Advanced Technology in Commercial Motor Vehicle Operations; Request for Comments

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice; request for information.

SUMMARY: The FHWA seeks information from motor carriers, vehicle and component manufacturers, technology vendors, and the public on the use of advanced driver, vehicle, and inspection technology in commercial motor vehicle operations. The FHWA plans to evaluate existing technologies to determine if they could be used to simplify or automate compliance with any of the Federal Motor Carrier Safety Regulations (FMCSRs) without compromising public safety. Commenters are encouraged to identify safety-related technology that could reduce paperwork or contribute to more efficient safety management and enforcement practices.

DATES: Comments should be received no later than November 6, 1995.

ADDRESSES: All written, signed comments should refer to the docket number that appears at the top of this document and must be submitted to HCC–10, Room 4232, Office of Chief Counsel, Federal Highway Administration, 400 Seventh Street, SW., Washington, DC 20590. All comments received will be available for examination at the above address from 8:30 a.m. to 3:30 p.m., e.t., Monday through Friday, except Federal holidays. Those desiring notification of receipt of comments must include a self-addressed, stamped postcard.

FOR FURTHER INFORMATION CONTACT: Mr. Philip J. Roke, Office of Motor Carrier Research and Standards, (202) 366–5884, or Mr. Charles Medalen, Office of the Chief Counsel, (202) 366–1354, Federal Highway Administration, Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590. Office hours are from 7:45 a.m. to 4:15 p.m., e.t., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

Background

The FHWA requests ideas, suggestions, and comments from motor carriers, manufacturers, technology vendors, other interested parties, and the public on how technology currently available, or soon to become available, to motor carriers and drivers subject to Federal regulatory requirements could be substituted for existing regulatory methods without compromising public safety. This is consistent with the goals of the agency's Zero Base Regulatory Review of the FMCSRs (49 CFR parts 350–399).

Specifically, the FHWA requests commenters to identify and discuss technologies that could reduce costs, delays, and paperwork burdens associated with the current rules, or even enhance operational safety. For example, on September 30, 1988, the FHWA published a final rule (53 FR 38666) to allow motor carriers, at their option, to use certain automatic on-board recording devices to record their drivers' records of duty status in lieu of the required handwritten record of duty status. This provision is now found at § 395.15 of the FMCSRs. Comparable innovations with even greater economic or safety potential may now be available or in the final stages of development.

Information submitted by commenters will help the agency decide which rules could benefit from technological modernization. We will consider amending or replacing current rules with technology-based standards that are consistent with the safe operation of commercial motor vehicles. Any revisions or modifications to the FMCSRs would be done under a separate rulemaking.

Ongoing Research and Development

The FHWA is pursuing several research projects addressing advances in driver, vehicle, and inspection technology. These projects include studies of fitness-for-duty testing devices, automated roadside inspection technologies, advanced brake system testing devices, and the feasibility of standardized vehicle safety component diagnostic devices. The FHWA will use relevant information supplied in response to this notice to supplement and/or validate these research findings.

Manufacturing Standards

The National Highway Traffic Safety Administration (NHTSA) establishes vehicle manufacturing standards and has the statutory authority to require specific components and or systems in original manufactured vehicles. The FHWA plans to share relevant vehicle component and/or systems information received in response to this notice with the NHTSA.

Information Requested

The FHWA requests commenters to provide information on available or soon-to-be available driver and vehicle technology that reduces the regulatory burden of complying with specific areas of the FMCSRs. Please provide as much data as possible on the design, operation, and cost (hardware, software, installation, training, maintenance, etc.) of each device or technology. Reductions in regulatory burdens should be quantified if at all possible. Detailed estimates of savings (in expenditures, time, accidents avoided, etc.) are also very important. (49 U.S.C. 31136, 315022; 49 CFR 1.48)

Issued on: August 30, 1995.

Rodney E. Slater,

Federal Highway Administrator.

BILLING CODE 4910–22–P

DEPARTMENT OF THE TREASURY

Office of the Comptroller of the Currency

Information Collection Submitted to OMB for Review

AGENCY: Office of the Comptroller of the Currency, Treasury.

ACTION: Notice of information collection submitted to OMB for review and approval under the Paperwork Reduction Act of 1980.

SUMMARY: In accordance with the requirements of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35), the Office of the Comptroller of the Currency (OCC) hereby gives notice that it has sent to the Office of Management and Budget (OMB) a Paperwork Reduction Act Submission regarding an information collection titled Recordkeeping Requirements for Securities Transactions (12 CFR Part 12).

DATES: Comments on this information collection are welcome and should be submitted by September 28, 1995.

ADDRESSES: A copy of the submission may be obtained by calling or writing the OCC contact.

SUPPLEMENTARY INFORMATION: In accordance with the requirements of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35), the OCC has sent to OMB a Paperwork Reduction Act Submission regarding the following information collection:

Type of Review: Regular.

Title: Recordkeeping Requirements for Securities Transactions (12 CFR 12).

Description: The Recordkeeping Requirements for Securities Transactions (12 CFR 12) serve to establish an audit trail that is used by the OCC in its regulatory examinations as a tool to evaluate a bank's compliance with the anti-fraud provisions of the Federal securities laws. The records provide a basis for adequate disclosure to customers who effect securities transactions through national banks.

Form Number: None.

OMB Number: 1557–0142.

Respondents: Businesses or other for-profit.

Number of Respondents: 416.

Total Annual Responses: 416.

Average Hours Per Recordkeeper: 306 hours.

Total Annual Burden Hours: 127,296.

OMB Reviewer: Milo Sunderhauf, (202) 395–7340, Paperwork Reduction Project 1557–0186, Office of Management and Budget, Room 10226, New Executive Office Building, Washington, DC 20503.

OCC Contact: John Ference or Jessie Gates, (202)874–5090, Legislative and Regulatory Activities Division (1557–0186), Office of the Comptroller of the Currency, 250 E Street, SW, Washington, DC 20219.

Comments: Comments regarding the submission should be addressed to both the OMB reviewer and the OCC contact listed above.

Date: August 30, 1995.

James F.E. Gillespie,

Director, Legislative & Regulatory Activities.

[FR Doc. 95–22125 Filed 9–6–95; 8:45 am]

BILLING CODE 4810–33–P

UNITED STATES INFORMATION AGENCY

Program Title NIS Secondary School Initiative; Inbound Academic Year Placement

ACTION: Notice—Request for Proposals.

SUMMARY: The NIS Secondary School Initiative Division, Office of Citizen Exchanges, of the United States Information Agency's Bureau of Educational and Cultural Affairs announces an open competition for an assistance award program. Public and private non-profit organizations meeting the provisions described in IRS regulation 26 CFR 1.501(c)(3)–1 may apply to place high school students between the ages of 15 and 17 from the New Independent States (NIS) of the former Soviet Union in homestays and schools for the 1996/97 academic year. Organizations will be responsible for orienting students at the local level and for monitoring them during their time in the U.S.

Overall grant-making authority for this program is contained in the Mutual Educational and Cultural Exchange Act of 1961, Public Law 87–256, as amended, also known as the Fulbright-Hays Act. The purpose of the Act is "to enable the Government of the United States and the people of other countries * * *; to strengthen the ties which unite us with other nations by demonstrating the educational and cultural interests, developments, and achievements of the people of the United States and other nations * * * and thus to assist in the development of friendly, sympathetic and peaceful relations between the United States and the other countries of the world." The number of grant awards in this competition will likely be 15–20. All grants are subject to the availability of funds in Fiscal Year 1996.

Programs and projects must conform with Agency requirements and guidelines outlined in the Solicitation Package.

ANNOUNCEMENT NAME AND NUMBER: All communications with USIA concerning this announcement should refer to the above title and reference number E/P–96–12. This is a request for proposals only for the activities described above. Requests for proposals in support of other youth exchange programs with the NIS are being published separately.

DEADLINE FOR PROPOSALS: All copies must be received at the U.S. Information Agency by 5:00 p.m. Washington, DC time on Friday, October 19, 1995. Faxed documents will not be accepted, nor will documents postmarked October 19 but received at a later date. It is the responsibility of each applicant to ensure that proposals are received by the above deadline. Notification of awards will be announced after January 8, 1996. Grant funds should be available by April 1, 1996.

FOR FURTHER INFORMATION CONTACT: Division for the Secondary School Initiative, E/PY, Room 314, U.S. Information Agency, 301 4th Street, SW., Washington, DC 20547, telephone: 202/619–6299; fax: 202/619–5311; Internet: daronson@usia.gov, to request a Solicitation Package, which includes more detailed award criteria, all application forms, and guidelines for preparing proposals, including specific criteria for preparation of the proposal budget. Please specify USIA Program Specialist Diana Aronson on all inquiries and correspondence. Interested applicants should read the complete **Federal Register** announcement before addressing inquiries to the Division for the NIS Secondary School Initiative or submitting their proposals. Once the RFP deadline has passed, Agency representatives may not discuss this competition in any way with applicants until after the Bureau proposal review process has been completed.

SUBMISSIONS: Applicants must follow all instructions given in the Solicitation Package. The original and ten copies of the complete application should be sent to: U.S. Information Agency, Ref.: E/P–96–12, Office of Grants Management, E/XE, Room 326, 301 4th Street, SW., Washington, DC 20547.

SUPPLEMENTARY INFORMATION: Pursuant to the Bureau's authorizing legislation, programs must maintain a non-political character and should be balanced and representative of the diversity of American political, social, and cultural life. "Diversity" should be interpreted in the broadest sense and encompass differences including but not limited to ethnicity, race, gender, religion, geographic location, socio-economic status, and physical challenges. Applicants are strongly encouraged to adhere to the advancement of this principle. Organizations are encouraged to seek diverse communities and host families in which to place students. Orientation programming should include information on diversity issues as part of American culture and should touch on current laws that mandate equal treatment of all people regardless of race, gender, national origin, or disabling condition.

Overview

Academic year 1996–97 will be the fourth year of the program, which is part of the NIS Secondary School Initiative. It was originally funded under the FREEDOM Support Act of 1992, and in fiscal year 1996 will be funded out of the USIA appropriation for educational and cultural exchanges. The goals of the program are to: promote mutual understanding between the people of the NIS and the U.S.; instill in the participants democratic values and provide experience living in a democracy; establish a critical mass of young people in the NIS capable of transforming their societies.

Purpose

To place approximately 1,200 pre-selected high school students from the 12 New Independent States (NIS) of the former Soviet Union in the United States to study and live for one academic year. To place students in qualified, well-motivated host families and welcoming schools. To enable the students to attain a broad view of the society and culture of the U.S. and to share their cultures with Americans.

Guidelines

Three organizations have been awarded grants to perform the following functions: recruitment and selection of students; assistance in documentation and preparation of IAP 66 forms; preparation of cross-cultural materials; pre-departure and arrival orientation; international travel from home to the host community and return; ongoing communication with natural parents; tracking of all students during their stay in the U.S. and provision of data to USIA; and ongoing follow-up with alumni following their return to the NIS. Separate grants will be awarded for a one-week mid-year Washington DC civics education program for all students and for intensive English training for those students who need to improve their English before going to their host communities. The announcements of the competitions for these grants are being published separately.

Organizations chosen under this competition are responsible for the following: Recruitment, selection, and orientation of host families; school placement; local orientation; specialized training of local staff and volunteers to work with NIS students; preparation and dissemination of materials to students pertaining to the placement organization; program enhancement activities; supervision and monitoring of students, trouble-shooting, and periodic reporting on their progress; communication with the organizations conducting other program components, when appropriate; evaluation of the students' performance and the success of the organization in achieving program goals; and re-entry training to prepare students for readjustment to their native culture.

Applicants may request a grant for the placement of at least 20 students. There is no ceiling on the number of students who may be placed by one organization. It is anticipated that 15 to 20 grants will be awarded for this component of the program. Placements will be spread all across the U.S. Students may be clustered in one or more regions or dispersed. If dispersed, applicants should demonstrate that local staffing and training of local staff is adequate to ensure their competence in supervising and counseling students from the NIS. Please refer to the Guidelines for Proposals—available on request from the address listed above—for details on essential program elements and permissible costs.

Programming begins at the point that the complete applications on selected finalists are delivered to the placement organizations, approximately on April 1, 1996. Participants arrive in their host communities in the month of August and remain for 10 to 11 months until their departure during the period mid-June to early July 1997.

Eligibility

Private legally incorporated not-for-profit—IRS-designated 501(c)(3)—organizations and public institutions are eligible for consideration under this competition. Organizations with less than four years experience conducting youth exchange programs will be eligible for grants not to exceed $60,000.

Participants

Finalists are secondary school students aged 15–17 who have been tested, interviewed and thoroughly screened in an elaborate, merit-based process. Some may be completing their studies in their home schools in May of 1996. Applicants are referred to the Guidelines for Proposals for additional details on student selection criteria.

Visa/Insurance/Tax Requirements

Participants will travel on J–1 visas issued by USIA using a government program number. Organizations must comply with all pertinent J–1 visa regulations in carrying out their responsibilities. Administration of the program must be in compliance with reporting and withholding regulations for federal, state, and local taxes as applicable. Recipient organizations should demonstrate tax regulation adherence in the proposal narrative and budget. Applicants should submit the health and accident insurance plans they intend to use for students on this program. USIA will compare the plan with the Agency plan and make a determination of which will be applicable.

Materials

Drafts of all printed materials developed specifically for this program paid for with grant funds should be submitted to the Agency for review and approval. All official documents should highlight the U.S. government's role as program sponsor and funding source. The USIA will determine the disposition of the copyrights on any materials so funded.

Proposed Budget

Organizations must submit a comprehensive line item budget based on guidelines in the Solicitation Package. Applicants must submit a comprehensive budget for the entire program. There must be a summary budget as well as a breakdown reflecting both the administrative budget and the program budget. Please refer to the Solicitation Package for complete formatting instructions and for allowable costs. For better understanding or further clarification, applicants may provide separate sub-budgets for each program component, phase, location, or activity in order to facilitate USIA decisions on funding.

Review Process

The USIA will acknowledge receipt of all proposals and will review them for technical eligibility. Proposals will be deemed ineligible if they do not fully adhere to the guidelines stated herein

and in the Solicitation Package. Eligible proposals will be forwarded to panels of USIA officers for advisory review. All eligible proposals will also be reviewed by the Agency contracts office, as well as USIA's East European and NIS Area Office and the USIA post overseas, where appropriate. Proposals may also be reviewed by the Office of the General Counsel or by other Agency elements. Funding decisions are at the discretion of the USIA Associate Director for Educational and Cultural Affairs. Final technical authority for assistance awards (grants or cooperative agreements) resides with the USIA grants officer.

Review Criteria

Technically eligible applications will be competitively reviewed according to the criteria stated below. These criteria are not rank ordered and all carry equal weight in the proposal evaluation:

1. Quality of the program idea: Proposals should exhibit originality, substance, precision, and relevance to USIA's mission to promote mutual understanding.
2. Program planning: Detailed agenda and relevant work plan should demonstrate substantive undertakings and logistical capacity. Agenda and plan should adhere to the program overview and guidelines described above.
3. Multiplier effect/impact: Proposed programs should strengthen long-term mutual understanding, including maximum sharing of information and establishment of long-term institutional and individual linkages.
4. Support of Diversity: Proposals should demonstrate substantive support of the Bureau's policy on diversity. Achievable and relevant features should be cited in both program administration (selection of participants and host families, program venue, and program evaluation) and program content (orientation and wrap-on sessions, programs meetings, resource materials and follow-up activities).
5. Institutional Capacity: Proposed personnel and institutional resources should be adequate and appropriate to carry out the responsibilities listed above.
6. Institution's Record/Ability: Proposals should demonstrate an institutional record of successful administration of exchange programs, including responsible fiscal management and full compliance with all reporting requirements for past Agency grants as determined by USIA's Office of Contracts. The Agency will consider the past performance of prior recipients and the demonstrated potential of new applicants.
7. Project Evaluation: Proposals should include a plan to evaluate both the performance of the students and the grantee organization's success in achieving the goals of the program as outlined above. USIA recommends that the proposal include a draft survey questionnaire or other evaluation technique plus description of a methodology to use. Award-receiving organizations/institutions will be expected to submit quarterly reports.
8. Cost-effectiveness: The overhead and administrative components of the proposal, including salaries and honoraria, should be kept as low as possible. All other items should be necessary and appropriate.
9. Cost-sharing: Proposals should maximize cost-sharing through other private sector support as well as institutional direct funding contributions.

Notice

The terms and conditions published in this RFP are binding and may not be modified by any USIA representative.

Explanatory information provided by the Agency that contradicts published language will not be binding. Issuance of the RFP does not constitute an award commitment on the part of the Government. The Agency reserves the right to reduce, revise, or increase proposal budgets in accordance with the needs of the program and the availability of funds. Final awards cannot be made until funds have been appropriated by Congress, allocated and committed through internal USIA procedures.

Notification

All applicants will be notified of the results of the review process after January 8. Awards made will be subject to periodic reporting and evaluation requirements.

Dated: September 1, 1995.

Dell Pendergrast,

Deputy Associate Director, Bureau of Educational and Cultural Affairs.

[FR Doc. 95–22192 Filed 9–6–95; 8:45 am]

BILLING CODE 8230–01–M

Freedom Support Act Secondary School Initiative—U.S./NIS Academic Studies Inbound/Outbound Program

ACTION: Notice—request for proposals.

SUMMARY: The Division for the Secondary School Initiative, Office of Citizen Exchanges of the United States Information Agency's Bureau of Educational and Cultural Affairs announces an open competition for an assistance award to facilitate academic exchanges between American high school students and students from the 12 New Independent States (NIS) of the former Soviet Union. Public and private non-profit organizations and educational institutions meeting the provisions described in IRS regulation 25 CFR 1.501(c)(3)–1 may apply to develop projects that promote the purposes of this program, which are to: (a) Build the capacity of organizations to conduct academic exchanges at the secondary school level between the U.S. and the NIS; (b) sponsor study opportunities in the U.S. for NIS high-school-aged students; and (c) promote study abroad opportunities in the NIS for Americans. Applicants may apply for grants of up to two years duration. Exchanges of three to six months duration may take place during the 1997 spring semester, the 1997 fall semester, the 1998 spring semester, and the 1998 fall semester. Full year inbound and outbound exchanges may take place during the 1997–98 academic year.

The countries of the NIS are: Armenia, Azerbaijan, Belarus, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine, and Uzbekistan.

Overall grant making authority for this program is contained in the Secondary School Exchange Initiative, as originally authorized in the Freedom Support Act of 1992 (P.L. 102–391). It is anticipated that $4 million will be allotted to this program.

Programs and projects must conform with Agency requirements and guidelines as outlined in the Solicitation Package. USIA projects are subject to the availability of funds.

ANNOUNCEMENT TITLE AND NUMBER: All communications with USIA concerning this announcement should refer to the above title and reference number E/P–96–15. This is a request for proposals only for the program models described above. Requests for proposals in support of other youth exchange programs with the NIS are being published separately.

DEADLINE FOR PROPOSALS: All copies must be received at the U.S. Information Agency by 5 p.m. Washington, D.C. time on Friday, January 12, 1996. Faxed documents will not be accepted, nor will documents postmarked on January 12, 1996 but received at a later date. It is the responsibility of each applicant to ensure that proposals are received by the above deadline. Notification of awards will be announced on or after April 12, 1996. Grant funds should be available by June 1, 1996.

FOR FURTHER INFORMATION CONTACT:

The Division for the Secondary School Initiative, E/PY, Room 320, U.S. Information Agency, 301 4th Street, S.W., Washington, D.C. 20547, telephone: (202) 619–6299; fax (202) 619–5311, internet address: sjones@usia.gov to request a Solicitation Package, which includes more detailed criteria; all application forms; and guidelines for preparing proposals, including specific criteria for preparation of the proposal budget. Please specify USIA Program Officer, Shalita Jones on all inquiries and correspondences. Interested applicants should read the complete **Federal Register** announcement before addressing inquiries or submitting their proposals to the Division of the Secondary School Initiative. Once the RFP deadline has passed, Division representatives may not discuss this competition in any way with applicants until the Bureau's proposal review process has been completed.

SUBMISSIONS: Applicants must follow all instructions given in the Solicitation Package. The original and 10 copies of the complete application should be sent to: U.S. Information Agency, Ref.: E/P–96–15, Office of Grants Management, E/XE, Room 326, 301 4th Street, SW., Washington, DC 20547.

Applicants must also submit the "Executive Summary" and "Proposal Narrative," sections of the proposal on a 3.5" diskette, formatted for DOS. This material must be provided in ASCII text (DOS) format with a maximum line length of 65 characters. USIA will transmit these files electronically to USIS posts overseas for their review, with the goal of reducing the time it takes to get posts' comments for the Agency's grants review process.

DIVERSITY GUIDELINES: Pursuant to the Bureau's authorizing legislation, programs must maintain a non-political character and should be balanced and representatives of the diversity of American political, social, and cultural life. "Diversity" should be interpreted in the broadest sense and encompass differences including but not limited to ethnicty, race, gender, religion, geographic location, socio-economic status, and physical challenges. Applicants are strongly encouraged to adhere to the advancement of this principle both in program and administration of its program content. Please refer to the review criteria under the "Support for Diversity" section for specific suggestions on incorporating diversity into the total proposal.

SUPPLEMENTARY INFORMATION:

Overview

The purpose of this program is to provide the opportunity for American students to study at a school and experience life with a host family and its community in one of the 12 New Independent States of the former Soviet Union, and, to sponsor students from the NIS to study at an American school and experience life with a host family and its community in the U.S. The programs are intended to provide avenues that will enhance the students' understanding of each country's political, social, and cultural and ethnic diversity; to promote the exchange of ideas; and to foster long-term friendships, through courses of study such as history, social studies, civics, and global economics and environmental issues, as well as through living and interacting with their host families and communities. Initial grant funding is also intended to facilitate the creation of partnerships with NIS organizations seeking to promote exchanges, and to assist U.S. non-profit organizations to build their own capacity to conduct exchange business in the NIS which will promote a long-term future for exchanges beyond federal funding.

This program has four components. Please note that each component is independent of the other and is not subject to reciprocity. Applicants may opt to apply for any or a combination of any or all four of the following components:

A. Outbound Semester

This component will give American high-school students a chance to live with a host family and study at the secondary school level in an NIS country for a period of no less than three months.

B. Inbound Semester

This component provides opportunities for NIS high-school students to live with a host family and study at secondary-level institutions for one academic semester in the U.S.

C. Academic Year Outbound

This component provides opportunities for American high-school students to study for a school year (no less than 9 months) in a country of the former Soviet Union, and to more fully experience the life and culture of a host family and its community.

D. Academic Year Inbound

This component provides the opportunity for students from the former Soviet Union to study for a school year (no less than 9 months) at an American high school, and to experience the life and culture of a host family and its community.

Guidelines

There is no prescribed formula for either component of the program, however, organizations should encourage students to participate in extracurricular activities and provide students with community-based activities. Also, organizations have the option to concentrate groups of students in regional clusters or disperse students wisely. The purpose of clustering is to facilitate periodic gatherings for ongoing orientation, excursions and cultural programming, and well as supervision and feedback. Organizations should identify in their proposals the target regions, states and/or communities in which placements will be sought, and describe how placements in those areas will benefit students and the overall purpose of the program. The names and addresses of prospective schools and letters of agreement to participate from relevant school/district/community officials should be included in the proposal. Regardless of the placement plan, organizations may propose periodic gatherings of students locally, regionally, or nationally.

Grantee organizations working with their offices overseas and/or NIS partners will: Recruit and select students based on merit using their own criteria; arrange for their placement in schools; select host families; make all travel and logistical arrangements; conduct orientation, re-entry, and debriefing sessions for students and hosts; supervise students, solve problems, and provide counseling as needed; develop a mechanism for the transfer of academic credit and/or the certification of school attendance; interact with the schools on an ongoing basis; and evaluate the program's success.

Proposals should succinctly describe how these elements will be handled, with special attention to the following factors:

A. Proposals must demonstrate the organization's capacity to secure quality homestays and school placements for the number of students on which they are bidding by describing the process it uses to identify and screen potential host families, as well as its system for making school placements.

B. Organizations using the cluster method should: specify the cluster size and likely locations; and include a description of how clustering will affect the program, such as scheduling periodic gatherings of the students. A sample schedule of gatherings and topics or themes to be addressed should be included.

C. Organizations using the dispersal method should explain its placement philosophy; describe how dispersal will affect the program; and if planning periodic gatherings the proposal should include a tentative itinerary for sample meetings.

D. Inbound students should be sufficiently proficient in English upon arrival in the U.S. in order to function in a high-school environment. However, no USIA grant funding will be provided for English training under this program.

Preference will be given to proposals that include language skills as a selection criterion for American students going to the NIS. Applicant organizations with alternative approaches to language qualifications should discuss them in the proposal.

Programs must comply with J–1 visa regulations. Visa applications (IAP–66 forms) for NIS participants will be processed by the program office. Please refer to program specific guidelines in the POGI section of the Solicitation Package for further details.

Eligibility

Private not-for-profit organizations and public educational instructions including secondary schools, school districts, state education agencies, and organizational and educational consortiums are invited to participate. Grants awarded to eligible organizations with less than four years of experience in conducting international exchange programs will be limited to $60,000.

Proposed Budget

Applicants must submit a comprehensive line-item budget for the entire program. There must be a summary budget as well as a break-down reflecting both the administrative budget and the program budget. For better understanding or further clarification, applicants may provide separate sub-budgets for each program component, phase, location, or activity in order to facilitate USIA decisions on funding. Cost-sharing is encouraged and may be in the form of allowable direct or indirect costs. Please refer to the Solicitation Package and Guidelines for complete budget and formatting instructions, and allowable costs.

Review Process

USIA will acknowledge receipt of all proposals and will review them for technical eligibility. Proposals will be deemed ineligible if they do not fully adhere to the guidelines stated herein and in the Solicitation Package. Eligible proposals will be forwarded to panels of USIA officers for advisory review. All eligible proposals will also be reviewed by the Agency contracts office, as well as the Agency's Area Office and the relevant USIA post overseas. Proposals may also be reviewed by the Office of the General Counsel or by other Agency elements. Funding decisions are at the discretion of the Associate Director for Educational and Cultural Affairs. Final technical authority for grant awards resides with the USIA grants officer.

Review Criteria

Technically eligible applications will be competitively reviewed according to the criteria stated below. These criteria are not rank ordered and all carry equal weight in the proposal evaluation:

1. Quality of the program idea: Proposals should exhibit originality, substance, precision, and relevance to Agency's mission.

2. Program planning: Detailed agenda and relevant work plan should demonstrate substantive undertakings and logistical capacity. Agenda and plan should adhere to the program overview and guidelines described above. Proposals should also clearly demonstrate how students will be selected on the basis of merit and the qualifications needed for a successful program.

3. Ability to achieve program objectives: Objectives should be reasonable, feasible, and flexible. Proposals should clearly demonstrate how the institution will meet the program's objectives and plan.

4. Multiplier effect/impact: Proposed programs should strengthen long-term mutual understanding, including maximum sharing of information and establishment of long-term institutional and individual linkages.

5. Support of Diversity: Proposals should demonstrate the recipient's commitment to promoting the awareness and understanding of diversity throughout the program. This can be accomplished through documentation (such as a written statement or account) summarizing past and/or ongoing activities and efforts that further the principle of diversity within both the organization and the program activities.

6. Institutional Capacity: Proposed personnel and institutional resources should be adequate and appropriate to achieve the program or project's goals.

7. Institution's Record/Ability: Proposals should demonstrate an institutional record of successful exchange programs, including responsible fiscal management and full compliance with all reporting requirements for past Agency grants as determined by USIA's Office of Contracts. The Agency will consider the past performance of prior recipients and the demonstrated potential of new applicants.

8. Follow-on Activities: Proposals should provide a plan for continued follow-on activity (without USIA support) which ensures that USIA supported programs are not isolated events.

9. Project Evaluation: Proposals should include a plan to evaluate the success of the program, both as the activities unfold and at the end of the program. USIA recommends that the proposal include a draft survey questionnaire or other technique, plus a description of a methodology to use to link outcomes to original project objectives. Award-receiving organizations/institutions will be expected to submit intermediate reports after each project component is concluded or quarterly reports, whichever is less frequent.

10. Cost-effectiveness: The overhead and administrative components of the proposal, including salaries and honoraria, should be kept as low as possible. All other items should be necessary and appropriate.

11. Cost-sharing: Proposals should maximize cost-sharing through other private sector support as well as institutional direct funding contributions.

12. Value to U.S.-Partner Country Relations: Proposed projects should receive positive assessments by USIA's geographic area desk and overseas officers of program need, potential impact, and significance in the partner country(ies).

Notice

The terms and conditions published in this RFP are binding and may not be modified by any USIA representative. Explanatory information provided by the Agency that contradicts published language will not be binding. Issuance of the RFP does not constitute an award commitment on the part of the Government. The Agency reserves the right to reduce, revise, or increase proposal budgets in accordance with the needs of the program and the availability of funds. Final awards cannot be made until funds have been appropriated by Congress, allocated and committed through internal USIA procedures.

Notification

All applicants will be notified of the results of the review process on or about

April 12, 1996. Awards made will be subject to periodic reporting and evaluation requirements.

Dated: September 1, 1995.

Dell Pendergrast,

Deputy Associate Director, Educational and Cultural Affairs.

BILLING CODE 8230-01-M

Meeting of the Cultural Property Advisory Committee

SUMMARY: The Cultural Property Advisory Committee will meet on September 13 and 14, 1995, in Santa Fe, New Mexico. The sessions on September 13 will be held in the Meem Auditorium, Museum of Indian Arts and Culture, 710 Camino Lego, Santa Fe, from approximately 9:30 a.m. to 5 p.m. The agenda will include discussions concerning public awareness, expanding institutional dialogue on the protection of cultural property, and developments in museum ethics. There will also be a presentation on an initiative about "Protecting Cultural Objects Through International Documentation Standards." Technological developments in law enforcement will also be addressed. The September 13 portion of the meeting will be open to the public. Due to limited space, persons wishing to attend must call (202) 619–6612 no later than 4 p.m. (EDST), September 12, 1995. Only persons who have telephoned in advance will be permitted in the meeting room. The meeting on September 14 will be held in the Board Room of the School of American Research, 660 Garcia St. The entire meeting held on September 14 will be closed to the public pursuant to 5 U.S.C. 552b(c)(9)(B) and 19 U.S.C. 2605(h). The agenda will include the review of cultural property import restrictions currently in place under the Convention on Cultural Property Implementation Act (19 U.S.C. 2601 et. al., P.L. 97–446) and deliberations concerning internal Committee and agency operations.

Dated: August 31, 1995.

Penn Kemble,

Acting Director, United States Information Agency.

Determination To Close; The Entire Meeting of the Cultural Property Advisory Committee; September 14, 1995

In accordance with 5 U.S.C. 552b(c)(9)(B), and 19 U.S.C. 2605(h), I hereby determine that the entire meeting of the Cultural Property Advisory Committee on September 14, 1995, which is devoted (1) to review of the effectiveness of import restrictions in place for Peru, Guatemala, Bolivia, El Salvador and Mali; and (2) to a discussion of internal operating procedures and a review of statutory interpretations may be closed to the public.

Dated: August 31, 1995.

Penn Kemble,

Acting Director, United States Information Agency.

BILLING CODE 8230-01-M

DEPARTMENT OF VETERANS AFFAIRS

Medical Research Service Merit Review Committee; Notice of Meetings

The Department of Veterans Affairs gives notice under the Federal Advisory Committee Act, 5 U.S.C. App., of the following meetings to be held from 8 a.m. to 5 p.m. at the Holiday Inn Central, 1501 Rhode Island Avenue, NW., Washington, DC:

Subcommittee for	Date
Alcoholism and Drug Dependence.	September 21 and 22, 1995.
Hematology	September 21 and 22, 1995.
Nephrology	September 26 and 27, 1995.
Respiration	September 27 and 28, 1995.
General Medical Science.	September 29 and 30, 1995.
Surgery	September 30 and October 1, 1995.
Cardiovascular	October 2 and 3, 1995.
Endocrinology	October 9 and 10, 1995.
Mental Health and Behavioral Sciences.	October 11 and 12, 1995.
Aging and Clinical Geriatrics.	October 12 and 13, 1995.
Infectious Diseases	October 16 and 17, 1995.
Neurobiology	October 16 and 17, 1995.
Immunology	October 19 and 20, 1995.
Oncology	October 19 and 20, 1995.
Gastroenterology	October 23 and 24, 1995.
Medical Research Service Merit Review Committee.	December 5, 1995.

These meetings will be for the purpose of evaluating the scientific merit of research conducted in each speciality by Department of Veterans Affairs (VA) investigators working in VA Medical Centers and Clinics.

These meetings will be open to the public up to the seating capacity of the rooms at the start of each meeting to discuss the general status of the program. All of the Merit Review Subcommittee meetings will be closed to the public after approximately one hour from the start for the review, discussion, and evaluation of initial and renewal projects.

The closed portion of the meeting involves: discussion, examination, reference to, and oral review of site visits, staff and consultant critiques of research protocols and similar documents. During this portion of the meeting, discussion and recommendations will deal with qualifications of personnel conducting the studies, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy, as well as research information, the premature disclosure of which would be likely to significantly frustrate implementation of proposed agency action regarding such research projects. As provided by subsection 10(d) of Public Law 92–463, as amended by Public Law 94–409, closing portions of these meetings is in accordance with 5 U.S.C., 552b(c)(6) and (9)(B). Because of the limited seating capacity of the rooms, those who plan to attend should contact Dr. LeRoy Frey, Chief, Program Review Division, Medical Research Service, Department of Veterans Affairs, Washington, DC, (202) 565–5942, at least five days prior to each meeting. Minutes of the meetings and rosters of the members of the Subcommittees may be obtained from this source.

Dated: August 31, 1995.

By direction of the Secretary.

Heyward Bannister,

Committee Management Officer.

[FR Doc. 95–22312 Filed 9–6–95; 8:45 am]

Sunshine Act Meetings

Federal Register
Vol. 60, No. 173
Thursday, September 7, 1995

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

FEDERAL ELECTION COMMISSION

DATE AND TIME: Tuesday, September 12, 1995 at 10:00 a.m.

PLACE: 999 E Street, N.W., Washington, D.C.

STATUS: This Meeting Will Be Closed to the Public.

ITEMS TO BE DISCUSSED:

Compliance matters pursuant to 2 U.S.C. § 437g
Audits conducted pursuant to 2 U.S.C. § 437g, § 438(b), and Title 26, U.S.C.
Matters concerning participation in civil actions or proceedings or arbitration
Internal personnel rules and procedures or matters affecting a particular employee

DATE AND TIME: Thursday, September 14, 1995 at 10:00 a.m.

PLACE: 999 E Street, N.W., Washington, D.C. (Ninth Floor.)

STATUS: This Meeting Will Be Open to the Public.

ITEMS TO BE DISCUSSED:

Correction and Approval of Minutes
Advisory Opinion 1995–29: David W. Syme,Treasurer, Christopher Cox Congressional Committee
Advisory Opinion 1995–30: Craig Snyder, Deputy Chairman, Arlen Specter, 96
Regulatons:
  MCFL Regulations: Revised Rules on Facilitation, Candidate Appearances, Endorsements, Voter Guides and Meeting Rooms
  Draft Final Rules and Accompanying Explanation and Justification on Amendments to the Communications Disclaimer Requirements (11 CFR 110.11)
Administrative Matters

PERSON TO CONTACT FOR INFORMATION: Mr. Ron Harris, Press Officer, Telephone: (202) 219–4155.

Marjorie W. Emmons,

Secretary of the Commission.

SECURITIES AND EXCHANGE COMMISSION

Agency Meeting

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94–409, that the Securities and Exchange Commission will hold the following meeting during the week of September 4, 1995.

A closed meeting will be held on Friday, September 8, 1995, at 10 a.m.

Commissioners, Counsel to the Commissioners, the Secretary to the Commission, and recording secretaries will attend the closed meetings. Certain staff members who have an interest in the matters may also be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, one or more of the exemptions set forth in 5 U.S.C. 552b(c) (4), (8), (9)(A) and (10) and 17 CFR 200.402(a) (4), (8), (9)(i) and (10), permit consideration of the scheduled matters at the closed meeting.

Commissioner Wallman, as duty officer, voted to consider the items listed for the closed meeting in a closed session.

The subject matter of the closed meeting scheduled for Friday, September 8, 1995, at 10 a.m., will be:

Institution of administrative proceedings of an enforcement nature.
Settlement of administrative proceedings of an enforcement nature.
Institution of injunctive actions.
Settlement of injunctive actions.
Formal order of investigation.
Opinions.

At times, changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: The Office of the Secretary (202) 942–7070.

Dated: September 1, 1995.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

federal register

Thursday
September 7, 1995

Part II

Environmental Protection Agency

40 CFR Parts 280 and 281

Underground Storage Tanks—Lender Liability; Final Rule

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 280 and 281

[FRL–5292–1]

RIN 2050–AD67

Underground Storage Tanks—Lender Liability

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is issuing this rule under the Resource Conservation and Recovery Act (RCRA), Subtitle I—Regulation of Underground Storage Tanks. This rule limits the regulatory obligations of lending institutions and other persons who hold a security interest in a petroleum underground storage tank (UST) or in real estate containing a petroleum underground storage tank, or that acquire title or deed to a petroleum UST or facility or property on which an UST is located. This final rule specifies conditions under which these "security interest holders" may be exempted from the RCRA Subtitle I corrective action, technical, and financial responsibility regulatory requirements that apply to an UST owner and operator. This rule should result in additional capital availability for UST owners, many of whom are small businesses, and will assist them in meeting environmental requirements by improving their facilities.

EFFECTIVE DATE: This rule is effective December 6, 1995.

ADDRESSES: The official record for this rulemaking, Docket Number UST 3–18, is located in the UST Docket, room M2616 of the U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC. The docket is open from 9 a.m. to 4 p.m., Monday through Friday, excluding Federal holidays. Docket materials, including a comprehensive document containing EPA's response to comments received on the proposed rule, may be reviewed by appointment by calling (202) 260–9720. Copies of docket materials may be made at a cost of $0.15 per page. The mailing address is U.S. Environmental Protection Agency, OUST Docket (5305), 401 M Street, SW., Washington, DC 20460. Please note that EPA is planning to relocate the UST Docket to Arlington, VA during September 1995. You may call (202) 260–9720 for up-to-date information on access to the docket.

FOR FURTHER INFORMATION CONTACT: For further information about this rule, contact the RCRA/Superfund Hotline, U.S. Environmental Protection Agency, Washington, DC. 20460, (800) 424–9346 (toll-free) or (703) 412–9810 (local). For the hearing impaired, the number is (800) 553–7672 (toll-free), or (703) 412–3323 (local). For technical information on this rule, contact John Heffelfinger in the EPA Office of Underground Storage Tanks at (703) 308–8881.

SUPPLEMENTARY INFORMATION: The contents of today's preamble are listed in the following outline:

I. Background
II. Description of the UST Regulatory Program
  A. UST Technical Standards
  1. Leak Prevention
  2. Leak Detection
  3. Release Reporting
  4. Closure
  5. Notification, Reporting, and Recordkeeping
  B. Corrective Action Requirements
  C. Financial Responsibility Requirements
  D. State Program Approval Regulations
  E. Scope of the UST Program
III. The UST Security Interest Exemption and Intent of Today's Rule
  A. Overview
  B. Legal Authority
  C. Real Property Used as Collateral
  D. Abandoned Tanks
  E. Liability of a Holder as an Owner of an Underground Storage Tank or Underground Storage Tank System
  1. Petroleum Production, Refining, and Marketing
  2. Indicia of Ownership
  3. Primarily to Protect a Security Interest
  4. "Holder" of Ownership Indicia
  5. Participating in Management
  F. Liability of a Holder as an Operator of an Underground Storage Tank or Underground Storage Tank System
  1. Pre-Foreclosure Operation
  2. Post-Foreclosure Operation
  3. Release Reporting Requirements Following Foreclosure
  G. Financial Responsibility Requirements
  H. State Implementation and State Program Approval
  I. Holders' Access to State Funds
  J. Outstanding Loans and Loans in Foreclosure Upon the Effective Date of the Rule
IV. Issues Outside the Scope of this Rule
  A. Petroleum Producers, Refiners, and Marketers

V. Economic Analysis
VI. Regulatory Assessment Requirements
  A. Executive Order 12866
  B. Regulatory Flexibility Act
  C. Paperwork Reduction Act
  D. Unfunded Mandates Reform Act

I. Background

EPA is establishing regulatory criteria specifying which RCRA Subtitle I requirements are applicable to a secured creditor. Section 9003(h)(9) of RCRA exempts from the definition of "owner," for purposes of § 9003(h)—EPA Response Program for Petroleum, those persons who, without participating in the management of the UST or UST system, and who are not otherwise engaged in petroleum production, refining, and marketing, maintain indicia of ownership in an UST or UST system primarily to protect a security interest. Those most affected by this "security interest exemption" include private lending institutions or other persons that provide loans secured by real estate containing an UST or UST system, or that acquire title to, or other indicia of ownership in, a contaminated UST or UST system.[1] However, the security interest exemption is not limited solely to lending institutions; it potentially applies to any person whose indicia of ownership in an UST or UST system is maintained primarily to protect a security interest.

The RCRA Subtitle I security interest exemption affects not only secured creditors but also UST and UST system owners who seek capital through the private lending market. Today's rule provides a regulatory exemption from the federal UST regulatory requirements for those persons who provide secured financing to UST and UST system owners. EPA expects this rule, in conjunction with the statutory exemption in § 9003(h)(9), to encourage the extension of credit to credit-worthy UST owners. Until now, EPA believes that concerns over environmental liability have made a significant number of lenders reluctant to make loans to otherwise credit-worthy owners and operators of USTs. The free flow of credit to UST owners (many of whom are small entities that may rely on secured financing mechanisms for capital) is expected to assist UST owners in meeting their obligations to upgrade, maintain, or otherwise comply with RCRA Subtitle I and other environmental requirements. Conversely, the lack of such capital may adversely affect the ability of an UST owner to meet its obligations under Subtitle I, with concomitant adverse environmental impacts from USTs and UST systems that are out of compliance due to the lack of financing to make the necessary improvements.

---

[1] Under the laws of some states, an interest in real property may include an interest in USTs or UST systems located on that property. See Sunnybrook Realty Co. Inc. v. State of New York, Kesbec, Inc. v. State of New York, Claim Nos. 32844, 33125, 15 Misc. 2d 739; 182 N.Y.S. 2d 983. Of course, the loan documents may specifically include or exclude USTs as collateral securing the obligation.

The Agency is also concerned that if otherwise credit-worthy UST owners and operators are unable to obtain financing to perform leak detection tests, or to upgrade or replace deficient tanks, the market for UST equipment could be adversely affected, thereby limiting the availability and/or affecting the cost of such equipment. In addition, a lack of adequate capital could produce a ripple effect which would cut across other portions of the UST-related industrial sector for equipment and services. For example, based on letters received from UST equipment manufacturers, EPA believes that this sector has suffered as a direct result of the capital squeeze on UST owners and operators. The Agency is further concerned that many UST equipment manufacturers may find it increasingly difficult to sustain their production of UST equipment. Unnecessary constrictions on the free flow of capital for UST improvements to meet regulatory requirements could force companies to abandon their production of UST equipment or to close altogether, and it may have adverse impacts on the environment by inhibiting future investment in or development of new UST technological innovations.

The preamble to this rule is structured as follows: The following section briefly describes the UST program. This section is followed by a discussion of the rule, which includes a description of the various options lenders may exercise both pre- and post-foreclosure with respect to regulatory compliance for a secured UST or UST system. The rule concludes with regulatory text.

II. Description of the UST Regulatory Program

Based on the Agency's study of the banking community's lending practices and discussions with representatives of both lenders and borrowers, EPA believes that the lending community in general is not particularly familiar with the UST statutory scheme and regulatory program. Because USTs and UST systems are likely to be used as collateral in securing loans to borrowers, the Agency believes that it is appropriate and useful to briefly describe the UST program in the preamble of this rule. The following discussion is general in nature and is intended to provide a framework for lenders or others to better understand the scope and intent of the program; it is not intended to be a substitute for the regulations themselves.

Under the Hazardous and Solid Waste Amendments of 1984, Congress responded to the increasing threat to groundwater posed by leaking underground storage tanks by adding Subtitle I to the Resource Conservation and Recovery Act. Subtitle I required EPA to develop a comprehensive regulatory program for USTs storing petroleum or hazardous substances. Congress directed the Agency to publish regulations that would require owners and operators of new tanks and tanks already in the ground to prevent and detect leaks, cleanup leaks, and demonstrate that they are financially capable of cleaning up leaks and compensating third parties for resulting damages.

EPA's UST regulations, 40 CFR Parts 280 and 281, apply to any person who owns or operates an UST or UST system. The term "owner" is defined in the statute generally to mean any person who owns an UST used for the storage, use, or dispensing of substances regulated under Subtitle I of RCRA (which includes both petroleum and hazardous substances) (§ 9001(3), 42 USC 6991(3)). Owners are responsible for complying with the "technical requirements," "financial responsibility requirements," and "corrective action requirements" specified in the statute and regulations. These requirements are intended to ensure that USTs are managed and maintained safely, so that they will not leak or otherwise cause harm to human health and the environment. In addition, should a leak occur, the requirements provide that the owner is responsible for addressing the problem. These same requirements apply to any person who "operates" an UST system. The term "operator" is very broad and means "any person in control of, or having responsibility for, the daily operation of the underground storage tank" (§ 9001(4), 42 USC 6991(4)). As with owners, there may be more than one operator of a tank at a given time. Each owner and operator has obligations under the statute and regulations. In this respect, it is important to understand that a person may have obligations under Subtitle I either as an owner or as an operator, or both.

The following subsections describe briefly each of the major components of the UST regulatory program applicable to persons who own or operate USTs and UST systems.

A. UST Technical Standards

The technical standards of 40 CFR Part 280 referred to here include: Subpart B—UST systems: Design, Construction, Installation, and Notification (including performance standards for new UST systems, upgrading of existing UST systems, and notification requirements); Subpart C—General Operating Requirements (including spill and overfill control, corrosion protection, reporting and recordkeeping); Subpart D—Release Detection; § 280.50 (reporting of suspected releases) of Subpart E—Release Reporting, Investigation, and Confirmation; and Subpart G—Out of Service UST Systems (including temporary and permanent closure). These regulations impose obligations upon UST owners and operators, separate from the Subtitle I corrective action requirements discussed in Section II. B of this preamble.

1. Leak Prevention

Before EPA regulations were issued, most tanks were constructed of bare steel and were not equipped with release prevention or detection features. 40 CFR § 280.21 requires UST owners and operators to ensure that their tanks are protected against corrosion and equipped with devices that prevent spills and overfills no later than December 22, 1998. Tanks installed before December 22, 1988 must be replaced or upgraded by fitting them with corrosion protection and spill and overfill prevention devices to bring them up to new-tank standards. USTs installed after December 22, 1988 must be fiberglass-reinforced plastic, corrosion-protected steel, a composite of these materials, or determined by the implementing agency to be no less protective of human health and the environment, and must be designed, constructed, and installed in accordance with a code of practice developed by a nationally recognized association or independent testing laboratory. Piping installed after December 22, 1988 generally must be protected against corrosion in accordance with a national code of practice. All owners and operators must also ensure that releases due to spilling or overfilling do not occur during product transfer and that all steel systems with corrosion protection are maintained, inspected, and tested in accordance with § 280.31.

2. Leak Detection

In addition to meeting the leak prevention requirements, owners and operators of USTs must use a method listed in §§ 280.43 through 280.44 for detecting leaks from portions of both tanks and piping that routinely contain product. Deadlines for compliance with the leak detection requirements have been phased in based on the tank's age: The oldest tanks, which are most likely to leak, had the earliest compliance deadlines. Phase-in of the leak detection requirements was completed in 1993, and all UST systems should now be in compliance with these requirements.

3. Release Reporting

UST owners and operators must, in accordance with § 280.50, report to the implementing agency within 24 hours, or another reasonable time period specified by the implementing agency, the discovery of any released regulated UST substances, or any suspected release. Unusual operating conditions or monitoring results indicating a release must also be reported to the implementing agency.

4. Closure

Owners or operators who would like to take tanks out of operation must either temporarily or permanently close them in accordance with 40 CFR part 280 subpart G—Out-of-Service UST Systems and Closure. When UST systems are temporarily closed, owners and operators must continue operation and maintenance of corrosion protection and, unless all USTs have been emptied, release detection. If temporarily closed for three months or more, the UST system's vent lines must be left open and functioning, and all other lines, pumps, manways, and ancillary equipment must be capped and secured. After 12 months, tanks that do not meet either the performance standards for new UST systems or the upgrading requirements (excluding spill and overfill device requirements) must be permanently closed, unless a site assessment is performed by the owner or operator and an extension is obtained from the implementing agency. To close a tank permanently, an owner or operator generally must: Notify the regulatory authority 30 days before closing (or another reasonable time period determined by the implementing agency); determine if the tank has leaked and, if so, take appropriate notification and corrective action; empty and clean the UST; and either remove the UST from the ground or leave it in the ground filled with an inert, solid material.

5. Notification, Reporting, and Recordkeeping

UST owners who bring an UST system into use after May 8, 1986 must notify state or local authorities of the existence of the UST and certify compliance with certain technical and other requirements, as specified in § 280.22. Owners and operators must also notify the implementing agency at least 30 days (or another reasonable time period determined by the implementing agency) prior to the permanent closure of an UST. In addition, owners and operators must keep records of testing results for the cathodic protection system, if one is used; leak detection performance and upkeep; repairs; and site assessment results at permanent closure (which must be kept for at least three years).

B. Corrective Action Requirements

Owners and operators of UST systems containing petroleum or hazardous substances must investigate, confirm, and respond to confirmed releases, as specified in §§ 280.51 through 280.67. These requirements include, where appropriate: Performing a release investigation when a release is suspected or to determine if the UST system is the source of an off-site impact (investigation and confirmation steps include conducting tests to determine if a leak exists in the UST or UST system and conducting a site check if tests indicate that a leak does not exist but contamination is present); notifying the appropriate agencies of the release within a specified period of time; taking immediate action to prevent any further release (such as removing product from the UST system); containing and immediately cleaning up spills or overfills; monitoring and preventing the spread of contamination into the soil and/or groundwater; assembling detailed information about the site and the nature of the release; removing free product to the maximum extent practicable; investigating soil and groundwater contamination; and, in some cases, outlining and implementing a detailed corrective action plan for remediation.

C. Financial Responsibility Requirements

The financial responsibility regulations (40 CFR part 280 subpart H) require that UST owners or operators demonstrate the ability to pay the costs of corrective action and to compensate third parties for injuries or damages resulting from the release of petroleum from USTs. The regulations require all owners or operators of petroleum USTs to maintain an annual aggregate of financial assurance of $1 million or $2 million, depending on the number of USTs owned. Financial assurance options available to owners and operators include: Purchasing commercial environmental impairment liability insurance; demonstrating self-insurance; obtaining guarantees, surety bonds, or letters of credit; placing the required amount into a trust fund administered by a third party; or relying on coverage provided by a state assurance fund.

D. State Program Approval Regulations

Subtitle I of RCRA allows state UST programs approved by EPA to operate in lieu of the federal program. EPA's state program approval regulations under 40 CFR Part 281 set standards for state programs to meet.

E. Scope of the UST Program

This rule applies only to petroleum underground storage tanks that are subject to Subtitle I of RCRA. There are certain types or classes of tanks that are excluded from Subtitle I of RCRA. Therefore, the provisions of this rule do not apply to holders of security interests in excluded tanks. Among those tanks specifically excluded by statute are: Farm and residential tanks of 1,100 gallons or less capacity used for storing motor fuel for noncommercial purposes; tanks used for storing heating oil for consumptive use on the premises where stored; tanks stored on or above the floor of underground areas (such as basements or tunnels); septic tanks; systems for collecting stormwater or wastewater; and flow-through process tanks (42 U.S.C. § 6991(1)).

III. The UST Security Interest Exemption and Intent of Today's Rule

A. Overview

Today's regulation addresses the requirements of Subtitle I that are applicable to a person who holds a security interest in a petroleum UST or UST system, or in a facility or property on which a petroleum UST or UST system is located, from the time that the person extends the credit up through and including foreclosure and re-sale. A holder of a security interest who satisfies the conditions in this rule will not be considered either an "owner" or an "operator" of an underground storage tank for purposes of compliance with Subtitle I regulatory requirements.

The security interest exemption under Subtitle I, § 9003(h)(9) of RCRA, 42 U.S.C. § 6991b(h)(9), on which this rule is based, provides:

> As used in this subsection, the term "owner" does not include any person who, without participating in the management of an underground storage tank and otherwise not engaged in petroleum production, refining, and marketing, holds indicia of ownership primarily to protect the owner's security interest in the tank.

While limited legislative history exists concerning the RCRA Subtitle I security interest exemption, EPA believes this provision is intended to provide protection from liability for a

person whose only connection with a tank is as the holder of a security interest; *i.e.*, a bank or other creditor who has made a loan to a borrower (commonly the tank's owner) and who has in return secured the loan by taking a security interest in the tank or in the property on which the tank is located. No guidance or other indication is available concerning the types of activities that Congress considered to be consistent with the Subtitle I security interest exemption, or about the types of activities that Congress considered to be impermissible participation in an UST or UST system's management.

The statutory exemption explicitly addresses liability for corrective action at petroleum UST-contaminated sites. Other portions of the statute and regulations applicable to an "owner" of a tank include 40 CFR part 280 subparts B, C, D, E (§ 280.50 only), and G (hereafter referred to as the "UST technical standards" for purposes of this rule), and Subpart H—Financial Responsibility. The statute is silent with respect to a holder's liability for these other requirements solely as a consequence of having ownership rights in a tank primarily to protect a security interest. The Agency does not believe that these limited ownership rights rise to the level of full "ownership" sufficient to make the holder an "owner" of the tank, as that term is used in § 9001(3) of RCRA Subtitle I. Therefore, EPA is providing, under its broad rulemaking authority in § 9003, that a holder who meets the criteria specified in this rule (i.e., whose only connection with the tank is as the *bona fide* holder of a security interest in a petroleum UST or UST system or in a facility or property on which a petroleum UST or UST system is located) is not subject to the UST technical standards, corrective action, and financial responsibility requirements otherwise applicable to a tank owner. EPA believes that this is both appropriate under the Agency's rulemaking authority and consistent with Congressional intent in providing the § 9003(h)(9) exemption for those persons who provide only financing to owners of a tank. Accordingly, a qualifying holder will not be required to comply with the full panoply of EPA regulations implementing Subtitle I that apply to tank owners prior to or following foreclosure, provided that the requirements of today's rule are satisfied.

With respect to a holder's potential to be an "operator" of a tank prior to foreclosure, consistent with the provisions of this rule, the holder typically will not be involved in the day-to-day operations of the tank, and will therefore not incur liability as an "operator."[2] By foreclosing, however, the holder takes affirmative action with respect to the tank and displaces the borrower; therefore, by necessity, the holder has taken "control of * * * [and] responsibility for * * *" the tank, and therefore could be considered a tank operator under the definition at 42 USC 6991(4). However, under today's rule, a foreclosing holder can avoid regulation as an UST "operator" in certain circumstances. In general, a holder will not be considered an UST "operator" if petroleum is not added to, stored in, or dispensed from the UST. In order to satisfy this condition, this rule allows a holder to empty the UST within a certain period of time after foreclosure, and undertake specified minimally burdensome and environmentally protective actions to secure and protect the UST or UST system. On the other hand, a holder who operates a tank by, for example, storing or dispensing petroleum following foreclosure will be subject to the full range of requirements applicable to any person operating a tank (including corrective action requirements).

In developing today's rule, EPA examined the potential obligations under Subtitle I of government entities that act as conservators or receivers of assets acquired from failed lending and depository institutions, such as the Federal Deposit Insurance Corporation (FDIC) and Resolution Trust Corporation (RTC). Where a government entity or its designee is acting as a conservator or receiver, EPA interprets the security interest exemption RCRA Subtitle I section 9003(h)(9) to preclude the imposition of the insolvent estate's liabilities against the government entity acting as the conservator or receiver, and considers the liabilities of the institution being administered to be limited to the institution's assets. The situation of a conservator or receiver of a failed or insolvent lending institution is analogous to that of a trustee (particularly a trustee in bankruptcy) that is administering an insolvent's estate and, in accordance with those principles, the insolvent's liabilities generally are to be satisfied from the estate being administered and not from the assets of the conservator or receiver. Therefore, satisfaction of an estate's debts or liabilities would not reach the general assets of the FDIC, the RTC, those of any other government entity acting in a similar capacity, or those of a private person acting on behalf of the conservator or receiver. (The broader issue of trustee and fiduciary liability is discussed in section IV.C. of this preamble.)

B. Legal Authority

EPA is promulgating today's rule to close a gap in the Subtitle I security interest exemption that must be addressed in order to provide holders with certainty regarding their responsibility for UST regulatory compliance. While the statutory exemption explicitly applies to holders who become owners of underground storage tanks, the exemption does not address holders in the capacity of an UST operator. The Agency believes that without promulgating a rule under EPA's broad grant of rulemaking authority applying the protection found in the statutory security interest exemption to holders as operators as well as owners, the statutory exemption may be rendered virtually meaningless, since an owner of an UST is also typically an UST operator. EPA does not believe that Congress, in creating section 9003(h)(9), intended for an otherwise exempt holder of a security interest to nonetheless fall subject to UST regulatory obligations as an operator. As such, EPA's exercise of its rulemaking authority in this rule is appropriate and, perhaps, needed to fully effectuate the purpose of the statute.

In the proposed rule, EPA cited the legal authority that provides the basis for development of the UST lender liability rule—section 9003(b), 42 U.S.C. 6991b(b) of RCRA Subtitle I, and briefly explained the difference between the statutory authority supplied under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) for the vacated Superfund lender liability rule and the authority supplied under RCRA Subtitle I for an UST lender liability rule. While several commenters stated their belief that EPA has sufficient authority under RCRA to promulgate a regulation regarding UST lender liability, some commenters also expressed concern that the rule would be challenged in light of the outcome of litigation on the CERCLA lender liability rule.[3]

---

[2] Of course, a lender which has control of or responsibility for the daily operation of a tank would be an "operator" under § 9001(4), and therefore subject to all requirements applicable to an operator of a tank, including corrective action. Similarly, such acts may also constitute "participation in the management" of the tank, which would void the § 9003(h)(9) exemption and obligate the lender to comply with these same technical, financial, and corrective action requirements as an owner.

[3] On Feb. 4, 1994, the U.S. Court of Appeals for the D.C. Circuit vacated EPA's 1992 rule on lender

EPA believes that the authority granted in section 9003 of Subtitle I clearly provides the Agency with broad rulemaking authority, as well as explicit rulemaking authority to, in its discretion, exempt certain classes of owners and operators (i.e., holders of security interests as described in this rule) from the UST technical standards, corrective action requirements, and financial responsibility requirements. Section 9003 expressly directs the Agency to "promulgate release detection, prevention, and correction regulations applicable to all owners and operators of underground storage tanks, as may be necessary to protect human health and the environment." Section 9003(b) permits the Agency, in promulgating regulations under Subtitle I, to make distinctions in its UST regulations between types or classes of tanks, based upon, *inter alia*, "the technical capability of the owners and operators." Because security interest holders are typically not as a general matter engaged in the operation and maintenance of USTs (and thus do not possess the technical capacity of most UST owners and operators), EPA does not believe that requiring them to comply with highly detailed technical requirements is appropriate where requiring them to do so is not necessary for protection of human health and the environment. Furthermore, the Agency believes an exemption from these regulatory requirements is appropriate in the context of this rule, where an exemption will serve, albeit indirectly, to advance the goals of Subtitle I by making credit more available and thus aiding in the implementation of tank upgrading and replacement requirements.

However, this authority is not open-ended, as section 9003(a) requires EPA to promulgate regulations that are protective of human health and the environment. Without compromising the level of protectiveness established by the UST program, EPA previously relied on its section 9003(b) authority when it excluded a group of owners and operators from RCRA Subtitle I requirements in the final Financial Responsibility Rule (53 FR 43322, Oct. 26, 1988). (In relevant part, the preamble to the final Financial Responsibility Rule states: "The Agency does not interpret the Congressional intent of Subtitle I to preclude exempting any class of USTs from otherwise applicable requirements when the Agency has determined that such requirements are not necessary to protect human health or the environment.") That rule exempted states and the federal government from the UST financial responsibility requirements since those entities were, as a class, able to satisfy the purpose of the financial responsibility requirements in the absence of regulation.

Similarly, for purposes of this rule, EPA believes that it is reasonable, in light of the purposes behind this rule, to exempt a holder from RCRA Subtitle I technical standards, corrective action requirements, and financial responsibility requirements as an operator if its USTs are empty and secure (as explained later in today's rule) or if the holder chooses to also engage in environmentally beneficial activities (as discussed later in this preamble). Because of the eligibility conditions a holder must meet before enjoying this regulatory exemption, EPA's UST regulations will satisfy the statutory requirement that they be protective of human health and the environment.

C. Real Property Used as Collateral

A number of commenters pointed out that the proposed rule conveys the impression that under common commercial practice a security interest holder typically holds an UST or UST system as collateral for a loan obligation. These commenters went on to state that such an impression is incorrect. They maintained that in a typical lending relationship, the lender holds a security interest not in the UST or UST system, but rather in the real property on which the UST or UST system is located.

EPA recognizes that borrowers generally pledge real property as collateral rather than tanks, which are considered fixtures of real property under many state laws. While the Agency failed to refer to real property in its definition of the term, "holder," it specifically defined "security interest" as meaning "an interest in a petroleum UST or UST system or in the facility or property on which the UST or UST system is located, created or established for the purpose of securing a loan or other obligation." EPA acknowledges that the phrase, "UST or UST system or facility or property on which the UST or UST system is located," was not used consistently throughout the proposed rule. This was due in part to the way in which Subtitle I's requirements are structured—UST compliance responsibility rests with the owner or operator of the UST or UST system, not the property on which the UST or UST system is located. Therefore, when describing a holder's liability as an owner or operator under Subtitle I requirements, EPA is obliged to address that liability in terms of how it relates to the ownership or operation of the UST or UST system. Nevertheless, in order to maintain consistency with commercial practice and to clarify that the exemption applies to a holder's collateral in the real estate containing an UST, as well as to the UST itself, the Agency has applied the use of the term, "UST or UST system or facility or property on which the UST or UST system is located," throughout today's final rule, whenever appropriate.

D. Abandoned Tanks

A few commenters expressed concern about the effect that the rule would have upon the number of contaminated sites for which there might be no identifiable or financially capable liable party, which might increase the number of abandoned tanks that would have to be cleaned up with public funding. There are a number of reasons why EPA does not expect the rule to increase the number of abandoned tanks.

First, this regulation is intended to provide clarity and meaning to the existing federal statutory security interest exemption. The rule does not decrease the universe of regulated tanks from those currently regulated under Subtitle I. Further, the rule does not affect the legal obligations to comply with applicable Subtitle I requirements of a previous owner or operator who abandons a tank. Such previous UST owners and operators can be held liable for regulatory compliance or cost recovery under the Leaking Underground Storage Tank Trust Fund. Financial condition does not affect the liability of a tank owner or operator under Subtitle I.

Second, the rule is expected to help UST owners and operators acquire capital to keep their businesses healthy and in compliance with environmental requirements, and in the process, reduce the number of abandoned tanks and potential petroleum releases. Furthermore, the Agency believes that by expanding capital availability, this rule will encourage early compliance with the upcoming 1998 Subtitle I requirement regarding tank upgrading or

---

liability under CERCLA in Kelley, et al. v. EPA, No. 93–1312. The CERCLA rule interpreted a statutory exemption under CERCLA that is similar to that under RCRA Subtitle I. The Court held that "EPA lack[ed] statutory authority to restrict by regulation private rights of action arising under the statute * * *" Kelley, slip op. at 3. Whereas CERCLA contains a provision regarding private rights of action, there is no explicit provision for private rights of action contained in RCRA Subtitle I. Furthermore, § 9003 of Subtitle I expressly confers EPA a broad rulemaking authority; to the extent that the grants of rulemaking authority were not sufficiently explicit under CERCLA, such is not the case under RCRA Subtitle I.

---

replacement. UST owners who acquire capital to upgrade or replace old, corroded tanks earlier than 1998 greatly contribute to preventing further petroleum contamination.

While contemplating the effect this rule might have upon the number of abandoned tanks, the Agency also recognized that many holders currently abandon UST properties they hold as collateral rather than foreclosing on them and risking potential liability for cleanup costs. EPA believes that this rule will actually improve protection of human health and the environment by providing an incentive to holders who are interested in taking advantage of this regulatory exemption to empty any tanks they acquire through foreclosure, thus preventing future releases. As a result of the rule's increasing the number of holders who take advantage of the security interest exemption and subsequently extend more UST-related loans, EPA expects there to be fewer abandoned or so-called orphan tanks and fewer releases that might otherwise occur due to the lack of capital available for tank upgrading and replacement.

E. Liability of a Holder as an Owner of an Underground Storage Tank or Underground Storage Tank System

The following sections describe the key terms used in this rule. For the most part, these are also terms used in the § 9003(h)(9) security interest exemption. This section specifies the activities that are not "participating in the management" of a tank and which a holder may under today's rule, engage in consistent with Subtitle I regulatory requirements.

1. Petroleum Production, Refining, and Marketing

"Production of petroleum" includes, but is not limited to, activities involved in the production of crude oil or other forms of petroleum, as well as the production of petroleum products from purchased materials, either domestically or abroad. "Refining" includes the processes of cracking, distillation, separation, conversion, upgrading, and finishing of refined petroleum or petroleum products. "Marketing" includes the distribution, transfer, or sale of petroleum or petroleum products for wholesale or retail purposes. A holder who stores petroleum products in USTs for on-site consumption only, such as to provide heat to an office building or to refuel its own vehicles, is not considered to be engaged in petroleum production, refining, or marketing for the purposes of the UST regulatory program.

2. Indicia of Ownership

For purposes of this rule, "indicia of ownership" means ownership or evidence of an ownership interest in a petroleum UST or UST system, or in a facility or property on which a petroleum UST or UST system is located. This definition is not intended to limit or qualify type, quality, or quantity of ownership indicia that may be held by a person for the purpose of the regulatory exemption. The nature of the ownership interest may vary according to the type of secured transaction and the nature of the holder's relationship (such as that of a guarantor or surety). Accordingly, indicia of ownership may be evidence of any ownership interest or right to an UST or UST system, such as a security interest, an interest in a security interest, or any other interest in an UST or UST system. For purposes of this rule, examples of such indicia include, but are not limited to, a mortgage, deed of trust, or legal or equitable title obtained pursuant to foreclosure or its equivalents, a surety bond, guarantee of an obligation, or an assignment, lien, pledge, or other right to or form of encumbrance against a petroleum UST or UST system, or a facility or property on which a petroleum UST or UST system is located. Accordingly, it is not necessary for a person to hold actual title or a security interest in order to maintain some indicia or evidence of ownership in an UST or UST system.

3. Primarily To Protect a Security Interest

The term, "primarily to protect a security interest" as used in this regulation, means a holder's indicia of ownership are held primarily for the purpose of securing payment or performance of an obligation. EPA intends this phrase to require that the ownership interest be maintained primarily for the purpose of, or primarily in connection with, securing payment or performance of a loan or other obligation (a security interest), and not an interest in the UST or UST system or facility or property on which the UST or UST system is located held for some other reason.

A security interest may arise pursuant to a variety of statutory or common law financing transactions. While a security interest is ordinarily created by mutual consent, such as a secured transaction within the scope of Article 9 of the Uniform Commercial Code, there are other means by which a security interest may be created, some of which may or may not be the result of a consensual arrangement between the parties to the transaction. In general, a transaction that gives rise to a security interest within the ambit of this rule is one that provides the holder with recourse against the UST or UST system or facility or property on which the UST or UST system is located; the purpose of the interest is to secure the repayment of money, the performance of a duty, or of some other obligation. See generally J. White & R. Summers, Handbook on the Uniform Commercial Code § 22 (2d Ed. 1980); Restatement of Security (1941).

As a matter of general law, security interests may arise from transactions in which an interest in an UST or UST system is created or established for the purpose of securing a loan or other obligation, and includes mortgages, deeds of trust, liens, and title held pursuant to lease financing transactions. Security interests may also arise from transactions such as sale-and-leasebacks, conditional sales, installment sales, trust receipt transactions, certain assignments, factoring agreements or accounts receivable financing agreements, consignments, among others, provided that the transaction creates or establishes an interest in an UST or UST system for the purpose of securing a loan or other obligation.

Some commenters were confused by and requested clarification of the term "lease financing transaction in which the lessor does not select initially the leased property," as used is the rule. A "lease financing transaction" is a common financing transaction for equipment and other types of personal property, and is treated under this rule as a security interest. These are leases where the form of the transaction provides for the lessor to acquire title to the property for and at the discretion of the lessee. The lessor then recovers its loan (i.e., the purchase price of the property) through rental payments from the lessee and, in some cases, from the sale of the property to the lessee or a third party at the end of the lease. Thus, the lessee is the borrower and the lessor is the holder of a security interest in the property.

At the beginning of the lease financing transactions covered by this rule, the lessor does not initially select the leased property. Instead, this is done by the lessee or a third party. Further, during the initial lease or any re-lease, the lessor does not control the daily operation and maintenance of the property. The primary reason the lessor holds indicia of ownership in the property is to protect its security interest in the event that the debtor/lessee fails to pay off its obligation to the lessor. If a debtor/lessee defaults, a lessor may acquire the property through a variety of mechanisms, and is still considered to hold indicia of ownership under this rule provided that it complies with the other provisions of this rule.

In contrast to the preceding discussions, "indicia of ownership" held "primarily to protect [a] security interest" do not include evidence of interests in the nature of an investment in the UST or UST system or in the facility or property on which the UST or UST system is located, or an ownership interest held primarily for any reason other than as protection for a security interest. The person holding ownership indicia to protect a security interest may have additional, secondary reasons for maintaining the indicia in addition to protecting a security interest; maintaining indicia for reasons in addition to protecting a security interest may be consistent with the exemption and this rule. However, any such additional reasons must be secondary to protecting a security interest in the secured UST or UST system or in the facility or property on which the UST system is located. EPA recognizes that lending institutions have revenue interests in the loan transactions that create security interests; such revenue interests are not considered to be investment interests, but are considered secured transactions falling within the security interest regulatory exemption.

4. "Holder" of Ownership Indicia

A "holder" as used in this regulation is a person who maintains ownership indicia primarily to protect a security interest, however acquired or held. The term "holder" includes the initial holder (such as the loan originator) and any subsequent holder, such as a successor-in-interest, subsequent purchaser on the secondary market, loan guarantor, surety, or other person who maintains indicia of ownership primarily to protect a security interest. The term also includes any person acting on behalf of or for the benefit of the holder, such as a court-appointed receiver or a holder's agent, employee, or representative.

Finally, it should be noted that lending institutions, which typically hold a large number of security interests, may also act in some trustee, fiduciary, or other capacity with respect to an UST or UST system. However, this rule does not address circumstances in which a lending institution or any person acts as a trustee, or in a non-lending capacity, or has any interest in an UST or UST system other than as provided in this rule. Because this regulation, as well as the exemption in § 9003(h)(9), addresses only persons who maintain a "security interest," any discussion of persons with other interests or involvement in an UST or UST system is beyond the scope of this rule. Of course, a trustee or other fiduciary, or any other person who holds indicia of ownership in the UST or UST system primarily to protect a security interest, may fall within this security interest regulatory exemption.

5. Participating in Management

As used in this rule, "participation in management" means actual involvement in the management or control of decisionmaking related to the operational aspects or day-to-day operations of an UST or UST system by the holder. Participation in management does not include the mere capacity or unexercised right or ability to influence the operational aspects or day-to-day operations of an UST or UST system or facility or property on which an UST or UST system is located. For purposes of this rule, actual involvement in the operational aspects or day-to-day operation of the UST or UST system means use of the UST to contain petroleum, and includes the storage, filling, or dispensing of petroleum contained in an UST or UST system. For purposes of this rule, a holder performing the functions of a plant manager, operations manager, chief operating officer, chief executive officer, and the like, of the facility or business at which the UST is located is considered to be exercising management control or decisionmaking authority over the operational aspects of the UST or UST system and therefore, participating in management, unless the responsibilities for the position specifically exclude all UST operational responsibilities. Control over the operational aspects of management should not be confused, however, with those activities which constitute administrative or financial management, or involvement in environmental compliance activities or activities taken to protect human health and the environment. Involvement in administrative, financial management, or environmental compliance activities does not, by itself, constitute participation in management under this rule.

The proposed rule included a two-pronged general test of management participation that attempted to distinguish between the scope of general activities acceptable for a holder to undertake, and those activities that could be carved out purely as operational activities rather than other activities related to UST or UST system responsibilities. However, the Agency received a number of comments on the proposed rule indicating that the general test merely added confusion in determining whether or not a holder was engaging in management participation. Consequently, the general test has been omitted in this final rule. Instead, the Agency has concluded that management participation is best defined as actual involvement in the management or control of decisionmaking related to the operational aspects or day-to-day operations of the UST or UST system, and not the financial, administrative or environmental compliance aspects of the UST or UST system or facility or property on which the UST or UST system is located.

The following sections discuss and describe the specific activities of a holder that the rule defines as not being instances of participation in management by a person holding indicia of ownership primarily to protect a security interest in the UST or UST system or facility or property on which an UST or UST system is located. Therefore, conduct of these activities will not, by itself, void the exemption for holders of security interests provided under this rule.

It bears repeating, however, that the activities identified in this rule do not specify the only activities that may be undertaken by a holder without losing the protection of this security interest regulatory exemption, and one should not infer that activities not specifically mentioned in this rule are automatically considered evidence of participation in management—those must be addressed on a case-by-case basis, generally determined by whether or not the holder is involved in the management or control of decisionmaking related to the operational aspects or day-to-day operations of an UST or UST system.

a. Actions that are not participation in management. Participation in the following activities will not exclusively, in themselves, exceed the bounds of this regulatory exemption: Policing the loan; undertaking financial work out with a borrower where the obligation is in default or in threat of default; undertaking foreclosing and winding up operations (as described later in this preamble); or preparing for sale or liquidation of the UST or UST system or facility or property on which the UST or UST system is located. In addition, the holder is not considered to be participating in the management of the UST or UST system or facility or property on which the UST or UST system is located, by monitoring the

---

borrower's business; by requiring or conducting environmental compliance activities related to the UST technical standards or other federal, state or local environmental laws and regulations; by requiring or conducting on-site investigations, including site assessments, inspections, and audits, of the environmental condition of the UST or UST system or facility or property on which the UST or UST system is located or of the borrower's financial condition; by requiring or conducting UST or UST system corrective action in compliance with 40 CFR part 280 subpart F or applicable state requirements in those states which have been delegated authority by EPA to administer the UST program; by monitoring other aspects of the UST or UST system considered relevant or necessary by the holder; by requiring certification of financial information or compliance with applicable duties, laws, or regulations, or by requiring other similar actions. Such oversight and obligations of compliance imposed by the holder are not considered part of the management of an UST or UST system or facility or property on which the UST or UST system is located. Although such oversight and obligations may inform and perhaps strongly influence the borrower's management of an UST or UST system, the holder is not considered to be participating in management where the borrower continues to be in control of the day-to-day operations of the UST or UST system.

The following sections describe in more detail two areas of special interest to those who commented on the proposed rule regarding actions in which holders may engage without jeopardizing their security interest exemption.

(1) Administrative and Financial Management. Administrative and financial management activities may be engaged in by a holder in the course of managing a loan portfolio and do not exceed the boundaries of the security interest exemption. Such activities may include providing financial or other assistance, environmental investigations or monitoring of the borrower's business and collateral, engaging in "loan work out" activities, foreclosing on a secured UST or UST system or facility or property on which an UST or UST system is located, winding down operations following foreclosure, or divesting itself of the foreclosed-on property containing an UST or UST system.

(2) Actions Taken to Protect Human Health and the Environment. In the proposed rule, EPA included a separate discussion of voluntary environmental activities undertaken by a holder to protect human health and the environment. A number of commenters stated that this discussion conflicted in part with the discussion entitled "Participating in Management," thereby creating uncertainty regarding a holder's ability to conduct or to require a borrower to conduct site investigation and remediation activities, as well as leak prevention and leak detection activities. The "Participating in Management" section of the proposal's preamble contained information that simultaneously stated that environmental compliance activities would be considered evidence of participation in UST or UST system management, while describing several environmental compliance activities for which a lender could engage in without being considered to be participating in UST or UST system management. The Agency also stated in the proposal's preamble that lender actions which protect human health and the environment are appropriate to include within the scope of protected UST or UST system activities because of the special position and role played by holders in the Subtitle I program, and recognized by Congress in the UST security interest statutory exemption. Several commenters stated the importance of allowing security interest holders to undertake UST remediation to ensure that they can sell UST properties they acquire through foreclosure without jeopardizing protection from Subtitle I liability. Commenters stated that without such protection, many holders will remain reluctant to extend loans to UST owners and operators, undermining the intent of the statutory exemption. Several of these commenters asserted the advantage of allowing holders to take the lead in remediating contaminated sites, rather than waiting on state agencies with limited resources to conduct such cleanups. By directly undertaking such voluntary corrective actions, holders can more quickly eliminate threats to public safety, health, and the environment.

Thus, in order to clarify EPA's original intent to allow holders to voluntarily conduct site remediations as well as other environmentally beneficial activities on properties on which they hold a security interest, the Agency asserts that both environmental compliance activities and activities that are undertaken voluntarily to protect human health and the environment will not be considered evidence of participation in the management of an UST or UST system or facility or property on which an UST or UST system is located. A holder who undertakes these actions must do so in compliance with the applicable requirements in 40 CFR part 280 or applicable state requirements in those states that have been delegated authority by EPA to administer the UST program pursuant to 42 USC § 6991c and 40 CFR part 281.

The following list provides examples of those activities that a holder can engage in without exceeding the bounds of the UST security interest exemption—these are examples only and do not represent all allowable activities: release response and corrective action for UST systems, environmental site investigations, tank upgrading and replacement, leak detection, and maintenance of corrosion protection. These activities are not required of a holder as a condition for obtaining the security interest exemption as an UST "owner"; holders are allowed to participate in these activities without losing the protection of the exemption. Other activities that are not considered participation in management may be required of a holder as a condition for obtaining the security interest exemption as an UST "operator." These activities are discussed later in this preamble, and include: tank emptying, capping and securing lines, permanent or temporary closure of an UST or UST system, and release reporting.

b. Actions taken throughout the loan transaction process that are not participation in management. In the proposed rule, EPA described the major components of the loan transaction process, including elements of that process that occur both prior to and after foreclosure. Most of that discussion is included in this final rule as well, in order to provide clarity and guidance to those UST owners and operators and security interest holders interested in this rule.

(1) Actions at the inception of the loan or other transaction giving rise to a security interest. Actions undertaken by a holder prior to the inception of a transaction in which indicia of ownership are held primarily to protect a security interest are not considered evidence of participation in the management of the UST or UST system. Thus, consultation and negotiation concerning the structure and terms of the loan or other obligation, the payment of interest, the payment period, and specific or general financial or other advice, suggestions, counseling, guidance, or other actions at or prior to the time that indicia of ownership are

first held are not, for purposes of this rule, considered evidence of participation in the management of the UST or UST system or facility or property on which the UST or UST system is located. Activities that take place prior to holding indicia of ownership are not relevant for determining whether the holder has participated in the management of the UST or UST system after the time that the holder acquires indicia of ownership.

In addition to such pre-loan involvement, a holder may determine (whether for risk management or any other business purpose) to undertake or require an environmental investigation (which could include a site assessment, inspection, and/or audit) of an UST or UST system securing the loan or other obligation. Such environmental investigation may be undertaken by the holder, for example, or the holder may require one to be conducted by another party (such as the borrower) as a condition of the loan or other transaction. Neither RCRA Subtitle I nor this rule require that such an environmental investigation be undertaken to qualify for the security interest exemption, and the obligations of a holder seeking to avail itself of the exemption cannot be based on or affected by the holder's not conducting or not requiring an environmental investigation in connection with the security interest. Similarly, a holder is not engaged in management participation as a result of undertaking or requiring an environmental investigation, and nothing in this rule should be understood to discourage a holder from undertaking or requiring such an environmental investigation in circumstances deemed appropriate by the holder. Because lender-conducted or required investigations of a borrower's business or collateral are information-gathering in nature, such activities cannot be considered to be management participation by a holder.

In the event that a pre-loan environmental investigation of an UST or UST system reveals contamination, the holder may undertake any one of a variety of responses that it deems appropriate: For example, the holder may refuse to extend credit or to follow through with the transaction or instead maintain indicia of ownership in other, non-contaminated property as protection for the security interest. Alternatively, a holder may determine that the risk of default is sufficiently slight (or that the extent of contamination is minimal and does not significantly affect the value of the UST or UST system as collateral) to proceed to extend credit and maintain indicia of ownership in the UST or UST system. Additionally, the holder may require the borrower to report and clean up the contamination as a condition for extending the loan. Such activities are not considered participation in the management of the UST or UST system or facility or property on which the UST or UST system is located, and a holder that knowingly takes a security interest in contaminated collateral is not subject to compliance with the RCRA Subtitle I corrective action regulatory program on that basis.

(2) Policing the security interest or loan. A holder may undertake actions that are consistent with holding ownership indicia primarily to protect a security interest which include, but are not limited to, a requirement that the borrower clean up a release from the UST or UST system which may have occurred prior to or during the life of the loan or security interest (as described in the last section); a requirement of assurance of the borrower's compliance with applicable federal, state, and local environmental or other laws and regulations during the life of the loan or security interest; securing authority or permission for the holder to periodically or regularly monitor or inspect the UST or UST system or facility or property on which the UST or UST system is located, or the borrower's business or financial condition, or both; or to comply with legal requirements to which the holder is subject; or other requirements or conditions by which the holder is able to police adequately the loan or security interest, provided that the exercise by the holder of such other loan policing activities are not considered evidence of control over the operational aspects of UST or UST system or facility or property on which the UST or UST system is located.

The authority for the holder to take such actions may be contained in contractual (e.g., loan) documents or other relevant documents specifying requirements for financial, environmental, and other warranties, covenants, and representations or promises from the borrower. While the regulatory exemption in this rule requires that the actions undertaken by a holder in overseeing or managing the loan or other obligation be consistent with those of a person whose indicia of ownership in an UST or UST system (or facility or property on which an UST or UST system is located) is held primarily to protect a security interest, a holder is not expected to be an insurer or guarantor of environmental safety or quality at a secured UST or UST system. The inclusion of environmental warranties and covenants is not considered to be evidence of a holder's acting as an insurer or guarantor, and a finding of "management participation" cannot be premised on the existence of such terms or upon the holder's actions that ensure that the UST or UST system is managed in an environmentally sound manner. Since these actions are consistent with holding indicia of ownership primarily to protect a security interest, they are not considered to be participation in management in this rule.

(3) Loan work out. The holder may determine that actions need to be taken with respect to the UST or UST system to safeguard the security interest from loss. These actions may be necessary when, for example, a loan is in default or threat of default, and are commonly referred to as "loan work out" activities. "Loan work out" is largely an undefined term but is generally understood in the financial community to mean those activities undertaken to prevent, mitigate, or cure a default by the obligor or to preserve or prevent the diminution of the value of the security. Loan work out activities are recognized by EPA as a common lender undertaking and, as such, these actions will not take a holder outside of the scope of the security interest exemption provided that such actions do not include decisionmaking control over the day-to-day operation of the UST or UST system or facility or property on which the UST or UST system is located.

When the holder undertakes loan work out activities, provides financial or other advice, or similar support to a financially distressed borrower, the holder will remain within the scope of this security interest regulatory exemption only so long as the holder does not participate in management as defined herein under the section entitled "Participating in Management." Loan work out actions that are not evidence of "participation in management" include, but are not limited to: Restructuring or renegotiating the terms of the security interest; requiring payment of additional rent or interest; exercising forbearance with regard to the security interest; requiring or exercising rights pursuant to an assignment of accounts or other amounts owing to an obligor; requiring or exercising rights pursuant to an escrow agreement pertaining to amounts owing to an obligor; providing specific or general financial or other advice, suggestions, counseling, or guidance; and exercising any right or remedy the holder is entitled to by law or under any warranties, covenants, conditions,

representations, or promises from the borrower.

(4) Foreclosure. In order to secure performance of an obligation, a holder often must take possession of an UST or UST system or facility or property on which an UST or UST system is located, as a result of a borrower's business failure and the subsequent foreclosure of the real property used to secure that obligation. The foreclosure process often results in the holder's taking record title or deed to the UST or UST system or facility or property on which an UST or UST system is located. Financial institutions and others who hold security interest exemptions are thereby justifiably concerned about the risks inherent in acquiring liability for compliance with the RCRA Subtitle I requirements for underground storage tanks.

EPA received several comments regarding the foreclosure process and the use of the term "foreclosure or its equivalents" in the proposed rule to trigger the date upon which several conditional measures were proposed to begin. Several commenters explained the linear fashion in which the foreclosure process generally works, indicating that no specific date could be tied to the term "foreclosure" by itself. EPA recognizes that since this rule places several time-related conditions upon a holder to enable it to avoid liability as an UST "operator" under the security interest exemption, it is incumbent upon the Agency to select a precise definition of the term "foreclosure." On the other hand, as commenters suggested, there is no one best consistently used and practical step in the process that can be used as a date to define the end of the foreclosure process. EPA has taken all of these facts into consideration and determined that for purposes of this rule, "foreclosure" means that a legal, marketable or equitable title or deed has been issued, approved and recorded, and that the holder has obtained access to the UST, UST system, UST facility, and property on which the UST or UST system is located, provided that the holder acted diligently to acquire marketable title or deed and to gain access to the UST, UST system, facility and property on which the UST or UST system is located.

EPA acknowledges that the definition of "foreclosure" used in this rule describes only part of the process that is generally associated with the foreclosure process. In response to many comments, however, the concept of real property "access" has also been included in the definition. The definition used in this rule was selected to provide a point of reference for indicating the completion of the foreclosure process and point at which a holder could physically access any USTs or UST systems located on the property acquired through the foreclosure process.

Other components of the foreclosure process not referenced specifically in this rule's definition of foreclosure include: foreclosure judgment, foreclosure sale, purchase at foreclosure sale, acquisition or assignment of title in lieu of foreclosure, acquisition of a right to possession or title, or other agreement in settlement of the loan obligation, or any other formal or informal manner by which the holder acquires possession of the borrower's collateral for subsequent disposition in partial or full satisfaction of the underlying obligation. These actions associated with the foreclosure process are considered to fall within the scope of this regulatory exemption as necessary incidents to holding ownership indicia primarily to protect a security interest, so long as the holder's acquisition pursuant to foreclosure is reasonably necessary to ensure satisfaction or performance of the obligation, is temporary in nature, and occurs while the holder is actively seeking to sell or otherwise divest the foreclosed-on UST or UST system of facility or property on which the UST or UST system is located.

In general, under this rule, a foreclosing holder must, in order to maintain consistency with the security interest exemption, seek to sell or otherwise divest itself of foreclosed-on property in a reasonably expeditious manner using whatever commercially reasonable means are available or appropriate, taking all facts and circumstances into account. A holder cannot, under the terms of this rule, reject or refuse offers for the property that represent fair consideration for the asset and remain within the regulatory exemption. "Fair consideration," for purposes of this rule, is equivalent to or in excess of the sum of the outstanding principal (or comparable amount in the case of a lease that constitutes a security interest) owed to the holder immediately preceding the acquisition of full title (or in the case of a lease financing transaction, possession of an UST or UST system or facility or property on which an UST or UST system is located) pursuant to foreclosure, plus any unpaid interest, rent, or penalties (whether arising before or after foreclosure). "Fair consideration" also includes all reasonable and necessary costs, debts, fees or other charges incurred by the holder incident to work out, foreclosure, retention, preserving, protecting, and preparing the UST or UST system or facility or property on which the UST or UST system is located, prior to sale, re-lease pursuant to a lease financing transaction (whether by a new lease financing transaction or substitution of the lessee) or other disposition, plus environmental compliance costs (such as tank emptying, upgrading, replacement, and removal, as well as site assessment and corrective action costs); less any amounts received by the holder in connection with any partial disposition of the property and any amounts paid by the borrower subsequent to the acquisition of full title (or possessions in the case of an UST or UST system subject to a lease financing transaction) pursuant to foreclosure. A holder that outbids or refuses offers from parties offering fair consideration for the property establishes that the property is no longer being held primarily to protect a security interest. The terms of the bid are relevant for this purpose, and a holder is not required to accept offers that would require it to breach duties owed to other holders, the borrower, or other persons with interests in the property that are owed a legal duty. In addition, [illegible] term "fair consideration" [illegible] all cash offer, which is inten[illegible] [illegible]re that this rule would not [illegible] holder to accept a bid that contains unacceptable conditions, such as requirements for indemnification agreements, non-cash offers, "bundled" offers, etc. This provision should not be read to require that a holder may accept only cash offers, however; a holder is always free to accept any offer satisfactory to the holder. The exact requirement that would be imposed by this regulation is that a holder may not reject a cash offer of fair consideration for the foreclosed-on property. If it does, or if it outbids others offering fair consideration, then the holder would, under this rule, be considered to be an owner of the UST or UST system or facility or property on which the UST or UST system is located in the same manner as any other purchaser.

This rule's provisions defining "fair consideration" and specifying when the foreclosing holder may reject or outbid offers for the property were formulated to reflect the amount that the holder may bid at the foreclosure sale, or not reject during the foreclosure sale or thereafter, in order to recover on its loan or other obligation. In addition, there may be multiple security interests in a borrower's property held by secured creditors, which the definition of "fair consideration" must account for. Therefore, for a senior creditor, the term "fair consideration" means a cash amount that represents a value equal to or greater than the outstanding obligation owed to the holder (including the fees, penalties, and other charges incurred by the holder in connection with the property). "Fair consideration" further indicates that the amount that will recover the holder's "security interest" in the property may vary depending on the seniority of the loan or other obligation that is being foreclosed upon. Specifically, a junior creditor may be required to outbid senior creditors in order to recover the value of its loan or other obligation. The definition of fair consideration therefore distinguishes between what junior or senior creditors may bid or not reject for purposes of maintaining the exemption. In addition, in order to avoid liability under law (for example, to the borrower), the foreclosing holder may be required to seek an amount at the foreclosure sale that is greater than the outstanding obligation owed to the foreclosing holder, or to sell the property in a different manner; therefore, this rule does not require a holder to accept an offer of "fair consideration" if to do so would subject the holder to liability under federal or state law.

In this way the rule's provisions with respect to the sale or disposition of property will not conflict with the manner in which such sales are required to be conducted under general principles of law applicable to the holder and the disposition of the property including the UST or UST system. For purposes of this rule, the definition of "fair consideration" is an objective test to determine whether the foreclosing holder has an investment or other interest in the property that is not within the exemption, or whether the holder's post-foreclosure activities indicate that it continues to maintain its ownership indicia in the property primarily to protect a security interest, and is therefore within the protective ambit of this rule.

While a holder may use whatever means are reasonable and appropriate for marketing foreclosed-on property to establish that it is seeking to divest itself of property in an expeditious manner, EPA has established the following "bright line" test that a holder may choose to use to definitely establish that it continues to hold indicia of ownership primarily to protect a security interest, and is not an "owner" of foreclosed-on property for purposes of complying with the UST regulatory program. Under the "bright line" test a holder must, within 12 months following foreclosure (as defined herein under the section entitled "Foreclosure"), list the property with a broker, dealer, or agent who deals with the type of property in question, or advertise the property as being for sale or disposition on at least a monthly basis in either a real estate publication or a trade or other publication suitable for the property in question, or a newspaper of general circulation (defined as one with a circulation over 10,000, or one suitable under any applicable federal, state, or local rules of court for publication required by court order or rules of civil procedure) covering the area where the property is located. If the holder satisfies these criteria, the holder is considered to have complied with the requirement in this rule that it is seeking to sell or otherwise divest the property in an expeditious manner. A holder choosing to avail itself of this bright line test will be able to provide clear and unambiguous evidence that it is not the UST or UST system's "owner" following foreclosure, for purposes of complying with the UST regulatory program.

EPA also recognizes that market conditions, the condition of the property, and other factors may mean that despite reasonable efforts to expeditiously sell or divest foreclosed-on property, the property may not be quickly sold. Therefore, this regulation does not impose a time requirement for the ultimate disposition of foreclosed-on property. Provided that the property is being actively offered for sale by the holder and no offers of fair consideration are ignored, outbid, or rejected, foreclosed-on property may continue to be held by the holder without the holder being considered an "owner" of the UST or UST system or facility or property on which the UST or UST system is located.

In the proposed rule, EPA proposed that in order for a holder to avoid losing the protection of the security interest exemption, the holder must act upon a written, *bona fide*, firm offer of fair consideration for the property within 90 days of receipt of the offer. A few commenters expressed a concern that 90 days would not provide a holder enough time to complete such a transaction in cases where the purchaser undertakes a site assessment before finalizing the transaction. The Agency has maintained the same language as that contained in the proposed rule, but wants to clarify that the requirement to "act upon" an offer does not mean that a purchase transaction must be completed with the 90-day time period. Rather, the holder must consider the offer, which may include, but is not limited to, responding to the offer and/or initiating a purchase transaction within 90 days. If at any time after six months following the acquisition of marketable title the holder outbids, rejects, or does not act upon within 90 days of receipt of, a written, *bona fide*, firm offer of fair consideration for the property, the holder will lose the protection of the rule. Under this rule, a "written, *bona fide*, firm offer" is a legally enforceable, commercially reasonable, offer, including all material terms of the transaction, from a ready, willing, and able purchaser who demonstrates to the holder's satisfaction the ability to perform. Where a holder outbids, rejects, or fails to act upon an offer of fair consideration, the holder is considered, for the purpose of this regulatory exemption, to be maintaining its indicia of ownership in the property as protection for investment purposes, and not as security for the obligation.

(5) Winding up operations after foreclosure. In addition, in the post-foreclosure context, this rule provides that a holder that forecloses on an UST or UST system with ongoing operations may wind up the UST or UST system's operations without also being considered to be participating in management. Winding up is considered a protected activity by a foreclosing holder because, without such protection, foreclosure would not be possible where practical or commercial necessity dictates that the foreclosing holder undertake such actions. "Winding up" in the post-foreclosure context includes those actions that are necessary to close down an UST or UST system's operations, secure the site, and otherwise protect the value of the foreclosed assets for subsequent sale or liquidation. In winding up an UST or UST system, a holder may undertake all necessary security measures or take other actions that protect and preserve an UST or UST system's assets, including steps taken to prevent or minimize the risk of a release or threat of release of the UST or UST system's contents.

F. Liability of a Holder as an Operator of an Underground Storage Tank or Underground Storage Tank System

While the Subtitle I security interest exemption excludes a holder from the definition of "owner" for regulatory compliance purposes, the statute does not explicitly address a holder's responsibilities as an UST or UST system "operator." EPA recognizes that the absence of explicit language in the security interest exemption regarding a holder's responsibility for the Subtitle I requirements as an "operator" creates a potential problem for holders, since EPA's UST regulations (as described in Section II of this preamble) apply to both owners and operators of underground storage tanks.

Some concern was expressed by commenters regarding the absence in the proposed rule of an outright exemption for holders from the definition of "operator" and the potential liability to which a holder could be exposed by engaging in any affirmative action in respect to an UST or UST system. EPA believes that Congress did not grant holders an outright exemption to the term "operator" in the Subtitle I security interest exemption because it may have wanted to ensure that holders did not engage in the day to day operations of the UST or UST system. The Agency believes this intent can be inferred from the statutory requirement that a holder may not "participate in the management" of the UST or UST system without voiding the exemption. EPA realizes that in order to provide meaning to the exemption, however, it is important to define how a holder can acquire title and access to an UST or UST system or facility or property on which an UST is located, and take affirmative actions to protect the value of their security interest, without losing the protection of the security interest exemption. Consequently, this regulation provides a road map that ensures that holders can utilize the security interest exemption, while reflecting the intent that exempted holders be prohibited from operating USTs or UST systems. The following sections discuss the actions that a holder can and cannot take to remain within the protective ambit of the regulatory security interest exemption.

1. Pre-Foreclosure Operation

Prior to foreclosure, it is the borrower, not the holder, who generally is in control of, or has responsibility for, the daily operation of an UST or UST system, and is subject to the full range of requirements applicable to operators of USTs. During this time period, a holder is permitted to conduct those activities related to its financial and administrative obligations of managing a loan portfolio, as well as environmental compliance activities and activities undertaken voluntarily to protect human health and the environment in compliance with 40 CFR part 280. The holder in this position will not lose its ability to take advantage of this regulatory exemption as a result of engaging in these activities. If the holder becomes engaged in the daily operation of an UST or UST system, however, it becomes subject to the full range of requirements applicable to operators of USTs or UST systems.

2. Post-Foreclosure Operation

Once a holder has foreclosed on an UST or UST system or facility or property on which the UST or UST system is located, it displaces the borrower and could become engaged in the day-to-day operation of an UST or UST system merely by storing product in the UST or UST system. EPA considers an UST to be in use and in operation if petroleum is added to, dispensed from, or stored in the UST. Therefore, except as provided in this rule, a holder cannot continue to use, store, dispense, or fill petroleum in an UST or UST system after obtaining marketable title and access to the UST or UST system or facility or property on which the UST or UST system is located without incurring Subtitle I liability (unless there is another operator available, as described later in this section). That does not mean, however, that a holder is barred from taking affirmative actions to ensure that a tank is no longer in use, by demonstrating that the tank is no longer storing, dispensing or being filled with petroleum. The holder best demonstrates this by emptying tanks it acquires through the foreclosure process. Thus, in order to qualify for the exemption, it is essential for a holder to empty all tanks that it knows about or should know about shortly after undertaking foreclosure (the time period following foreclosure is discussed later in this section), unless there is another operator who takes responsibility for complying with 40 CFR part 280 (as described later in this section). An UST or UST system is empty—in accordance with § 280.70—when all materials have been removed using commonly employed practices so that no more than 2.5 centimeters (one inch) of residue, or 0.3 percent by weight, of the total capacity of the UST system, remain in the system. Stated simply, this means that all product must be removed from the UST or UST system so that only one inch of residue remains. To ensure that the UST system has been adequately secured, vent lines must be left open and functioning, and all other lines, pumps, manways, and ancillary equipment must be capped and secured (§ 280.70).

Several commenters expressed concern about a blanket requirement for holders to discontinue operation of an UST or UST system upon acquisition of the UST or UST system through foreclosure, particularly if a lessee or other tenant was present at the site. In response to these commenters concerns, EPA believes that tanks can remain in use if there is someone who is available to take responsibility as an operator for compliance with the Subtitle I requirements. There may be situations, for example, when a lessee is willing to continue operating an UST or UST system as the "operator," in compliance with Subtitle I, while a holder is in possession of the UST or UST system or facility or property on which the UST is located. In some instances, the holder may want to arrange for a different person to operate the UST or UST system, for example, when the existing lease expires. In those cases where an operator (other than the holder) exists who is in control of and has responsibility for the daily operation of the UST, and who can be held responsible for compliance with 40 CFR part 280 requirements, the holder would not be considered the operator. Under these circumstances it is not necessary, in order to retain the security interest exemption, for a holder to empty the tanks for which it is knowledgeable about upon foreclosure, or to empty tanks that it becomes knowledgeable of later. (The issue of known and unknown tanks is discussed later in this section.)

In foreclosure, to avoid being an "operator" of the UST, in addition to emptying and securing the UST or UST system, a holder must also comply with the Subtitle I requirements for either temporary or permanent closure, in order to retain the security interest exemption. A holder who chooses to permanently close its UST or UST system, must do so in accordance with §§ 280.71 through 280.74, Subpart G—Out of Service UST Systems and Closure, except the holder is not required to perform corrective action if contamination is discovered. A holder who chooses to temporarily close its tanks is required to maintain corrosion protection and report any known or suspected releases from the UST system. In accordance with § 280.70(a), release detection is not required as long as the UST system is empty. A foreclosing holder who fails to satisfy the conditions established in this rule for retaining the security interest exemption could be an "operator" under the Subtitle I regulations and would therefore be subject to the full panoply of Subtitle I regulatory obligations applicable to all operators of tanks, including the corrective action regulations.

a. Costs of post-foreclosure temporary closure conditions. A few commenters expressed concern that the costs associated with the proposed rule's post-foreclosure conditions to empty tanks and enter temporary closure would prevent lenders from making UST-related loans. EPA does not believe that the costs associated with performing these actions are significant, compared to the cost of alternatives that holders would otherwise face.

First, in the absence of this regulatory exemption, as an "operator" upon foreclosure, a holder would have to comply with the UST technical standards in some manner. Entering temporary closure is one way to comply with the UST technical standards. The only condition placed upon a holder by this rule that differs from what normally constitutes temporary closure under the technical standards is the requirement for emptying tanks. The estimated total cost of emptying one tank and draining the associated pipes is $950. $350 of this cost is attributed to the mobilization of a truck for fuel disposal, which remains a fixed price per site. The total estimated cost per four-tank facility is $2750 ($600 per tank, plus $350 for the truck). The total cost for securing the lines is estimated at $225 per facility. These costs could be as much as the cost for release detection for tanks that a holder does not empty and that remain in use, estimated at up to $2800 for a four-tank facility. Under the requirements in 40 CFR § 280.70 for temporary closure, an owner or operator is allowed to either empty and secure its tanks, or perform release detection. While this regulatory exemption restricts a holder's choice to emptying and securing its tanks, no new costs are imposed upon the holder, since without this rule, the holder would have to pay approximately the same cost, whether it chose to empty its tanks or maintain release detection. For further information regarding the costs of emptying tanks and securing lines, please see the "Background Document in Support of the Lender Liability Rule for Underground Storage Tanks Under Subtitle I of the Resource Conservation and Recovery Act" located in the UST Docket at 401 M Street, SW., room 2616, Washington, DC 20460.

b. Time frame for emptying USTs and securing UST systems EPA received the most comments regarding the period of time allowed to demonstrate that a holder is no longer storing product, and thereby no longer operating an UST or UST system. All but one person who commented on the 15-day time frame in the proposed rule maintained that 15 days was not enough time to empty tanks and complete temporary closure after foreclosure. EPA proposed 15 days originally because our research indicated that only seven days should be necessary to empty the tanks and secure the lines at an UST facility once a contractor had been selected. Another seven days was added to provide time for the holder to become familiar with the details of this regulatory exemption and identify a qualified contractor. The Agency is obliged by the regulatory authority under section 9003(b), 42 U.S.C. 6991b(b) of Subtitle I to promulgate regulations based not only upon the technical capability of owners and operators, but also upon what is necessary to protect human health and the environment. It is therefore incumbent upon the Agency to select the shortest time period needed by a holder to empty tanks and secure lines.

Commenters listed a variety of reasons why more time would be needed for emptying tanks, including: special problems associated with rural communities such as long distances—travel time and locating a qualified contractor; snow, ice and other inclement weather conditions (thick snow and/or ice can make tanks difficult or impossible to detect and empty during winter months); contracting delays related to difficulties in locating, scheduling and negotiating a price with a contractor, and in some cases, in obtaining various bids; banks' (especially small banks') unfamiliarity with EPA regulations; multiple tanks at large facilities; laboratory testing requirements imposed by some states; and finding alternative storage arrangements, especially for non-marketers. Government agencies, acting in a receivership capacity, could face special difficulties due to protracted contract bidding requirements. Recommendations proposed by commenters, due to these various delays, ranged from 30 to 140 days.

Based on these commenters' concerns and information that they provided, the Agency has concluded that 60 calendar days is a reasonable, minimum period of time after undergoing foreclosure, as that term is defined under section III. C. 5. of this preamble, to allow a holder to empty its known tanks (see discussion of unknown tanks later in this section). This decision is based upon the following estimated time frame developed from information received by commenters: approximately one week to become familiar with Subtitle I and the details of this regulatory exemption, and to locate all USTs and the extent of the UST system on the foreclosed property; 5 weeks to complete a contractor bidding process and hire a qualified contractor, perform laboratory tests if necessary (accounting for travel time and weather delays), and apply for and obtain approval for content disposal if required by the state; two weeks to schedule contractor and for contractor to perform and complete work related to emptying all USTs and securing the UST system (accounting for travel time, other commitments and weather delays).

EPA also recognizes that the time needed for a holder to empty its tanks and secure its UST system may vary based upon the holder's geographic location. Extreme weather conditions in areas such as Alaska, special problems associated with rural communities, and additional requirements imposed by some states, may pose special problems for holders attempting to empty tanks in an expeditious manner. Thus, holders in some states may need more than 60 days to empty their tanks and secure their UST systems. Therefore, EPA believes that the implementing agency should have the ability to select a time frame that it finds most appropriate for holders, either based upon individual holders' needs (case-by-case determination), or based upon a standard time frame for all holders under the jurisdiction of that implementing agency. Thus, a holder who wishes to take advantage of this regulatory exemption, must empty its known tanks within 60 days after foreclosure or within 60 days after the effective date of this rule, whichever is later, or within another reasonable timeframe as specified by the implementing agency.

c. Unknown Tanks. Many commenters noted that a holder may not know of the existence of an UST when, through foreclosure, it acquires title to an UST or UST system or facility or property on which an UST or UST system is located. Several examples were provided by commenters demonstrating the problems associated with identifying all the USTs that may be located on a property it acquires. Among the examples, commenters stated that USTs may not be registered with the state, or it may be difficult for a holder to know of the existence of an UST on agricultural property or on other non-fuel-marketer properties. Sometimes the borrower does not disclose the existence of any USTs or the exact number and location of the USTs. Even if the holder is aware that USTs may be located on the property, it may encounter difficulty in identifying the USTs' exact locations. This could be especially difficult when a site is covered with snow or ice during the winter. Furthermore, USTs are sometimes hidden under asphalt or even under buildings. Performing an environmental assessment or audit is no guarantee that USTs will be found. As one commenter asserted, even a phase II

site assessment could fail to indicate the presence of USTs.

Several commenters urged EPA to adopt a more practical approach to emptying tanks that may not be discovered by the holder until after the 60-day time period following foreclosure. EPA believes that unless a holder is allowed to empty a tank upon discovering it, rather than potentially losing the protection of the regulatory security interest exemption if it fails to identify and empty all its tanks within 60 days after foreclosure, holders will remain suspicious of extending credit to UST owners and operators, undermining the purpose of this rule. Therefore, a holder can remain within the protective ambit of this rule by emptying an unknown UST within 60 days after discovering it or within 60 days after the effective date of this rule, whichever is later, or within another timeframe as specified by the implementing agency.

d. Permanent closure. A number of commenters objected to EPA's proposal pertaining to holders who had not disposed of the UST or UST system or facility or property on which the UST or UST system is located, within 12 months after foreclosure. The Agency proposed that in order for these holders to maintain the regulatory exemption, they must either enter permanent closure if they failed to dispose of the UST or UST system 12 months after foreclosure, or perform a site assessment and apply for an extension of temporary closure from the implementing agency. Several commenters doubted that they would be able to sell properties with USTs within 12 months. They argued that permanent closure would be burdensome and unnecessary to protect human health and the environment, since the requirement to empty the UST would eliminate the threat of contamination from further releases from the UST.

Commenters also insisted that holders do not possess the technical capacity of the average UST owner or operator, so they should not have to enter permanent closure to retain the exemption. Furthermore, commenters did not believe that it was appropriate for a holder, who acts as a temporary custodian of the UST or UST system, to decide the ultimate fate of a facility (whether to take the tanks permanently out of operation). Rather, they asserted, that decision should be left up to the subsequent purchaser. As one commenter stated, total closure could severely hinder a holder's selling opportunities and eventually remove the property from the mainstream of commerce. Although the proposed rule offered holders the option of applying for an extension of temporary closure from the implementing agency, some states prohibit such extensions, which would leave holders in those states without any option other than permanent closure of the tanks.

EPA agrees with commenters that the decision regarding whether or not a tank should be permanently closed should generally be left with whoever purchases the UST or UST system or facility or property on which the UST is located from the holder. The Agency has concluded that USTs that are emptied, secured and placed in temporary closure for the temporary period of time for which they are possessed by a holder should not need to be permanently removed or permanently closed in place in order to protect human health and the environment. Therefore, in this final rule, a holder may retain the regulatory exemption by temporarily closing but not permanently closing its USTs and UST systems. However, if a holder is unable to dispose of an UST property within 12 months, it must conduct a site assessment if the USTs are older and do not meet new tank performance standards (discussed later in this section). EPA believes that it is important for a holder to conduct such an assessment in order for the implementing agency to determine if there is any contamination on the site, and if so, make a determination regarding the potential amount of risk posed to human health and the environment and whether that risk warrants the implementing agency taking corrective action. (While this rule precludes a holder's liability for corrective action costs if the holder retains its eligibility for the exemption as provided in the rule, the implementing agency can undertake corrective action measures on the holder's site based upon its assessment of the risks posed by any contamination identified there.) As in the case of other temporarily closed tanks, in order to maintain protection of human health and the environment, contamination should not be allowed to remain unidentified for more than 12 months after an UST or UST system has been taken out of service (or in this case, more than 12 months after foreclosure, as that term is defined under § 280.210(c) of this rule). For purposes of this provision, the 12-month period begins to run from the effective date of the rule or from the date on which the UST or UST system is emptied and secured, whichever is later.

The Agency does not consider the site assessment condition to be unduly burdensome for several reasons. First, a holder will only need to perform a site assessment if the USTs that the holder has acquired have not been upgraded or replaced to meet the requirements of § 280.20 for new UST systems or § 280.21 for upgraded systems, or if no external release detection method is in operation. Many of a holder's USTs should be upgraded or replaced since many of the loans that UST owners and operators are requesting are expected to be used for upgrading or replacing substandard tanks. Furthermore, after 1998, all tanks are required to be upgraded or replaced, so holders should encounter few substandard USTs after that time. A site assessment can also be averted if one of the external release detection methods allowed in § 280.43 (e) or (f) is operating at the end of the 12-month period, and the release detection method operating indicates that no release has occurred.

The Agency is also aware that conducting a site assessment during property transfers has become a standard business practice and that few property transactions currently take place without one. If a holder should have to bear the cost of performing a site assessment, that cost may in some cases be passed on to the subsequent purchaser, and in some states, the holder may be reimbursed for the cost of performing a site assessment through the state's petroleum assurance fund or through other assistance programs. While EPA cannot require states to pay or reimburse a holder for performing a site assessment (or for undertaking any other actions that would protect the environment, such as corrective action), the Agency encourages states to provide assistance to holders who wish to engage in environmental compliance activities or voluntary environmental actions in order to protect their security interest.

3. Release Reporting Requirements Following Foreclosure

Under today's rule, upon foreclosure, a holder taking advantage of the regulatory exemption from corrective action regulations must nevertheless comply with the requirement in § 280.50 that the discovery of any releases from the UST be reported to the implementing agency. Only the reporting requirement must be followed; the holder need not comply with § 280.52, despite the reference to that provision in § 280.50. The release reporting requirement of § 280.50 is part of Subpart E, which details the obligations for reporting known or suspected releases, investigating off-site impacts, confirming that a release has occurred, and cleaning up spills and overfills. While Subpart E generally implements Subtitle I's corrective action and site investigation requirements, from which a holder may be excluded under today's rule, § 280.50 has historically been viewed by EPA as part of the UST technical standards.

A holder is responsible, following foreclosure, for reporting to the implementing agency, any discovery of released regulated substances, or any suspected release at an UST site or in the surrounding area. Such reporting is considered necessary to ensure protection of human health and the environment. By the holder's informing the implementing agency of a release, the implementing agency can then determine the appropriate response action, if any.

In the absence of today's rule a holder, as an UST operator, would have to perform release investigation and confirmation in accordance with §§ 280.51 through 280.53. Under today's rule, a holder who chooses to take the tank(s) out of service as described in this rule is required to follow the procedures established in § 280.50 but is not subject to the release investigation and confirmation requirements in §§ 280.51 through 280.53. A holder who elects to keep the tank(s) in operation, however, is obligated to comply with all of the Subpart E requirements, including those related to release investigation and confirmation, and corrective action.

G. Financial Responsibility Requirements

RCRA § 9003(c), as implemented by EPA at 40 CFR Part 280 Subpart H—Financial Responsibility, requires owners or operators of petroleum USTs to demonstrate financial responsibility for taking corrective action and for compensating third parties for bodily injury and property damage caused by accidental UST releases. As discussed earlier under Section III. A. of this preamble, EPA is defining, for purposes of its Subtitle I corrective action and technical requirements, the term "owner" to mean that a holder who maintains ownership rights in an UST or UST system primarily to protect a security interest does not rise to the level of a full "owner," and therefore is not subject to compliance with those regulatory requirements. As described earlier, this approach to EPA's regulatory program is consistent with the Subtitle I statutory security interest exemption. Similarly, a holder is not subject to the financial responsibility requirements as an UST owner.

The Agency is also exempting a holder as an UST "operator" from the financial responsibility requirements, provided the holder satisfies the conditions contained in this rule. Before a holder takes possession of an UST or UST system, a holder is not considered an UST operator, for purposes of EPA's technical and financial responsibility regulations, if it is acting merely as a holder and is not in control of the daily operation of the UST or UST system. Therefore, a holder typically is not subject to the UST financial responsibility requirements of 40 CFR Part 280 Subpart H as an operator prior to foreclosure.

Under this rule a holder is exempted from corrective action as an operator after foreclosure if it ensures that its tanks no longer store petroleum and it complies with the temporary or permanent closure requirements specified in this rule. (See Section III. F. 2. of this preamble). In these situations, where the holder is not liable for corrective action and where the tanks are empty and pose little threat of release, it would serve no useful purpose to require a holder to demonstrate compliance with the financial responsibility requirements for corrective action. Therefore, the Agency is exempting holders who satisfy all the other requirements in this rule from demonstrating Subtitle I financial responsibility for UST corrective action.

A holder's responsibility for demonstrating UST financial responsibility for third-party bodily injury and property damage compensation poses a different issue. While RCRA Subtitle I does not include provisions that actually impose third-party liability upon UST owners and operators, it does require UST owners and operators to demonstrate their ability to compensate third parties for bodily injury and property damage caused by accidental releases arising from the operation of an UST or UST system. The Agency believes that a holder who complies with all the conditions set forth in today's rule should not be required to comply with any of the UST financial responsibility requirements as an owner or operator, including those for both corrective action and third-party liability coverage. This regulatory exemption is consistent with the interpretation of that language adopted in the preamble to the UST financial responsibility final rule (53 FR at 43323). In that rule, EPA exempted tanks taken out of operation prior to the effective date of the rule from UST financial responsibility compliance. In the preamble to the final rule, EPA recognized that "insurance providers would be extremely reluctant to assure tanks taken out of operation because of the perceived greater uncertainty associated with them" (53 FR at 43327). In particular, insurers have indicated that in the case of foreclosed USTs, they would be concerned about vandalism and other threats to USTs at non-operational, unattended gas stations or similar locations with public access. The preamble also states that "even if providers of assurance would assure these tanks, it is unlikely that they would cover leaks which occurred before the effective date of the policy" (53 FR at 43327).

A similar situation exists for holders who empty their tanks and enter temporary or permanent closure after foreclosure. EPA has discovered that it is practically impossible to obtain third-party environmental insurance coverage for a new owner of empty tanks. Providers of financial assurance are reluctant to provide any coverage for tanks that no longer store petroleum product. Further, providers are reluctant to provide coverage for damages that occur after the effective date of the policy for releases that might have occurred prior to the effective date of the policy. Under this rule a holder is required to empty its tanks in order to be exempt from corrective action regulatory requirements. Since providers are unlikely to provide any coverage for empty tanks at non-operational facilities or for releases that occurred prior to foreclosure, and since third-party damages would be extremely unlikely to stem from releases occurring after the holder forecloses on and empties its tanks, the Agency believes it is unnecessary to require third-party liability coverage for such tanks.

RCRA § 9003(c)(6) supports this regulatory exemption. That provision emphasizes the connection between the UST financial responsibility requirement and a tank's operational status: "The regulations promulgated pursuant to this section shall include: * * * (6) requirements for maintaining evidence of financial responsibility for taking corrective action and compensating third parties for bodily injury and property damage caused by sudden and nonsudden accidental releases arising from operating an underground storage tank." [emphasis added.] The Agency believes that since a holder must demonstrate that its tanks are empty and that it is complying with the UST temporary or permanent closure requirements in order to avoid corrective action liability as an operator, there should be no need for a holder who meets these requirements to demonstrate financial responsibility for corrective action or third-party damages. By requiring the holder to empty the tank in order to be exempt from corrective action requirements, EPA is ensuring that damages caused by future releases from that tank will be minimized if not avoided altogether. As a result, holders who act in accordance with the requirements described in this rule are exempt from all Subtitle I financial responsibility requirements.

H. State Implementation and State Program Approval

EPA received numerous comments regarding the problems associated with the absence of lender liability provisions in many states, as well as the problems generated by the variety of state UST lender liability provisions that currently exist. Some commenters argued that the only way to make today's rule effective would be for EPA to require states to enact state legislation regarding UST lender liability. Other commenters specifically addressed state program approval requirements and state clean up funds. In general, the comments indicate that several misconceptions exist regarding the role of state programs in implementing Subtitle I, the state program approval process and state clean up funds.

First, as many commenters pointed out, today's rule only affects federal UST requirements, and only provides an eligible holder protection against federal enforcement actions. Since the UST program is implemented primarily through the states under state laws, a holder can be afforded protection against UST liability at the state level only if the state has enacted its own lender liability legislation, regulations, or policies.

Several states have already enacted laws or regulations containing UST lender liability provisions. In many states without existing lender liability provisions, state legislatures are debating lender liability bills. While EPA can encourage states to enact UST lender liability provisions, the Agency does not have the authority to require that states adopt such provisions. Therefore, the Agency strongly urges those states without security interest exemptions to enact legislation similar to what is included in today's Federal rule. EPA believes that such action is crucial in the effort to increase the availability of capital to UST owners and operators.

Several comments submitted to EPA addressed state program approval and whether or not states could broaden protections for holders. A state's lender liability legislation or regulations may affect the state's program approval and states need to be cognizant of that relationship when considering the enactment of a security interest exemption.

UST state program approval, as provided for under RCRA Subtitle I § 9004, and as implemented by 40 CFR part 281, provides states the ability to operate an UST regulatory program in lieu of the federal program if they first submit the program for review and receive approval from EPA. EPA approval of a state program means that the requirements in the state's laws and regulations will be in effect rather than the federal requirements. Program approval ensures that a single set of requirements (the state's) will be enforced in that state, thus eliminating the duplication and confusion that can result from having separate state and federal requirements. EPA considers state program approval to be an integral part of the UST regulatory program.

EPA's approval review focuses primarily on the basic state authorities (laws and regulations) needed to achieve the underlying objectives of the federal regulations covering the UST technical standards, corrective action, and financial responsibility requirements. The UST state program approval process is also based upon a performance-oriented approach. The statutory test for an approvable state program is that it be "no less stringent" than the federal requirements and include as many categories of UST systems (or be as broad in scope) as the federal requirements. EPA reviews the state's specific statutory and regulatory provisions as well as their interpretation by the Attorney General of the state.

Enactment of lender liability legislation or regulations is not a requirement for receiving or maintaining state program approval. A state program without a security interest exemption is acceptable under EPA's state program approval requirements, since failure to have such a provision would not narrow the scope of the state program, nor render it "less stringent" than the federal program. However, in order to fully effectuate the purpose of today's rule in expanding capital opportunities to UST owners and operators, EPA recommends that states act promptly to enact secured creditor provisions.

If a state program includes an UST security interest exemption, EPA will evaluate it against the criteria in § 281.39 of this rule. A state program that exempts a holder from UST requirements as an owner and operator may be approved if: The holder is maintaining indicia of ownership primarily to protect a security interest in a petroleum UST or UST system; the holder does not participate in the management or operation of the UST or UST system; and the holder does not engage in petroleum production, refining, and marketing. The state's program application should address the issue of UST lender liability in the "Scope" section of its state program description, under § 281.21 of the State Program Approval regulations.

A state may encounter program approval conflicts if it enacts a lender liability provision that is broader in scope or less stringent than today's federal lender liability rule. However, this rule should not present a barrier for states to receive state program approval. The program approval requirements contained in this rule are intended to provide enough flexibility to allow states to enact various UST lender liability provisions without jeopardizing their ability to receive or maintain approval of their state program.

I. Holders' Access to State Funds

EPA received several comments regarding a holder's ability to apply for state cleanup funding to remediate an UST property acquired through foreclosure. Some commenters also expressed concern about a holder's ability to access other state assistance programs intended for UST owners and operators. While the EPA cannot require states to ensure that holders are included among those eligible for a state's cleanup fund, reinsurance program, loan or grant program, today's rule is not intended to prohibit or discourage states from allowing holders access to these programs.

A few commenters highlighted the confusion that exists regarding the association between EPA's financial responsibility requirements and the state cleanup funds. EPA believes that it is important for holders to understand the purpose of state cleanup funds, the relationship between EPA and these state funds, and the relationship between the financial responsibility requirements and state cleanup funds.

As described earlier under section II. C. of this preamble, the financial responsibility requirements were promulgated to ensure that UST owners and operators demonstrated their ability to pay the costs of conducting remediation and compensating third parties for injuries or damages due to UST contamination. There are an array of acceptable financial responsibility compliance mechanisms, including insurance, guarantees, letters of credit, surety bonds, fully-funded trust funds and state assurance funds. State assurance or cleanup funds have become the most common and low cost financial responsibility compliance mechanism for tank owners and operators. As described earlier in this preamble under section III. G., holders who are eligible for today's regulatory security interest exemption are not responsible for demonstrating financial assurance. However, as noted by commenters, many holders would like to obtain access to state cleanup funds to voluntarily remediate any contamination that might be located on an UST property they obtain through foreclosure in order to protect human health and the environment, and make the property more attractive to potential purchasers. Some commenters were concerned that the proposed lender liability rule would have the unintended effect of blocking such access.

State cleanup funds have been established in many states to assist UST owners and operators in performing corrective action. States may apply to EPA for approval of its cleanup fund as a financial assurance mechanism. States are not, however, required by law or regulation to establish a cleanup fund or any other state UST assistance program, or to submit the fund to EPA for approval.

Each state fully controls how its fund functions. No two state cleanup funds are identical; they vary in the amounts and types of coverage provided, in their eligibility requirements, in the amount of funding, funding source, method of payment, and program implementation. EPA's understanding is that currently, holders are eligible to apply for state cleanup fund monies in some states and not in others. That situation will likely continue upon promulgation of this rule, as this rule is not intended to alter the eligibility of holders to apply for state cleanup fund monies. While EPA cannot require that states provide holders access to these funds, EPA encourages states to recognize the benefits associated with remediating UST properties held by holders in terms of increased protection of human health and the environment, and the enhanced ability to return these properties to productive use.

J. Outstanding Loans and Loans in Foreclosure Upon the Effective Date of the Rule

In the proposed rule, EPA requested comments regarding how the potential liability associated with a holder's current holdings acquired through foreclosure could affect the extension of future UST-related loans. Many commenters expressed their concern that financial institutions would be unwilling to extend loans to properties containing USTs if those institutions incurred significant costs in relation to properties on which they had already foreclosed. Several commenters also insisted that the Subtitle I security interest exemption was not intended by Congress to be contingent upon EPA's exercise of its rulemaking authority. These commenters noted that a rule that does not include a holder's current UST holdings would effectively void the secured creditor exemption that has been part of RCRA since 1986, thereby denying holders the protection that Congress provided in the law. Commenters also expressed concern that failure to include in the exemption a holder's outstanding loans in foreclosure would create the need for a cumbersome recordkeeping system, in which holders would have to keep track of whether foreclosures occurred prior to or after the effective date of the rule. Commenters also indicated that enforcement would be hampered unless states began requiring holders to report the date on which foreclosures occur, as defined under § 280.210(c). They stated that such a reporting requirement would add an additional burden on security interest holders, not intended by Congress' statutory exemption for security interest holders.

In addition, several commenters mentioned the benefits that would be afforded the environment by including outstanding loans within the exemption's protective ambit. For example, commenters stated that holders would be encouraged to empty USTs and undertake voluntary cleanups on currently foreclosed properties containing USTs if such properties were included in the rule.

Based on the comments received, EPA has concluded that there is sufficient evidence to indicate that the intent of the rule in expanding credit opportunities for UST owners and operators would be undermined if the rule does not cover holders of existing security interests and holders of security interests already in foreclosure upon the effective date of the rule. Furthermore, such protection for holders could provide additional environmental benefits; by encouraging holders in foreclosure at the time the rule is issued to empty their tanks, contamination will be curtailed at numerous UST sites throughout the country. Therefore, holders of existing as well as future security interests, including those in foreclosure upon the effective date of this rule, fall within the rule's protective ambit as long as the holder satisfies the conditions contained in this rule for the regulatory security interest exemption.

IV. Issues Outside the Scope of This Rule

A. Petroleum Producers, Refiners, and Marketers

Several commenters requested that the security interest exemption be expanded to cover petroleum producers, refiners, and marketers who hold indicia of ownership primarily to protect a security interest. They claimed that a petroleum marketer who extends loans to UST owners is no different than a financial institution that extends loans to UST owners, except that a marketer's experience in the petroleum industry helps it avoid unsound practices that lead to foreclosures. Commenters further stated that these "petroleum marketer-creditors" supply loans to many small businesses that cannot get loans elsewhere, and that without an exemption for petroleum producers, refiners, and marketers, capital from these sources would dry up.

The statutory exemption for security interest holders in Subtitle I specifically excludes petroleum producers, refiners, and marketers. Since the Subtitle I security interest exemption excludes petroleum producers, refiners, and marketers, the Agency has not extended the regulatory exemption to these persons.

EPA disagrees with commenters who stated that small businesses will be harmed by today's rule. To the contrary, the Agency expects this regulatory exemption to increase the total amount of capital available to small businesses, who are currently most in need of capital for UST improvements. Financial institutions, currently reluctant to make UST-related loans to small businesses should, as a result of this rule, greatly increase the total availability of capital for UST owners who are otherwise credit worthy.

Although holders who engage in petroleum production, refining, and marketing are not covered by this regulatory exemption, they should not expect to automatically be held liable for cleaning up contamination caused by a borrower. Under the federal UST regulations, such a holder would need to meet the regulatory definition of either "owner" or "operator" of the UST in order to be potentially liable for contamination caused by the UST. A determination as to whether or not a holder who engages in petroleum production, refining, and marketing is responsible for UST cleanup costs as an owner or operator will be based on the individual circumstances of the case, as has been the situation in the past. Thus, this rule does not affect the current liability scheme for holders who also

engage in petroleum production, refining, and marketing. As a result, EPA does not believe that capital from these sources will "dry up" as some commenters stated.

A few commenters were confused about the effect of the rule upon a holder's ability to extend capital to or foreclose on an UST property that was used by a borrower to produce, refine, or market petroleum. EPA believes that the restriction in the statutory security interest exemption was intended to prevent petroleum producers, refiners, and marketers from personally employing the exemption. Thus, the restriction in the exemption allows holders who do not engage in petroleum production, refining, and marketing to hold a security interest in an UST or UST system for a borrower who engages in these areas of business.

B. Third Party Liability

Several commenters addressed the issue of a holder's protection from third party actions. In general, these commenters requested that the final rule provide protection for holders from UST litigation initiated by private parties (i.e., private legal actions not involving the United States government). Since RCRA Subtitle I does not impose liability pertaining to third parties, EPA has not addressed third party liability in this rule. Third parties who wish to recover UST regulatory compliance and corrective action response costs may have a cause of action against holders under various provisions of federal and state law, other than Subtitle I of RCRA.

While this rule cannot offer protection for holders from every conceivable type of liability related to UST contamination on properties held by holders to protect a security interest, it specifies the types of activities that holders may engage in while remaining within the protective ambit of the Subtitle I security interest exemption. In so doing, it provides certainty for holders whose primary concern is fear of being held liable by the federal government under relevant UST statutes and regulations—not third-party actions.

C. Trustee and Fiduciary Liability Under Subtitle I

EPA received a number of comments requesting that the security interest exemption be expanded to cover trustees and fiduciaries acting in a fiduciary capacity. Commenters stressed the importance of providing the trust operations of a financial institution protection from RCRA Subtitle I liability. They expressed concern that the financial institution or individual financial officer acting as a trustee or fiduciary could face personal liability under RCRA Subtitle I if any or all of a trust's assets are contaminated by an UST release. Commenters asserted that they should not be held personally liable for the cleanup of trust properties because prior to their appointment as trustee or fiduciary they would have no way of knowing whether the trust's property was contaminated, nor would they have been able to have prevented the contamination. They maintained that protection for all areas of a financial institution's operations was crucial to stimulate more credit for small businesses to upgrade and improve their UST systems. Commenters further stated that a large environmental expense on the trust side of a financial institution would have a significant, negative effect upon UST-related lending on the commercial side.

EPA carefully considered the comments received regarding this issue, but has not provided the specific relief requested by commenters. Since the primary purpose of this rule is to expand the availability of capital to UST owners by encouraging lenders to make loans to credit-worthy UST owners, it is appropriate for EPA to provide an exemption for holders of security interests on UST-related loans. The Agency is not convinced, however, that it is necessary to extend the exemption to other persons, such as trustees, who, in their capacity as trustee, are not involved in making UST-related loans to tank owners.

The Agency believes that in most instances, however, the liability of a trustee may be limited by the operation of existing trust law. While acknowledging the complexities of trust law as well as numerous jurisdictional variations, EPA believes the concepts described in the Restatement (Second) of Trusts (1959)[4] provide a fair representation of the common law of trusts, and generally would be applicable to trusts involving underground storage tanks.

Under the well-established and generally accepted principles governing the obligations of trusts and the liability of trustees, as articulated in the Restatement, the trustee is technically personally responsible for the liability: "The trustee is subject to personal liability to third persons on obligations incurred in the administration of the trust to the same extent that he would be liable if he held the property free of trust." Restatement (Second) of Trusts § 261. However, the rule of personal liability is tempered by a right to indemnification: "The Trustee is entitled to indemnity out of the trust estate for expenses properly incurred by him in the administration of the trust." *ID.* § 244. Accordingly, the rule is that ordinarily the trustee may obtain indemnification from the trust assets for the acts within his or her official capacity. Thus, EPA believes that in most instances, a trust's assets would be available for cleanup of trust property contaminated by USTs.

D. Hazardous Substance Tanks

Several commenters noted that hazardous substance UST systems are regulated under Subtitle I, and indicated that the rule would be more useful if holders would not have to concern themselves with determining which USTs contained petroleum and which contained other substances. They requested that the rule also apply to USTs storing hazardous substances. Such a rule, reasoned one commenter, would better reflect the actual property inspection and examination process that holders undertake with respect to their collateral.

Today's regulatory exemption does not apply to non-petroleum, hazardous substance USTs or UST systems regulated under Subtitle I. The primary reasons for this are, first, the security interest exemption appears in one specific section of RCRA Subtitle I, titled EPA Response Program for Petroleum (see RCRA section 9003(h)). As the title indicates, the security interest provision applies to petroleum USTs and UST systems. Second, the primary purpose of this rule is to expand capital availability for small business petroleum UST owners and operators, particularly petroleum retailers. The Agency believes that a rule pertaining exclusively to petroleum USTs and UST systems will address the needs of this particular group of tank owners and operators.

E. Hazardous Waste Tanks

As explained under section III of this preamble, the RCRA Subtitle I security interest exemption specifically applies to USTs that are regulated under Subtitle I and that are used to contain an accumulation of petroleum. A few commenters requested that EPA expand the exemption to include tanks storing hazardous waste as well.

Today's rule only addresses petroleum USTs regulated under Subtitle I of RCRA. Hazardous waste is regulated under Subtitle C of RCRA. Section 9001(2)(A) of Subtitle I explicitly excludes USTs containing hazardous waste from regulation under Subtitle I. EPA derives its authority to develop today's rule in part from section 9003(h) of Subtitle I of RCRA—EPA Response Program for Petroleum. This authority applies exclusively to Subtitle I USTs and does not extend to the regulation of hazardous waste under Subtitle C. Thus, today's rule applies exclusively to EPA's RCRA Subtitle I UST program and does not affect any environmental requirements outside of the Subtitle I regulatory context.

---

[4] The Restatement (Second) of Trusts (1959) is an authoritative summary of the law of trusts prepared by the American Law Institute. Although the Restatement is not codified into law, it is frequently used as a guide to interpretation by courts.

F. Aboveground Storage Tanks and Heating Oil Tanks

A few commenters requested that in addition to petroleum USTs, the proposed regulatory exemption apply to aboveground storage tanks (ASTs) and heating oil tanks. Neither ASTs nor tanks used to store heating oil for consumptive use on the premises where stored are regulated under RCRA Subtitle I, although they may be regulated sometimes under other federal laws (e.g., the Oil Pollution Act) or state laws. Today's rule only addresses petroleum USTs regulated under Subtitle I of RCRA. The rule applies exclusively to EPA's RCRA Subtitle I UST program and does not affect any environmental requirements outside of the Subtitle I regulatory context.

While ASTs and heating oil tanks used for on-site consumption are excluded from the federal UST requirements, several states do regulate them. Under federal law, states are allowed to develop more stringent requirements, as well as requirements that are broader in scope than federal the ones. Thus, holders may find themselves responsible for certain state-imposed AST and/or heating oil tank requirements. States that are concerned about lender liability issues may choose to provide statutory and regulatory exclusions for holders that extend loans to borrowers who own or operate ASTs or heating oil tanks, particularly if it would have a positive influence on the ability of an UST owner or operator to obtain capital.

V. Economic Analysis

In the proposed rule, EPA requested that commenters furnish information that would help the Agency better understand how this regulatory exemption would affect an UST owner or operator's ability to comply with UST regulations. The Agency specifically requested information regarding the current interest rate charged for loans when property with one or more USTs is used as collateral. In addition, holders were asked about the extent to which credit might have been more available in the past if the rule had been in effect.

EPA did not receive any substantive comments or data regarding this request for information, and as a result, was unable to collect and analyze any new data that would assist the Agency in quantitatively evaluating further the rule's potential effects upon environmental protection and economic growth. For those interested in a more detailed discussion of the costs and benefits associated with today's rule, please refer to the "Background Document in Support of the Lender Liability Rule for Underground Storage Tanks Under Subtitle I of the Resource Conservation and Recovery Act," located in the OUST Docket at 401 M Street, SW., room M2616, Washington, DC 20460.

VI. Regulatory Assessment Requirements

A. Executive Order 12866

Under Executive Order 12866 [58 FR 51735 (October 4, 1993)], the Agency must determine whether the regulatory action is "significant" and therefore subject to review by the U.S. Office of Management and Budget (OMB) and the requirements of the Executive Order. The Order defines "significant regulatory action" as one that is likely to result in a rule that may:

(1) Have an annual effect on the economy of $100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or state, local, or tribal governments or communities;

(2) Create a serious inconsistency or otherwise interfere with an action taken or planned by another agency;

(3) Materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof, or

(4) Raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the Executive Order.

Pursuant to the terms of Executive Order 12866, it has been determined that this rule is a "significant regulatory action" because it raises unique or novel policy issues. Therefore, this rule is subject to review by OMB. OMB, however, elected to waive its review of the final rule. Thus, no changes were made in the final rule in response to OMB recommendations.

B. Regulatory Flexibility Act

In accordance with the Regulatory Flexibility Act of 1980, agencies must evaluate the effects of a regulation on small entities. If the rule is likely to have a "significant impact on a substantial number of small entities," then a Regulatory Flexibility Analysis must be performed. Because this rule may actually result in cost savings for small entities that hold security interests in USTs or UST systems, by lowering the cost and increasing the availability of capital for small business UST owners, EPA certifies that today's rule would not have a significant impact on a substantial number of small entities.

C. Paperwork Reduction Act

This rule does not contain any new information collection requirements under the provision of the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.*

To the extent that this rule discusses any information collection requirements imposed under existing underground storage tank regulations, those requirements have been approved by the OMB under the Paperwork Reduction Act and have been assigned control number 2050–0068 (ICR no. 1360.04).

D. Unfunded Mandates Reform Act

Under Section 202 of the Unfunded Mandates Reform Act of 1995, signed into law on March 22, 1995, EPA must prepare a statement to accompany any rule where the estimated costs to state, local, or tribal governments in the aggregate, or to the private sector, will be $100 million or more in any one year. Under Section 205, EPA must select the most cost-effective and least burdensome alternative that achieves the objective of the rule and is consistent with statutory requirements. Section 203 requires EPA to establish a plan for informing and advising any small governments that may be significantly impacted by the rule.

EPA has determined that this rule does not include a federal mandate that may result in estimated costs of $100 million or more to either state, local or tribal governments in the aggregate, or to the private sector.

List of Subjects in 40 CFR Parts 280 and 281

Hazardous substances, Insurance, Oil pollution, Reporting and recordkeeping requirements, Surety bonds, Water pollution control, Water supply.

Dated: August 29, 1995.

Carol M. Browner,

Administrator.

For the reasons set out in the preamble title 40, chapter I of the Code of Federal Regulations is amended as follows:

PART 280—TECHNICAL STANDARDS AND CORRECTIVE ACTION REQUIREMENTS FOR OWNERS AND OPERATORS OF UNDERGROUND STORAGE TANKS (UST)

1. The authority citation for part 280 is revised to read as follows:

Authority: 42 U.S.C. 6912, 6991, 6991a, 6991b, 6991c, 6991d, 6991e, 6991f, 6991g, 6991h.

2. Part 280 is amended by adding subpart I consisting of §§ 280.200 through 280.240 to read as follows:

Subpart I—Lender Liability

Sec.

280.200 Definitions.
280.210 Participation in management.
280.220 Ownership of an underground storage tank or underground storage tank system or facility or property on which an underground storage tank or underground storage tank system is located.
280.230 Operating an underground storage tank or underground storage tank system.

Subpart I—Lender Liability

§ 280.200 Definitions.

(a) *UST technical standards,* as used in this subpart, refers to the UST preventative and operating requirements under 40 CFR part 280, subparts B, C, D, G, and § 280.50 of subpart E.

(b) *Petroleum production, refining, and marketing.*

(1) *Petroleum production* means the production of crude oil or other forms of petroleum (as defined in § 280.12) as well as the production of petroleum products from purchased materials.

(2) *Petroleum refining* means the cracking, distillation, separation, conversion, upgrading, and finishing of refined petroleum or petroleum products.

(3) *Petroleum marketing* means the distribution, transfer, or sale of petroleum or petroleum products for wholesale or retail purposes.

(c) *Indicia of ownership* means evidence of a secured interest, evidence of an interest in a security interest, or evidence of an interest in real or personal property securing a loan or other obligation, including any legal or equitable title or deed to real or personal property acquired through or incident to foreclosure. Evidence of such interests include, but are not limited to, mortgages, deeds of trust, liens, surety bonds and guarantees of obligations, title held pursuant to a lease financing transaction in which the lessor does not select initially the leased property (hereinafter "lease financing transaction"), and legal or equitable title obtained pursuant to foreclosure. Evidence of such interests also includes assignments, pledges, or other rights to or other forms of encumbrance against property that are held primarily to protect a security interest. A person is not required to hold title or a security interest in order to maintain indicia of ownership.

(d) *A holder* is a person who, upon the effective date of this regulation or in the future, maintains indicia of ownership (as defined in § 280.200(c)) primarily to protect a security interest (as defined in § 280.200(f)(1)) in a petroleum UST or UST system or facility or property on which a petroleum UST or UST system is located. A holder includes the initial holder (such as a loan originator); any subsequent holder (such as a successor-in-interest or subsequent purchaser of the security interest on the secondary market); a guarantor of an obligation, surety, or any other person who holds ownership indicia primarily to protect a security interest; or a receiver or other person who acts on behalf or for the benefit of a holder.

(e) *A borrower, debtor, or obligor* is a person whose UST or UST system or facility or property on which the UST or UST system is located is encumbered by a security interest. These terms may be used interchangeably.

(f) *Primarily to protect a security interest* means that the holder's indicia of ownership are held primarily for the purpose of securing payment or performance of an obligation.

(1) *Security interest* means an interest in a petroleum UST or UST system or in the facility or property on which a petroleum UST or UST system is located, created or established for the purpose of securing a loan or other obligation. Security interests include but are not limited to mortgages, deeds of trusts, liens, and title pursuant to lease financing transactions. Security interests may also arise from transactions such as sale and leasebacks, conditional sales, installment sales, trust receipt transactions, certain assignments, factoring agreements, accounts receivable financing arrangements, and consignments, if the transaction creates or establishes an interest in an UST or UST system or in the facility or property on which the UST or UST system is located, for the purpose of securing a loan or other obligation.

(2) *Primarily to protect a security interest,* as used in this subpart, does not include indicia of ownership held primarily for investment purposes, nor ownership indicia held primarily for purposes other than as protection for a security interest. A holder may have other, secondary reasons for maintaining indicia of ownership, but the primary reason why any ownership indicia are held must be as protection for a security interest.

(g) *Operation* means, for purposes of this subpart, the use, storage, filling, or dispensing of petroleum contained in an UST or UST system.

§ 280.210 Participation in management.

The term "participating in the management of an UST or UST system" means that, subsequent to the effective date of this subpart, December 6, 1995, the holder is engaging in decisionmaking control of, or activities related to, operation of the UST or UST system, as defined herein.

(a) Actions that are participation in management.

(1) Participation in the management of an UST or UST system means, for purposes of this subpart, actual participation by the holder in the management or control of decisionmaking related to the operation of an UST or UST system. Participation in management does not include the mere capacity or ability to influence or the unexercised right to control UST or UST system operations. A holder is participating in the management of the UST or UST system only if the holder either:

(i) Exercises decisionmaking control over the operational (as opposed to financial or administrative) aspects of the UST or UST system, such that the holder has undertaken responsibility for all or substantially all of the management of the UST or UST system; or

(ii) Exercises control at a level comparable to that of a manager of the borrower's enterprise, such that the holder has assumed or manifested responsibility for the overall management of the enterprise encompassing the day-to-day decisionmaking of the enterprise with respect to all, or substantially all, of the operational (as opposed to financial or administrative) aspects of the enterprise.

(2) Operational aspects of the enterprise relate to the use, storage, filling, or dispensing of petroleum contained in an UST or UST system, and include functions such as that of a facility or plant manager, operations manager, chief operating officer, or chief executive officer. Financial or administrative aspects include functions such as that of a credit manager, accounts payable/receivable manager, personnel manager, controller, chief financial officer, or similar functions. Operational aspects of the enterprise do not include the financial or administrative aspects of the enterprise,

or actions associated with environmental compliance, or actions undertaken voluntarily to protect the environment in accordance with applicable requirements in 40 CFR part 280 or applicable state requirements in those states that have been delegated authority by EPA to administer the UST program pursuant to 42 USC 6991c and 40 CFR part 281.

(b) Actions that are not participation in management pre-foreclosure.

(1) Actions at the inception of the loan or other transaction. No act or omission prior to the time that indicia of ownership are held primarily to protect a security interest constitutes evidence of participation in management within the meaning of this subpart. A prospective holder who undertakes or requires an environmental investigation (which could include a site assessment, inspection, and/or audit) of the UST or UST system or facility or property on which the UST or UST system is located (in which indicia of ownership are to be held), or requires a prospective borrower to clean up contamination from the UST or UST system or to comply or come into compliance (whether prior or subsequent to the time that indicia of ownership are held primarily to protect a security interest) with any applicable law or regulation, is not by such action considered to be participating in the management of the UST or UST system or facility or property on which the UST or UST system is located.

(2) Loan policing and work out. Actions that are consistent with holding ownership indicia primarily to protect a security interest do not constitute participation in management for purposes of this subpart. The authority for the holder to take such actions may, but need not, be contained in contractual or other documents specifying requirements for financial, environmental, and other warranties, covenants, conditions, representations or promises from the borrower. Loan policing and work out activities cover and include all such activities up to foreclosure, exclusive of any activities that constitute participation in management.

(i) Policing the security interest or loan.

(A) A holder who engages in policing activities prior to foreclosure will remain within the exemption provided that the holder does not together with other actions participate in the management of the UST or UST system as provided in § 280.210(a). Such policing actions include, but are not limited to, requiring the borrower to clean up contamination from the UST or UST system during the term of the security interest; requiring the borrower to comply or come into compliance with applicable federal, state, and local environmental and other laws, rules, and regulations during the term of the security interest; securing or exercising authority to monitor or inspect the UST or UST system or facility or property on which the UST or UST system is located (including on-site inspections) in which indicia of ownership are maintained, or the borrower's business or financial condition during the term of the security interest; or taking other actions to adequately police the loan or security interest (such as requiring a borrower to comply with any warranties, covenants, conditions, representations, or promises from the borrower).

(B) Policing activities also include undertaking by the holder of UST environmental compliance actions and voluntary environmental actions taken in compliance with 40 CFR part 280, provided that the holder does not otherwise participate in the management or daily operation of the UST or UST system as provided in § 280.210(a) and § 280.230. Such allowable actions include, but are not limited to, release detection and release reporting, release response and corrective action, temporary or permanent closure of an UST or UST system, UST upgrading or replacement, and maintenance of corrosion protection. A holder who undertakes these actions must do so in compliance with the applicable requirements in 40 CFR part 280 or applicable state requirements in those states that have been delegated authority by EPA to administer the UST program pursuant to 42 U.S.C. 6991c and 40 CFR part 281. A holder may directly oversee these environmental compliance actions and voluntary environmental actions, and directly hire contractors to perform the work, and is not by such action considered to be participating in the management of the UST or UST system.

(ii) Loan work out. A holder who engages in work out activities prior to foreclosure will remain within the exemption provided that the holder does not together with other actions participate in the management of the UST or UST system as provided in § 280.210(a). For purposes of this rule, "work out" refers to those actions by which a holder, at any time prior to foreclosure, seeks to prevent, cure, or mitigate a default by the borrower or obligor; or to preserve, or prevent the diminution of, the value of the security. Work out activities include, but are not limited to, restructuring or renegotiating the terms of the security interest; requiring payment of additional rent or interest; exercising forbearance; requiring or exercising rights pursuant to an assignment of accounts or other amounts owing to an obligor; requiring or exercising rights pursuant to an escrow agreement pertaining to amounts owing to an obligor; providing specific or general financial or other advice, suggestions, counseling, or guidance; and exercising any right or remedy the holder is entitled to by law or under any warranties, covenants, conditions, representations, or promises from the borrower.

(c) Foreclosure on an UST or UST system or facility or property on which an UST or UST system is located, and participation in management activities post-foreclosure.

(1) Foreclosure. (i) Indicia of ownership that are held primarily to protect a security interest include legal or equitable title or deed to real or personal property acquired through or incident to foreclosure. For purposes of this subpart, the term "foreclosure" means that legal, marketable or equitable title or deed has been issued, approved, and recorded, and that the holder has obtained access to the UST, UST system, UST facility, and property on which the UST or UST system is located, provided that the holder acted diligently to acquire marketable title or deed and to gain access to the UST, UST system, UST facility, and property on which the UST or UST system is located. The indicia of ownership held after foreclosure continue to be maintained primarily as protection for a security interest provided that the holder undertakes to sell, re-lease an UST or UST system or facility or property on which the UST or UST system is located, held pursuant to a lease financing transaction (whether by a new lease financing transaction or substitution of the lessee), or otherwise divest itself of the UST or UST system or facility or property on which the UST or UST system is located, in a reasonably expeditious manner, using whatever commercially reasonable means are relevant or appropriate with respect to the UST or UST system or facility or property on which the UST or UST system is located, taking all facts and circumstances into consideration, and provided that the holder does not participate in management (as defined in § 280.210(a)) prior to or after foreclosure.

(ii) For purposes of establishing that a holder is seeking to sell, re-lease pursuant to a lease financing transaction (whether by a new lease financing transaction or substitution of the lessee), or divest in a reasonably expeditious

manner an UST or UST system or facility or property on which the UST or UST system is located, the holder may use whatever commercially reasonable means as are relevant or appropriate with respect to the UST or UST system or facility or property on which the UST or UST system is located, or may employ the means specified in § 280.210(c)(2). A holder that outbids, rejects, or fails to act upon a written *bona fide,* firm offer of fair consideration for the UST or UST system or facility or property on which the UST or UST system is located, as provided in § 280.210(c)(2), is not considered to hold indicia of ownership primarily to protect a security interest.

(2) Holding foreclosed property for disposition and liquidation. A holder, who does not participate in management prior to or after foreclosure, may sell, re-lease, pursuant to a lease financing transaction (whether by a new lease financing transaction or substitution of the lessee), an UST or UST system or facility or property on which the UST or UST system is located, liquidate, wind up operations, and take measures, prior to sale or other disposition, to preserve, protect, or prepare the secured UST or UST system or facility or property on which the UST or UST system is located. A holder may also arrange for an existing or new operator to continue or initiate operation of the UST or UST system. The holder may conduct these activities without voiding the security interest exemption, subject to the requirements of this subpart.

(i) A holder establishes that the ownership indicia maintained after foreclosure continue to be held primarily to protect a security interest by, within 12 months following foreclosure, listing the UST or UST system or the facility or property on which the UST or UST system is located, with a broker, dealer, or agent who deals with the type of property in question, or by advertising the UST or UST system or facility or property on which the UST or UST system is located, as being for sale or disposition on at least a monthly basis in either a real estate publication or a trade or other publication suitable for the UST or UST system or facility or property on which the UST or UST system is located, or a newspaper of general circulation (defined as one with a circulation over 10,000, or one suitable under any applicable federal, state, or local rules of court for publication required by court order or rules of civil procedure) covering the location of the UST or UST system or facility or property on which the UST or UST system is located. For purposes of this provision, the 12-month period begins to run from December 6, 1995 or from the date that the marketable title or deed has been issued, approved and recorded, and the holder has obtained access to the UST, UST system, UST facility and property on which the UST or UST system is located, whichever is later, provided that the holder acted diligently to acquire marketable title or deed and to obtain access to the UST, UST system, UST facility and property on which the UST or UST system is located. If the holder fails to act diligently to acquire marketable title or deed or to gain access to the UST or UST system, the 12-month period begins to run from December 6, 1995 or from the date on which the holder first acquires either title to or possession of the secured UST or UST system, or facility or property on which the UST or UST system is located, whichever is later.

(ii) A holder that outbids, rejects, or fails to act upon an offer of fair consideration for the UST or UST system or the facility or property on which the UST or UST system is located, establishes by such outbidding, rejection, or failure to act, that the ownership indicia in the secured UST or UST system or facility or property on which the UST or UST system is located are not held primarily to protect the security interest, unless the holder is required, in order to avoid liability under federal or state law, to make a higher bid, to obtain a higher offer, or to seek or obtain an offer in a different manner.

(A) Fair consideration, in the case of a holder maintaining indicia of ownership primarily to protect a senior security interest in the UST or UST system or facility or property on which the UST or UST system is located, is the value of the security interest as defined in this section. The value of the security interest includes all debt and costs incurred by the security interest holder, and is calculated as an amount equal to or in excess of the sum of the outstanding principal (or comparable amount in the case of a lease that constitutes a security interest) owed to the holder immediately preceding the acquisition of full title (or possession in the case of a lease financing transaction) pursuant to foreclosure, plus any unpaid interest, rent, or penalties (whether arising before or after foreclosure). The value of the security interest also includes all reasonable and necessary costs, fees, or other charges incurred by the holder incident to work out, foreclosure, retention, preserving, protecting, and preparing, prior to sale, the UST or UST system or facility or property on which the UST or UST system is located, re-lease, pursuant to a lease financing transaction (whether by a new lease financing transaction or substitution of the lessee), of an UST or UST system or facility or property on which the UST or UST system is located, or other disposition. The value of the security interest also includes environmental investigation costs (which could include a site assessment, inspection, and/or audit of the UST or UST system or facility or property on which the UST or UST system is located), and corrective action costs incurred under §§ 280.51 through 280.67 or any other costs incurred as a result of reasonable efforts to comply with any other applicable federal, state or local law or regulation; less any amounts received by the holder in connection with any partial disposition of the property and any amounts paid by the borrower (if not already applied to the borrower's obligations) subsequent to the acquisition of full title (or possession in the case of a lease financing transaction) pursuant to foreclosure. In the case of a holder maintaining indicia of ownership primarily to protect a junior security interest, fair consideration is the value of all outstanding higher priority security interests plus the value of the security interest held by the junior holder, each calculated as set forth in this paragraph.

(B) Outbids, rejects, or fails to act upon an offer of fair consideration means that the holder outbids, rejects, or fails to act upon within 90 days of receipt, a written, *bona fide,* firm offer of fair consideration for the UST or UST system or facility or property on which the UST or UST system is located received at any time after six months following foreclosure, as defined in § 280.210(c). A "written, *bona fide,* firm offer" means a legally enforceable, commercially reasonable, cash offer solely for the foreclosed UST or UST system or facility or property on which the UST or UST system is located, including all material terms of the transaction, from a ready, willing, and able purchaser who demonstrates to the holder's satisfaction the ability to perform. For purposes of this provision, the six-month period begins to run from December 6, 1995 or from the date that marketable title or deed has been issued, approved and recorded to the holder, and the holder has obtained access to the UST, UST system, UST facility and property on which the UST or UST system is located, whichever is later, provided that the holder was acting diligently to acquire marketable title or deed and to obtain access to the UST or UST system, UST facility and property on which the UST or UST system is located. If the holder fails to act diligently to acquire marketable title or deed or to gain access to the UST or UST system, the six-month period begins to run from December 6, 1995 or from the date on which the holder first acquires either title to or possession of the secured UST or UST system, or facility or property on which the UST or UST system is located, whichever is later.

(3) Actions that are not participation in management post-foreclosure. A holder is not considered to be participating in the management of an UST or UST system or facility or property on which the UST or UST system is located when undertaking actions under 40 CFR part 280, provided that the holder does not otherwise participate in the management or daily operation of the UST or UST system as provided in § 280.210(a) and § 280.230. Such allowable actions include, but are not limited to, release detection and release reporting, release response and corrective action, temporary or permanent closure of an UST or UST system, UST upgrading or replacement, and maintenance of corrosion protection. A holder who undertakes these actions must do so in compliance with the applicable requirements in 40 CFR part 280 or applicable state requirements in those states that have been delegated authority by EPA to administer the UST program pursuant to 42 U.S.C. 6991c and 40 CFR part 281. A holder may directly oversee these environmental compliance actions and voluntary environmental actions, and directly hire contractors to perform the work, and is not by such action considered to be participating in the management of the UST or UST system.

§ 280.220 Ownership of an underground storage tank or underground storage tank system or facility or property on which an underground storage tank or underground storage tank system is located.

Ownership of an UST or UST system or facility or property on which an UST or UST system is located. A holder is not an "owner" of a petroleum UST or UST system or facility or property on which a petroleum UST or UST system is located for purposes of compliance with the UST technical standards as defined in § 280.200(a), the UST corrective action requirements under §§ 280.51 through 280.67, and the UST financial responsibility requirements under §§ 280.90 through 280.111, provided the person:

(a) Does not participate in the management of the UST or UST system as defined in § 280.210; and

(b) Does not engage in petroleum production, refining, and marketing as defined in § 280.200(b).

§ 280.230 Operating an underground storage tank or underground storage tank system.

(a) Operating an UST or UST system prior to foreclosure. A holder, prior to foreclosure, as defined in § 280.210(c), is not an "operator" of a petroleum UST or UST system for purposes of compliance with the UST technical standards as defined in § 280.200(a), the UST corrective action requirements under §§ 280.51 through 280.67, and the UST financial responsibility requirements under §§ 280.90 through 280.111, provided that, after December 6, 1995, the holder is not in control of or does not have responsibility for the daily operation of the UST or UST system.

(b) Operating an UST or UST system after foreclosure. The following provisions apply to a holder who, through foreclosure, as defined in § 280.210(c), acquires a petroleum UST or UST system or facility or property on which a petroleum UST or UST system is located.

(1) A holder is not an "operator" of a petroleum UST or UST system for purposes of compliance with 40 CFR part 280 if there is an operator, other than the holder, who is in control of or has responsibility for the daily operation of the UST or UST system, and who can be held responsible for compliance with applicable requirements of 40 CFR part 280 or applicable state requirements in those states that have been delegated authority by EPA to administer the UST program pursuant to 42 U.S.C. 6991c and 40 CFR part 281.

(2) If another operator does not exist, as provided for under paragraph (b)(1) of this section, a holder is not an "operator" of the UST or UST system, for purposes of compliance with the UST technical standards as defined in § 280.200(a), the UST corrective action requirements under §§ 280.51 through 280.67, and the UST financial responsibility requirements under §§ 280.90 through 280.111, provided that the holder:

(i) Empties all of its known USTs and UST systems within 60 calendar days after foreclosure or within 60 calendar days after December 6, 1995, whichever is later, or another reasonable time period specified by the implementing agency, so that no more than 2.5 centimeters (one inch) of residue, or 0.3 percent by weight of the total capacity of the UST system, remains in the system; leaves vent lines open and functioning; and caps and secures all other lines, pumps, manways, and ancillary equipment; and

(ii) Empties those USTs and UST systems that are discovered after foreclosure within 60 calendar days after discovery or within 60 calendar days after December 6, 1995, whichever is later, or another reasonable time period specified by the implementing agency, so that no more than 2.5 centimeters (one inch) of residue, or 0.3 percent by weight of the total capacity of the UST system, remains in the system; leaves vent lines open and functioning; and caps and secures all other lines, pumps, manways, and ancillary equipment.

(3) If another operator does not exist, as provided for under paragraph (b)(1) of this section, in addition to satisfying the conditions under paragraph (b)(2) of this section, the holder must either:

(i) Permanently close the UST or UST system in accordance with §§ 280.71 through 280.74, except § 280.72(b); or

(ii) Temporarily close the UST or UST system in accordance with the following applicable provisions of § 280.70:

(A) Continue operation and maintenance of corrosion protection in accordance with § 280.31;

(B) Report suspected releases to the implementing agency; and

(C) Conduct a site assessment in accordance with § 280.72(a) if the UST system is temporarily closed for more than 12 months and the UST system does not meet either the performance standards in § 280.20 for new UST systems or the upgrading requirements in § 280.21, except that the spill and overfill equipment requirements do not have to be met. The holder must report any suspected releases to the implementing agency. For purposes of this provision, the 12-month period begins to run from December 6, 1995 or from the date on which the UST system is emptied and secured under paragraph (b)(2) of this section, whichever is later.

(4) The UST system can remain in temporary closure until a subsequent purchaser has acquired marketable title to the UST or UST system or facility or property on which the UST or UST system is located. Once a subsequent purchaser acquires marketable title to the UST or UST system or facility or property on which the UST or UST system is located, the purchaser must decide whether to operate or close the UST or UST system in accordance with applicable requirements in 40 CFR part 280 or applicable state requirements in those states that have been delegated authority by EPA to administer the UST program pursuant to 42 U.S.C. 6991c and 40 CFR part 281.

PART 281—APPROVAL OF STATE UNDERGROUND STORAGE TANK PROGRAMS

1. The authority citation for part 281 is revised to read as follows:

Authority: 42 U.S.C. 6912, 6991 (c), (d), (e), (g).

Subpart C—[Amended]

2. Section 281.39 is added to subpart C to read as follows:

§ 281.39 Lender liability.

(a) A state program that contains a security interest exemption will be considered to be no less stringent than, and as broad in scope as, the federal program provided that the state's exemption:

(1) Mirrors the security interest exemption provided for in 40 CFR part 280, subpart I; or

(2) Achieves the same effect as provided by the following key criteria:

(i) A holder, meaning a person who maintains indicia of ownership primarily to protect a security interest in a petroleum UST or UST system or facility or property on which a petroleum UST or UST system is located, who does not participate in the management of the UST or UST system as defined under § 280.210 of this chapter, and who does not engage in petroleum production, refining, and marketing as defined under § 280.200(b) of this chapter is not:

(A) An "owner" of a petroleum UST or UST system or facility or property on which a petroleum UST or UST system is located for purposes of compliance with the requirements of 40 CFR part 280; or

(B) An "operator" of a petroleum UST or UST system for purposes of compliance with the requirements of 40 CFR part 280, provided the holder is not in control of or does not have responsibility for the daily operation of the UST or UST system.

(ii) [Reserved]

(b) [Reserved]

Department of Health and Human Services

Food and Drug Administration

21 CFR Parts 864, et al.

Medical Devices; Effective Date of Requirement for Premarket Approval for Class III Preamendments Devices; Proposed Rules

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Parts 864, 868, 870, 872, 876, 880, 882, 884, 888, and 890

[Docket No. 95N-0084]

RIN 0910-AA31

Medical Devices; Effective Date of Requirement for Premarket Approval for Class III Preamendments Devices

AGENCY: Food and Drug Administration, HHS.

ACTION: Proposed rule; opportunity to request a change in classification.

SUMMARY: The Food and Drug Administration (FDA) is proposing to require the filing of a premarket approval application (PMA) or a notice of completion of product development protocol (PDP) for 43 class III medical devices. The agency also is summarizing its proposed findings regarding the degree of risk of illness or injury designed to be eliminated or reduced by requiring the devices to meet the statute's approval requirements and the benefits to the public from the use of the devices. In addition, FDA is announcing the opportunity for interested persons to request the agency to change the classification of any of the devices based on new information.

DATES: Written comments by January 5, 1996; request for a change in classification by September 22, 1995. FDA intends that, if a final rule based on this proposed rule is issued, PMA's will be required to be submitted within 90 days of the effective date of the final rule.

ADDRESSES: Submit written comments or requests for a change in classification to the Dockets Management Branch (HFA–305), Food and Drug Administration, rm. 1–23, 12420 Parklawn Dr., Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Joseph M. Sheehan, Center for Devices and Radiological Health (HFZ–84), Food and Drug Administration, 2098 Gaither Rd., Rockville, MD 20850, 301–594–4765.

SUPPLEMENTARY INFORMATION:

I. Background

Section 513 of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 360c) requires the classification of medical devices into one of three regulatory classes: Class I (general controls), class II (special controls), and class III (premarket approval). Generally, devices that were on the market before May 28, 1976, the date of enactment of the Medical Device Amendments of 1976 (the amendments) (Pub. L. 94–295), and devices marketed on or after that date that are substantially equivalent to such devices, have been classified by FDA. For the sake of convenience, this preamble refers to both the devices that were on the market before May 28, 1976, and the substantially equivalent devices that were marketed on or after that date as "preamendments devices."

Section 515(b)(1) of the act (21 U.S.C. 360e(b)(1)) establishes the requirement that a preamendments device that FDA has classified into class III is subject to premarket approval. A preamendments class III device may be commercially distributed without an approved PMA or notice of completion of a PDP until 90 days after FDA issues a final rule requiring premarket approval for the device, or 30 months after final classification of the device under section 513 of the act, whichever is later. Also, a preamendments device subject to the rulemaking procedure under section 515(b) of the act is not required to have an approved investigational device exemption (IDE) (21 CFR part 812) contemporaneous with its interstate distribution until the date identified by FDA in the final rule requiring the submission of a PMA for the device. At that time, an IDE is required only if a PMA has not been submitted or a PDP completed.

Section 515(b)(2)(A) of the act provides that a proceeding to issue a final rule to require premarket approval shall be initiated by publication of a notice of proposed rulemaking containing: (1) The proposed rule; (2) proposed findings with respect to the degree of risk of illness or injury designed to be eliminated or reduced by requiring the device to have an approved PMA or a declared completed PDP and the benefit to the public from the use of the device; (3) an opportunity for the submission of comments on the proposed rule and the proposed findings; and (4) an opportunity to request a change in the classification of the device based on new information relevant to the classification of the device.

Section 515(b)(2)(B) of the act provides that if FDA receives a request for a change in the classification of the device within 15 days of the publication of the notice, FDA shall, within 60 days of the publication of the notice, consult with the appropriate FDA advisory committee and publish a notice denying the request for change of classification or announcing its intent to initiate a proceeding to reclassify the device under section 513(e) of the act. If FDA does not initiate such a proceeding, section 515(b)(3) of the act provides that FDA shall, after the close of the comment period on the proposed rule and consideration of any comments received, issue a final rule to require premarket approval, or publish a notice terminating the proceeding. If FDA terminates the proceeding, FDA is required to initiate reclassification of the device under section 513(e) of the act, unless the reason for termination is that the device is a banned device under section 516 of the act (21 U.S.C. 360f).

If a proposed rule to require premarket approval for a preamendments device is made final, section 501(f)(2)(B) of the act (21 U.S.C. 351(f)(2)(B)) requires that a PMA or a notice of completion of a PDP for any such device be filed within 90 days of the date of promulgation of the final rule or 30 months after final classification of the device under section 513 of the act, whichever is later. If a PMA or a notice of completion of a PDP is not filed by the later of the two dates, commercial distribution of the device is required to cease. The device may, however, be distributed for investigational use if the manufacturer, importer, or other sponsor of the device complies with the IDE regulations. If a PMA or a notice of completion of a PDP is not filed by the later of the two dates, and no IDE is in effect, the device is deemed to be adulterated within the meaning of section 501(f)(1)(A) of the act, and subject to seizure and condemnation under section 304 of the act (21 U.S.C. 334) if its distribution continues. Shipment of the device in interstate commerce will be subject to injunction under section 302 of the act (21 U.S.C. 332), and the individuals responsible for such shipment will be subject to prosecution under section 303 of the act (21 U.S.C. 333). In the past, FDA has requested that manufacturers take action to prevent the further use of devices for which no PMA has been filed and may determine that such a request is appropriate for the class III devices that are the subjects of this regulation.

The act does not permit an extension of the 90-day period after promulgation of a final rule within which an application or a notice is required to be filed. The House Report on the amendments states that "the thirty month 'grace period' afforded after classification of a device into class III * * * is sufficient time for manufacturers and importers to develop the data and conduct the investigations necessary to support an application for premarket approval." (H. Rept. 94–853, 94th Cong., 2d sess. 42 (1976).)

The Safe Medical Devices Act of 1990 (Pub. L. 101–629) (SMDA) added new section 515(i) to the act (21 U.S.C. 360e(i)). This section requires FDA to review the classification of preamendments class III devices for which no final rule has been issued requiring the submission of PMA's and to determine whether each device should be reclassified into class I or class II or remain in class III. For devices remaining in class III, SMDA directed FDA to develop a schedule for issuing regulations to require premarket approval. However, the SMDA does not prevent FDA from proceeding immediately to rulemaking under section 515(b) of the act on specific devices, in the interest of public health, independent of the procedures in section 515(i). Indeed, proceeding directly to rulemaking under section 515(b) of the act is consistent with Congress' objective in enacting section 515(i) i.e., that preamendments class III devices for which PMA's have not been required either be reclassified to class I or class II or be subject to the requirements of premarket approval. Moreover, in this proposal, interested persons are being offered the opportunity to request reclassification of any of the devices.

In the **Federal Register** of May 6, 1994 (59 FR 23731), FDA issued a notice of availability of a preamendments class III devices strategy document. The strategy document set forth FDA's plans for implementing the provisions of section 515(i) of the act for preamendments class III devices for which FDA had not yet required premarket approval. FDA divided this universe of devices into three groups:

1. Group 1 devices are devices that FDA believes raise significant questions of safety and/or effectiveness but are no longer used or are very limited in use. FDA's strategy is to call for PMA's for all Group 1 devices in an omnibus 515(b) rulemaking action. This proposed rule implements that strategy and covers all Group 1 devices referenced by the May 6, 1994, **Federal Register** notice.
2. Group 2 devices are devices that FDA believes have a high potential for being reclassified into class II. For these devices, FDA has issued an order under section 515(i) of the act requiring manufacturers to submit safety and effectiveness information so that FDA can make a determination as to whether the devices should be reclassified.
3. Group 3 devices are devices that FDA believes are currently in commercial distribution and are not likely candidates for reclassification. FDA intends to issue proposed rules to require the submission of PMA's for the 15 highest priority devices in this group in accordance with the schedule set forth in the strategy document. FDA has also issued an order under section 515(i) of the act for the remaining 27 Group 3 devices requiring the submission of safety and effectiveness information so that FDA can make a determination as to whether the devices should be reclassified or retained in class III.

A. Dates New Requirements Apply

In accordance with section 515(b) of the act, FDA is proposing to require that a PMA or a notice of completion of a PDP be filed with the agency for class III devices within 90 days after promulgation of any final rule based on this proposal. An applicant whose device was legally in commercial distribution before May 28, 1976, or whose device has been found by FDA to be substantially equivalent to such a device, will be permitted to continue marketing such class III devices during FDA's review of the PMA or notice of completion of the PDP. FDA intends to review any PMA for the device within 180 days, and any notice of completion of a PDP for the device within 90 days of the date of filing. FDA cautions that, under section 515(d)(1)(B)(i) of the act, the agency may not enter into an agreement to extend the review period for a PMA beyond 180 days unless the agency finds that "* * * the continued availability of the device is necessary for the public health."

FDA intends that, under § 812.2(d) (21 CFR 812.2(d)), the preamble to any final rule based on this proposal will state that, as of the date on which a PMA or a notice of completion of a PDP is required to be filed, the exemptions in § 812.2(c)(1) and (c)(2) from the requirements of the IDE regulations for preamendments class III devices will cease to apply to any device that is: (1) Not legally on the market on or before that date, or (2) legally on the market on or before that date but for which a PMA or notice of completion of PDP is not filed by that date, or for which PMA approval has been denied or withdrawn.

If a PMA or a notice of completion of a PDP for a class III device is not filed with FDA within 90 days after the date of promulgation of any final rule requiring premarket approval for the device, commercial distribution of the device must cease. The device may be distributed for investigational use only if the requirements of the IDE regulations regarding significant risk devices are met. The requirements for significant risk devices include submitting an IDE application to FDA for its review and approval. An approved IDE is required to be in effect before an investigation of the device may be initiated or continued. FDA, therefore, cautions that IDE applications should be submitted to FDA at least 30 days before the end of the 90-day period after the final rule to avoid interrupting investigations.

B. Proposed Finding With Respect to Risks and Benefits

As required by section 515(b) of the act, FDA is publishing its proposed findings regarding: (1) The degree of risk of illness or injury designed to be eliminated or reduced by requiring that these devices have an approved PMA or a declared completed PDP; and (2) the benefits to the public from the use of the device.

These findings are based on the reports and recommendations of the advisory committees (panels) for the classification of these devices along with any additional information that FDA discovers. Additional information can be found in the proposed and final rules classifying these devices as listed below:

Devices	Proposed rule	Final rule
Hematology/Pathology (21 CFR part 864).	September 11, 1979 (44 FR 52950).	September 12, 1980 (45 FR 60576
Anesthesiology 1982 (21 CFR part 868).	November 2, 1979 (44 FR 63292).	July 16, (47 FR 31130)
Cardiovascular (21 CFR part 870).	March 9, 1979 (44 FR 13284).	February 5, 1980 (45 FR 7904)
Dental (21 CFR part 872).	December 30, 198 (45 FR 85962).	August 12, 1987 (52 FR 30082)

C. Devices Subject to This Proposal

1. Hematology and Pathology Devices

Automated Differential Cell Counter (§ 864.5220)

(1) *Identification*. An automated differential cell counter is a device used to identify and classify one or more of the formed elements of the blood. The device is in class III when intended for uses other than to flag or identify specimens containing abnormal blood cells. Otherwise, the device is in class II.

(2) *Summary of data*. The members of the Hematology and Pathology Devices Classification Panel based their recommendation upon the Panel members' clinical experience with automated differential cell counters and on information presented at a symposium entitled "Differential Counters in Hematology" held at the Panel meeting. Among the speakers at the symposium was Dr. Robert Miller of the Johns Hopkins University Medical Center. Dr. Miller discussed difficulties concerning data interpretation, precision and accuracy, correlation to reference methods and error in terms of coincidence, nonreproducible results, nonlinearity, and specific interferences.

FDA has reviewed medical literature concerning automated differential cell counters (Refs. 1 through 5). The medical literature reports two basic methodologies for automated differential cell counting: Pattern recognition and flow-through techniques. Pattern recognition systems microscopically scan a fixed, stained blood film. Flow-through systems count and identify cells suspended in a liquid medium.

Pattern recognition systems are handicapped by their lack of accuracy (Ref. 1). In one study, 68.8 percent of the abnormal cells that the system examined were classified as normal (Ref. 2). An error of this sort could result in the failure to detect a pathological blood sample (Ref. 1). Several studies (Refs. 3 through 5) show a discrepancy between pattern recognition counts and manual counts of monocytes (mononuclear leukocytes). It is suggested that the criteria for identifying monocytes need to be better defined (Ref. 4). There also have been reports of discrepancies between pattern recognition counts and manual counts of plasma cells and atypical lymphocytes (Ref. 4). The tendency of pattern recognition systems to underestimate the number of atypical lymphocytes is ascribed to flaws in the recognition criteria. Pattern recognition systems also cause difficulty in blood film preparation. Overlapping cells must be avoided, and a uniform distribution of cell types must be achieved (Ref. 1).

Flow-through systems allow a hundredfold increase in the rate at which cells are counted. There is imperfect correlation between the classification logic systems of the flow-through machines and morphological features of the blood cell classes as defined by fixed, Romanowsky-stained preparations (Ref. 1). Therefore, these machines will fail to classify up to 10 percent of normal cells.

The device was the subject of a reclassification petition and was partially reclassified into class II for the uses listed above. The proposed rule for reclassification was published in the **Federal Register** of April 5, 1989 (54 FR 13698) and the final rule was published in the **Federal Register** of June 8, 1990 (55 FR 23510).

(3) *Risks to health*.

- Hepatitis infection—Exposure of the user, donor, or patient to blood, blood products, or blood aerosols presents a risk of hepatitis infection. HIV was unknown in 1979 when the device was classified and is also an important risk.
- Misdiagnosis and inappropriate therapy—Failure of the device to perform satisfactorily may lead to an error in the diagnosis of a blood cell disorder. Inappropriate therapy based on inaccurate diagnostic data may place the patient at risk.

2. Anesthesiology Devices

Electroanesthesia Apparatus (§ 868.5400)

(1) *Identification*. An electroanesthesia apparatus is a device used for the induction and maintenance of anesthesia during surgical procedures by means of an alternating or pulsed electric current that is passed through electrodes fixed to the patient's head.

(2) *Summary of data*. The Anesthesiology Devices Classification Panel and the Neurological Devices Classification Panel recommended that electroanesthesia apparatus be classified into class III (premarket approval) because the device presents a potential unreasonable risk of illness or injury to the patient. The Anesthesiology Devices Classification Panel based its recommendation on the insufficient number of domestic studies on human subjects. The Panel had not seen any medical data on which to judge the safety and effectiveness of the device, and believed that the technique of electroanesthesia is not considered a well-established or well-recognized clinical procedure. The Neurological Devices Classification Panel noted that many factors important to the clinical application of this technique have not been sufficiently defined. The Neurological Devices Classification Panel also based its recommendation on the Panel members' experience with the device, and their judgment and knowledge of the pertinent literature (Ref. 6). The National Research Council recommended that electroanesthesia should be considered as a potentially useful adjunct in the maintenance of anesthesia but that electroanesthesia should be limited to investigational use until its effects, advantages, and standardization can be adequately evaluated.

(3) *Risks to health*.

- Electrical shock—Improper electrical grounding may allow the patient or operator to receive an electrical shock.
- Damage to central nervous system—Excessively high electrical current or voltage could damage the central nervous system and cerebral tissues.
- Skin burns—If the electrodes are too small and yield a high current density, skin burns may result.
- Skin irritation—Electrode gels or pastes used to establish electrical contact between the electrode and the skin may cause skin irritation.
- Cardiac or pulmonary interference—The position of the electrode on the head may lead to electrical interference with cardiac or pulmonary functions in the patient.

3. Cardiovascular Devices

Catheter Balloon Repair Kit (§ 870.1350)

(1) *Identification*. A catheter balloon repair kit is a device used to repair or replace the balloon of a balloon catheter. The kit contains the materials, such as glue and balloons, necessary to effect the repair or replacement.

(2) *Summary of data*. The members of the Cardiovascular Devices Classification Panel based their recommendation on the potential hazards associated with the inherent properties of the device and on their personal knowledge of, and experience with, the device. The Panel was not aware of any published literature on this device.

(3) *Risks to health*.

- Gas embolism—Balloon rupture caused by the repair material or a leak in the repair material can allow potentially debilitating or fatal gas emboli to escape into the bloodstream.
- Embolism—Pieces of the balloon that break or flake off may form potentially debilitating or fatal emboli.
- Thromboembolism—Inadequate blood compatibility of the materials used in this device and inadequate surface finish and cleanliness can lead to potentially debilitating or fatal thromboemboli.
- Cardiac arrhythmias—Toxic substances released from the repair material (glue or other adhesive) can trigger cardiac arrhythmias (irregularities in heart rhythm).

Trace Microsphere (§ 870.1360)

(1) *Identification*. A trace microsphere is a radioactively tagged nonbiodegradable particle that is intended to be injected into an artery or vein and trapped in the capillary bed for the purpose of studying blood flood within or to an organ.

(2) *Summary of data*. The Panel members based their recommendation on the potential hazards associated with the inherent properties of the device and on their personal knowledge of, and experience with, the device.

(3) *Risks to health*.

- Thromboembolism—Inadequate blood compatibility of the materials used in the device may lead to potentially debilitating or fatal thromboemboli.
- Embolism—If the microspheres are too large or tend to clump together, they can lodge in a blood vessel and block the flow of blood to an organ.
- Tissue damage—Tissue damage can result from excessive radioactivity of the particles.

Carotid Sinus Nerve Stimulator (§ 870.3850)

(1) *Identification*. A carotid sinus nerve stimulator is an implantable device used to decrease arterial pressure by stimulating Hering's nerve at the carotid sinus.

(2) *Summary of data*. The Panel members based their recommendation on the potential hazards associated with the inherent properties of the device and on their personal knowledge of, and experience with, the device.

(3) *Risks to health*.

- Tissue and blood damage—If the materials, surface finish, or cleanliness of this device are inadequate, damage to the blood and tissue may result.
- Inability to control blood pressure—Failure of the device to stimulate properly can prevent effective control of elevated blood pressure.

High-Energy DC-Defibrillator (Including Paddles) (§ 870.5300)

(1) *Identification*. A high-energy DC-defibrillator is a device that delivers into a 50-ohm test load an electrical shock of greater than 360 joules of energy used for defibrillating the atria or ventricles of the heart or to terminate other cardiac arrhythmias. The device may either synchronize the shock with the proper phase of the electrocardiogram or may operate asynchronously. The device delivers the electrical shock through paddles placed either directly across the heart or on the surface of the body.

(2) *Summary of data*. The Panel relied upon the potential hazards associated with the inherent properties of the device and on the Panel members' personal knowledge of, and experience with, the device. In addition, the Panel sought information from the medical and scientific community, industry, and medical literature (Refs. 20 through 25).

(3) *Risks to health*.

- Electrical shock to operator—Improper electrical design of the device can lead to a serious electrical shock to the operator.
- Inability to defibrillate or persistence of the arrhythmia—Inability to rhythmia may occur because of excessive energy, excessive current, insufficient energy, insufficient current, a difference between the indicated level of energy and the delivered into a 50-ohm load, or excessive leakage current.
- Inability to defibrillate—Inability to defibrillate may occur when certain drugs that can raise the defibrillation threshold are used.
- Inability to defibrillate due to paddle design—Inability to defibrillate may result from inappropriate paddle size or inappropriate paddle location on the subject.

4. Dental Devices

Karaya and Sodium Borate With or Without Acacia Denture Adhesive (§ 872.3400)

(1) *Identification*. A karaya with sodium borate with or without acacia denture adhesive is a device composed of karaya and sodium borate with or without acacia intended to be applied to the base of a denture before the denture is inserted into the patient's mouth. The device is used to improve denture retention and comfort. If it contains 12 percent or more by weight of sodium borate, it is in class III; otherwise it is in class I.

(2) *Summary of data*. The members of the Dental Devices Classification Panel relied upon their personal knowledge of, and clinical experience with, the device in the practice of dentistry and on a report from the then-Bureau of Drugs' OTC Panel on Dentifrices and Dental Care Agents (Ref. 26). This report states that there is a lack of information concerning the safety of adhesives containing sodium borate and a lack of information concerning the effectiveness of acacia in denture adhesives. The report states that the sodium borate concentration of 12 to 20 percent of the adhesive's total weight is equivalent to 2.6 to 5.3 percent boron. Because at least a portion of a denture adhesive is ingested, this amount of boron could cause chronic toxicity in denture wearers (Ref. 27). The Panel agrees that there is a lack of data concerning the safety and effectiveness of acacia and karaya with sodium borate.

(3) *Risks to health*.

- Chronic toxicity—The boron in this device may cause chronic toxicity to users.
- Adverse tissue reaction—If the materials in the device are not biocompatible, the patient may have an adverse tissue reaction.

Carboxymethylcellulose Sodium and Cationic Polyacrylamide Polymer Denture Adhesive (§ 872.3420)

(1) *Identification*. A carboxymethylcellulose sodium and cationic polyacrylamide polymer denture adhesive is a device composed of carboxymethylcellulose sodium and cationic polyacrylamide polymer intended to be applied to the base of a denture before the denture is inserted in a patient's mouth. The device is used to improve denture retention and comfort.

(2) *Summary of data*. The Panel based its recommendation on the lack of information available to demonstrate the effectiveness of carboxymethylcellulose sodium and cationic polyacrylamide in dental adhesives and on a report of the then-Bureau of Drugs' OTC Panel on Dentifrices and Dental Care Agents. According to the report, the belief that carboxymethylcellulose sodium is safe is based, in part, on its widespread use in food products such as milk and ice cream (Ref. 28). Tests of cationic polyacrylamide for acute oral toxicity, eye irritation, and dermal and inhalation toxicity in subacute and chronic feeding experiments in animals have been negative (Ref. 26). Human patch tests also have been negative (Ref. 28). However, no data were submitted to the Panel to demonstrate, and the literature did not establish, the effectiveness of carboxymethylcellulose

sodium cationic polyacrylamide polymer as a denture adhesive.

(3) *Risks to health.*

- Bone loss from lack of effectiveness—If the adhesive fails to anchor the denture in its proper position, a change in the distance between the upper and lower jaws may occur that may lead to gum irritation and bone loss due to alteration of biting forces.
- Adverse tissue reaction—if the materials in the device are not biocompatible, the patient may have an adverse tissue reaction.

Polyacrylamide Polymer (Modified Cationic Denture Adhesive (§ 872.3480)

(1) *Identification.* A polyacrylamide polymer (modified cationic) denture adhesive is a device composed of polyacrylamide polymer (modified cationic) intended to be applied to the base of a denture before the denture is inserted in a patient's mouth. The device is used to improve denture retention and comfort.

(2) *Summary of data.* The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, this device, and on a report of the then-Bureau of Drugs' OTC Panel on Dentifrices and Dental Care Agents. Tests of polyacrylamide polymer (modified cationic) for acute oral toxicity, eye irritation, and dermal and inhalation toxicity in subacute and chronic feeding experiments in animals have been negative (Ref. 26). Human patch tests also have been negative (Ref. 28). However, no data were submitted to the Panel to demonstrate, and the literature did not establish, the effectiveness of polyacrylamide polymer as the sole ingredient of a denture adhesive.

(3) *Risks to health.*

- Bone loss—If the adhesive fails to anchor the denture in its proper position, and the distance between the upper and lower jaw is changed, then bone loss and gum irritation may occur.
- Adverse tissue reaction—If the materials in the device are not biocompatible, the patient may have an adverse tissue reaction.

Polyvinylmethylether Maleic Anhydride (PVM–MA), Acid Copolymer, and Carboxymethylcellulose Sodium (NACMC) Denture Adhesive (§ 872.3500)

(1) *Identification.* Polyvinylmethylether maleic anhydride (PVM–MA), acid copolymer, and carboxymethylcellulose sodium (NACMC) denture adhesive is a device composed of polyvinylmethylether maleic anhydride, acid copolymer, and carboxymethylcellulose sodium intended to be applied to the base of a denture before the denture is inserted in a patient's mouth. The device is used to improve denture retention and comfort.

(2) *Summary of data.* The Panel based it recommendation on the Panel members' personal knowledge of, and clinical experience with the device and on a report of the then-Bureau of Drugs' OTC Panel on Dentifrices and Dental Care Agents. The report states that sufficient data are not available to demonstrate the safety and effectiveness of a combination of PVM—MA and NACMC used as a denture adhesive (Ref. 26). The Panel also based its recommendation on a publication by Blacow (Ref. 27), which states that the pH and stability of the anhydride and diacid forms may be hazardous due to the possible presence of an acid pH of 2 to 3, which can burn the tissues in the mouth.

(3) *Risks to health.*

- Toxicity—Ingestion of the materials in this device may cause chronic toxicity to users.
- Adverse tissue reaction—If the materials in the device are not biocompatible, the patient may have an adverse tissue reaction. Acidity of the adhesive may burn tissues in the mouth.

Over-the-Counter (OTC) Denture Reliner (§ 872.3560)

(1) *Identification.* An OTC denture reliner is a device consisting of a material such as plastic resin that is intended to be applied as a permanent coating or lining on the base or tissue-contacting surface of a denture. The device is intended to replace a worn denture lining and may be available for purchase over the counter.

(2) *Summary of data.* The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device. The Panel also based its recommendation on statements that further studies are necessary to determine the safety and effectiveness of this device (Ref. 26).

(3) *Risks to health.*

- Bone degeneration—Use of the device may cause alteration in the vertical dimension of a denture and result in bone degeneration in the upper and lower jaw.
- Carcinomas—Long-term irritation or oral tissues caused by incorrect vertical dimension may cause formation of carcinomas.

Root Canal Filling Resin (§ 872.3820)

(1) *Identification.* A root canal filling resin is a device composed of material, such as methylmethacrylate, intended for use during endodontic therapy to fill the root canal of a tooth. If chloroform is used as an ingredient in the device, the device is in class III. Otherwise, it is in class I.

(2) *Summary of data.* The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, root canal filling resins in the practice of dentistry.

(3) *Risks to health.* FDA believes that root canal fillings containing chloroform present a risk of carcinogenicity.

5. Gastroenterology-Urology Devices

Colonic Irrigation System (§ 876.5220)

(1) *Identification.* A colonic irrigation system is a device intended to instill water into the colon through a nozzle inserted into the rectum to cleanse (evacuate) the contents of the lower colon. The system is designed to allow evacuation of the contents of the colon during the administration of the colonic irrigation. The device consists of a container for fluid connected to the nozzle via tubing and includes a system which enables the pressure, temperature, or flow of water through the nozzle to be controlled. The device may include a console-type toilet and necessary fittings to allow the device to be connected to water and sewer pipes. The device may use electrical power to heat the water. This device does not include the enema kit (§ 876.5210). When the device is intended for colon cleansing when medically indicated, such as before radiologic or endoscopic examinations, it is in class II. When the device is intended for other uses, including colon cleansing routinely for general well being, it is in class III.

(2) *Summary of data.* The members of the Gastroenterology-Urology Devices Classification Panel based their recommendation on the Panel members' personal knowledge of, and clinical experience with, the device.

(3) *Risks to health.*

- Tissue burns—The temperature-regulating mechanism for the water heater used in this device may allow overheating of the water which is delivered to the patient's colon, resulting in tissue burns.
- Perforation of the colon—Excessive water pressure delivered by this device could result in perforation of the wall of the colon.
- Colon irritation—Excessive or inappropriate use of this device may result in irritation of the colon.
- Electrical injury—Improper design, construction, or a malfunction of the device could result in electrical injury to the patient or operator.

Implanted Electrical Urinary Continence Device (§ 876.5270)

(1) *Identification.* An implanted electrical urinary continence device is a device intended for treatment of urinary incontinence that consists of a receiver implanted in the abdomen with electrodes for pulsed-stimulation that are implanted either in the bladder wall or in the pelvic floor, and a battery-powered transmitter outside the body.

(2) *Summary of data.* The Panel based its recommendation on a review of the historical data concerning implanted electrical urinary continence devices. Halverstadt and Parry (Ref. 29) discussed several unsolved problems inherent in the electrical stimulation of the bladder. These problems include breakage of lead wires, the cumbersome nature of the electrodes, risk of preformation by wires of the bladder cavity, difficulty of obtaining uniform contraction of the detrusor muscle, and the spread of the stimulus to neighboring tissues producing abdominal pain. The Panel also based its recommendation on the experimental nature of these devices and on the lack of adequate medical literature and experience supporting their safety and effectiveness.

(3) *Risks to health.*

- Adverse tissue reaction and erosion—Defects in the design or the construction of the device, or lack of biocompatibility of the materials used in the device, may cause an adverse tissue reaction and tissue erosion adjacent to the device.
- Infection—Defects in the design or construction of the device preventing adequate cleaning or sterilization, or defects in packaging or processing of a device sold as sterile, may allow pathogenic organisms to be introduced and cause an infection in the patient.
- Tissue damage—Defects in the electrode wires may lead to their breakage and consequent tissue damage.
- Abdominal and leg pain—The amount of stimulation by the electrodes necessary to obtain adequate bladder stimulation may lead to abdominal and leg pain.
- Electrical injury—Improper design, construction, or malfunction of the device could result in electrical injury to the patient or the operator.

6. General Hospital and Personal Use Devices

Chemical Cold Pack Snakebite Kit (§ 880.5760)

(1) *Identification.* A chemical cold pack snakebite kit is a device consisting of a chemical cold pack and tourniquet used for first-aid treatment of snakebites.

(2) *Summary of data.* The members of the General Hospital and Personal Use Devices Classification Panel based their recommendation on the Panel members' personal knowledge of, and clinical experience with, the device and on several articles in the literature that evaluate different types of treatment for snakebites (Refs. 30, 31, and 32). Most of the literature showed that cryotherapy (the use of cold therapy for the treatment of snakebites) is inappropriate. Clement and Pietrusko found high rates of amputation, local tissue destruction, and prolonged disability in patients treated by this method (Ref. 30). A National Academy of Sciences report stated that doubts about the safety and effectiveness of short-term cold therapy for treatment of snakebites have not been resolved (Ref. 31). The report also stated that the use of cold therapy for a long period of time appears to be dangerous. Watt reported that, among children who had to have amputations because of snakebites, 75 percent had received cryotherapy for the snakebites (Ref. 32).

(3) *Risks to health.*

- Local tissue damage—Exposure of tissue to cold temperatures for long periods of time can freeze the tissue and cause local tissue damage, sometimes necessitating limb amputations.

7. Neurological Devices

Rheoencephalograph (§ 882.1825)

(1) *Identification.* A rheoencephalograph is a device used to estimate a patient's cerebral circulation (blood flow in the brain) by electrical impedance methods with direct electrical connections to the scalp or neck area.

(2) *Summary of data.* The members of the Neurological Devices Classification Panel referenced the literature on this device (Refs. 43 through 46). Some of the panel members witnessed its clinical application. Dr. William Jarzembski, one of the Panel members, provided some detailed information concerning his research on this device.

(3) *Risks to health.*

- Erroneous clinical conclusions—The device may indicate that cerebral circulation is normal, when in fact it may be very abnormal.
- Electrical shock—Excessive current could cause injury, and malfunction of the device could result in an electrical shock.
- Skin reaction—The electrode materials and conductive media may irritate the skin.

Intravascular Occluding Catheter (§ 882.5150)

(1) *Identification.* An intravascular occluding catheter is a catheter with an inflatable or detachable balloon tip that is used to block a blood vessel to treat malformations, e.g., aneurysms (balloonlike sacs formed on blood vessels) of intracranial blood vessels.

(2) *Summary of data.* The Panel members based their recommendation on the lack of data available on this device. Although the Panel members were aware of the use of this device in investigational programs, they believed that there is not enough information or data to demonstrate that its safety and effectiveness can be adequately controlled by means other than premarket approval.

(3) *Risks to health.*

- Infarction of nervous tissue—If the catheter is not controllable or if the balloon or tip should fail or unexpectedly come loose from the catheter, use of the device may cause infarction of nervous tissue (death of nervous tissue due to stoppage of circulation) and other serious injury to the brain and other nervous tissue.
- Hemorrhage—The catheter or improper balloon inflation may injure a blood vessel and result in bleeding.
- Thrombogenesis—Blood coagulation and clotting may result if the material of which the catheter is constructed is not compatible with blood.

Implanted Spinal Cord Stimulator for Bladder Evacuation (§ 882.5850)

(1) *Identification.* An implanted spinal cord stimulator for bladder evacuation is an electrical stimulator used to empty the bladder of a paraplegic patient who has a complete transection of the spinal cord and who is unable to empty his or her bladder by reflex means or by the intermittent use of catheters. The stimulator consists of an implanted receiver with electrodes that are placed on the conus medullaris portion of the patient's spinal cord and an external transmitter for transmitting the stimulating pulses across the patient's skin to the implanted receiver.

(2) *Summary of data.* The Panel members based their recommendation on information supplied by Dr. Blaine Nashold, one of the Panel members, who had been one of the primary individuals engaged in the development of the device (Ref. 37). Dr. Nashold reported that he had implanted the device in a small group of paraplegic patients. Six of the 12 patients had been successfully emptying their bladders by this method for 5 years (Ref. 37).

(3) *Risks to health.*

- Injury to neural tissue—Tissue fibrosis may develop around the electrode on the spinal cord and cause a diminished response to the electrical stimulus.
- Tissue toxicity—The implanted stimulator, lead wires, or electrodes may contain material that is not biocompatible.
- Cerebrospinal fluid leakage—The fluid that surrounds the spinal cord might leak out around the receiver wires.

8. Obstetrical and Gynecological Devices

Obstetric Data Analyzer (§ 884.2050)

(1) *Identification.* An obstetric data analyzer is a device designed to interpret fetal status during labor and to warn of possible fetal distress by analyzing electronic signal data obtained from fetal or maternal electronic or other monitors. This generic type of device includes signal analysis and display equipment, electronic interfaces for other equipment, and power supplies and component parts.

(2) *Summary of data.* FDA reviewed the Obstetrical and Gynecological Devices Classification Panel's recommendation and obtained additional information and data describing the application of automatic analysis techniques to the determination of possible fetal distress. The technique was new in 1978, and very little definitive information was available. It was reasonable to expect that as algorithms were developed and tested, confidence in automatic analysis would increase (Ref. 38).

(3) *Risks to health.*

- Electrical shock—Malfunction of the device could result in electrical shock to the patient.
- Misdiagnosis—Inadequate design or calibration of the device could lead to the generation of inaccurate diagnostic data. If inaccurate diagnostic data is used in managing the patient, the physician may prescribe a course of treatment which places the fetus and patient at risk unnecessarily.

Fetal Electroencephalographic Monitor (§ 884.2620)

(1) *Identification.* A fetal electroencephalographic monitor is a device used to detect, measure, and record in graphic form (by means of one or more electrodes placed transcervically on the fetal scalp during labor) the rhythmically varying electrical skin potentials produced by the fetal brain.

(2) *Summary of data.* The Panel based its recommendation on the fact that fetal electroencephalographic monitoring was a relatively new method of brain function evaluation during birth. Its sensitivity and applicability in the field of the fetal brain research remained to be established because clinical experience was too limited to ascertain its safe and effective use. Rosen and Peltzman, who were performing the major research on this device, were continuing with further controlled studies (Refs. 39 and 40).

(3) *Risks to health.*

- Electrical shock—Malfunction of the device could result in electrical shock to the patient.
- Misdiagnosis—Inadequate design of the device can lead to the generation of inaccurate diagnostic data. If inaccurate diagnostic data are used in managing the patient, the physician may prescribe a course of treatment that places the fetus and patient at risk unnecessarily.
- Adverse tissue reaction—Material in the device could result in a systemic or local tissue reaction when the device comes in contact with the patient.
- Infection—If the device is not properly sterilized, it may introduce microorganisms that could cause infection.

Fetal Scalp Clip Electrode and Applicator (§ 884.2685)

(1) *Identification.* A fetal scalp clip electrode and applicator is a device designed to establish electrical contact between fetal skin and an external monitoring device by means of pinching skin tissue with a nonreusable clip. This device is used to obtain a fetal electrocardiogram. This generic type of device may include a clip electrode applicator.

(2) *Summary of data.* The Panel based its recommendation on personal knowledge of, and experience with, the device. Information presented to the Panel indicated a 1 to 2 percent infection rate for newborns on whom fetal scalp clip electrodes were used (Ref. 41). The Panel noted that this device is in limited use in the United States because the circular (spiral) electrode, preferred because it is easier to apply and remove, is available.

(3) *Risks to health.*

- Adverse tissue reaction—Material in the device could cause a local tissue or systemic reaction when the device comes in contact with the fetus.
- Infection—If the device is not properly sterilized, it may introduce microorganisms that could cause infection.
- Tissue damage—Poor design or incorrect application could result in scalp injury when the device pinches the fetal scalp.

Expandable Cervical Dilator (§ 884.4250)

(1) *Identification.* An expandable cervical dilator is an instrument with two handles and two opposing blades used manually to dilate (stretch open) the cervix.

(2) *Summary of data.* The Panel based its recommendation on personal knowledge of, and experience with, the device. The Panel members' experience with the expandable cervical dilator had been that its leverage is very difficult to control in such a way that the cervix is dilated evenly.

(3) *Risks to health.*

- Laceration of the cervix—Appropriate design and materials are necessary to prevent trauma to the cervix and possible subsequent infertility.
- Adverse tissue reaction—Material in the device could cause a local tissue or systematic reaction when the device comes in contact with the patient.
- Infection—If the device is not properly sterilized, it may introduce microorganisms that could cause infection.

Vibratory Cervical Dilator (§ 884.4270)

(1) *Identification.* A vibratory cervical dilator is a device designed to dilate the cervical os by stretching it with a power-driven vibrating probe head. The device is used to gain access to the uterus or to induce abortion, but is not to be used during labor when a viable fetus is desired or anticipated.

(2) *Summary of data.* The Panel based its recommendation on experience with, and personal knowledge of, the device. The Panel reviewed the literature on the device and in a typical study of 50 patients, there were 3 failures to dilate and 3 patients with cervical tears (Ref. 42). The Panel believed that more data concerning these types of dilators were necessary before standards could be written.

(3) *Risks to health.*

- Laceration of the cervix—Appropriate design and material are necessary to prevent trauma to the cervix and possible subsequent infertility.
- Electrical shock—Malfunction of the device could result in electrical shock to the patient.
- Adverse tissue reaction—Material in the device could cause a systemic or local tissue reaction when the device comes in contact with the patient.
- Infection—If the device is not properly sterilized, it may introduce microorganisms that could cause infection.

Metreurynter-Balloon Abortion System (§ 884.5050)

(1) *Identification.* A metreurynter-balloon abortion system is a device used to induce abortion. The device is inserted into the uterine cavity, inflated, and slowly extracted. The extraction of the balloon from the uterus causes dilation of the cervical os. This generic type of device may include pressure sources and pressure controls.

(2) *Summary of data.* The Panel based its recommendation on the Panel members' familiarity with the device and a review of the literature on this device. Although journal articles discussing the use of this device in Japan indicate that it may be safe and effective (Refs. 43 and 44), the Panel believed that these data were inconclusive and that more studies needed to be performed to establish the performance characteristics of the device. A standard textbook mentioned that the device is rarely used because of potential trauma or infection, unpredictability, and the risk of a live-born fetus (Ref. 45).

(3) *Risks to health.*

- Infection—If the device is not properly sterilized, it may introduce microorganisms that could cause infection.
- Trauma, laceration, hemorrhage, and perforation—Poor design of the device could cause uneven dilation of the cervix causing injury to the patient.
- Adverse tissue reaction—Material or substances in the device could cause a systemic or local tissue reaction when the device comes in contact with the patient's cervix.
- Unnecessary medical procedures—Loss of the device could result in an otherwise unnecessary medical procedure to recover the device from the uterus.

Abdominal Decompression Chamber (§ 884.5225)

(1) *Identification.* An abdominal decompression chamber is a hoodlike device used to reduce pressure on the pregnant patient's abdomen for the relief of abdominal pain during pregnancy or labor.

(2) *Summary of data.* The Panel based its recommendation on personal knowledge of, and experience with, this device. The Panel considered this device to be ineffective. Additionally, the Panel found no literature available to supply adequate clinical data supporting any claim of effectiveness. The consensus of the Panel was that any data that might be developed would support an action to ban the device because its risks outweigh its benefits.

(3) *Risks to health.*

- Difficult patient management—The device is cumbersome and covers the abdominal area of the patient, thus blocking the physician from examining the patient.
- Supine hypotension—Because the patient is required to lie on her back, the possibility of induced low blood pressure and consequent complications exists.

9. Orthopedic Devices

Ankle Joint Metal/Polymer Non-Constrained Cemented Prosthesis (§ 888.3120)

(1) *Identification.* An ankle joint metal/polymer non-constrained cemented prosthesis is a device intended to be implanted to replace an ankle joint. The device limits minimally (less than normal anatomic constraints) translation in one or more planes. It has no linkage across-the-joint. This generic type of device includes prostheses that have a tibial component made of alloys, such as cobalt-chromium-molybdenum, and a talar component made of ultra-high molecular weight polyethylene, and is limited to those prostheses intended for use with bone cement (§ 888.3027).

(2) *Summary of data.* The members of the Orthopedic Devices Classification Panel based their recommendation on the Panel members' personal knowledge of the device and on the available medical literature. According to Freeman (Ref. 47), "It is still too early to say whether this operation (total ankle joint replacement) offers any advantages over arthrodesis * * *. It would appear a comfortable mobile ankle can be produced but how reliably this can be done and how long the results will last is impossible to say." The only available clinical study on the device at the time of the Panel meeting had been done by Newton (Ref. 48). From 1973 to 1978, 50 patients had this prosthesis implanted. There have been 20 (40 percent) reported failures. FDA believed these data are insufficient to establish the safety and effectiveness of ankle joint metal/polymer non-constrained prostheses.

(3) *Risks to health.*

- Loss or reduction of joint function—Improper design or inadequate mechanical properties of the device, such as its lack of strength and resistance to wear, may result in a loss or reduction of joint function due to excessive wear, fracture, deformation of the device, or loosening of the device in the surgical cavity.
- Adverse tissue reaction—Inadequate biological or mechanical properties of the device, such as its lack of biocompatibility and resistance to wear, may result in an adverse tissue reaction due to dissolution or wearing away from the surfaces of the device and the release of materials from the device to the surrounding tissues and systemic circulation.
- Infection—The presence of the prosthesis within the body may lead to an increased risk of infection.

Elbow Joint Humeral (Hemi-Elbow) Metallic Uncemented Prosthesis (§ 888.3180)

(1) *Identification.* An elbow joint humeral (hemi-elbow) metallic uncemented prosthesis is a device intended to be implanted, made of alloys such as cobalt-chromium-molybdenum, that is used to replace the distal end of the humerus formed by the trochlea humeri and the capitulum humeri. The generic type of device is limited to prostheses intended for use without bone cement (§ 888.3027).

(2) *Summary of data.* The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device. The only available clinical data at the time of the Panel meeting were the results of 2 surgeons who had implanted 18 devices over a 10-year period (Ref. 49). An earlier publication (Ref. 50) discussed the clinical results in what appeared to be the first 10 of these 18 implantations. The devices had been implanted in nine patients (one patient had prostheses implanted bilaterally). These patients were evaluated 1 to 7 years later and only four patients (44 percent) had stable, pain-free elbows with a functional range of motion. New bone growth restricted or totally blocked elbow joint motion in three patients. The device was removed in two other patients; because of joint pain and swelling in one; and because the device had dislocated and was eroding through the skin in the other.

(3) *Risks to health.*

- Loss or reduction of joint function—Improper design or inadequate mechanical properties of the device, such as its lack of strength and resistance to wear, may result in the loss or reduction of joint function due to excessive wear, fracture, deformation of the device, or loosening of the device in the surgical cavity.
- Adverse tissue reaction—Inadequate biological or mechanical properties of the device, such as its lack of biocompatibility and resistance to wear, may result in an adverse tissue reaction due to dissolution or wearing away from the surfaces of the device and release of materials from the device to the

surrounding tissues and systemic circulation.

- Infection—The presence of the prosthesis within the body may lead to an increased risk of infection.

Finger Joint Metal/Metal Constrained Uncemented Prosthesis (§ 888.3200)

(1) *Identification.* A finger joint metal/metal constrained uncemented prosthesis is a device intended to be implanted to replace a metacarpophalangeal (MCP) or proximal interphalangeal (finger) joint. The device prevents dislocation in more than one anatomic plane and consists of two components which are linked together. This generic type of device includes prostheses made of alloys, such as cobalt-chromium-molybdenum, or protheses made from alloys and ultra-high molecular weight polyethylene. This generic type of device is limited to prostheses intended for use without bone cement (§ 888.3027).

(2) *Summary of data.* The only finger joint metal/metal constrained uncemented prosthesis discussed in the literature at the time of the Panel meeting was a two-pronged stainless steel hinged prostheses that was developed by Flatt for use in the MCP and the proximal interphalangeal (PIP) joints of the fingers.

Flatt presented clinical results with the Flatt finger prosthesis in a series of publications over a 12-year period (Refs. 51 through 56). Thirty-one prostheses had been implanted for 6 months or more (6 months to 34 months); 23 in the PIP joint and 8 in the MCP joint. In the earliest of these reports, Flatt noted that despite early encouraging clinical results, the long-term outlook for the device did not look favorable. In particular, Flatt noted that the bone absorption that occurs around the neck of the prosthesis may possibly lead to obstruction of flexion. Flatt also noted that possible complications from use of the device might be: (a) Bone erosion in patients in whom the intramedullary prongs have been forced together in the medullary canal, and (b) metal fatigue and fracture of the intramedullary prongs.

Subsequent publications by Flatt (Refs. 55 and 56) showed that the predicted complications did, in fact, occur. Flatt and Ellison (Ref. 55) reported on the implantation of 242 prostheses (167 in the MCP joint and 75 in the PIP joint) with an average followup of 6.2 years (range 1 to 12 years). Twenty-six (10.7 percent) of the prostheses (15 MCP and 11 PIP) had to be removed for the following reasons: Periarticular fibrosis (bone resorption) and settling, 14; failure (i.e., fracture) of both intramedullary prongs, 2; failure of the screw holding the hinge together, 2; breakdown of the skin over the prosthesis, 5; and infection, 3. The authors reported that of the prostheses that required removal, more than half were removed because of settling within the recipient bones. Bone absorption around the intramedullary prongs, scarring, or heterotrophic bone formation around the hinge caused sufficient mechanical difficulties to necessitate removal of the prosthesis. Flatt and Ellison noted that the gradually progressing periarticular fibrosis (bone resorption) resulted in a decreased range of joint motion and was related to very active use of the hand.

Girzados and Clayton (Ref. 57) reported on the implantation of 23 Flatt finger prostheses in 11 patients with an average followup of 44 months (range 24 to 73 months). Of the 23 prostheses implanted, 11 were in the MCP joints of the fingers, 8 were in the PIP joints of the thumb. Bone absorption around the neck and stems of the prosthesis occurred in 16 of the 23 (69 percent) joints. Six prostheses (26 percent) were rated as poor results: Three had no motion postoperatively; one was grossly unstable; and two were implanted in a patient with active rheumatoid disease who, over a period of 64 months, had intermittent swelling and pain over the joints that had been replaced with the prostheses. The authors reported that "good" or "fair" results were obtained in 13 (56 percent) of the joints. However, the number of patients having pain-free stable joints with a useful range of motion (defined as "good") as opposed to those with limited motion, minimal pain, and instability (defined as "fair") could not be determined.

Problems associated with the Flatt finger prosthesis have been recognized by many authors (Refs. 58 through 63). Several authors (Refs. 58 and 59) reported that these prostheses have not been generally accepted because of the accompanying bone resorption. McFarland (Ref. 60) reported that the Flatt prosthesis had been only moderately successful, that complications were frequent and included bone overgrowth with loss of motion, migration of the prosthesis due to bone erosion, and metal failures (i.e., device fractures). Goldner and Urbaniak (Ref. 62) and Smith and Broudy (Ref. 63) noted that the bone resorption and subsequent migration of the devices was caused by the use of a rigid material in osteoporotic bone. Smith and Broudy (Ref. 63) also noted that the intramedullary prongs frequently migrate through the cortex and occasionally the hinge would break or the overlying skin would ulcerate, causing tendon rupture and infection.

(3) *Risks to health.*

- Loss or reduction of joint function—Improper design or inadequate mechanical properties of the device, such as its lack of strength and resistance to wear, may result in a loss or reduction of joint function due to excessive wear, fracture, deformation of the device, or loosening of the device in the surgical cavity.
- Adverse tissue reaction—Inadequate biological or mechanical properties of the device, such as its lack of biocompatibility and resistance to wear, may result in an adverse tissue reaction due to dissolution or wearing away from the surfaces of the device and the release of materials from the device to the surrounding tissues and systemic circulation.
- Infection—The presence of the prosthesis within the body may lead to an increased risk of infection.

Finger Joint Metal/Metal Constrained Cemented Prosthesis (§ 888.3210)

(1) *Identification.* A finger joint metal/metal constrained cemented prosthesis is a device intended to be implanted to replace a MCP (finger) joint. This device prevents dislocation in more than one anatomic plane and has components which are linked together. This generic type of device include prosthesis that are made of alloys, such as cobalt-chromium-molybdenum, and is limited to those prosthesis intended for use with bone cement (§ 888.3027).

(2) *Summary of data.* Two types of these prostheses were discussed in the literature: (a) The Link prostheses, a metallic hinge intended to replace the MCP joint of a finger or thumb; and (b) the Biomedical Laboratories of the University of Cincinnati (BLUC) prostheses, a hinged metallic prostheses intended to replace the MCP joint of the thumb.

Devas and Shah (Refs. 64 and 65) reported on the implementation of 51 Link prostheses in 25 patients with an average postoperative followup of 4 years (range 2 to 6 years). In 15 (30 percent) of these implantations, the patient had persistent pain in the joint and what was described as a useless finger. The authors believed that the proportion of patients with pain was far too large to make the treatment method freely available. They noted that the main cause of failure was due to loosening of the prostheses with disruption (erosion) of the bone. They also noted that in most of the joints with good and fair results the prosthesis had become loose but that the patients were free from symptoms at the time of evaluation. The authors believed that prosthesis loosening may have been caused by fixation of the components by injecting the cement into the metacarpal and phalangeal bone shafts, and it was noted that a modified prosthesis with a different technique of insertion was being considered (Ref. 65). Two papers (Refs. 66 and 67) described the design and testing of the BLUC thumb prostheses. Clinical results, however, were not presented. FDA believed that the data available on the devices, the clinical results of the use of the devices in 25 patients with a reported failure rate of 30 percent, and the recommendation by the authors that the procedure not be made freely available, did not establish the long-term safety and effectiveness of finger joint metal/metal constrained prostheses.

(3) *Risks to health*

- Loss or reduction of joint function—Improper design or inadequate mechanical properties of the device, such as its lack of strength and resistance to wear, may result in a loss or reduction of joint function due to excessive wear, fracture, deformation of the device, or loosening of the device in the surgical cavity.
- Adverse tissue reaction—Inadequate biological or mechanical properties of the device, such as its lack of biocompatibility and resistance to wear, may result in an adverse tissue reaction due to dissolution or wearing away from the surfaces of the device and the release of materials from the device to the surrounding tissues and systemic circulation.
- Infection—The presence of the prosthesis within the body may lead to an increased risk of infection.

Finger Joint Metal/Polymer Constrained Cemented Prosthesis (§ 888.3220)

(1) *Identification.* A finger joint metal/polymer constrained cemented prosthesis is a device intended to be implanted to replace a MCP or proximal interphalangeal (finger) joint. The device prevents dislocation in more than one anatomic plane, and consists of two components which are linked together. This generic type of device includes prostheses that are made of alloys, such as cobalt-chromium-molybdenum, and ultra-high molecular weight polyethylene, and is limited to those prostheses intended for use with bone cement (§ 888.3027).

(2) *Summary of data.* Clinical results on three designs of finger joint polymer constrained prostheses were presented in the literature: The Calnan-Nicolle prosthesis, intended for use in the MCP and PIP joints for the fingers; the Niebauer prosthesis also intended for use in the MCP and PIP joints of the fingers; and the Swanson prosthesis intended for use in the MCP and PIP joints of the fingers and for the MCP joint of the thumb.

a. *Calnan-Nicolle prosthesis.* This device has two components: An across-the-joint component having intramedullary stems and a flexible hinge made of polypropylene, and a silicone rubber sleeve which encapsulates the flexible hinge portion of the device (Ref. 72). Griffiths and Nicolle (Ref. 73) reported on the clinical results 8 to 37 months (average of 20 months) after implantation of the Calnan-Nicolle device in 112 MCP joints in 31 patients. Complete relief from pain was obtained in four (13 percent) patients. There was much improvement over preoperative pain status in 13 (42 percent), moderate pain relief in 10 (32 percent), and little pain relief in 4 (13 percent) patients. These authors reported that a deterioration in the performance of the prosthesis occurred in up to half of the patients between 1 and 2 years after insertion of the prosthesis; and that part of the deterioration in function was due directly to mechanical failure of the prosthesis. The range of joint motion had deteriorated over time in 33 of the 40 (82.5 percent) hands on which surgery was performed. Joint deformity was "corrected and held" in 10 to 31 hands (32 percent), was corrected initially but recurred in 14 of 31 (45 percent) hands, and worsened in 7 of 31 (23 percent) hands. The silicone capsule (sleeve) had fractured in 31 of the 112 prostheses (28 percent). The polypropylene stems had fractured in five joints (5 percent). Nicolle (Ref. 71) noted that time and experience had shown that the polypropylene hinge of the Calnan-Nicolle prosthesis does not appear to be strong enough to withstand fully the compression and torsional stresses that may occur in the use of the hand.

b. *Niebauer prosthesis.* This device consists of a single, flexible, across-the-joint component. The intramedullary stems and the flexible hinge portion of the device are made of silicone to allow tissue penetration and fixation of the stems. Beckenbaugh et al. (Ref. 75) reported on the clinical results 12 to 65 months (average 32 months) after implantation in the MCP joints of 68 Niebauer prostheses and found a fracture rate of the device of 38.2 percent (26 devices), recurrence of clinical deformity in 44.1 percent (30 devices) and recurrence of pain in 2 percent. Goldner et al. (Ref. 76) reported a fracture rate of 29.7 percent in 37 prostheses implanted for 6.5 years and 17.5 percent fracture rate in 143 prostheses implanted 4 to 6 years. These authors believe that the silicone-polyester material used in the device may absorb lipids and become brittle, and that eventual fracture of the prosthesis is a possibility, but that fracture does not preclude a good functional result. Goldner and Urbaniak (Ref. 77) evaluated 103 patients over a 4-year period. Pain was relieved or greatly diminished postoperatively in all but 8 of the 103 patients. The average active range of motion in these patients was 51 degrees. The range of motion was noted to increase up to about 1 year postoperatively; and then thought to decrease slightly, possibly due to enlarged bony outgrowths from the surface of the bone and impingement of peripheral bone on the hinge of the device. In two (2 percent) of patients, the device had fractured, which was accompanied by deformity and a moderate amount of pain.

Hagert (Ref. 78) conducted X-ray examinations on 41 joints with Niebauer implants. This author reported that of the 41 prostheses studied, 26 (63.4 percent) were found to be damaged (i.e., cracked within the implant midsection, fragmented at the midsection, or fractured at the hinge), 1 to 36 months postoperatively. This author believed that the Niebauer implant might be too weak to withstand forces in the MCP joints, and that a possible contributing factor was the use of materials (polyester fiber and silicone rubber) with differing elasticity. This author noted that the Niebauer implant was reported to have withstood 100 million flexions during mechanical tests bending it around a fixed axis, but not exposing it simultaneously to shearing type forces which are present in the MCP joint. These shearing forces were reportedly most probably responsible for the deformation of the implant and the subsequent damage observed. Niebauer and Landry (Ref. 79) reported that destruction of the bone around the hinge of the device had occurred in a few cases and that this atrophy may be the result of pressure from the prosthesis. In an evaluation by X-ray of the 41 Niebauer prostheses, Hagert (Ref. 78) observed bone resorption in 23 of the 41 joints (56 percent). The cortex of the bone was penetrated in 13 (32 percent) of these joints. It was reported that the observed erosion of the bone is most likely caused by motion of the intramedullary stems within the medullary cavity, and is exaggerated by the rough polyester surface of the device.

c. *Swanson prosthesis.* This device is made entirely of silicone rubber and is designed to act as an internal mold, maintaining joint alignment, becoming encapsulated and stabilized by fibrous tissue, and gliding or moving within the medullary cavity rather than being fixed to the bone (Ref. 80). A number of reports (Refs. 75 and 80 through 86) were found describing the use of the Swanson prostheses in the MCP joints of the fingers, but few reports (Refs. 87 through 90) were available describing the use of this device in the MCP joint of the thumb, or the PIP joints of the fingers. In 1976, it was reported that a new "high performance" silicone elastomer material had been developed for use in the Swanson prosthesis. With the exception of one report (Ref. 90), the available clinical data were obtained using prostheses made from the "conventional" silicone elastomer. Fracture of implants made of the "conventional" silicone elastomer appears to be the most frequently reported failure. Beckenbaugh et al. (Ref. 75) reported that of 186 Swanson prostheses implanted in the MCP joint for an average of 32 months (range 12 months to 65 months), 26.3 percent (49) had fractured. Hagert et al. (Ref. 82) reported that of 104 Swanson implants evaluated, 25 percent (26) had failed, either by cracking or fragmenting and fracturing within the followup period of 1.5 to 5 years. Mannerfelt and Anderson (Ref. 83) reported a fracture rate of 2.8 percent in 144 joints evaluated 1.5 to 3.5 years (average 2.5 years) after implantation. Ferlic et al. (Ref. 84) reported a fracture rate of 9 months (average 2.3 years) after implantation. Swanson (Ref. 80) reported the lowest rate of fracture, 0.88 percent, in a field clinic series involving over 3,000 implants with a followup of from 6 to 30 months.

The effects of fracture of the device on the clinical results were evaluated by several authors. Aptekar et al. (Ref. 85) described the occurrence of detritic synovitis (inflammation of the synovial tissue) due to shards of silicone rubber found in relation to a broken prosthesis. Beckenbaugh et al. (Ref. 75) noted that recurrence of deformity was associated with implant fracture, i.e., ulnar drift, in 14 percent; weakness or instability in 21 percent; hyperextension in 11 percent; and some clinical deformities in 43 percent; but that while the recurrence of deformity implied that soft tissue balance was not present after the implant fractured, it was not clear whether the imbalance caused the fracture or developed because of it.

Hagert (Ref. 86) believed that the increased displacement, i.e., ulnar deviation, noted in some joints with fractured implants, may indicate insufficiency of the fibrous capsule surrounding the implant to restrain the forces occurring at the MCP joint. This pressure, combined with movement of the implant within the medullary canal was reportedly found to cause a moderately progressive bone resorption throughout the followup period in all of the 36 joints examined. Resorption was observed around the midsection of the prosthesis where the implant was in close contact with bone and around the intramedullary stems of the device. Erosion of bone around the midsection of the device led to various degrees of migration of the device in 28 out of 36 (78 percent) of the joints examined. The author found that decreased joint flexion was observed due either to the distal migration of the implant or a growing volar bony spur in 13 out of the 39 (33 percent) joints examined. He concluded that the design of the device may be insufficient to fully restrain the volarly and proximally directed forces in the MCP joint and the serious decrease of flexion. Hagert et al. (Ref. 82) reported that although it is generally accepted that silicone rubber absorbs lipids and other substances, the effects on material changes and degradation is not adequately known. Weightman et al. (Ref. 87) noted that lipid absorption could contribute to mechanical failure of the prostheses, as chemical deterioration is known to be a prime initiator of fatigue failures of polymers. Other clinical results have been reported in the literature (Refs. 80, 81, 87, and 89) on the use of this prosthesis in large numbers of patients. These results were very similar to those summarized previously.

(3) *Risks to health.*

- Loss or reduction of joint function—Improper design of inadequate mechanical properties of the device, such as its lack of strength and resistance to wear, may result in a loss or reduction of joint function due to excessive wear, fracture, deformation of the device, or loosening of the device in the surgical cavity.

- Adverse tissue reaction—Inadequate biological or mechanical properties of the device, such as its lack of biocompatibility and resistance to wear, may result in an adverse tissue reaction due to dissolution or wearing away from the surfaces of the device and the release of materials from the device to the surrounding tissues and systemic circulation.

- Infection—The presence of the prosthesis within the body may lead to an increased risk of infection.

Hip Joint Metal Constrained Cemented or Uncemented Prosthesis (§ 888.3300)

(1) *Identification.* A hip joint metal constrained cemented or uncemented prosthesis is a device intended to be implanted to replace a hip joint. The device prevents dislocation in more than one anatomic plane and has components that are linked together. This generic type of device includes prostheses that have components made of alloys, such as cobalt-chromium-molybdenum, and is intended for use with or without bone cement (§ 888.3027). This device is not intended for biological fixation.

(2) *Summary of data.* The agency has obtained data and information describing the use of hip joint metal constrained prostheses. Sivash (Ref. 91) reported on implantation in 164 patients; followup time was 1 to 9 years. Breakage of the prosthesis was reported in 13 (8 percent) of the patients. Because of the lack of adequate data to demonstrate the safety and effectiveness of these implanted devices, FDA believed that use of the hip joint metal constrained prosthesis presents an unreasonable risk of illness or injury.

(3) *Risks to health.*

- Loss or reduction of joint function—Improper design or inadequate mechanical properties of the device, such as its lack of strength and resistance to wear, may result in a loss or reduction of joint function due to excessive wear, fracture, deformation of the device, or loosening of the device, or loosening of the device in the surgical cavity.
- Adverse tissue reaction—Inadequate biological or mechanical properties of the device, such as its lack of biocompatibility and resistance to wear, may result in an adverse tissue reaction due to a dissolution or wearing away from the surfaces of the device and the release of material from the device to the surrounding tissues and systemic circulation.
- Infection—The presence of the prosthesis within the body may lead to an increased risk of infection.

Hip Joint Metal/Polymer Constrained Cemented or Uncemented Prosthesis (§ 888.3310)

(1) *Identification.* A hip joint metal/polymer constrained cemented or uncemented prosthesis is a device intended to be implanted to replace a hip joint. The device prevents dislocation in more than one anatomic plane and has components that are linked together. This generic type of device includes prostheses that have a femoral component made of alloys, such

as cobalt-chromium-molybdenum, and an acetabular component made of ultra-high molecular weight polyethylene. This generic type of device is intended for use with or without bone cement (§ 888.3027). This device is not intended for biological fixation.

(2) *Summary of data.* The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device.

(3) *Risks to health.*

- Loss or reduction of joint function—Improper design or inadequate mechanical properties of the device, such as its lack of strength and resistance to wear, may result in a loss or reduction of joint function due to excessive wear, fracture, deformation of the device, or loosening of the device in the surgical cavity.
- Adverse tissue reaction—Inadequate biological or mechanical properties of the device, such as its lack of biocompatibility and resistance to wear, may result in an adverse tissue reaction due to dissolution or wearing away from the surfaces of the device and the release of materials from the device to the surrounding tissues and systemic circulation.
- Infection—The presence of the prosthesis within the body may lead to an increased risk of infection.

Hip Joint (Hemi-Hip) Acetabular Metal Cemented Prosthesis (§ 888.3370)

(1) *Identification.* A hip joint (hemi-hip) acetabular metal cemented prosthesis is a device intended to be implanted to replace a portion of the hip joint. This generic type of device includes prostheses that have an acetabular component made of alloys, such as cobalt-chromium-molybdenum. This generic type of device is limited to those prostheses intended for use with bone cement (§ 888.3027).

(2) *Summary of data.* The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device.

(3) *Risks to health.*

- Loss or reduction of joint function—Improper design or inadequate mechanical properties of the device, such as its lack of strength and resistance to wear, may result in a loss or reduction of joint function due to excessive wear, fracture, deformation of the device, or loosening of the device in the surgical cavity.
- Adverse tissue reaction—Inadequate biological or mechanical properties of the device, such as its lack of biocompatibility and resistance to wear, may result in an adverse tissue reaction due to dissolution or wearing away from the surfaces of the device and the release of materials from the device to the surrounding tissues and systemic circulation.
- Infection—The presence of the prosthesis within the body may lead to an increased risk of infection.

Hip Joint Femoral (Hemi-Hip) Trunnion-Bearing Metal/Polyacetal Cemented Prosthesis (§ 888.3380)

(1) *Identification.* A hip joint femoral (hemi-hip) trunnion-bearing metal/polyacetal cemented prosthesis is a two-part device intended to be implanted to replace the head and neck of the femur. This generic type of device includes prostheses that consist of a metallic stem made of alloys, such as cobalt-chromium-molybdenum, with an integrated cylindrical trunnion bearing at the upper end of the stem that fits into a recess in the head of the device. The head of the device is made of polyacetal (polyoxymethylene) and it is covered by a metallic alloy, such as cobalt-chromium-molybdenum. The trunnion bearing allows the head of the device to rotate on its stem. The prosthesis is intended for use with bone cement (§ 888.3027).

(2) *Summary of data.* The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device and on a presentation to the Panel. Dr. Ian Goldie (University of Goteborg) presented the results of several Norwegian studies with these prostheses. Dr. Goldie referred to Christiansen's series of 241 hips in which excellent results were obtained in 57 percent of the cases and good results in 33 percent. In this series, there were five infections, seven cases of loosening of the acetabular cup, two dislocations shortly after operation, two cases of femoral perforation, and three cases of heterotopic ossification. Dr. Goldie then presented the results of his own series of 61 patients. In the 19 patients with 2 years followup, and in the 28 patients with 6 months followup, there were no complications. However, in the remaining 14 patients with a followup of 1 year, there were the following complications: 2 dislocations between the head and the cup, 2 cases of heterotopic ossification, and 2 patients with inexplicable pain.

FDA sought additional data and information on the safety and effectiveness of these devices. A review of the medical literature revealed a disagreement regarding the resistance to wear of polyacetal materials. McKellop et al. (Ref. 92) reported that laboratory wear rates for polyacetal ranged from 70 percent lower than polyethylene to 540 percent higher. Dumbleton (Ref. 93) reported wear in the trunnion sleeve of the device and that polyacetal exhibits a low resistance to wear. Because of the potential problems involving its resistance to wear, the long-term effectiveness of this device is questionable. The initial investigator and his associates have been the primary users of this device. Long-term followup data are available only from the initial investigator. Clinical cases documenting effectiveness and safety of the device involve usage of less than 3 years.

(3) *Risks to health.*

- Loss or reduction of joint function—Improper design or inadequate mechanical properties of the device, such as its lack of strength and resistance to wear, may result in a loss or reduction in joint function due to excessive wear, fracture, deformation of the device components, or loosening of the device in the surgical cavity.
- Adverse tissue reaction—Inadequate biological or mechanical properties of the device, such as its lack of biocompatibility or resistance to wear, may result in an adverse tissue reaction due to dissolution or wearing away of the surfaces of the device and the release of materials from the device to the surrounding tissues and systemic circulation.
- Infection—The presence of a prosthesis within the body may lead to an increased risk of infection.

Knee Joint Femorotibial Metallic Constrained Cemented Prosthesis (§ 888.3480)

(1) *Identification.* A knee joint femorotibial metallic constrained cemented prosthesis is a device intended to be implanted to replace part of a knee joint. The device prevents dislocation in more than one anatomic plane and has components that are linked together. The only knee joint movement allowed by the device is in the sagittal plane. This generic type of device includes prostheses that have an intramedullary stem at both the proximal and distal locations. The upper and lower components may be joined either by a solid bolt or pin, an internally threaded bolt with locking screw, or a bolt retained by circlip. The components of the device are made of alloys, such as cobalt-chromium-molybdenum. The stems of the device may be perforated, but are intended to be implanted with a polymethylmethacrylate luting agent (bone cement).

(2) *Summary of data.* The Panel based its recommendation on the Panel members' personal knowledge of, and experience with, the device, and its

review of the medical literature. Results from using the device in more than 720 cases have been reported in the medical literature in the United States during the past 3 years (Refs. 94, 100, and 103). Reports in the medical literature exist that document use of the device in several thousand cases worldwide during the past 10 years. The Panel believed that this extensive clinical use has revealed the usual mechanical problems, implant loosening and settling. The Panel determined that the overall risks resulting from use of the prosthesis were no worse than the risks associated with major knee surgery without implantation of a prosthesis.

Of the 957 patients reviewed by the Panel who have had this prosthesis implanted and who were discussed in the worldwide medical literature (Refs. 94 through 105), 108 (11 percent) suffered implant failure, 233 (24 percent) of the cases had complications, and 104 (11 percent) had loosening of the prosthesis.

FDA sought additional data on the safety and effectiveness of this device. Kettelkamp (Ref. 105) reported that the failure rate for the device ranges from 5 percent to 24 percent for the hinged metal knee prosthesis, with a short followup time. Kettlekamp (Ref. 105) and Chand (Ref. 106) both believe that excessive forces may be applied to the intramedullary stem bone cement interface because the constrained prosthesis hinge prevents medial/lateral joint movement. Kettlekamp believes that if the stem loosens, the cement may rub away and destroy the surrounding bone, causing a larger cavity and making revision difficult or impossible.

Kettlekamp reviewed reports in the medical literature on use of 576 Walldius hinged knee prostheses. In one group of 144 implantations, complications occurred in 29 cases (13 percent). In the remaining 432 cases, 89 (20 percent) were classified as failures, 33 (7 percent) required reoperations, and 53 (12 percent) had loosening. Fractures occurred in 11 cases (2 percent) and deep infection was reported in 35 knees (8 percent). Kettlekamp reported that the incidence of complication increased with the length of reported followup. Brady and Garber (Ref. 103) reviewed results of implanting the Shiers design of this device in 288 knees. He reported poor results in 71 knees (24 percent), reoperation was required in 33 knees (11 percent), and loosening observed in 56 knees (19 percent). Brady stated that the major problems involved with use of these prosthesis are the absence of axial (medial) rotation, the necessary resection of large amounts of bone, and the creation of physiologic dead space.

Kettlekamp (Ref. 105) and Deburge et al. (Ref. 107) reported that the major problem with the Shiers design prosthesis is loosening. Deburge reported a loosening rate of 15 percent (22 patients) during a 5-year followup of the request of implanting the Guepar constrained knee prosthesis in 152 patients. However, less than half of these instances of device loosening were symptomatic (10 of 22 patients). Reoperations were performed on the 10 patients. Other authors (Ref. 100) believed that the rate of loosening of the prosthesis is higher, possibly around 80 percent, but that only a small percentage of those patients with device loosening are symptomatic.

Arden and Kamdar (Ref. 108) reported followup for 7 years on implantation of 193 Shiers design prostheses. They reported that 11 percent of the patients had aseptic loosening. Kaushal et al. (Ref. 109) reported followup examination of a series of 30 knees about 42 months following implantation of the prosthesis. The examination revealed that 13 knees (46 percent) had phlebothrombosis, 8 knees (11 percent) had asymptomatic loosening, 4 knees (5.4 percent) had deep infections, and 3 knees (4.3 percent) had symptomatic loosening. The major problems with use of the prosthesis were settling, loosening, and limitation on the range of joint motion allowed. In preliminary data, Van Camp et al. (Ref. 110) showed that stress loading appeared to cause mechanical loosening of the device.

Walker (Ref. 111) stated that the valgus angle of the knee was ignored in the older designs of this prosthesis. Walker said this design problem resulted in lateral stress on the intramedullary stems of the device. This theory was verified experimentally by Wagner and Bourgois (Ref. 112). Wagner and Bourgois also showed that, in both the Walldius and Shiers designs of the prosthesis, the prosthesis' axis of rotation was not equivalent to the axis of the anatomic joint it replaced. These researchers said the pin in the Shiers prosthesis was turned down on the axis and that it might loosen if the prosthesis were overstressed. Because the axle pin of the Walldius prosthesis is clamped on one side, the location of the axis causes localized wear.

Although infection immediately following implantation of a prosthesis is primarily a result of surgical technique, Swanson et al. (Ref. 113) stated that the design of the prosthesis may minimize the rate of infection associated with implantation. Swanson found that the infection rate was lower when less bone was removed for insertion of the device. Phillips and Taylor (Ref. 98) reported that most groups of patients who have received this prosthesis have suffered about a 10 percent higher incidence of infection than patients in whom other generic types of knee prostheses have been implanted.

In cases of total failure of implantation of a joint prosthesis, the prosthesis may be removed and the joint fused (arthrodesis). The rate of success in performing arthrodesis is related to the amount of bone that was removed to implant the device. Arthrodesis is difficult following implantation of a constrained joint replacement device.

(3) *Risks to health.*

- Loss or reduction of joint function—Improper design or inadequate mechanical properties of the device, such as its lack of strength and resistance to wear, may result in a loss or reduction of joint function due to excessive wear, fracture, deformation of the device, or loosening of the device in the surgical cavity.
- Adverse tissue reaction—Inadequate biological or mechanical properties of the device, such as its lack of biocompatibility and resistance to wear, may result in an adverse tissue reaction due to dissolution or wearing away from the surfaces of the device and the release of materials from the device to the surrounding tissues and systemic circulation.
- Infection—The presence of the prosthesis within the body may lead to an increased risk of infection.

Knee Joint Patellofemoral Polymer/Metal Semi-Constrained Cemented Prothesis (§ 888.3540)

(1) *Identification.* A knee joint patellofemoral polymer/metal semi-constrained cemented prosthesis is a two-part device intended to be implanted to replace part of a knee joint in the treatment of primary patellofemoral arthritis or chondromalacia. The device limits translation and rotation in one or more planes via the geometry of its articulating surfaces. It has no linkage across-the-joint. This generic type of device includes a component made of alloys, such as cobalt-chromium-molybdenum or austenitic steel, for resurfacing the intercondylar groove (femoral sulcus) on the anterior aspect of the distal femur, and a patellar component made of ultra-high molecular weight polyethylene. This generic type of device is limited to those devices intended for use with bone cement (§ 888.3027). The patellar component is designed to be implanted only with its femoral component.

(2) *Summary of data.* The Panel based its recommendation on the Panel members' personal knowledge of, and experience with, similar devices and a presentation made to the Panel. Fox reported on his clinical experience with this generic type of device. Fox stated that patellofemoral joint replacement was performed in more than 60 knees, with the followup since 1974. He reported that he, as well as his patients, were pleased with the results.

Other than the presentation to the Panel made by Fox, FDA was not aware of any clinical data for this device. Moreover, because Fox provided no details regarding the device or its implantation procedure, FDA was not certain that the devices Fox implanted belong to this generic class.

(3) *Risks to health.*

- Loss or reduction of joint function—Improper design or inadequate mechanical properties of the device, such as its lack of strength and resistance to wear, may result in a loss or reduction of joint function due to excessive wear, fracture, deformation of the device, or loosening of the device in the surgical cavity.
- Adverse tissue reaction—Inadequate biological or mechanical properties of the device, such as its lack of biocompatibility and resistance to wear, may result in an adverse tissue reaction due to dissolution of wearing away from the surfaces of the device and the release of materials from the device to the surrounding tissues and systemic circulation.
- Infection—The presence of the prosthesis within the body may lead to an increased risk of infection.

Knee Joint Patellofemorotibial Polymer/Metal/Metal Constrained Cemented Prosthesis (§ 888.3550)

(1) *Identification.* A knee joint patellofemorotibial polymer/metal/metal constrained cemented prosthesis is a device intended to be implanted to replace a knee joint. The device prevents dislocation in more than one anatomic plane and has components that are linked together. This generic type of device includes prostheses that have a femoral component, a tibial component, a cylindrical bolt and accompanying locking hardware that are all made of alloys, such as cobalt-chromium-molybdenum, and a retropatellar resurfacing component made of ultra-high molecular weight polyethylene. The retropatellar surfacing component may be attached to the resected patella either with a metallic screw or luting agent. All stemmed metallic components within this generic class are intended to be implanted with a polymethylmethacrylate luting agent (bone cement).

(2) *Summary of data.* The Panel based its recommendation on the Panel members' knowledge of, and experience with, the device and a presentation made to the Panel. Pritchard and Fox described their experiences with various patellofemoral joint replacing devices including this generic type of device. Pritchard has implanted patellofemorotibial joint prostheses in at least 100 patients during the 3 years prior to the Panel meeting. Also, Fox reported that he has achieved good results in over 60 cases since 1974. In May 1962, Young (Ref. 116) reported on a series of 16 patients ranging in age from 31 to 70 years who had a Young design prosthesis implanted (2 were bilateral implantations). With a followup time between 9 and 61 months (median of 20 months), 7 of these 16 experienced a clinical failure (43.8 percent) with a mean time of about 9 months before prosthesis removal and arthrodesis (joint fusion). In a later report in 1971, Young (Ref. 120) stratified results by indication: At least 3 of 19 osteoarthritic knees were failures (15.8 percent incidence); at least 17 of 45 rheumatoid knees failed (37.8 percent incidence); of 4 replacements for giant-cell tumor, 2 failed (50 percent incidence); and at least 6 of 10 traumatic arthritic knees failed (60 percent incidence).

Young noted that nine knees examined sometime after initial implantation demonstrated darkening in tissue adjacent to metallic components. Young believed that the darkening of tissue was caused by tissue contamination from corrosion products. Young also believed that similar tissue darkening was noted by Girzadas et al. (Ref. 117). Young believed that the darkening was caused by the bolts used in his design that were made from a cobalt-based alloy, whereas the other components were made from a casting alloy. Young stated that, as a result of his survey of the clinical results for 85 physicians who had implanted the Young-design prosthesis, he was not optimistic about use of the hinged metal/metal knee prostheses and their future for replacement arthroplasty.

In 1973, Hanslik (Ref. 121) reported results of using the device in 50 patients (two bilaterally implanted), principally for the indication of stereoarthrosis. Minimum followup was not given, while maximum followup was possibly 4 years. The patients ranged in age from 56 to 76 years. At least four failures (8 percent) were associated with restricted gliding of the patellofemoral articulation: One of these was attributed to polymethylmethacrylate-induced bony necrosis. Hanslik used the Young (Ref. 116) design of prosthesis and had made major modifications in implantation technique as recommended by Friedebold and Radloff (Refs. 115, 118, and 120). Hanslik performed partial resection of the patella rather than total excision and used a polymethylmethacrylate luting agent to grout the medullary stems (presumably in addition to the cancellous bone screws recommended by Young). Friedebold and Radloff (Ref. 119) reported on use of the prosthesis in femorotibial replacement in 11 patients ranging in age from 50 to 80 years, with between 6 months and 5 years of followup. There were three failures (27.3 percent).

(3) *Risks to health.*

- Loss or reduction of joint function—Improper design or inadequate mechanical properties of the device, such as its lack of strength and resistance to wear, may result in a loss or reduction of joint function due to excessive wear, fracture, deformation of the device, or loosening of the device in the surgical cavity.
- Adverse tissue reactions—Inadequate biological or mechanical properties of the device, such as its lack of biocompatibility and resistance to wear, may result in an adverse tissue reaction due to dissolution or wearing away from the surface of the device and the release of materials from the device to the surrounding tissues and systemic circulation.
- Infection—The presence of the prosthesis within the body may lead to an increased risk of infection.

Knee Joint Femoral (Hemi-Knee) Metallic Uncemented Prosthesis (§ 888.3570)

(1) *Identification.* A knee joint femoral (hemi-knee) metallic uncemented prosthesis is a device made of alloys, such as cobalt-chromium-molybdenum, intended to be implanted to replace part of a knee joint. The device limits translation and rotation in one or more planes via the geometry of its articulating surfaces. It has no linkage across-the-joint. This generic type of device includes prostheses that consist of a femoral component with or without protuberance(s) for the enhancement of fixation and is limited to those prostheses intended for use without bone cement (§ 888.3027).

(2) *Summary of data.* FDA was concerned about both the severity of the clinical complications resulting from use of the device and the rate at which these complications occur. The agency

used the complication classification scheme developed by Fox (Ref. 122) and grouped complications by time periods following surgical implantation; immediate postoperative complications, within 2 weeks; short term, within 24 months; and long term, more than 24 months. Platt and Pepler reported in 1969 their clinical results on 55 patients who had this prosthesis implanted with up to 10 years followup (Ref. 123). Their reported incidence of complications ranged from: General—none reported; systemic—none reported; and remote—1 late (2 years postoperatively) paranoid schizophrenia (1.8 percent); and (4) local—at least 45 percent. The most frequent complication was immediate postoperative infection with a presumed incidence of 25.5 percent. The reoperation rate for this series of patients was reported as 20 out of 62 knees or 32.4 percent; assuming only 1 reoperation per patient, a 36.4 percent revision rate will result.

Aufranc and Jones et al. (Refs. 124 and 125) made extensive modifications to M. Smith-Peterson's original "keeled" femoral condylar mold (Ref. 126) and commenced a series of device implantations employing a noncemented stemmed implant in 1952. Clinical results on 64 patients with a minimum of 1-year followup showed that the incidence of complications were: Zero for general and remote categories; 3.1 percent for systemic (2 thrombophlebitic episodes); and a minimum of 25 percent for cumulated local complications. Matching Platt and Pepler's experience (Ref. 124), the most frequent complication observed was immediate postoperative infection with a presumed incidence of 20.3 percent. This series of patients, as of mid-1969, displayed a reoperation rate of 14 out of 79 knees (17.7 percent), assuming only 1 reoperation per patient. Considering this result, with their report of 16 clinical results rated at less than "fair," the failure rate is calculated as 38 percent with an average followup time of 87 months. Aufranc and Jones (Ref. 124) noted that 6 of their initial 14 implantations were failures (42.9 percent) with a maximum followup of 5 years; apparently 10 more years of surgical experience reduced the overall failure rate by 5 percent, without altering the principal reported failure modes: Infection and "poor" clinical result.

Further review of available literature (Refs. 108 and 127 through 136), failed to disclose device experience that would significantly alter the trends described above.

(3) *Risks to health.*

- Loss or reduction of joint or limb function—Improper design or inadequate mechanical properties of the device, such as its lack of strength and resistance to wear, may result in the loss or reduction of joint function due to excessive wear, fracture, deformation of the device, or loosening of the device in the surgical cavity.
- Adverse tissue reaction—Inadequate biological or mechanical properties of the device, such as its lack of biocompatibility and resistance to wear, may result in an adverse tissue reaction due to dissolution of wearing away from the surfaces of the device and the release of materials from the device to the surrounding tissues and the systemic circulation.
- Infection—The presence of the prosthesis within the body may lead to an increased risk of infection.
- Death—Death may result from lipoembolic sequelae or thromboembolic complications during or immediately following implantation.

Knee Joint Patellar (Hemi-Knee) Metallic Resurfacing Uncemented Prosthesis (§ 888.3580)

(1) *Identification.* A knee joint patellar (hemi-knee) metallic resurfacing uncemented prosthesis is a device made of alloys, such as cobalt-chromium-molybdenum, intended to be implanted to replace the retropatellar articular surface of the patellofemoral joint. The device limits minimally (less than normal anatomic constraints) translation in one or more planes. It has no linkage across-the-joint. This generic type of device includes prostheses that have a retropatellar resurfacing component and an orthopedic screw to transfix the patellar remnant. This generic type of device is limited to those prostheses intended for use without bone cement (§ 888.3027). This device is in class III when intended for uses other than treatment of degenerative and posttraumatic patellar arthritis; when intended for those uses, it is in class II.

(2) *Summary of data.* FDA was not aware of any valid scientific evidence supporting the safety and effectiveness of this device when intended for uses other than the treatment of degenerative and posttraumatic patellar arthritis.

3. *Risks to health.*

- Loss or reduction of joint function—Improper design or inadequate mechanical properties of the device, such as its lack of strength and resistance to wear, may result in a loss or reduction of joint function due to excessive wear, fracture, deformation of the device, or loosening of the device in the surgical cavity.
- Adverse tissue reaction—Inadequate biological or mechanical properties of the device, such as its lack of biocompatibility and resistance to wear, may result in an adverse tissue reaction due to dissolution or wearing away from the surfaces of the device and the release of materials from the device to the surrounding tissues and systemic circulation.
- Infection—The presence of the prosthesis within the body may lead to an increased risk of infection.

Shoulder Joint Metal/Metal or Metal/Polymer Constrained Cemented Prosthesis (§ 888.3640)

(1) *Identification.* A shoulder joint metal/metal or metal/polymer constrained cemented prosthesis is a device intended to be implanted to replace a shoulder joint. The device prevents dislocation in more than one anatomic plane and has components that are linked together. This generic type of device includes prostheses that have a humeral component made of alloys, such as cobalt-chromium-molybdenum, and a glenoid component made of this alloy or a combination of this alloy and ultra-high molecular weight polyethylene. This generic type of device is limited to those prostheses intended for use with bone cement (§ 888.3027).

(2) *Summary of data.* The Panel based its recommendation on the Panel members' personal knowledge of the device and on their knowledge of the medical literature (Refs. 136 through 139). Two of these references (Refs. 136 and 137) described a shoulder joint constrained prosthesis (Fenlin and Zippel designs) and report that implantation of the device relieved pain in 16 of 17 patients. In the patient with the painful prosthesis, the authors believed that the device had loosen. The times of implantation were not reported.

Fenlin (Ref. 138) reported that the Fenlin design prosthesis had been implanted in five patients. The results in three of these patients were discussed. One patient was described as being free of pain, and able to use the operated shoulder for all normal activities, except those requiring elevation of the arm above 80°. The length of followup in this patient was 20 months. Complications were reported in the other two patients. In one patient, the device had loosened at 3 months postoperatively, due to abnormal anatomy of the glenoid. The second patient suffered partial nerve palsy due to damage of the axillary nerve during surgery. Linscheid and Cofield (Ref. 139) reported on the implantation of 13 constrained shoulder joint prostheses (6 of the Stanmore design, and 7 of the Bickel design). The average time of followup was reported as 13 months and ranged from 2 to 26 months. There were two cases of dislocations of the Stanmore design prosthesis and one case of dislocation of the Bickel design prosthesis. There were two additional complications reported with the Bickel design device; one case of fracture of the humeral component and one case of loosening of the glenoid component.

FDA sought additional information on the safety and effectiveness of these devices. Cofield (Ref. 140) reported that prosthetic replacement of the shoulder joint was in 1971, an experimental, investigational procedure. This author noted that basic knowledge about shoulder biomechanics was limited and that current knowledge of shoulder prostheses was not sufficient to establish the requirements of a prosthetic replacement. Buechel et al. (Ref. 141) noted that complications with current shoulder prostheses have been associated with the designs of the devices: (1) The Bickel design shoulder joint prosthesis was reported to dislocate and loosen due to the limited motion of the prosthesis; and (2) the prosthesis design used by Lettin and Scales (presumably the Stanmore design shoulder prosthesis) was reported to significantly limit joint motion, then sublux, and eventually dislocate at the extremes of normal joint motion. Clinical results with several prosthesis designs were reported by Cofield (Ref. 140, 142, and 143). Eleven persons in whom Bickel design prostheses had been implanted were evaluated 18 months to 39 months postoperatively (Ref. 142). Three (27 percent) were experiencing significant pain. The components of the Bickel device had dislocated in two cases. The glenoid component had dislodged from the scapula in two cases and loosened in one. The humeral component had fractured in two other cases. Reoperation was required in four patients and was needed in two or three others. Cofield reported that further clinical and mechanical deterioration in these patients was anticipated due to progressive loosening of the glenoid components and fatigue fracture of the neck of the humeral component, which was not believed to be strong enough. These authors concluded that this type of shoulder joint replacement (i.e., the Bickel design) is not justified. Cofield (Refs. 140 and 143) also reported clinical results in nine patients who had received Stanmore prostheses. After an average postoperative time of 1 year (ranging between 4 and 18 months), six patients had satisfactory relief of pain and three had significant pain. The glenoid component had loosened in two patients. FDA concurred with the Panel that the reported clinical experience with these devices did not establish their long-term safety and effectiveness.

(3) *Risks to health.*

- Loss or reduction of joint function—Improper design or inadequate mechanical properties of the device, such as its lack of strength and resistance to wear may result in a loss or reduction of joint function due to excessive wear, fracture, deformation of the device, or loosening of the device in the surgical cavity.
- Adverse tissue reaction—Inadequate biological or mechanical properties of the device such as its lack of biocompatibility and resistance to wear, may result in an adverse tissue reaction due to dissolution or wearing away from the surfaces of the device and the release of materials from the device to the surrounding tissues and systemic circulation.
- Infection—The presence of the prosthesis within the body may lead to an increased risk of infection.

Shoulder Joint Glenoid (Hemi-Shoulder) Metallic Cemented (§ 888.3680) Prosthesis

(1) *Identification.* A shoulder joint glenoid (hemi-shoulder) metallic cemented prosthesis is a device that has a glenoid (socket) component made of alloys, such as cobalt-chromium-molybdenum, or alloys with ultra-high molecular weight polyethylene and intended to be implanted to replace part of a shoulder joint. This generic type of device is limited to those prostheses intended for use with bone cement (§ 888.3027).

(2) *Summary of the data.* The Panel based its recommendation on the Panel members' personal knowledge of; and clinical experience with, the device.

(3) *Risks to health.*

- Loss or reduction of joint function—Improper design or inadequate mechanical properties of the device, such as its lack of strength and resistance to wear, may result in a loss or reduction of joint function due to excessive wear, fracture, deformation of the device, or loosening of the device in the surgical cavity.
- Adverse tissue reaction—Inadequate biological or mechanical properties of the device, such as its lack of biocompatibility and resistance to wear, may result in an adverse tissue reaction due to dissolution or wearing away from the surfaces of the device and the release of materials from the device to the surrounding tissues and systemic circulation.
- Infection—The presence of the prosthesis within the body may lead to an increased risk of infection.

Wrist Joint Metal Constrained Cemented Prosthesis (§ 888.3790)

(1) *Identification.* A wrist joint metal constrained cemented prosthesis is a device intended to be implanted to replace a wrist joint. The device prevents dislocation in more than one anatomic plane and consists of either a single flexible across-the-joint component or two components linked together. This generic type of device is limited to a device which is made of alloys, such as cobalt-chromium-molybdenum, and is limited to those prostheses intended for use with bone cement (§ 888.3027).

(2) *Summary of data.* The Panel based its recommendation on the Panel members' personal knowledge of the device and on the available medical literature. Gschwend et al. (Ref. 144) used this prosthesis in 15 cases from 1971 through 1975. Fixation was reported to be inadequate and not correlated to loads imposed on the wrist joint. In three cases (20 percent), the distal stem became loose. The stem fractured in two cases (13 percent). On one occasion (6.6 percent) the metacarpal bone broke. In another case, as a result of a disturbance of muscle balance, the investigators observed a fixed ulnar deviation of the wrist joint with a tendency toward radial penetration of the medullary canal of the third metacarpal bone. The investigators also described three cases (20 percent) of a sinking of the prosthesis into the capitate through the third metacarpal.

(3) *Risks to health.*

- Loss or reduction of joint function—Improper design or inadequate mechanical properties of the device, such as its lack of strength and resistance to wear, may result in a loss or reduction of joint function due to excessive wear, fracture, deformation of the device, or loosening of the device in the surgical cavity.
- Adverse tissue reaction—Inadequate biological or mechanical properties of the device, such as its lack of biocompatibility and resistance to wear, may result in an adverse tissue reaction due to dissolution or wearing away from the surfaces of the device and release of materials from the device to the surrounding tissues and systemic circulation.
- Infection—The presence of the prosthesis within the body may lead to an increased risk of infection.

10. Physical Medicine Devices

Rigid Pneumatic Structure Orthosis (§ 890.3610)

(1) *Identification.* A rigid pneumatic structure orthosis is a device intended for medical purposes to provide whole body support by means of a pressurized suit to help thoracic paraplegics walk.

(2) *Summary of data.* The Panel based its recommendation on the literature concerning the device (Refs. 145 and 146). The literature evaluation did not demonstrate that the device was safe or effective (Ref. 146). The rigid pneumatic structure orthosis was also evaluated as requested by the Veterans' Administration and the Rehabilitation Services Administration, Department of Health, Education, and Welfare (Ref. 146), and did not meet adequate performance standards for safety and effectiveness.

(3) *Risks to health.*

- Bodily injury—The device could collapse and the patient could fall, resulting in bodily injury, if inflation is lost or the zippers fail.
- Tissue trauma and/or pressure sores—Tissue trauma and/or pressure sores could result if the support beams overinflate and cause excessive pressure on the skin of the patient.

II. PMA Requirements

A PMA for these devices must include the information required by section 515(c)(1) of the act. Such a PMA should also include a detailed discussion of the risks identified above, as well as a discussion of the effectiveness of the device for which premarket approval is sought. In addition, a PMA must include all data and information on: (1) Any risks known, or that should be reasonably known, to the applicant that have not been identified in this document; (2) the effectiveness of the device that is the subject of the application; and (3) full reports of all preclinical and clinical information from investigations on the safety and effectiveness of the device for which premarket approval is sought.

A PMA should include valid scientific evidence obtained from well-controlled clinical studies, with detailed data, in order to provide reasonable assurance of the safety and effectiveness of the device for its intended use.

Applicants should submit any PMA in accordance with FDA's "Premarket Approval (PMA) Manual." This manual is available upon request from FDA, Center for Devices and Radiological Health, Division of Small Manufacturers Assistance (HFZ–220), 1350 Piccard Dr., Rockville, MD 20850.

III. Request for Comments with Data

Interested persons may, on or before January 5, 1996, submit to the Dockets Management Branch (address above) written comments regarding this proposal. Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. Received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

IV. Opportunity to Request a Change in Classification

Before requiring the filing of a PMA or a notice of completion of a PDP for a device, FDA is required by section 515(b)(2)(A)(i) through (b)(2)(A)(iv) of the act and § 860.132 (21 CFR 860.132) to provide an opportunity for interested persons to request a change in the classification of the device based on new information relevant to its classification. Any proceeding to reclassify the device will be under the authority of section 513(e) of the act.

A request for a change in the classification of these devices is to be in the form of a reclassification petition containing the information required by § 860.123 (21 CFR 860.123), including new information relevant to the classification of the device, and shall, under section 515(b)(2)(B) of the act, be submitted by September 22, 1995.

The agency advises that, to ensure timely filing of any such petition, any request should be submitted to the Dockets Management Branch (address above) and not to the address provided in § 860.123(b)(1). If a timely request for a change in the classification of these devices is submitted, the agency will, by November 6, 1995, after consultation with the appropriate FDA advisory committee and by an order published in the **Federal Register**, either deny the request or give notice of its intent to initiate a change in the classification of the device in accordance with section 513(e) of the act and § 860.130 (21 CFR 860.130) of the regulations.

V. Environmental Impact

The agency has determined under 21 CFR 25.24(a)(8) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

VI. Analysis of Impacts

FDA has examined the impacts of the proposed rule under Executive Order 12866 and the Regulatory Flexibility Act (Pub. L. 96–354). Executive Order 12866 directs agencies to assess all costs and benefits of available regulatory alternatives and, when regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety, and other advantages; distributive impacts; and equity). The agency believes that this proposed rule is consistent with the regulatory philosophy and principles identified in the Executive Order. In addition, the proposed rule is not a significant regulatory action as defined by the Executive Order and so is not subject to review under the Executive Order.

The Regulatory Flexibility Act requires agencies to analyze regulatory options that would minimize any significant impact of a rule on small entities. Because FDA believes that there is little or no interest in marketing these devices, the agency certifies that the proposed rule will not have a significant economic impact on a substantial number of small entities. Therefore, under the Regulatory Flexibility Act, no further analysis is required.

VII. References

List of Subjects

21 CFR Part 864

Blood, Medical devices, Packaging and containers.

21 CFR Parts 868, 870, 872, 876, 880, 882, 884, 888, and 890

Medical devices.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, it is proposed that 21 CFR parts 864, 868, 870, 872, 876, 880, 882, 884, 888, and 890 be amended as follows:

PART 864—HEMATOLOGY AND PATHOLOGY DEVICES

1. The authority citation for 21 CFR part 864 continues to read as follows:

Authority: Secs. 501, 510, 513, 515, 520, 701 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 351, 360, 360c, 360e, 360j, 371).

2. Section 864.5220 is amended by revising paragraph (c) to read as follows:

§ 864.5220 Automated differential cell counter.

* * * * *

(c) *Date PMA or notice of completion of a PDP is required.* A PMA or notice of completion of a PDP is required to be filed with the Food and Drug Administration on or before (date 90 days after date of publication of the final rule based on this proposed rule). For any automated differential cell counter described in paragraph (b)(2) of this section that was in commercial distribution before May 28, 1976, or that has, on or before (date 90 days after date of publication of the final rule based on this proposed rule), been found to be substantially equivalent to an automated differential cell counter described in paragraph (b)(2) of this section that was in commercial distribution before May 28, 1976. Any other automated differential cell counter described in paragraph (b)(2) of this section shall have an approved PMA or declared completed PDP in effect before being placed in commercial distribution.

PART 868—ANESTHESIOLOGY DEVICES

3. The authority citation for 21 CFR part 868 continues to read as follows:

Authority: Secs. 501, 510, 513, 515, 520, 701 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 351, 360, 360c, 360e, 360j, 371).

4. Section 868.5400 is amended by revising paragraph (c) to read as follows:

§ 868.5400 Electroanesthesia apparatus.

* * * * *

(c) *Date PMA or notice of completion of a PDP is required.* A PMA or notice of completion of a PDP is required to be filed with the Food and Drug Administration on or before (date 90 days after date of publication of the final rule based on this proposed rule) for any electroanesthesia apparatus that was in commercial distribution before May 28, 1976, or that has, on or before (date 90 days after date of publication of the final rule), been found to be substantially equivalent to a electroanesthesia apparatus that was in commercial distribution before May 28, 1976. Any other electroanesthesia apparatus shall have an approved PMA or a declared completed PDP in effect before being placed in commercial distribution.

PART—870 CARDIOVASCULAR DEVICES

5. The authority citation for 21 CFR part 870 continues to read as follows:

Authority: Secs. 501, 510, 513, 515, 520, 701 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 351, 360, 360c, 360e, 360j, 371).

6. Section 870.1350 is amended by revising paragraph (c) to read as follows:

§ 870.1350 Catheter balloon repair kit.

* * * * *

(c) *Date PMA or notice of completion of a PDP is required.* A PMA or notice of completion of a PDP is required to be filed with the Food and Drug Administration on or before (date 90 days after date of publication of the final rule). For any catheter balloon repair kit that was in commercial distribution before May 28, 1976, or that has, on or before (date 90 days after date of publication of the final rule), been found to be substantially equivalent to a catheter balloon repair kit that was in commercial distribution before May 28, 1976. Any other catheter balloon repair kit shall have an approved PMA or a declared completed PDP in effect before being placed in commercial distribution.

7. Section 870.1360 is amended by revising paragraph (c) to read as follows:

§ 870.1360 Trace microsphere.

* * * * *

(c) *Date PMA or notice of completion of a PDP is required.* A PMA or notice of completion of a PDP is required to be filed with the Food and Drug Administration on or before (date 90 days after date of publication of the final rule). For any trace microsphere that was in commercial distribution before May 28, 1976, or that has, on or before (date 90 days after date of publication of the final rule), been found to be substantially equivalent to a trace microsphere that was in commercial distribution before May 28, 1976. Any other trace microsphere shall have an approved PMA or a declared completed PDP in effect before being placed in commercial distribution.

8. Section 870.3850 is amended by revising paragraph (c) to read as follows:

§ 870.3850 Carotid sinus nerve stimulator.

* * * * *

(c) *Date PMA or notice of completion of a PDP is required.* A PMA or a notice of completion of a PDP is required to be filed with the Food and Drug Administration on or before (date 90 days after date of publication of the final rule) for any carotid sinus nerve stimulator that was in commercial distribution before May 28, 1976, or that has, on or before (date 90 days after date of publication of the final rule), been found to be substantially equivalent to a carotid sinus nerve stimulator that was in commercial distribution before May 28, 1976. Any other carotid sinus nerve stimulator shall have an approved PMA or a declared completed PDP in effect before being placed in commercial distribution.

9. Section 870.5300 is amended by revising paragraph (c) to read as follows:

§ 870.5300 DC-defibrillator (including paddles).

* * * * *

(c) *Date PMA or notice of completion of a PDP is required.* A PMA or a notice of completion of a PDP is required to be filed with the Food and Drug Administration on or before (date 90 days after date of publication of the final rule). For any DC-defibrillator (including paddles) described in paragraph (b)(1) of this section that was in commercial distribution before May 28, 1976, or that has, on or before (date 90 days after date of publication of the final rule), been found to be substantially equivalent to a DC-defibrillator (including paddles) described in paragraph (b)(1) of this section that was in commercial distribution before May 28, 1976. Any other DC-defibrillator (including paddles) described in paragraph (b)(1) of this section shall have an approved PMA or declared completed PDP in effect before being placed in commercial distribution.

PART 872—DENTAL DEVICES

10. The authority citation for 21 CFR part 872 continues to read as follows:

Authority: Secs. 501, 510, 513, 515, 520, 701 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 351, 360, 360c, 360e, 360j, 371).

11. Section 872.3400 is amended by revising paragraph (c) to read as follows:

§ 872.3400 Karaya and sodium borate with or without acacia denture adhesive.

* * * * *

(c) *Date PMA or notice of completion of a PDP is required.* A PMA or a notice of completion of a PDP is required to be filed with the Food and Drug Administration on or before (date 90 days after date of publication of the final rule) for any karaya and sodium borate with or without acacia denture adhesive that was in commercial distribution before May 28, 1976, or that has, on or before (date 90 days after date of publication of the final rule), been found to be substantially equivalent to a karaya and sodium borate with or without acacia denture adhesive that was in commercial distribution before May 28, 1976. Any other karaya and sodium borate with or without acacia denture adhesive shall have an approved PMA or a declared completed PDP in effect before being placed in commercial distribution.

12. Section 872.3420 is amended by revising paragraph (c) to read as follows:

§ 872.3420 Carboxymethylcellulose sodium and cationic polyacrylamide polymer denture adhesive.

* * * * *

(c) *Date PMA or notice of completion of a PDP is required.* A PMA or a notice of completion of a PDP is required to be filed with the Food and Drug Administration on or before (date 90 days after date of publication of the final rule) for any carboxymethylcellulose sodium and cationic polyacrylamide polymer denture adhesive that was in commercial distribution before May 28, 1976, or that has, on or before (date 90 days after date of publication of the final rule), been found to be substantially equivalent to a carboxymethylcellulose sodium and cationic polyacrylamide polymer denture adhesive that was in commercial distribution before May 28, 1976. Any other carboxymethylcellulose sodium and cationic polyacrylamide polymer denture adhesive shall have an approved PMA or a declared completed PDP in effect before being placed in commercial distribution.

13. Section 872.3480 is amended by revising paragraph (c) to read as follows:

§ 872.3480 Polyacrylamide polymer (modified cationic) denture adhesive.

* * * * *

(c) *Date PMA or notice of completion of a PDP is required.* A PMA or a notice of completion of a PDP is required to be filed with the Food and Drug Administration on or before (date 90 days after date of publication of the final rule) for any polyacrylamide polymer (modified cationic) denture adhesive that was in commercial distribution before May 28, 1976, or that has, on or before (date 90 days after date of publication of the final rule), been found to be substantially equivalent to a polyacrylamide polymer (modified cationic) denture adhesive that was in commercial distribution before May 28, 1976. Any other polyacrylamide polymer (modified cationic) denture adhesive shall have an approved PMA or a declared completed PDP in effect before being placed in commercial distribution.

14. Section 872.3500 is amended by revising paragraph (c) to read as follows:

§ 872.3500 Polyvinylmethylether maleic anhydride (PVM–MA), acid copolymer, and carboxymethylcellulose sodium (NACMC) denture adhesive.

* * * * *

(c) *Date PMA or notice of completion of a PDP is required.* A PMA or a notice of completion of a PDP is required to be filed with the Food and Drug Administration on or before (date 90 days after date of publication of the final rule) for any polyvinylmethylether maleic anhydride (PVM–MA), acid copolymer, and carboxymethylcellulose sodium (NACMC) denture adhesive that was in commercial distribution before May 28, 1976, or that has, on or before (date 90 days after date of publication of the final rule), been found to be substantially equivalent to a polyvinylmethylether maleic anhydride (PVM–MA), acid copolymer, and carboxymethylcellulose sodium (NACMC) denture adhesive that was in commercial distribution before May 28, 1976. Any other polyvinylmethylether maleic anhydride (PVM–MA), acid copolymer, and carboxymethylcellulose sodium (NACMC) denture adhesive shall have an approved PMA or a declared completed PDP in effect before being placed in commercial distribution.

15. Section 872.3560 is amended by revising paragraph (c) to read as follows:

§ 872.3560 OTC denture reliner.

* * * * *

(c) *Date PMA or notice of completion of a PDP is required.* A PMA or a notice of completion of a PDP is required to be filed with the Food and Drug Administration on or before (date 90 days after date of publication of the final rule) for any OTC denture reliner that was in commercial distribution before May 28, 1976, or that has, on or before (date 90 days after date of publication of the final rule), been found to be substantially equivalent to an OTC denture reliner that was in commercial distribution before May 28, 1976. Any other OTC denture reliner shall have an approved PMA or a declared completed PDP in effect before being placed in commercial distribution.

16. Section 872.3820 is amended by revising paragraph (c) to read as follows:

§ 872.3820 Root canal filling resin.

* * * * *

(c) *Date PMA or notice of completion of a PDP is required.* A PMA or a notice of completion of a PDP is required to be filed with the Food and Drug Administration on or before (date 90 days after date of publication of the final rule) for any root canal filling resin described in paragraph (b)(2) of this section that was in commercial distribution before May 28, 1976, or that has, on or before (date 90 days after date of publication of the final rule), been found to be substantially equivalent to a root canal filling resin described in paragraph (b)(2) of this section that was in commercial distribution before May 28, 1976. Any other root canal filling resin shall have an approved PMA or a declared completed PDP in effect before being placed in commercial distribution.

PART 876—GASTROENTEROLOGY-UROLOGY DEVICES

17. The authority citation for 21 CFR part 876 is revised to read as follows:

Authority: Secs. 501, 510, 513, 515, 520, 522, 701 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 351, 360, 360c, 360e, 360j, 360l, 371).

18. Section 876.5220 is amended by revising paragraph (c) to read as follows:

§ 876.5220 Colonic irrigation system.

* * * * *

(c) *Date PMA or notice of completion of a PDP is required.* A PMA or a notice of completion of a PDP is required to be filed with the Food and Drug Administration on or before (date 90 days after date of publication of the final rule) for any colonic irrigation system described in paragraph (b)(2) of this section that was in commercial distribution before May 28, 1976, or that has, on or before (date 90 days after date of publication of the final rule), been found to be substantially equivalent to a colonic irrigation system described in paragraph (b)(2) of this section that was in commercial distribution before May 28, 1976. Any other colonic irrigation system shall have an approved PMA in effect before being placed in commercial distribution.

19. Section 876.5270 is amended by revising paragraph (c) to read as follows:

§ 876.5270 Implanted electrical urinary continence device.

* * * * *

(c) *Date PMA or notice of completion of a PDP is required.* A PMA or a notice of completion of a PDP is required to be filed with the Food and Drug Administration on or before (date 90 days after date of publication of the final rule) for any implanted electrical urinary continence device that was in commercial distribution before May 28, 1976, or that has, on or before (date 90 days after date of publication of the final rule), been found to be substantially equivalent to an implanted electrical urinary continence device that was in commercial distribution before May 28, 1976. Any other implanted electrical urinary continence device shall have an approved PMA or a declared completed PDP in effect before being place in commercial distribution.

PART 880—GENERAL HOSPITAL AND PERSONAL USE DEVICES

20. The authority citation for 21 CFR part 880 continues to read as follows:

Authority: Secs. 501, 510, 513, 515, 520, 701 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 351, 360, 360c, 360e, 360j, 371).

21. Section 880.5760 is amended by revising paragraph (c) to read as follows:

§ 880.5760 Chemical cold pack snakebite kit.

* * * * *

(c) *Date PMA or notice of completion of a PDP is required.* A PMA or a notice of completion of a PDP is required to be filed with the Food and Drug Administration on or before (date 90 days after date of publication of the final rule) for any chemical cold pack snakebite kit that was in commercial distribution before May 28, 1976, or that has, on or before (date 90 days after date of publication of the final rule), been found to be substantially equivalent to a chemical cold pack snakebite kit that was in commercial distribution before May 28, 1976. Any other chemical cold pack snakebite kit shall have an approved PMA or a declared completed PDP in effect before being placed in commercial distribution.

PART 882—NEUROLOGICAL DEVICES

22. The authority citation for 21 CFR part 882 continues to read as follows:

Authority: Secs. 501, 510, 513, 515, 520, 701 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 351, 360, 360c, 360e, 360j, 371).

23. Section 882.1825 is amended by revising paragraph (c) to read as follows:

§ 882.1825 Rheoencephalograph.

* * * * *

(c) *Date PMA or notice of completion of a PDP is required.* A PMA or a notice of completion of a PDP is required to be filed with the Food and Drug Administration on or before (date 90 days after date of publication of the final rule) for any rheoencephalograph that was in commercial distribution before May 28, 1976, or that has, on or before (date 90 days after date of publication of the final rule), been found to be substantially equivalent to a rheoencephalograph that was in commercial distribution before May 28, 1976. Any other rheoencephalograph shall have an approved PMA or a declared completed PDP in effect before being placed in commercial distribution.

24. Section 882.5150 is amended by revising paragraph (c) to read as follows:

§ 882.5150 Intravascular occluding catheter.

* * * * *

(c) *Date PMA or notice of completion of a PDP is required.* A PMA or a notice of completion of a PDP is required to be filed with the Food and Drug Administration on or before (date 90 days after date of publication of the final rule) for any intravascular occluding catheter that was in commercial distribution before May 28, 1976, or that has, on or before (date 90 days after date of publication of the final rule), been found to be substantially equivalent to a intravascular occluding catheter that was in commercial distribution before May 28, 1976. Any other intravascular occluding catheter shall have an approved PMA or a declared completed PDP in effect before being place in commercial distribution.

25. Section 882.5850 is amended by revising paragraph (c) to read as follows:

§ 882.5850 Implanted spinal cord stimulator for bladder evacuation.

* * * * *

(c) *Date PMA or notice of completion of a PDP is required.* A PMA or a notice of completion of a PDP is required to be filed with the Food and Drug Administration on or before (date 90 days after date of publication of the final rule) for any implanted spinal cord stimulator for bladder evacuation that was in commercial distribution before May 28, 1976, or that has, on or before (date 90 days after date of publication of the final rule), been found to be substantially equivalent to an implanted spinal cord stimulator for bladder evacuation that was in commercial distribution before May 28, 1976. Any other implanted spinal cord stimulator for bladder evacuation shall have an approved PMA or a declared completed PDP in effect before being placed in commercial distribution.

PART 884—OBSTETRICAL AND GYNECOLOGICAL DEVICES

26. The authority citation for 21 CFR part 884 continues to read as follows:

Authority: Secs. 501, 510, 513, 515, 520, 701 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 351, 360, 360c, 360e, 360j, 371).

27. Section 884.2050 is amended by revising paragraph (c) to read as follows:

§ 884.2050 Obstetric data analyzer.

* * * * *

(c) *Date PMA or notice of completion of a PDP is required.* A PMA or a notice of completion of a PDP is required to be filed with the Food and Drug Administration on or before (date 90 days after date of publication of the final rule) for any obstetric data analyzer that was in commercial distribution before May 28, 1976, or that has, on or before (date 90 days after date of publication of the final rule), been found to be substantially equivalent to an obstetrical data analyzer that was in commercial distribution before May 28, 1976. Any other obstetric data analyzer shall have an approved PMA or a declared completed PDP in effect before being place in commercial distribution.

28. Section 884.2620 is amended by revising paragraph (c) to read as follows:

§ 884.2620 Fetal electroencephalographic monitor.

* * * * *

(c) *Date PMA or notice of completion of a PDP is required.* A PMA or a notice of completion of a PDP is required to be filed with the Food and Drug Administration on or before (date 90 days after date of publication of the final rule) for any fetal electroencephalographic monitor that was in commercial distribution before May 28, 1976, or that has, on or before (date 90 days after date of publication of the final rule), been found to be substantially equivalent to a fetal electroencephalographic monitor in commercial distribution before May 28, 1976. Any other fetal electroencephalographic monitor shall have an approved PMA or a declared completed PDP in effect before being placed in commercial distribution.

29. Section 884.2685 is amended by revising paragraph (c) to read as follows:

§ 884.2685 Fetal scalp clip electrode and applicator.

* * * * *

(c) *Date PMA or notice of completion of a PDP is required.* A PMA or a notice of completion of a PDP is required to be filed with the Food and Drug Administration on or before (date 90 days after date of publication of the final rule) for any fetal scalp clip electrode and applicator that was in commercial distribution before May 28, 1976, or that has, on or before (date 90 days after date of publication of the final rule), been found to be substantially equivalent to a fetal scalp clip electrode and applicator that was in commercial distribution before May 28, 1976. Any other fetal scalp clip electrode and applicator shall have an approved PMA or a declared completed PDP in effect before being placed in commercial distribution.

30. Section 884.4250 is amended by revising paragraph (c) to read as follows:

§ 884.4250 Expandable cervical dilator.

* * * * *

(c) *Date PMA or notice of completion of a PDP is required.* A PMA or a notice of completion of a PDP is required to be filed with the Food and Drug Administration on or before (date 90 days after date of publication of the final rule) for any expandable cervical dilator that was in commercial distribution before May 28, 1976, or that has, on or before (date 90 days after date of publication of the final rule), been found to be substantially equivalent to an expandable cervical dilator that was in commercial distribution before May 28, 1976. Any other expandable cervical dilator shall have an approved PMA or a declared completed PDP in effect before being placed in commercial distribution.

31. Section 884.4270 is amended by revising paragraph (c) to read as follows:

§ 884.4270 Vibratory cervical dilators.

* * * * *

(c) *Date PMA or notice of completion of a PDP is required.* A PMA or a notice of completion of a PDP is required to be filed with the Food and Drug Administration on or before (date 90 days after date of publication of the final rule) for any vibratory cervical dilator that was in commercial distribution before May 28, 1976, or that has, on or before (date 90 days after date of publication of the final rule), been found to be substantially equivalent to a vibratory cervical dilator that was in commercial distribution before May 28, 1976. Any other vibratory cervical dilator shall have an approved PMA or a declared completed PDP in effect before being placed in commercial distribution.

32. Section 884.5050 is amended by revising paragraph (c) to read as follows:

§ 884.5050 Metreurynter-balloon abortion system.

* * * * *

(c) *Date PMA or notice of completion of a PDP is required.* A PMA or a notice of completion of a PDP is required to be filed with the Food and Drug Administration on or before (date 90 days after date of publication of the final rule) for any metreurynter-balloon abortion system that was in commercial distribution before May 28, 1976, or that has, on or before (date 90 days after date of publication of the final rule), been found to be substantially equivalent to a metreurynter-balloon abortion system that was in commercial distribution before May 28, 1976. Any other metreurynter-balloon abortion system shall have an approved PMA or a declared completed PDP in effect before being placed in commercial distribution.

33. Section 884.5225 is amended by revising paragraph (c) to read as follows:

§ 884.5225 Abdominal decompression chamber.

* * * * *

(c) *Date PMA or notice of completion of a PDP is required.* A PMA or a notice of completion of a PDP is required to be filed with the Food and Drug Administration on or before (date 90 days after date of publication of the final rule) for any abdominal decompression chamber that was in commercial distribution before May 28, 1976, or that has, on or before (date 90 days after date of publication of the final rule), been found to be substantially equivalent to an abdominal decompression chamber that was in commercial distribution before May 28, 1976. Any other abdominal decompression chamber shall have an approved PMA or a declared completed PDP in effect before being placed in commercial distribution.

PART 888—ORTHOPEDIC DEVICES

34. The authority citation for 21 CFR part 888 continues to read as follows:

Authority: Secs. 501, 510, 513, 515, 520, 701 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 351, 360, 360c, 360e, 360j, 371).

35. Section 888.3120 is amended by revising paragraph (c) to read as follows:

§ 888.3120 Ankle joint metal/polymer non-constrained cemented prosthesis.

* * * * *

(c) *Date PMA or notice of completion of a PDP is required.* A PMA or a notice of completion of a PDP is required to be filed with the Food and Drug Administration on or before (date 90 days after date of publication of the final rule) for any ankle joint metal/polymer non-constrained cemented prosthesis that was in commercial distribution before May 28, 1976, or that has, on or before (date 90 days after date of publication of the final rule), been found to be substantially equivalent to a ankle joint metal/polymer non-constrained cemented prosthesis that was in commercial distribution before May 28, 1976. Any other ankle joint metal/polymer non-constrained cemented prosthesis shall have an approved PMA or a declared completed PDP in effect before being placed in commercial distribution.

36. Section 888.3180 is amended by revising paragraph (c) to read as follows:

§ 888.3180 Elbow joint humeral (hemi-elbow) metallic uncemented prosthesis.

* * * * *

(c) *Date PMA or notice of completion of a PDP is required.* A PMA or a notice of completion of a PDP is required to be filed with the Food and Drug Administration on or before (date 90 days after date of publication of the final rule) for any elbow joint humeral (hemi-elbow) metallic uncemented prosthesis that was in commercial distribution before May 28, 1976, or that has, on or before (date 90 days after date of publication of the final rule), been found to be substantially equivalent to a elbow joint humeral (hemi-elbow) metallic uncemented prosthesis that was in commercial distribution before May 28, 1976. Any other elbow joint humeral (hemi-elbow) metallic uncemented prosthesis shall have an approved PMA or a declared completed PDP in effect before being placed in commercial distribution.

37. Section 888.3200 is amended by revising paragraph (c) to read as follows:

§ 888.3200 Finger joint metal/metal constrained uncemented prosthesis.

* * * * *

(c) *Date PMA or notice of completion of a PDP is required.* A PMA or a notice of completion of a PDP is required to be filed with the Food and Drug Administration on or before (date 90 days after date of publication of the final rule), for any finger joint metal/metal constrained uncemented prosthesis that was in commercial distribution before May 28, 1976, or that has, on or before (date 90 days after date of publication of the final rule), been found to be substantially equivalent to a finger joint metal/metal constrained uncemented prosthesis that was in commercial distribution before May 28, 1976. Any other finger joint metal/metal constrained uncemented prosthesis shall have an approved PMA or a declared completed PDP in effect before being placed in commercial distribution.

38. Section 888.3210 is amended by revising paragraph (c) to read as follows:

§ 888.3210 Finger joint metal/metal constrained cemented prosthesis.

* * * * *

(c) *Date PMA or notice of completion of a PDP is required.* A PMA or a notice of completion of a PDP is required to be filed with the Food and Drug Administration on or before (date 90 days after date of publication of the final rule) for any finger joint metal/metal constrained cemented prosthesis that was in commercial distribution before May 28, 1976, or that has, on or before (date 90 days after date of publication of the final rule), been found to be substantially equivalent to a finger joint metal/metal constrained cemented prosthesis that was in commercial distribution before May 28, 1976. Any other finger joint metal/metal constrained cemented prosthesis shall have an approved PMA or a declared completed PDP in effect before being placed in commercial distribution.

39. Section 888.3220 is amended by revising paragraph (c) to read as follows:

§ 888.3220 Finger joint metal/polymer constrained cemented prosthesis.

* * * * *

(c) *Date PMA or notice of completion of a PDP is required.* A PMA or a notice of completion of a PDP is required to be filed with the Food and Drug Administration on or before (date 90 days after date of publication of the final rule) for any finger joint metal/polymer constrained cemented prosthesis that was in commercial distribution before May 28, 1976, or that has, on or before (date 90 days after date of publication of the final rule), been found to be substantially equivalent to a finger joint metal/polymer constrained cemented prosthesis that was in commercial distribution before May 28, 1976. Any other finger joint metal/polymer constrained cemented prosthesis shall have an approved PMA or a declared completed PDP in effect before being placed in commercial distribution.

40. Section 888.3300 is amended by revising paragraph (c) to read as follows:

§ 888.3300 Hip joint metal constrained cemented or uncemented prosthesis.

* * * * *

(c) *Date PMA or notice of completion of a PDP is required.* A PMA or a notice of completion of a PDP is required to be filed with the Food and Drug Administration on or before (date 90 days after date of publication of the final rule) for any hip joint metal constrained cemented or uncemented prosthesis that was in commercial distribution before May 28, 1976, or that has, on or before (date 90 days after date of publication of the final rule), been found to be substantially equivalent to a hip joint metal constrained cemented or uncemented prosthesis that was in commercial distribution before May 28, 1976. Any other hip joint metal constrained cemented or uncemented prosthesis shall have an approved PMA or a declared completed PDP in effect before being placed in commercial distribution.

41. Section 888.3310 is amended by revising paragraph (c) to read as follows:

§ 888.3310 Hip joint metal/polymer constrained cemented or uncemented prosthesis.

* * * * *

(c) *Date PMA or notice of completion of a PDP is required.* A PMA or a notice of completion of a PDP is required to be filed with the Food and Drug Administration on or before (date 90 days after date of publication of the final rule) for any hip joint metal/polymer constrained cemented or uncemented prosthesis that was in commercial distribution before May 28, 1976, or that has, on or before (date 90 days after date of publication of the final rule), been found to be substantially equivalent to a hip joint metal/polymer constrained cemented or uncemented prosthesis that was in commercial distribution before May 28, 1976. Any other hip joint metal/polymer constrained cemented or uncemented prosthesis shall have an approved PMA or a declared completed PDP in effect before being placed in commercial distribution.

42. Section 888.3370 is amended by revising paragraph (c) to read as follows:

§ 888.3370 Hip joint (hemi-hip) acetabular metal cemented prosthesis.

* * * * *

(c) *Date PMA or notice of completion of a PDP is required.* A PMA or a notice of completion of a PDP is required to be filed with the Food and Drug Administration on or before (date 90 days after date of publication of the final rule) for any hip joint (hemi-hip) acetabular metal cemented prosthesis that was in commercial distribution before May 28, 1976, or that has, on or before (date 90 days after date of publication of the final rule), been found to be substantially equivalent to a hip joint (hemi-hip) acetabular metal cemented prosthesis that was in commercial distribution before May 28, 1976. Any other hip joint metal (hemi-hip) acetabular metal cemented prosthesis shall have an approved PMA or a declared completed PDP in effect before being placed in commercial distribution.

43. Section 888.3380 is amended by revising paragraph (c) to read as follows:

§ 888.3380 Hip joint femoral (hemi-hip) trunnion-bearing metal/polyacetal cemented prosthesis.

* * * * *

(c) *Date PMA or notice of completion of a PDP is required.* A PMA or a notice of completion of a PDP is required to be filed with the Food and Drug Administration on or before (date 90 days after date of publication of the final rule) for any hip joint femoral (hemi-hip) trunnion-bearing metal/polyacetal cemented prosthesis that was in commercial distribution before May 28, 1976, or that has, on or before (date 90 days after date of publication of the final rule), been found to be substantially equivalent to a hip joint femoral (hemi-hip) trunnion-bearing metal/polyacetal cemented prosthesis that was in commercial distribution before May 28, 1976. Any other hip joint femoral (hemi-hip) trunnion-bearing metal/polyacetal cemented prosthesis shall have an approved PMA or a declared completed PDP in effect before being placed in commercial distribution.

44. Section 888.3480 is amended by revising paragraph (c) to read as follows:

§ 888.3480 Knee joint femorotibial metallic constrained cemented prosthesis.

* * * * *

(c) *Date PMA or notice of completion of a PDP is required.* A PMA or a notice of completion of a PDP is required to be filed with the Food and Drug Administration on or before (date 90 days after date of publication of the final rule) for any knee joint femorotibial metallic constrained cemented prosthesis that was in commercial distribution before May 28, 1976, or that has, on or before (date 90 days after date of publication in the **Federal Register** of the final rule based on this proposed rule), been found to be substantially equivalent to a knee joint femorotibial metallic constrained cemented prosthesis that was in commercial distribution before May 28, 1976. Any other knee joint femorotibial metallic constrained cemented prosthesis shall have an approved PMA or a declared completed PDP in effect before being placed in commercial distribution.

45. Section 888.3540 is amended by revising paragraph (c) to read as follows:

§ 888.3540 Knee joint patellofemoral polymer/metal semi-constrained cemented prosthesis.

* * * * *

(c) Date PMA or notice of completion of a PDP is required. A PMA or a notice of completion of a PDP is required to be filed with the Food and Drug Administration on or before (date 90 days after date of publication of the final rule) for any knee joint patellofemoral polymer/metal semi-constrained cemented prosthesis that was in commercial distribution before May 28, 1976, or that has, on or before (date 90 days after date of publication of the final rule), been found to be substantially equivalent to a knee joint patellofemoral polymer/metal semi-constrained cemented prosthesis that was in commercial distribution before May 28, 1976. Any other knee joint patellofemoral polymer/metal semi-constrained cemented prosthesis shall have an approved PMA or a declared completed PDP in effect before being placed in commercial distribution.

46. Section 888.3550 is amended by revising paragraph (c) to read as follows:

§ 888.3550 Knee joint patellofemorotibial polymer/metal/metal constrained cemented prosthesis.

* * * * *

(c) *Date PMA or notice of completion of a PDP is required.* A PMA or a notice of completion of a PDP is required to be filed with the Food and Drug Administration on or before (date 90 days after date of publication of the final rule) for any knee joint patellofemorotibial polymer/metal/metal constrained cemented prosthesis

that was in commercial distribution before May 28, 1976, or that has, on or before (date 90 days after date of publication of the final rule), been found to be substantially equivalent to a knee joint patellofemorotibial polymer/metal/metal constrained cemented prosthesis that was in commercial distribution before May 28, 1976. Any other knee joint patellofemorotibial polymer/metal/metal constrained cemented prosthesis shall have an approved PMA or a declared completed PDP in effect before being placed in commercial distribution.

47. Section 888.3570 is amended by revising paragraph (c) to read as follows:

§ 888.3570 Knee joint femoral (hemi-knee) metallic uncemented prosthesis.

* * * * *

(c) *Date PMA or notice of completion of a PDP is required.* A PMA or a notice of completion of a PDP is required to be filed with the Food and Drug Administration on or before (date 90 days after date of publication of the final rule) for any knee joint femoral (hemi-knee) metallic uncemented prosthesis that was in commercial distribution before May 28, 1976, or that has, on or before (date 90 days after date of publication of the final rule), been found to be substantially equivalent to a knee joint femoral (hemi-knee) metallic uncemented prosthesis that was in commercial distribution before May 28, 1976. Any other knee joint femoral (hemi-knee) metallic uncemented prosthesis shall have an approved PMA or a declared completed PDP in effect before being placed in commercial distribution.

48. Section 888.3580 is amended by revising paragraph (c) to read as follows:

§ 888.3580 Knee joint patellar (hemi-knee) metallic resurfacing uncemented prosthesis.

* * * * *

(c) *Date PMA or notice of completion of a PDP is required.* A PMA or a notice of completion of a PDP is required to be filed with the Food and Drug Administration on or before (date 90 days after date of publication of the final rule) for any knee joint patellar (hemi-knee) metallic resurfacing uncemented prosthesis described in paragraph (b)(2) of this section that was in commercial distribution before May 28, 1976, or that has on or before (date 90 days after date of publication of the final rule), been found to be substantially equivalent to a knee joint patellar (hemi-knee) metallic resurfacing uncemented prosthesis that was in commercial distribution before May 28, 1976. Any other knee joint patellar (hemi-knee) metallic resurfacing uncemented prosthesis shall have an approved PMA or a declared completed PDP in effect before being placed in commercial distribution.

49. Section 888.3640 is amended by revising paragraph (c) to read as follows:

§ 888.3640 Shoulder joint metal/metal or metal/polymer constrained cemented prosthesis.

* * * * *

(c) *Date PMA or notice of completion of a PDP is required.* A PMA or a notice of completion of a PDP is required to be filed with the Food and Drug Administration on or before (date 90 days after date of publication of the final rule) for any shoulder joint metal/metal or metal/polymer constrained cemented prosthesis that was in commercial distribution before May 28, 1976, or that has, on or before (date 90 days after date of publication of the final rule), been found to be substantially equivalent to a shoulder joint metal/metal or metal/polymer constrained cemented prosthesis that was in commercial distribution before May 28, 1976. Any other shoulder joint metal/metal or metal/polymer constrained cemented prosthesis shall have an approved PMA or a declared completed PDP in effect before being placed in commercial distribution.

50. Section 888.3680 is amended by revising paragraph (c) to read as follows:

§ 888.3680 Shoulder joint glenoid (hemi-shoulder) metallic cemented prosthesis.

* * * * *

(c) *Date PMA or notice of completion of a PDP is required.* A PMA or a notice of completion of a PDP is required to be filed with the Food and Drug Administration on or before (date 90 days after date of publication of the final rule) for any shoulder joint glenoid (hemi-shoulder) metallic cemented prosthesis that was in commercial distribution before May 28, 1976, or that has, on or before (date 90 days after date of publication of the final rule), been found to be substantially equivalent to a shoulder joint glenoid (hemi-shoulder) metallic cemented prosthesis that was in commercial distribution before May 28, 1976. Any other shoulder joint glenoid (hemi-shoulder) metallic cemented prosthesis shall have an approved PMA or a declared completed PDP in effect before being placed in commercial distribution.

51. Section 888.3790 is amended by revising paragraph (c) to read as follows:

§ 888.3790 Wrist joint metal constrained cemented prosthesis.

* * * * *

(c) *Date PMA or notice of completion of a PDP is required.* A PMA or a notice of completion of a PDP is required to be filed with the Food and Drug Administration on or before (date 90 days after date of publication of the final rule) for any wrist joint metal constrained cemented prosthesis that was in commercial distribution before May 28, 1976, or that has, on or before (date 90 days after date of publication of the final rule), been found to be substantially equivalent to a wrist joint metal constrained cemented prosthesis that was in commercial distribution before May 28, 1976. Any other wrist joint metal constrained cemented prosthesis shall have an approved PMA or a declared completed PDP in effect before being placed in commercial distribution.

PART 890—PHYSICAL MEDICINE DEVICES

52. The authority citation for 21 CFR part 890 continues to read as follows:

Authority: Secs. 501, 510, 513, 515, 520, 701 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 351, 360, 360c, 360e, 360j, 371).

53. Section 890.3610 is amended by revising paragraph (c) to read as follows:

§ 890.3610 Rigid pneumatic structure orthosis.

* * * * *

(c) *Date PMA or notice of completion of a PDP is required.* A PMA or a notice of completion of a PDP is required to be filed with the Food and Drug Administration on or before (date 90 days after date of publication of the final rule) for any rigid pneumatic structure orthosis that was in commercial distribution before May 28, 1976, or that has, on or before (date 90 days after date of publication of the final rule), been found to be substantially equivalent to a rigid pneumatic structure orthosis that was in commercial distribution before May 28, 1976. Any other rigid pneumatic structure orthosis shall have an approved PMA or a declared completed PDP in effect before being placed in commercial distribution.

Dated: August 9, 1995.

Department of Housing and Urban Development

Grants and Cooperative Agreements, Availability, Etc.: Rescissions Act Impact on Public and Indian Housing; Notice

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket Nos. FR-3769-N-02; FR-3774-N-03; FR 3832-N-02; FR-3841-N-04; FR-3867-N-02; and FR-3871-N-02]

Impact of Rescissions Act on Availability of Funding for Fiscal Year 1995: Public Housing Development; Traditional Indian Housing Development; Demolition and Disposition; Public and Indian Housing Modernization Program; and Family Investment Centers

AGENCY: Office of the Assistant Secretary for Public and Indian Housing, HUD.

ACTION: Notice of Impact of Rescissions Act on Availability of Funding for Fiscal Year (FY) 1995 for public housing development, the Traditional Indian Housing Development Program, public housing demolition and disposition, the public and Indian housing modernization program, and Family Investment Centers.

SUMMARY: The FY 1995 Rescissions Act affects the public and Indian housing programs described below by rescinding funds and amending the U.S. Housing Act of 1937. This notice advises the public of the rescissions and their impact on Notices of Funding Availability (NOFAs) that have been issued. This notice also advises the public of changes to regulation requirements and program policies, implementing some, but not all, of the provisions of the Rescissions Act that amend the 1937 Act for FY 1995.

DATES: This notice does not revise or extend any application deadlines, except with regard to demolition/disposition applications requesting replacement housing, as described in section I of this notice, under the heading **SUPPLEMENTARY INFORMATION**.

FOR FURTHER INFORMATION CONTACT:

For public housing programs, contact: William Minning, Director of Policy and Evaluation Division, Room 4236. Telephone (202) 708-0713, or (202) 708-0850 (TDD).

For Indian housing programs, contact: Bruce Knott, Native American Programs Housing and Community Development Division, Room P8204. Telephone (202) 755-0068, or (202) 708-0850 (TDD).

The address for both individuals is: Office of Public and Indian Housing, Department of Housing and Urban Development, 451 7th Street, SW., Washington, DC 20410. The telephone numbers listed are not toll-free.

SUPPLEMENTARY INFORMATION:

I. Public Housing Development

On June 16, 1995 (60 FR 31842), HUD published a NOFA that announced the availability of $600,278,866 for public housing development, of which $598,000,000 was derived from the FY 1995 appropriation and the remainder from carryover funds.

In the Emergency Supplemental Appropriations for Additional Disaster Assistance, for Anti-terrorism Initiatives, for Assistance in the Recovery from the Tragedy that Occurred at Oklahoma City, and Rescissions Act, 1995 (Pub. L. 104-19, approved July 27, 1995) (the Rescissions Act), Congress rescinded $620,600,000 of public housing development funds. The rescissions amount will be taken from FY 1995 funds, carryover funds, and recaptures.

The Rescissions Act provides that:

> [O]f the total rescinded under this heading, [Annual Contributions for Assisted Housing,] $700,600,000 shall be from amounts earmarked for development or acquisition costs of public housing (including $80,000,000 of funds for public housing for Indian families), except that such rescission shall not apply to funds for priority replacement housing for units demolished or disposed of (including units to be disposed of pursuant to a homeownership program under section 5(h) or title III of the United States Housing Act of 1937, as amended (hereinafter referred to as "the Act")) from the existing public housing inventory, as determined by the Secretary, or to funds related to litigation settlements or court orders, and the Secretary shall not be required to make any remaining funds available pursuant to section 213(d)(1)(A) of the Housing and Community Development Act of 1974 and notwithstanding any other provision of law, the Secretary may recapture unobligated funds for development or acquisition costs of public housing (including public housing for Indians) irrespective of the length of time funds have been reserved or of any time extension previously granted by the Secretary. * * *

Under the June 16, 1995 NOFA (60 FR 31842), applications were limited to the following funding categories:

(1) Replacements for demolition/disposition subject to section 18 of the United States Housing Act of 1937;

(2) Replacements for homeownership transfers under the HOPE I Program, and homeownership sales under section 5(h) of the U.S. Housing Act of 1937;

(3) Headquarters Reserve: Unforeseen housing needs resulting from natural and other disasters; housing needs resulting from emergencies, as certified by the Secretary, other than such disasters; housing needs resulting from the settlement of litigation; and housing in support of desegregation efforts; and

(4) "Other" applications.

Under the Rescissions Act, funds for priority replacement housing (including unforeseen housing needs resulting from natural and other disasters) and funds related to litigation settlements or court orders are not rescinded. Therefore, these are the only categories of Headquarters Reserve that can be funded. To the extent that HUD funds FY 1995 public housing development activities of this nature, however, the magnitude of the rescission dictates that HUD recapture unobligated prior year public housing funds (i.e., funds that have not been placed under an Annual Contributions Contract (ACC)), as described further below.

Because of the enactment of the Rescissions Act, HUD is now able to address only the first three categories of funding in the June 16, 1995 NOFA. To pay for the congressionally mandated FY 1995 funding actions under the first three NOFA categories, HUD will recapture prior year unobligated funds from funding awards not within congressionally protected categories.

The one-for-one replacement requirement of section 18 of the U.S. Housing Act of 1937 (the 1937 Act) was eliminated by the Rescissions Act for all public housing (but not Indian housing) demolition or disposition applications approved on or prior to September 30, 1995, including all previous section 18 approvals. Therefore, public housing (but not Indian housing) authorities are no longer required to provide replacement units for such demolition or disposition, nor is HUD obligated to make commitments to provide funding to meet that requirement. However, in keeping with the congressional directive that priority replacement housing funds are not rescinded, HUD intends to review FY 1995 replacement public housing applications and to consider funding those applications it views as best meeting the priorities stated in the NOFA.

Application Requirements

All provisions of the FY 1995 NOFA for public housing development, published on June 16, 1995, still apply except the references to category 4, "Other" applications. There will not be a "fair share" distribution of funds in FY 1995. HUD plans to destroy all category 4 "Other" applications submitted in response to the FY 1995 NOFA. Any public housing authorities (PHAs) interested in having their unfunded applications returned should contact the Office of Public Housing in the local HUD office.

The June 16, 1995 NOFA also provided that category 1 or 2 applications would not be funded unless the underlying demolition of disposition application was submitted by the time funding selections are made (60 FR 31845). The NOFA further provided that HUD may make a funding award if the underlying application had not yet been approved, if all aspects of the underlying application other than compliance with Section 412 of the Cranston-Gonzalez National Affordable Housing Act of 1990, as amended, were approvable by August 1, 1995 (See 60 FR 31845, section III.C.1, column 1.)

The last two sentences of section III.C.1. of the June 16, 1995 NOFA no longer apply and are replaced by the following three sentences:

> For those housing authorities that intend to submit an application for replacement housing under this NOFA, the underlying demolition or disposition application must be submitted by September 15, 1995, and must additionally be approvable by that date. The Department may make a funding award if the underlying application has not yet been approved, if all aspects of the underlying application other than compliance with section 412 of the Cranston-Gonzalez National Affordable Housing Act of 1990, as amended, are approvable by that date. The Department reserves the right to extend to an individual housing authority that submits a demolition or disposition application by the extended deadline the ability to augment its application submission for items that the HUD staff finds are not complete after an initial review for approvability and that can be completed within the time specified by HUD.

II. Traditional Indian Housing Development Program

On January 20, 1995 (60 FR 4330), HUD published the NOFA for the Traditional Indian Housing Development Program for Fiscal Year 1995. The NOFA announced that up to $282,000,000 was available for new Indian Housing units. Of that amount, $20,000,000 was retained until July 1, 1995 for replacement of approved demolition/disposition units. The NOFA also included a table reflecting the percentage of total funds being made available to each of the Field Offices of Native American Programs (FONAPs) (60 FR 4331).

HUD has completed its funding decisions under this NOFA. With the exception of $1,819,131, all funds have been reserved under grants to Indian Housing Authorities.

As referenced under the Public Housing Development section of this notice, Congress rescinded $80,000,000 of funds for public housing for Indian families, which reduces the maximum authorized budget authority for FY 1995 to $202,000,000. Since HUD completed funding decisions prior to the enactment of the Rescissions Act, HUD must reduce awards made to Indian housing authorities by $78,180,869 (the amount of the rescission less unreserved funds).

HUD intends, as practical, to assign an amount to be rescinded to each FONAP based upon the original assignment of Indian Housing Development funds. Each FONAP, in consultation with representatives of client groups, will identify sources of unobligated funds equal to that FONAPs share of the rescission. If an individual FONAP has insufficient unobligated funds, any remaining funds required to meet the rescission requirements will be prorated to each remaining FONAP.

III. Demolition or Disposition of Public Housing

On January 18, 1995, HUD published in the **Federal Register** (60 FR 3706) a final rule for demolition or disposition of public housing projects. The final rule implemented section 121 of the Housing and Community Development Act of 1987, which amended section 18 of the 1937 Act, governing approvals of demolition and disposition of public and Indian housing. Section 121 provided that developments or portions of developments may not be demolished or disposed of unless the housing agency (HA) has developed a plan for the provision of a replacement unit for each unit involved. The Rescissions Act eliminates the requirement for one-for-one replacement of dwelling units in the case of any application for demolition or disposition of public housing (but not Indian housing) approved on or before September 30, 1995.

In accordance with section 1002 of the Rescissions Act, HAs that have applications for demolition, disposition, or conversion to homeownership of public housing dwelling units approved *on or before September 30, 1995,* including all previous approvals, are no longer required to provide one-for-one housing replacement, and HUD is not obligated to commit the funds necessary to carry out the replacement housing plan. The Rescissions Act provides that no application for replacement housing submitted by a public housing agency to implement a final order of a court issued, or a settlement approved by a court, before enactment of the Rescissions Act, shall be affected.

Review of Pending and New Demolition/Disposition Applications

HUD's review of all pending applications (those currently in Processing Centers or in Headquarters) and all new applications approved on or before September 30, 1995, will require compliance with all provisions of 24 CFR part 970, except that HUD will not require compliance with 24 CFR 970.11, Replacement Housing Plans. HAs submitting new demolition or disposition applications should be aware that if their applications are approved on or before September 30, 1995, replacement housing is not required.

However, as directed by Congress and stated in the public housing development section of this notice (section I, above), HUD will review and consider for funding FY 1995 applications for use of public housing development funds as priority replacement housing. As HUD will describe in another notice to be published soon in the **Federal Register**, certain Section 8 funds will also be made available for replacement of public housing units that are to be demolished or disposed of.

HAs with pending applications for demolition or disposition are encouraged to inform the residents, the related resident organizations, and the units of local government that approved the replacement housing plans of the changes brought about by the Rescissions Act.

Approved Demolition/Disposition Applications With Reserved Funding

For those HAs whose demolition or disposition applications were previously approved by HUD on or before September 30, 1995, for which there are public housing development funds or Section 8 15-year or 5-year certificates reserved (i.e., the replacement housing plan is either fully or partially funded), the HA must use the funds that have been reserved, and are not recaptured, in accordance with all applicable requirements, even though the replacement housing requirement is no longer applicable.

Other Provisions

Other provisions of the Rescissions Act may be addressed in future **Federal Register** notices.

IV. Public and Indian Housing Modernization

The Rescissions Act rescinds $815 million previously appropriated for FY 1995 modernization under Section 14 of the 1937 Act. The $815 million rescission will be achieved by the following:

Eliminating Choice in Management set-aside	$100,000,000
Reducing Lead-Based Paint Risk Assessment set-aside	4,203,655

Reducing Reserve for Emergencies and Natural Disasters	40,000,000
Reducing Comprehensive Improvement Assistance Program (CIAP) funds	70,398,701
Reducing Comprehensive Grant Program (CGP) funds	600,397,644
Total	815,000,000

Set-asides for Section 6(j) technical assistance to HAs, the Tenant Opportunity Program, inspection and technical assistance, and lead-based paint indemnification will not be affected by the rescission.

Expanded Use of Modernization

The Rescissions Act amends section 14 of the 1937 Act by adding a new subsection (q) that expands the eligible activities that may be funded with modernization assistance (CGP or CIAP). An HA may use modernization assistance for any eligible activity related to public and Indian housing that is currently authorized by the 1937 Act or applicable appropriations Acts for an HA. For example, new eligible items include:

- Development of additional units or replacement housing;
- Modernization activities related to the public or Indian housing portion of housing developments held in partnership, or cooperation with nonpublic housing entities (this would include development of replacement housing and receipt of operating subsidy); and
- Other activities related to public and Indian housing, including activities eligible under the Urban Revitalization Demonstration (Hope VI).

However, the Rescissions Act does not authorize use of modernization assistance for public and Indian housing operating assistance.

If the HA wishes to undertake any of these previously ineligible activities, the HA shall revise its Physical Needs Assessment or Management Needs Assessment, as well as the Annual Statement or Five-Year Action Plan, and shall conduct another public hearing and obtain another Local Government Statement. If the revised Annual Statement includes any of these previously ineligible activities, the HA is required to submit another Board Resolution, approving the revised Annual Statement.

The Rescissions Act also states that modernization funds must be used principally for physical improvements or replacement housing and for associated management improvements, except as otherwise approved by the Secretary.

Comprehensive Grant Program (CGP)

The effect of the Rescissions Act is to reduce by 19 percent the amount of CGP funds available in FY 1995, from $3,153,244,533 to $2,552,846,889. The Rescissions Act directs HUD "to take actions necessary to assure that such rescission is distributed among public housing authorities, as if such rescission occurred prior to the commencement of the fiscal year." To comply with the Rescissions Act and to ensure that each CGP agency receives its proportionate reduction, HUD has rerun the CGP formula using the revised appropriation. HUD sent each CGP agency a letter on August 9, 1995, informing it of the revised formula amount and operating procedures to implement the rescission.

Comprehensive Improvement Assistance Program (CIAP)

On March 17, 1995 (60 FR 14538), HUD published a NOFA announcing the availability of $369,715,143 for the Comprehensive Improvement Assistance Program. The effect of the Rescissions Act is to reduce by 19 percent the amount of CIAP funds available in FY 1995, down to $299,316,442. The fund assignment to each HUD Field Office will be reduced accordingly. Since FY 1995 CIAP funding decisions were not final at the time the Rescissions Act was signed, no adjustments to FY 1995 CIAP grants are necessary. FY 1995 CIAP emergency applications that are already approved are not affected by the rescission.

V. Public and Indian Housing Family Investment Centers

HUD published a NOFA for up to $60,000,000 for Public and Indian Housing Family Investment Centers (FICs) on February 15, 1995 (60 FR 8900). HUD also published NOFAs for the following set-asides from FIC funds: $3,500,000 for the Family Investment Centers After-School Program, March 14, 1995 (60 FR 13850); $10,000,000 for a Youth Development Initiative, May 30, 1995 (60 FR 28304); and $1,000,000 for the HOPE in Youth Pilot Demonstration, July 20, 1995 (60 FR 37552).

The Rescissions Act provides that $66,000,000 shall be rescinded from amounts earmarked for family investment centers. However, $5,209,500 has already been awarded and placed under contract either to correct errors in HUD's processing of the FY 1994 family investment center competition or as part of an after school demonstration program. HUD concluded upon review that two applicants were not funded during the FY 1994 family investment center competition due to an error. HUD funded these two applicants for a total of $1,709,500. In addition HUD funded four grantees for a total of $3,500,000 as part of an after school demonstration program. These funds cannot be recaptured because they are under contract.

HID will not award additional grants in FY 1995 under the Family Investment Centers program.

Dated: August 30, 1995.

Michael B. Janis,

General Deputy Assistant Secretary for Public and Indian Housing.

Public Laws

104th Congress, 1st Session, 1995

Pamphlet prints of public laws, often referred to as slip laws, are the initial publication of Federal laws upon enactment and are printed as soon as possible after approval by the President. Legislative history references appear on each law. Subscription service includes all public laws, issued irregularly upon enactment, for the 104th Congress, 1st Session, 1995.

(Individual laws also may be purchased from the Superintendent of Documents, Washington, DC 20402-9328. Prices vary. See Reader Aids Section of the Federal Register for announcements of newly enacted laws.)

Briefings on How To Use the Federal Register
For information on briefings in Washington, DC and Atlanta, GA, see announcement on the inside cover of this issue.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper, 24x microfiche and as an online database through *GPO Access*, a service of the U.S. Government Printing Office. The online database is updated by 6 a.m. each day the **Federal Register** is published. The database includes both text and graphics from Volume 59, Number 1 (January 2, 1994) forward. It is available on a Wide Area Information Server (WAIS) through the Internet and via asynchronous dial-in. The annual subscription fee for a single workstation is $375. Six-month subscriptions are available for $200 and one month of access can be purchased for $35. Discounts are available for multiple-workstation subscriptions. To subscribe, Internet users should telnet to swais.access.gpo.gov and login as newuser (all lower case); no password is required. Dial-in users should use communications software and modem to call (202) 512–1661 and login as swais (all lower case); no password is required; at the second login prompt, login as newuser (all lower case); no password is required. Follow the instructions on the screen to register for a subscription for the **Federal Register** Online via *GPO Access*. For assistance, contact the *GPO Access* User Support Team by sending Internet e-mail to help@eids05.eids.gpo.gov, or a fax to (202) 512–1262, or by calling (202) 512–1530 between 7 a.m. and 5 p.m. Eastern time, Monday through Friday, except Federal holidays.

The annual subscription price for the **Federal Register** paper edition is $494, or $544 for a combined **Federal Register**, Federal Register Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the Federal Register Index and LSA is $433. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is $8.00 for each issue, or $8.00 for each group of pages as actually bound; or $1.50 for each issue in microfiche form. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA or MasterCard. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 60 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

Rules and Regulations

Federal Register
Vol. 60, No. 174
Friday, September 8, 1995

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 591

RIN 3206–AG73

Cost-of-Living Allowances (Nonforeign Areas)

AGENCY: Office of Personnel Management.

ACTION: Final rule.

SUMMARY: The Office of Personnel Management (OPM) is issuing two regulatory changes in the nonforeign area cost-of-living allowance (COLA) program. One change will clarify a reference in the regulations to examples of criteria we use for comparing housing between the allowance areas and Washington, DC. The second change will allow the payment of foreign area post differentials without any corresponding offset from the nonforeign area COLA. OPM is also changing the timing of living-cost surveys conducted in Hawaii, Guam, Puerto Rico, and the U.S. Virgin Islands. These changes will improve administration of the nonforeign area COLA program.

DATES: These regulations are effective October 10, 1995. These regulations are applicable on the first day of the first pay period beginning on or after October 10, 1995.

FOR FURTHER INFORMATION CONTACT: Allan G. Hearne, (202) 606–2838.

SUPPLEMENTARY INFORMATION: Under section 5941 of title 5, United States Code, and Executive Order 10000, as amended, certain Federal employees in nonforeign areas outside the 48 contiguous States are eligible for cost-of-living allowances (COLA's) when local living costs are substantially higher than those in the Washington, DC, area. Nonforeign area COLA's are paid in Alaska, Hawaii, Puerto Rico, the U.S. Virgin Islands, and Guam and the Commonwealth of the Northern Mariana Islands.

OPM published proposed rules on May 11, 1995 (60 FR 25150), to improve administration of the program by—

(1) Permitting the survey and analysis of living costs at fewer income levels than the three levels currently used;

(2) Clarifying the types of housing units to be surveyed; and

(3) Allowing the payment of foreign area post differentials without any corresponding offset from the nonforeign area COLA.

OPM also announced for comment its intention to change the timing of living-cost surveys conducted in Hawaii, Guam, Puerto Rico, and the U.S. Virgin Islands, although this change did not require a change in regulation.

There were five respondents to the proposed regulations. In the discussion that follows, we address the comments that we received on each issue and provide our response.

Number of Income Levels Surveyed

We received four comments on the proposal to use only one income level in the surveying of living costs. Each of the four commenters expressed concerns about the impact of the proposed change on COLA rates. One of the commenters favored continued use of the current three-level surveying methodology because of the possibility that the proposed change would not accurately reflect the actual costs of COLA area employees. The other three commenters presented arguments in favor of further study of the issue.

In light of these comments, we have decided not to make the change at this time. OPM will review the issue further in preparation for its report to Congress under the Treasury, Postal Service and General Government Appropriations Act, 1992 (Pub. L. 102–141), as amended. The comments received in response to the proposed regulation will be considered by OPM in its review.

Types of Housing Units Surveyed

We proposed to clarify a parenthetical phrase in current regulations concerning the types of housing units surveyed. We received four comments on this issue. Three commenters agreed with the change, although one said that if the cost index for any COLA area were unintentionally lowered, the change should be revoked. One commenter objected to the change, stating that new homes with their modern architectural preferences, greater amenities, and lower maintenance needs are more valuable than old homes. The commenter added that a comparison of new homes in Washington, DC, with old homes in COLA areas would not be fair and reasonable.

The parenthetical phrase "(type, size, age)" in 5 CFR § 591.205(b)(3) was intended to list *examples* of the standard shelter specifications that could be used for comparing housing in the COLA areas with the Washington, DC, area. Because we were not always able to obtain age data on the housing units surveyed, we proposed to remove "age" from the listing so as not to give the impression that age was in fact being used in the calculations.

In response to the comments, we are instead prefacing "type, size, age" with "e.g.," to make clear that these are examples of the specifications that could be used. We will continue to attempt to obtain age data and may apply age criteria for comparison of housing. If this proves feasible, we will provide a description of the exact procedures in a later **Federal Register** notice.

Nonforeign Area COLA and Foreign Post Differentials

We further proposed to eliminate the requirement in § 591.210(d) that an employee's *nonforeign* area COLA be reduced if the employee also receives a *foreign* area post differential and the two payments combined would otherwise exceed 25 percent of basic pay. This created a disincentive for employees in nonforeign allowance areas to accept long-term temporary assignments in foreign areas. The four comments we received on this proposal all agreed with the change.

Survey Timing

We also announced our intention to change the timing of the summer COLA surveys to correspond with the winter COLA surveys. This does not involve a regulatory change.

We received three comments on this proposal, all of which supported the change, although one respondent reserved full comment pending an opportunity to review the information upon which we based our decision. Therefore, in view of the potential benefit to the public and the

Government of this change and in anticipation of its minimal impact on COLA rates, OPM plans to conduct its living-cost surveys in Hawaii, Guam, Puerto Rico, and the U.S. Virgin Islands in the first quarter of the calendar year beginning with the next survey, which will be conducted in the first quarter of calendar year 1996.

General Comments

One commenter expressed concern that OPM issued the proposed regulations at a time when a broad examination of the COLA program is scheduled. The commenter felt that some of the changes could have a substantial impact on the program and that the 30-day comment period was not enough time to fully analyze their effect.

Except for the proposed technical clarification relating to standard shelter specifications, all of the changes we proposed were based on comments and recommendations we received on previously published living-cost survey reports. In fact, this particular commenter had proposed, on several previous occasions, analyzing living costs at only one income level, and we had addressed this issue specifically in several previous **Federal Register** notices. Therefore, because we were proposing to adopt recommendations that commenters had previously provided on issues that were not new, we believed that 30 days was sufficient time to review and comment on our proposals. In the future, however, OPM will continue to provide, whenever practical, at least 60 days for interested parties to review and comment on proposals relating to the COLA program.

One commenter responded generally to the cost of housing and grocery items in Alaska and expressed concern about any reduction in COLA rates. These final regulations will have no effect on the COLA rates payable in Alaska. Furthermore, Pub. L. 102–141, as amended, prohibits any reductions in COLA rates through December 31, 1996.

Regulatory Flexibility Act

I certify that this regulation will not have a significant economic impact on a substantial number of small entities because it will affect only Federal agencies and employees.

List of Subjects in 5 CFR Part 591

Government employees, Travel and transportation expenses, Wages.

Office of Personnel Management.

James B. King,

Director.

Accordingly, OPM is amending 5 CFR part 591 as follows:

PART 591—ALLOWANCES AND DIFFERENTIALS

Subpart B—Cost-of-Living Allowance and Post Differential—Nonforeign Areas

1. The authority citation for subpart B of part 591 continues to read as follows:

Authority: 5 U.S.C. 5941; E.O. 10000, 3 CFR, 1943–1948 Comp., p. 792; E.O. 12510, 3 CFR, 1985 Comp., p. 338.

2. In § 591.205, the second sentence in paragraph (b)(3) is revised to read as follows:

§ 591.205 Comparative cost index.

* * * * *

(b) * * *

(3) * * * Standard shelter specifications (e.g., type, size, age) are selected for each income level. * * *

* * * * *

§ 591.210 [Amended]

3. In § 591.210, paragraph (d) is removed and paragraphs (e), (f), and (g) are redesignated as paragraphs (d), (e), and (f), respectively.

BILLING CODE 6325–01–M

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 998

[Docket No. FV95–998–2FIR]

Amendment of Requirements Established Under Marketing Agreement No. 146 Regulating the Quality of Domestically Produced Peanuts for 1995 and Subsequent Crop Years

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: The Department of Agriculture (Department) is adopting as a final rule, with one minor correction, the provisions of an interim final rule that amends for the 1995 peanut crop and subsequent crop years several provisions of the incoming, outgoing, and indemnification regulations established under Marketing Agreement No. 146. The changes recognize industry operating practices and reduce the burden on handlers without compromising the agreement's objective. The objective of the agreement is to ensure that only wholesome peanuts enter edible market channels. This final rule was unanimously recommended by the Peanut Administrative Committee (Committee), the administrative agency for this wholesomeness assurance program.

EFFECTIVE DATE: September 8, 1995.

FOR FURTHER INFORMATION CONTACT: William G. Pimental, Marketing Specialist, Southeast Marketing Field Office, Fruit and Vegetable Division, AMS, USDA, P.O. Box 2276, Winter Haven, Florida 33883–2276; telephone: (941) 299–4770, or FAX: (941) 299–5169; or Jim Wendland, Marketing Specialist, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, room 2523–S, Washington, D.C. 20090–6456; telephone: (202) 720–2170, or FAX: (202) 720–5698.

SUPPLEMENTARY INFORMATION: This final rule is issued under Marketing Agreement No. 146 (7 CFR part 998) regulating the quality of domestically produced peanuts, hereinafter referred to as the agreement. This agreement is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the "Act."

The Department is issuing this rule in conformance with Executive Order 12866.

This rule has been reviewed under Executive Order 12778, Civil Justice Reform. This rule is not intended to have retroactive effect. This rule will not preempt any State or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule. There are no administrative procedures which must be exhausted prior to any judicial challenge to the provisions of this rule.

Pursuant to the requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this action on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened.

There are about 75 handlers of peanuts subject to regulation under the agreement, and about 47,000 peanut producers in the 16 States covered under the program. Small agricultural service firms are defined by the Small Business Administration (13 CFR 121.601) as those having annual receipts of less than $5,000,000, and small agricultural producers have been defined as those having annual receipts of less than $500,000. Some of the handlers signatory to the agreement are small entities, and a majority of the

producers may be classified as small entities.

In 1994, the reported U.S. production, mostly covered under the agreement, was approximately 4.25 billion pounds of peanuts, a 25 percent increase from the short 1993 crop. The preliminary 1994 peanut crop value is $1.23 billion, up 19 percent from the 1993 crop value.

The objective of the agreement, in place since 1965, is to ensure that only wholesome peanuts enter edible market channels. About 70 percent of U.S. shellers (handlers), handling approximately 95 percent of the crop, have voluntarily signed the agreement. Under the agreement, farmers' stock peanuts with visible *Aspergillus flavus* mold (the principal source of aflatoxin) are required to be diverted to non-edible uses. Each lot of milled peanuts must be sampled and the samples chemically analyzed for aflatoxin contamination. Signatory handlers who comply with these requirements may be eligible for indemnification of losses for individual lots of their peanuts which test positive to aflatoxin. Indemnification and administrative costs are paid by assessments levied on handlers signatory to the agreement.

The Committee, which is composed of producers and handlers of peanuts, meets to review the rules and regulations effective on a continuous basis for peanuts regulated under the agreement. Committee meetings are open to the public, and interested persons may express their views at these meetings. The Department reviews Committee recommendations and information, as well as information from other sources, and determines whether modification, suspension, or termination of the rules and regulations would tend to effectuate the declared policy of the Act.

The Committee met on March 22 and 23, 1995, and unanimously recommended several changes to incoming, outgoing, and indemnification regulations for 1995 and subsequent crop peanuts.

The Committee recommended amending § 998.100 Incoming quality regulation by revising paragraph (c) to provide that commercially acquired lots be designated as Segregation 2 peanuts (rather than Segregation 1) by the Federal or Federal-State Inspection Service (Inspection Service) when exceeding .50 percent freeze damage and/or 14.49 percent loose shelled kernels (LSK's) when the Inspection Service is notified that a contract between the producer and the handler specifies these more restrictive tolerances.

Currently, § 998.100 (b) defines Segregation 1 peanuts as farmers' stock peanuts with not more than 2 percent damaged kernels nor more than 1.00 percent concealed damage caused by rancidity, mold, or decay and which are free from visible *Aspergillus flavus*. Section 998.100 (c) defines Segregation 2 peanuts as farmers' stock peanuts with more than 2 percent damaged kernels or more than 1.00 percent concealed damage caused by rancidity, mold, or decay and which are free from visible *Aspergillus flavus*.

The recommendation was not adopted by the Department. The current standards are rules of general applicability which apply to all peanuts without regard to any contractual agreements between individuals. Buyers and sellers are free to agree to a variety of contractual terms. However, such agreements should not have the effect of determining whether peanuts are Segregation 1 or 2 as those terms are defined in the regulations.

Previously, § 998.100(i) Shelled peanuts read "Handlers may acquire from other handlers, for remilling and subsequent disposition to human consumption outlets, shelled peanuts (which originated from "Segregation 1 peanuts") that fail to meet the requirements specified for human consumption in paragraph (a) of the Outgoing Quality Regulation (§ 998.200). Any lot of such peanuts must be accompanied by a valid inspection certificate for the grade factors and must be positive lot identified. * * * Peanuts acquired pursuant to this paragraph shall be held and milled separate and apart from other receipts or acquisitions of the receiving handler, and further disposition shall be regulated by paragraph (h)(1) of the Outgoing Quality Regulation (§ 998.200)".

This rule continues in effect the revision made in paragraph (i) of § 998.100 to allow movement of shelled peanuts, which originated from Segregation 1 peanuts, without inspection and positive lot identification (PLI), from one handler to another and does not require the receiving handler to hold and mill such peanuts separate from other receipts and acquisitions. The high degree of control that had been in place for such transactions is no longer needed because the peanut industry has changed from small locally owned plants to large corporations with strict quality control procedures. The Committee believes that relaxing the requirements will enable handlers to reduce processing and storage costs and increase movement of peanuts without jeopardizing the agreement's quality control and lot identification objectives.

Section 998.200 Outgoing quality regulation was amended by revising paragraphs (f) and (h)(1) to allow handlers to transfer peanuts to any handler or to domestic commercial storage without PLI and certification of meeting quality requirements when it leaves the first facility. Previously, § 998.200(f) Inter-plant transfer read "Any handler may transfer peanuts from one plant owned by him to another of his plants or to commercial storage, without having such peanuts positive lot identified and certified as meeting quality requirements, but such transfer shall be only to points within the same production area and ownership shall have been retained by the handler. Upon any transferred peanuts being disposed of for human consumption, they shall meet all the requirements applicable to such peanuts".

Prior to the issuance of the interim final rule, § 998.200(h) Peanuts failing quality requirements read "(1) Handlers may sell to or contract with other handlers, for further handling, shelled peanuts (which originated from Segregation 1 peanuts) that fail to meet the requirements for disposition to human consumption outlets heretofore specified in paragraph (a) of this section. Lots of peanuts disposed of in this manner must be accompanied by a valid grade inspection certificate, and must be positive lot identified. Transactions made in this manner shall be reported to the Committee by both the seller and the buyer on a form provided by the Committee. Any such peanuts acquired by handlers pursuant to paragraph (i) of the Incoming Quality Regulation (§ 998.100) shall be held and milled separate and apart from other receipts or acquisitions of the receiving handler and further disposition shall be regulated by the requirements specified heretofore or pursuant to paragraph (h)(3) hereinafter".

This high degree of control is no longer needed. As stated earlier, the peanut industry has changed dramatically from many small locally owned and operated plants to large or multinational corporations with strict quality control procedures located throughout the different production areas in the United States. Relaxing the regulation allows freer movement of peanuts, more efficient use of facilities, and reduced numbers of inspections, resulting in lower costs and a more competitive industry, without compromising the program's quality control objective.

Under paragraph (h) of § 998.200, peanuts failing quality requirements for disposition to human consumption outlets can be sent to blanchers for reconditioning, to domestic crushers, or exported (when peanuts meet fragmented requirements). In § 998.200 paragraph (h)(2) previously read "Handlers may blanch or cause to have blanched positive lot identified shelled peanuts (which originated from Segregation 1 peanuts) that fail to meet the requirements of paragraph (a) of this section because of excessive damage, minor defects, moisture, or foreign material or are positive as to aflatoxin: *Provided,* That such lots of peanuts contain not in excess of 8 percent damage and minor defects combined or 2 percent foreign material. Prior to movement of such peanuts to a blancher, handlers shall report to the Committee, on a form furnished by the Committee, and receive authorization from the Committee for movement and blanching of each such lot. Lots of peanuts which are moved under these provisions must be accompanied by a valid grade inspection certificate and the title shall be retained by the handler until the peanuts are blanched and certified by an inspector of the Federal or Federal-State Inspection Service as meeting the requirements for disposal into human consumption outlets. To be eligible for disposal into human consumption outlets, such peanuts after blanching, must meet specifications for unshelled peanuts, damaged kernels, minor defects, moisture, and foreign material as listed in paragraph (a) of this section and be accompanied by an aflatoxin certificate determined to be negative by the Committee * * *."

Paragraph (h)(4) of § 998.200 previously read "Handlers may contract with Committee approved remillers for remilling shelled peanuts (which originated from Segregation 1 peanuts) that fail to meet the requirements for disposition to human consumption outlets heretofore specified in paragraph (a) of the Outgoing Quality Regulation: *Provided,* That such lot of peanuts contain not in excess of 8 percent damage and minor defects combined or 10 percent fall through or 2 percent foreign material. Prior to movement of such peanuts under these provisions to a Committee approved remiller, handlers shall report to the Committee, on a form furnished by the Committee, and receive authorization from the Committee for movement and remilling of each such lot. Lots of peanuts moved under these provisions must be accompanied by a valid grade inspection certificate and must be positive lot identified and the title of such peanuts shall be retained by the handler until the peanuts have been remilled and certified by the Federal or Federal-State Inspection Service as meeting the requirements for disposition to human consumption outlets specified in paragraph (a), and be accompanied by an aflatoxin certificate determined to be negative by the Committee. Remilling under these provisions may include composite remilling of more than one such lot of peanuts owned by the same handler. However, such peanuts owned by one handler shall be held and remilled separate and apart from all other peanuts * * *"

Paragraph (h)(2) of § 998.200 was relaxed by the interim final rule to allow individual handlers to move failing peanuts containing not in excess of 10 percent total unshelled peanuts and damaged kernels or 10 percent foreign material to Committee approved blanchers, rather than reworking (blanching) at their own facilities. Also, paragraph (h)(4) of § 998.200 was similarly relaxed to allow individual handlers to move failing peanuts to Committee approved remillers for remilling shelled peanuts containing not in excess of 10 percent total unshelled peanuts and damaged kernels or 10 percent fall through or 10 percent foreign material.

However, before such peanuts go to human consumption outlets, the peanuts have to be certified as meeting human consumption outlet requirements (must at least meet minimum requirements specified in "OTHER EDIBLE QUALITY" (NON-INDEMNIFIABLE) GRADES—WHOLE KERNELS AND SPLITS table of § 998.200(a) and must also be certified "negative" (not more than 15 parts per billion) as to aflatoxin).

These changes recognize the current generally more efficient, higher technology processing capabilities of blanchers' and remillers' facilities and practices compared with the typical handler's facility and are intended to provide handlers more reconditioning flexibility. These changes tend to reduce limitations on handlers by allowing them to use blanchers' and remillers' generally more efficient grading and milling facilities to rework such peanuts, improve handlers' competitive position, especially with regards to imported peanuts, by better utilizing peanut supplies and existing facilities and increase peanut movement to higher value markets.

This action also continues in effect the revisions made to paragraph (j) of § 998.200 to exempt certain peanuts, including those of a lower quality than Segregation 1 for domestic crushing, from being assessed to lower the handlers' costs for these lower value peanuts, as authorized by §§ 998.48 Assessments and 998.31 Incoming regulation of the agreement.

The Committee also recommended that this exemption apply to Segregation 1 peanuts for crushing. However, the recommendation was not adopted by the Department because the agreement provides no authority for such an exemption and it would require an amendment to the agreement through formal rulemaking procedures to add such authority. Segregation 1 peanuts are sometimes commingled with Segregation 2 or 3 peanuts. In such cases, the Segregation 1 peanuts take on the identity of the lower quality Segregation 2 or 3 peanuts, because it dilutes the quality of higher quality Segregation 1 peanuts. In those cases, the quantity of former Segregation 1 peanuts which were commingled are exempt from program assessments.

Further, this action amends § 998.300 Terms and conditions of indemnification by establishing reduced indemnification values specified in paragraphs (e), (h), (i), and (x); and revising paragraph (z) by specifying a reduced ceiling and/or number of claims to "trigger" payments. The indemnification value of rejects and entire lots is reduced to 35 cents per pound from the previous 45 cents. The interim final rule failed to mention that the reduction in indemnification value also required changes to paragraph (e) of § 998.300. This inadvertent omission is corrected in this document.

These changes are intended to reduce the problem encountered by the Committee and the Department on 1993 crop indemnification claims when the indemnification payment ceiling and number of claims was significantly exceeded and the Department was asked for and approved the authority for the Committee to spend up to $500,000 from the indemnification reserve fund to pay the excess claims. These changes are expected to reduce by $2 million the cost to the Committee for indemnification payments, and reduce the possibility of handlers making indemnification, rather than the edible market, the primary market for peanuts when regular market prices are low. When the market is weak some handlers may send their peanuts directly to indemnification rather than incur the cost of reworking the peanuts to improve the quality of the lots enough to sell them in the edible market.

The unchanged portions of the incoming, outgoing, and indemnification regulations currently in effect for 1994 crop peanuts are left in

effect, as is, for 1995 and subsequent crop years.

In accordance with the Paperwork Reduction Act of 1988 (44 U.S.C. Chapter.35), information collection requirements that are contained in this rule have been previously approved by the Office of Management and Budget (OMB) and have been assigned OMB No. 0581–0067.

Based on the above, the Administrator of the AMS has determined that this final rule will not have a significant economic impact on a substantial number of small entities.

After consideration of all relevant matter presented, the information and recommendations submitted by the Committee, and other information, it is found that finalizing the interim final rule which was published in the July 14, 1995, issue of the **Federal Register** (60 FR 36205), with one correction adding paragraph (e) to amended § 998.300, will tend to effectuate the declared policy of the Act. That rule provided that interested persons could file comments through August 14, 1995. No comments were received.

It is further found that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** (5 U.S.C. 553) because: (1) This action continues in effect relaxed requirements for peanut handlers, who voluntarily signed the agreement; and (2) the interim final rule provided that interested persons could file comments through August 14, 1995. No comments were received and the Department is adopting as a final rule the provisions of the interim final rule, with one correction.

List of Subjects in 7 CFR Part 998

Marketing agreements, Peanuts, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, 7 CFR part 998 is amended as follows:

PART 998—MARKETING AGREEMENT REGULATING THE QUALITY OF DOMESTICALLY PRODUCED PEANUTS

1. The authority citation for 7 CFR part 998 continues to read as follows:

Authority: 7 U.S.C. 601–674.

2. Accordingly, the interim final rule amending 7 CFR part 998 which was published at 60 FR 36205 on July 14, 1995, is adopted as a final rule and corrected as follows:

In amendatory item 4, on page 36208, in the third column, the 4th line, a reference to "(e)", is added between the word "paragraphs" and the letter "(h)".

Dated: September 1, 1995.

Ronald Cioffi,

Acting Deputy Director, Fruit and Vegetable Division.

RIN 0560–A

Disaster Set-Aside Program

AGENCY: Rural Housing and Community Development Service, Rural Business and Cooperative Development Service, Rural Utilities Service, and Consolidated Farm Service Agency, USDA.

ACTION: Final rule.

SUMMARY: The Consolidated Farm Service Agency (CFSA) is amending its regulations to implement the "Disaster Set-Aside (DSA) Program." This rule makes the Disaster Set-Aside Program a permanent servicing option available to all CFSA Farm Credit Programs borrowers affected by a natural disaster. Under this program, the distressed borrower will have the opportunity to move the next scheduled annual installment to the end of the loan term. The intended effect is to service disaster victims in an efficient and timely manner while keeping them in business.

EFFECTIVE DATE: Final rule effective September 8, 1995.

FOR FURTHER INFORMATION CONTACT: Kimberly R. Laris, Loan Officer, Consolidated Farm Service Agency, USDA, Farm Credit Programs Loan Servicing and Property Management Division, Room 5449, 14th Street and Independence Avenue SW., Washington, DC 20250–0774, Telephone (202) 720–1659.

SUPPLEMENTARY INFORMATION:

Classification

This rule has been determined to be not significant for purposes of Executive Order 12866 and therefore has not been reviewed by the Office of Management and Budget.

Intergovernmental Consultation

For the reasons set forth in the final rule related to Notice 7 CFR, part 3015, subpart V (48 FR 29115, June 24, 1983), Emergency Loans, Farm Ownership Loans, and Farm Operating Loans are excluded, with the exception of nonfarm enterprise activity, from the scope of Executive Order 12372, which requires intergovernmental consultation with state and local officials. The Soil and Water Loan Program, however, is subject to and has complied with the provisions of Executive Order 12372.

Programs Affected

These changes affect the following credit programs as listed in the Catalog of Federal Domestic Assistance:

10.404—Emergency Loans
10.406—Farm Operating Loans
10.407—Farm Ownership Loans
10.410—Low Income Housing Loans
10.418—Soil and Water Loans

Environmental Impact Statement

This document has been reviewed in accordance with 7 CFR part 1940, subpart G, "Environmental Program." The issuing agency has determined that this action does not significantly affect the quality of the human environment, and in accordance with the National Environmental Policy Act of 1969, an Environmental Impact Statement is not required.

Civil Justice Reform

This final rule has been reviewed under Executive Order 12778, Civil Justice Reform. In accordance with this rule: (1) All state and local laws and regulations that are in conflict with this rule will be preempted; (2) no retroactive effect will be given to this rule; and (3) administrative proceedings in accordance with the regulations of the agency at 7 CFR subpart B of part 1900 and any additional regulations to be published by the Department of Agriculture to implement the provisions of the National Appeals Division as mandated by the Department of Agriculture Reorganization Act of 1994 must be exhausted before bringing suit in court challenging action taken under this rule unless those regulations specifically allow bringing suit at an earlier time.

Paperwork Reduction Act

The information collection requirements contained in these regulations have been previously approved by the Office of Management and Budget (OMB) under the provisions of 44 U.S.C. chapter 35 and have been assigned OMB control number 0575–

0163 in accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3507). This final rule does not revise or impose any new information collection or recordkeeping requirements from those approved by OMB.

Discussion of Final Rule

The DSA Program was made available to CFSA Farm Credit (FC) Programs borrowers through an interim rule published in the **Federal Register** (59 FR 53079) October 21, 1994, with a 30 day comment period ending November 21, 1994. The program was designed to assist CFSA FC borrowers who were financially distressed because of a natural disaster that hit their area in 1993. The financial distress was nationwide due to heavy flooding in the Midwest and extreme drought in the South. The Agency estimated that considerably more borrowers were affected by disasters in 1993 than in any of the previous five years. In order to assist farmers suffering from delinquencies and possible farm failures, the Agency developed this servicing tool, DSA, that could provide immediate financial assistance without a massive amount of paperwork and restrictive requirements.

Under the DSA program, distressed borrowers may be permitted to move their next scheduled FC annual installment to the end of the loan term to be paid with the final installment. In order to be determined distressed, the borrower's net income must have been reduced as a result of the disaster causing insufficient income to be available to pay all family living and operating expenses, debts to other creditors, and CFSA FC payments. As of June 30, 1995, 6,800 borrowers affected by a 1993 disaster received DSA assistance.

Because of the overall success of the program and the many favorable comments received from borrowers, farm advocacy groups and others, the Agency has amended the regulation to allow DSA to be a permanent servicing tool available to all CFSA FC borrowers affected by a natural disaster.

Discussion of Revisions and Comments

In response to the interim rule, five respondents provided twenty-one comments, two respondents being from farm advocacy groups and three from employees within the Agency. Revisions were made for clarification in answer to comments. The regulations have also been revised to remove administrative procedures. These procedures will instead be available in the agency's internal instructions. Forms and exhibits are available in any CFSA local or state office.

Five comments were received in regard to extending the DSA program to assist borrowers affected by disasters after 1993. Three of the respondents recommended the program be available as a permanent servicing option following all natural disasters while one respondent recommended only extending the program to include 1994 disasters. Only one respondent recommended the program end after assisting farmers affected by the 1993 disasters. After careful consideration and favorable public response from farm advocacy groups and borrowers, the Agency has decided to make the DSA program available as a permanent servicing option to all borrowers affected by a disaster. By making this program available, the Agency believes that borrowers who would not be able to obtain emergency loans under subpart D of part 1945 of this chapter because of percent of loss or lack of collateral, or who cannot receive servicing under subpart S of part 1951, may be able to defer their FC payments in order to stay in business and avoid liquidation. It is also feasible to conclude that if the FC installments are set-aside, any Emergency loan the borrower is eligible for and still needs could be used to pay other creditors or provide for annual operating expenses. The Agency believes that borrowers eligible for this program will receive immediate financial relief from their FC payment obligations in a more expedient manner than under subpart S of part 1951. For example, the application process is simple and easy, unlike the primary loan servicing application under subpart S of part 1951 which requires extensive documentation by both the borrower and the servicing official. There are no additional security requirements to deter the borrower from requesting DSA and the Agency's position is more secure as no debt is written off. Also, based on the actual number of borrowers who received set-aside, the Agency was able to provide financial assistance within a few days whereas under subpart S of part 1951, it takes an average of 90 days to process an application and restructure a loan.

Because this program is promulgated pursuant to section 331A of the Consolidated Farm and Rural Development Act (CONACT) (see discussion in the interim rule at 59 Fed. Reg. 53080, October 21, 1994), the Agency does not consider the program to be a primary loan service program as defined in section 343(b)(3) of the CONACT, which would require the program to be part of the 1951–S process. This would be counterproductive to the purpose of the DSA program which is intended to provide immediate financial relief for one installment only. Moreover, this rule, like the interim rule in section 1951.957, states that borrowers cannot receive both 1951–T and 1951–S servicing when applications for both programs are pending. If DSA is granted, the one delinquent installment eligible for set-aside is serviced and the borrower is no longer delinquent. If 1951–S primary loan servicing is provided, the delinquency is cured by restructuring with or without debt writedown. At any event, as stated in section 1951.957(a)(2), borrowers may resubmit an application in accordance with 1951–S of this part for additional servicing after DSA has been received.

Since the DSA program will be made available to cover future disasters, the Agency has imposed a limitation that restricts future set-aside on a loan if there is already a payment still set-aside. If the borrower received set-aside on three of four loans and later requests set-aside because of another disaster, the borrower may only receive set-aside on the loan that does not already have a payment set-aside. If the set-aside is paid in full, or the loan with set-aside is later restructured under subpart S of part 1951, the set-aside will no longer exist and therefore the loan could again be considered for DSA under future disasters. This limitation was imposed to restrict a continual build up of payments being set-aside to the end of the loan when restructuring the debt under subpart S of part 1951 would have been the most effective servicing action.

One respondent recommended that attorneys for borrowers in bankruptcy be notified of the DSA program with a copy to the borrower. The Agency did not adopt this comment. The letter sent to the borrower is for information only. It is not specifically addressed to the borrower nor does it require the borrower to do anything that if not done, will cause the Agency to liquidate. Furthermore, borrowers in bankruptcy are not serviced under this subpart while under court jurisdiction. Agency regulations for servicing borrowers who have filed bankruptcy petitions are found in subpart A of part 1962.

One respondent suggested that the regulation and the informational letter be clarified to state that if a determination cannot be made based on the borrower's actual records, the borrower may have to provide evidence that all expenses and/or debts could not be paid as projected. The same respondent suggested that for borrowers whose crop is not harvested until the following year, that actual records for both the disaster year and the year in which the income is received be submitted to the Agency. The Agency adopted the first comment by adding a statement that other information may be requested by the servicing official when needed to make an eligibility determination. Instances when other information may be needed are when the borrower did not have a plan already prepared for the disaster year or the disaster affected the following year's production in which a plan or actual records ror that year may be needed. No changes were made as a result of the second comment since the regulation already requires the borrower to provide actual records for the production/marketing period in which the disaster occurred. This requirement should cover those commodities produced in one year and marketed the next. The Agency has also clarified in the eligibility requirements that consideration may be given to loss of income in the following year as a result of the disaster causing insufficient income to pay all expenses and debts for that year. An example may be that the borrower's feed was destroyed causing the borrower to purchase poorer quality feed which in turn caused a decrease in milk production.

Two respondents recommended the regulation be clarified to state that the borrower must have been a borrower at the time of the disaster and continued to be a borrower to the present time. Another respondent recommended that set-aside only be granted on loans outstanding at the time of the disaster. The Agency has adopted these suggestions by requiring that the borrower must have been a borrower and the loan being set-aside must have been outstanding at the time of the disaster. This clarification further enforces the intent of the program to assist borrowers who were affected by a disaster and were unable to make their payments; or if they were able to make their FC payments, they could not pay all their other creditors. If a borrower was not a borrower at the time of the disaster, then there were no payments to the Agency that could not be paid as a result of the disaster. If the Agency made a loan to the borrower after the disaster, a feasible farm and home plan would have been developed in order for the Agency to approve a loan and the affects of the disaster should have already been taken into consideration when the plan was developed. It is not the Agency's intent to make a loan to a borrower and then turn around and set-aside the first installment unless the loan was made prior to the disaster. The Agency has also clarified that borrowers paying under a debt settlement adjustment in accordance with subpart B of part 1956 are not eligible for DSA as these such borrowers are liquidating their debt, not continuing with it.

One respondent recommended that the regulation clarify that borrowers in bankruptcy who are still under court jurisdiction are considered in non-monetary default and are not eligible for the DSA program. The Agency has adopted this recommendation by clarifying that borrowers in bankruptcy or under court jurisdiction are considered in nonmonetary default. Borrowers under a confirmed plan who are still under court jurisdiction may obtain similar type servicing with a modification of their bankruptcy plan through the bankruptcy court as set forth in subpart A of part 1962. The Agency chose to exclude borrowers in bankruptcy from this subpart's servicing because the intent of the program was to expedite the servicing process to resolve the borrower's immediate financial distress. If the borrower is in bankruptcy, court approval is needed, thereby causing additional delays in servicing the borrower.

One respondent recommended an exception to allow borrowers who were restructured after the disaster to receive DSA if the restructure did not take into account the impact of the reduction in income or increase in expenses caused by the disaster. In other words, the impact was not known until harvest season and therefore the restructure did not cure the borrower's financial distress caused by the disaster. While this comment may be well taken since the DSA program was not available until October 21, 1994, these borrowers situations should have already been resolved through the exception authority or considered for 1951–S servicing. Therefore, the Agency did not revise its regulations to incorporate this specific exception. Because the Agency believes that there will be few of these cases in the future, it prefers to rely on its general exception authority contained in section 1951.959 for those few cases which may arise.

One respondent recommended that borrowers who received a confirmed bankruptcy plan after the disaster and are no longer under court jurisdiction should not be eligible for DSA as this is similar to a borrower being restructured under subpart S of part 1951. The Agency did not adopt this comment because generally speaking it has been the Agency's policy to recognize that the Bankruptcy Code provides entirely different relief than the Agency's regulations. For example, section 1951.909(e)(4)(vi) states that a writedown received in bankruptcy will not count toward a borrower's lifetime limit of one writedown nor will it count in the $300,000 per borrower limit.

Three respondents recommended the Agency allow up to the third annual installment to be set-aside in the event the borrower has already paid the installment due after the disaster and the very next installment. The Agency understands the concerns of the respondents. The regulation was published in late October 1994 with borrowers being notified soon thereafter. By this date, many borrowers who were affected by the disaster had already paid their installment due after the 1993 disaster, such as their January 1, 1994 installment, and because they were on an assignment to pay periodic payments throughout the year such as from milk production or hog sales, their January 1, 1995 installment was paid or almost paid by the time the regulation was issued. The same is true for borrowers not on an assignment who paid early in the year from production sales. It is understandable that even though the FC payments were paid, they still may not have been able to pay their other creditors because of the loss they suffered from the 1993 disaster. Borrowers not on an assignment or who did not pay early received full benefit of the DSA program because the income they received was paid to other creditors instead of paying their FC payments. Therefore, in order to provide all borrowers recovering from a disaster with the same opportunity to apply and receive DSA, the Agency has revised the regulations to allow borrowers who were affected by a disaster in 1994 to set-aside the next installment due, up to the third installment due after the disaster occurred. For all disasters thereafter, only the installment due immediately after the disaster or the very next one after that will be set-aside.

Two respondents recommended that the regulation be clarified to limit the amount set-aside to the amount the borrower cannot pay or by how much the borrower needs set-aside to develop a feasible cash flow for the next year. This is consistent with subpart B of part 1924 in which the borrower must pay the FC payments if able to do so, and subpart A of part 1962 for required use of security proceeds. The Agency has adopted this comment by limiting the amount to be set-aside by the lesser of the amount the borrower was unable to pay CFSA during the production/

marketing period in which the disaster occurred, or the amount the borrower was unable to pay other creditors and/or expenses, rounded up to the nearest whole installment. Expenses which the borrower is unable to pay may include the following year's operating and family living expenses if the income or commodities lost from the disaster year would have been used for these purposes, or if normal income security from the disaster year is approved for release under subpart A of part 1962 or otherwise authorized under subpart B of part 1924 for these purposes. Under no circumstances will a portion of the installment be set-aside leaving a balance still due. The portion not set-aside must be paid by the borrower on or before the date exhibit A to FmHA Instruction 1951–T (available in any CFSA local or state office) is signed.

One respondent recommended that the regulation be revised to allow for at least 30 days for the borrower to sign the addendum instead of up to 30 days. This would allow the Agency some flexibility in cases where the Agency's approval is contingent upon the borrower doing something to be eligible, such as paying a portion of the FC payments from proceeds that may not be available until after the 30 day period expires. The Agency has adopted this comment by revising the regulation to allow the County Supervisor to provide for a longer period of time to sign the addendum not to exceed 90 days under extenuating circumstances.

Two comments were received from one respondent to revise the addendum to only state the total amount set-aside on the loan since the Agency's accounting system does not allow the servicing official to calculate the amount of principal and interest that can be set-aside, and to state that if the borrower receives set-aside, the borrower's primary and preservation loan servicing application will be withdrawn, instead of just the primary loan servicing application. The Agency has adopted these comments.

The Agency also added another condition for cancelling and reversing DSA. The interim rule required cancellation when the borrower is later restructured with primary loan servicing. It also allowed for reversal of the DSA prior to the first scheduled annual installment coming due after the DSA is granted when a writedown, buyout, or operating loan assistance is needed. This rule requires cancellation when it is determined that the DSA was unauthorized because it was not provided in accordance with these regulations. If the Agency cancels DSA because the assistance was unauthorized, borrowers will be notified of the reasons for the decision, and provided with an opportunity to appeal. By reserving the authority to cancel DSA when it is unauthorized, the Agency is clarifying inherent Government authority to reverse transactions which are not in accordance with existing law. The Agency has discovered several instances of unauthorized assistance under the interim rule. It is in the public interest to correct these errors.

The Agency has also removed all reference to the 1993 disaster year from this rule since the time period for borrowers affected by a 1993 disaster has passed. (The interim rule allowed until July 1, 1995 to apply). Borrowers affected by a 1994 disaster through the date the final rule is published will have 8 months from the date they are notified of DSA to apply. For all future disasters, borrowers will have 8 months from the date the county is designated a disaster area, which is consistent with the time period to apply for an Emergency Loan in accordance with subpart A of part 1945.

List of Subjects in 7 CFR Part 1951

Account servicing, Credit, Loan programs—Agriculture, Loan programs—Housing and community development, Low and moderate income housing loans—Servicing, Debt restructuring.

Accordingly, part 1951, Chapter XVIII, title 7, Code of Federal Regulations is amended as follows:

PART 1951—SERVICING AND COLLECTIONS

1. The authority citation for part 1951 is revised to read as follows:

Authority: 5 U.S.C. 301; 7 U.S.C. 1989; 42 U.S.C. 1480.

2. Subpart T, §§ 1951.951 through 1951.1000, is revised to read as follows:

PART 1951—SERVICING AND COLLECTIONS

Subpart T—Disaster Set-Aside Program

Sec.
1951.951 Purpose.
1951.952 General.
1951.953 Notification and request for DSA.
1951.954 Eligibility and loan limitation requirements.
1951.955 –1951.956 [Reserved]
1951.957 Eligibility determination and processing.
1951.958 Cancellation and reversal of DSA.
1951.959 Exception authority.
1951.960 –1951.999 [Reserved]
1951.1000 OMB control number.

Subpart T—Disaster Set-Aside Program

§ 1951.951 Purpose.

This subpart sets forth the policies and procedures for the Disaster Set-Aside (DSA) Program. The DSA program is available to Farm Credit (FC) Programs borrowers, as defined in subpart S of this part, who suffered losses as a result of a natural disaster. FC loans that may be serviced under this subpart include Farm Ownership (FO), Operating (OL), Soil and Water (SW), Emergency (EM), Economic Emergency (EE), Special Livestock (SL), Economic Opportunity (EO), Softwood Timber (ST), Recreation (RL), and Rural Housing loans for farm service buildings (RHF). Nonprogram (NP) farm type loans may be serviced under this subpart for borrowers who also have FC loans.

§ 1951.952 General.

DSA is a program whereby borrowers who are current or not more than one installment behind on any and all FC loans may be permitted to move one scheduled annual installment for each eligible FC loan to the end of the loan term. The intent of this program is to relieve some of the borrower's immediate financial stress caused by the disaster and avoid foreclosure by the Government. DSA is not intended to circumvent the servicing available under subpart S of this part.

§ 1951.953 Notification and request for DSA.

(a) *Notification.* The Consolidated Farm Service Agency (CFSA) servicing office will notify FC borrowers of the availability of DSA and how to apply within 30 days from the date the servicing office is notified of the disaster designation as determined in accordance with subpart A of part 1945. Only FC borrowers who were borrowers at the time of the disaster and operated a farm or ranch in a county designated a disaster area or contiguous county will be notified. Those borrowers whose FC loan has been accelerated, restructured after the disaster, or who only have NP loans will not be notified. Notification of the DSA program will not affect the notification requirements contained in subpart S of this part.

(b) *Deadline to apply.* All FC borrowers liable for the debt must request DSA within 8 months from the date the disaster was designated, except borrowers affected by a disaster occurring in years 1994 and 1995 where counties or contiguous counties were designated prior to the date of this subpart will have 8 months from the date of DSA notification. Borrowers may only be considered for DSA one time for each disaster.

(c) *Information needed to apply.*

(1) A written request for DSA signed by all parties liable for the debt; and

(2) Actual production, income, and expense records for the production and marketing period in which the disaster occurred. Other information may be requested by the servicing official when needed to make an eligibility determination.

§ 1951.954 Eligibility and loan limitation requirements.

(a) *Eligibility requirements.* The following requirements must be met to be eligible for DSA:

(1) The borrower must have operated a farm or ranch in a county designated a disaster area or a county contiguous to such an area. The borrower must have been a borrower and operated the farm or ranch at the time of the disaster.

(2) The borrower must have acted in good faith as defined in § 1951.906 of subpart S of this part.

(3) All nonmonetary defaults must have been resolved. This means that even though the borrower has acted in good faith, the borrower may still be in default for reasons, such as, but not limited to: no longer farming, prior lienholder foreclosure, bankruptcy or under court jurisdiction, not properly maintaining chattel and real estate security, not properly accounting for the sale of security, or not carrying out any other agreement made with the Agency.

(4) The borrower must be current or not more than one installment behind on any and all FC loans at the time the scheduled installment will be set-aside. Borrowers paying under a debt settlement adjustment agreement in accordance with subpart B of part 1956 are not eligible.

(5) As a direct result of the disaster, sufficient income was not available to pay all family living and operating expenses, debts to other creditors, and CFSA. This determination will be based on the borrower's actual production and income and expense records for the disaster year and any other records required by the servicing official. Compensation received for losses shall be considered as well as increased expenses incurred because of the disaster. Consideration will also be given to insufficient income for the next production and marketing period following the disaster if the borrower establishes that production will be reduced or expenses increased as a result of the disaster.

(6) After the scheduled installments are set-aside, all FC and NP farm type loans must be current.

(7) The borrower's FC loan has not been accelerated nor has the borrower's debt been restructured under subpart S of this part since the disaster occurred.

(b) *Loan limitation requirements.*

(1) The loan must have been outstanding at the time of the disaster.

(2) Only one unpaid installment for each FC loan may be set-aside. If there is an installment still set-aside from a previous disaster, the loan is not eligible for DSA. If the set-aside is later paid in full, or cancelled through restructuring under subpart S of part 1951, the set-aside will no longer exist and therefore the loan may be considered for DSA under future disasters.

(3) The term remaining on the loan receiving DSA equals or exceeds 2 years from the due date of the installment being set-aside.

(4) The amount set-aside shall be limited to the lesser of the amount the borrower is unable to pay CFSA from the production and marketing period in which the disaster occurred, or the amount the borrower is unable to pay other creditors and/or expenses rounded up to the nearest whole installment. Expenses which the borrower is unable to pay may include the following year's operating and family living expenses if the income or commodities lost from the disaster year would have been used for these purposes, or if normal income security from the disaster year is approved for release under subpart A of 7 CFR part 1962 or otherwise authorized under subpart B of 7 CFR part 1924 for these purposes. Under no circumstances will a portion of the installment be set-aside leaving a balance still due. The portion not set-aside must be paid by the borrower on or before the date exhibit A of FmHA Instruction 1951–T (available in any CFSA office) is signed.

(5) The installment that may be set-aside is limited to the first scheduled annual installment due immediately after the disaster occurred, unless that installment is paid, then the next scheduled annual installment after that may be set-aside. For borrowers affected by a 1994 disaster who already paid both of these installments, the third scheduled installment to come due after the disaster may be set-aside.

(6) The amount set-aside will be the unpaid balance remaining on the installment at the time the borrower signs exhibit A of FmHA Instruction 1951–T (available in any CFSA office.) This amount will include the unpaid interest and any principal that would be credited to the account as if the installment were paid on the due date taking into consideration any payments applied to principal and interest since the due date. Recoverable cost items charged to FO, SW, and RHF loans may be set-aside with the annual installment. Cost items identified with a loan number different from the parent loan cannot be set-aside.

§§ 1951.955–1951.956 [Reserved]

§ 1951.957 Eligibility determination and processing.

(a) *Eligibility determination.* Upon receipt of a DSA request, the County Supervisor will determine whether the borrower meets the requirements set forth in 1951.954. Approval shall be contingent upon the borrower's continuing eligibility through the signing of Exhibit A.

(1) The borrower has up to 30 days to sign exhibit A of FmHA Instruction 1951–T (available in any CFSA office), for each loan installment set-aside. The County Supervisor may provide for a longer period of time not to exceed 90 days under extenuating circumstances, including but not limited to situations where the Agency's approval is contingent upon the borrower doing something to be eligible, such as paying a portion of the FC payments from proceeds that may not be available until after the 30 day period.

(2) Pending requests for primary loan servicing will continue to be considered in accordance with subpart S of this part. However, borrowers are not eligible for servicing under both programs. The application for the program not received will automatically be withdrawn at the time the installment is set-aside or the loan restructured, whichever is applicable. The automatic withdrawal is not appealable because the borrower is no longer delinquent. If the borrower again becomes delinquent or in financial distress, or requests primary loan servicing, the borrower will be notified or the request processed in accordance with subpart S of this part.

(b) *Processing.*

(1) [Reserved.]

(2) Interest will accrue on any principal amount set-aside at the same rate charged the non-set-aside portion. Interest will not accrue on the interest portion set-aside. Limited resource interest rate changes will affect the principal set-aside.

(3) The amount set-aside, including interest accrual on any principal set-aside, will be due on or before the final due date of the loan.

(4) There are no additional security requirements attached to the DSA program. All existing security instruments will remain in effect.

(5) [Reserved.]

(6) [Reserved.]

(7) Payments applied to the amount set-aside will be applied first to interest and then principal.

(c) *Adverse determination.* If the borrower becomes more than one installment behind on any FC loan while processing the DSA request, or while an appeal is being considered, and the second installment cannot be paid current prior to exhibit A of FmHA Instruction 1951–T (available in any CFSA office) being signed, the DSA request will be denied.

§ 1951.958 Cancellation and reversal of DSA.

(a) *Reasons for cancellation.* The set-aside may be reversed and exhibit A of FmHA Instruction 1951–T cancelled under the following described situations:

(1) The loan is later restructured with primary loan servicing, (the total unpaid balance must be restructured);

(2) If prior to the first scheduled installment due date after set-aside, the servicing official determines that the current borrower, if delinquent, would qualify for a writedown or net recovery buyout in accordance with subpart S of part 1951, or operating loan assistance in accordance with § 1941.14 of subpart A of 7 CFR part 1941; or

(3) When it has been determined that the borrower was provided unauthorized DSA assistance. (The set-aside will be cancelled after all appeal rights are exhausted. The set-aside will be removed from the account and the payment terms of the original promissory note will be retained as if DSA was never granted. Borrowers financially distressed or delinquent after reversal of the set-aside will be serviced in accordance with subpart S of this part).

(b) Reserved.

§ 1951.959 Exception authority.

The Administrator may, in individual cases, make an exception to any requirement or provision of this subpart which is not inconsistent with the authorizing statute or other applicable law if it is determined that application of the requirement or provision would adversely affect the Government's interest. The Administrator will exercise this authority upon the request of the State Director with the recommendation of the Deputy Administrator for Farm Credit Programs, or upon request initiated by the Deputy Administrator for Farm Credit Programs.

§§ 1951.960–1951.999 [Reserved]

§ 1951.1000 OMB control number.

The collection of information requirements in this regulation have been approved by the Office of Management and Budget and assigned OMB control number 0575–0163. Public reporting burden for this collection of information is estimated to be 15 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Department of Agriculture, Clearance Office OIRM, Room 404–W, Washington DC 20250; and to the Office of Management and Budget, Paperwork Reduction Project (OMB# 0575–0163), Washington, DC 20503.

Dated: August 31, 1995.

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to General Electric Company (GE) CF6–45/-50 series turbofan engines, that requires an initial and repetitive on-wing visual inspection of the side links of the five-link forward mount assembly for cracks, and replacement of the side links and pylon attachment bolts, and inspection of the fail-safe bolt and platform lug, if the side links are found cracked. This AD also requires a shop-level refurbishment of the side links as a terminating action to the on-wing inspection program. This amendment is prompted by four reports of cracked side links detected during routine engine shop visits. The actions specified by this AD are intended to prevent a side link fracture, which could result in the failure of the second side link, or the forward engine mount pylon attachment bolts, and possible separation of the engine from the aircraft.

DATES: Effective October 10, 1995.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of October 10, 1995.

ADDRESSES: The service information referenced in this AD may be obtained from General Electric Aircraft Engines, CF6 Distribution Clerk, Room 132, 111 Merchant Street, Cincinnati, OH 45246. This information may be examined at the Federal Aviation Administration (FAA), New England Region, Office of the Assistant Chief Counsel, 12 New England Executive Park, Burlington, MA; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Richard Woldan, Aerospace Engineer, Engine Certification Office, FAA, Engine and Propeller Directorate, 12 New England Executive Park, Burlington, MA 01803–5299; telephone (617) 238–7136; fax (617) 238–7199.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) to include an airworthiness directive (AD) that is applicable to General Electric Company (GE) CF6–45/-50 series turbofan engines was published in the **Federal Register** on April 6, 1995 (60 FR 17487). That action proposed to require an initial and repetitive on-wing visual inspection of the side links of the five-link forward mount assembly for cracks, and replacement of the side links and pylon attachment bolts, and inspection of the fail-safe bolt and platform lug, if side links are found cracked. That proposal also would require a shop-level refurbishment of the side links as a terminating action to the on-wing inspection program. The actions would be required to be accomplished in accordance with GE Aircraft Engines CF6–50 Service Bulletin No. 72–1092, dated November 18, 1994.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the comment received.

The one commenter states that the requirement to refurbish the side link at the next engine shop visit after effective date of the AD identified in paragraph (b) should be extended so that their current maintenance program is not disrupted.

The commenter further feels that the initial and repetitive inspection program will be sufficient to meet the safety objectives of the AD, and therefore considers the refurbishment to be optional. The FAA does not concur. The FAA has determined that the refurbishment compliance schedule fairly and reasonably balances the safety need to eliminate the unsafe condition from the fleet as quickly as possible with the operators' need to avoid unscheduled maintenance actions. The initial and repetitive inspections were intended as an interim corrective action only, and in order to meet the safety objectives of the AD, the refurbishment was deemed necessary. Individual operators who believe their circumstances warrant relief from the compliance schedule may submit requests for alternative methods of compliance or adjustments to the compliance times.

After careful review of the available data, including the comment noted above, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed.

The FAA estimates that 220 engines installed on aircraft of U.S. registry will be affected by this AD, that it will take approximately 7.5 work hours per engine to accomplish the required actions, and that the average labor rate is $60 per work hour. The FAA has estimated that only a small percentage of parts will actually require replacement as a result of this AD, and therefore, has determined the parts cost to be negligible. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $99,000.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES.**

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 USC 106(g), 40101, 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

95–17–15 General Electric Company: Amendment 39–9346. Docket 95–ANE–10.

Applicability: General Electric Company (GE) CF6–45/–50 series turbofan engines installed on, but not limited to, Airbus A300 series, Boeing 747 series, and McDonnell Douglas DC–10 series aircraft.

Note: This airworthiness directive (AD) applies to each engine identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For engines that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must use the authority provided in paragraph (d) to request approval from the Federal Aviation Administration (FAA). This approval may address either no action, if the current configuration eliminates the unsafe condition, or different actions necessary to address the unsafe condition described in this AD. Such a request should include an assessment of the effect of the changed configuration on the unsafe condition addressed by this AD. In no case does the presence of any modification, alteration, or repair remove any engine from the applicability of this AD.

Compliance: Required as indicated, unless accomplished previously. To prevent a side link fracture, which could result in failure of the second side link, or the forward engine mount pylon attachment bolts, and possible separation of the engine from the aircraft, accomplish the following:

(a) Inspect left-hand side links, Part Numbers (P/N) 9204M94P01, 9204M94P03, and 9346M99P01, and right-hand side links, P/N's 9204M94P02, 9204M94P04, and 9346M99P02, that have not had the side link refurbishment done in accordance with GE CF6–50 Task Numbered Shop Manual, GEK 50481, Chapter 72–23–11, including Temporary Revision No. 72–0821 and 72–0822, both dated November 1, 1994, as follows:

(1) For side links that have not been previously inspected in accordance with GE Aircraft Engines (GEAE) CF6–50 Service Bulletin (SB) No. 72–1092, dated November 18, 1994, inspect in accordance with paragraph 2.A of GEAE CF6–50 SB No. 72–1092, dated November 18, 1994, prior to accumulating 350 cycles in service (CIS), or 750 hours time in service (TIS), after the effective date of this AD, whichever occurs earlier.

(2) For side links that have been previously inspected in accordance with GEAE CF6–50 SB No. 72–1092, dated November 18, 1994, inspect in accordance with paragraph 2.A of GEAE CF6–50 SB No. 72–1092, dated November 18, 1994, prior to accumulating 350 CIS, or 750 hours TIS since inspected in accordance with GEAE CF6–50 SB No. 72–1092, dated November 18, 1994, whichever occurs earlier.

(3) Thereafter, inspect in accordance with paragraph 2.A of GEAE CF6–50 SB No. 72–1092, dated November 18, 1994, at intervals not to exceed 350 CIS, or 750 hours TIS since the last inspection, whichever occurs earlier.

(4) If side links are found cracked, replace the cracked side links and pylon attachment bolts with serviceable parts, and inspect the fail-safe bolt and platform lug in accordance with paragraph 2.B of GEAE CF6–50 SB No. 72–1092, dated November 18, 1994, prior to further flight.

(b) Refurbish the left-hand and right-hand side links identified in paragraph (a) of this AD at the next engine shop visit after the effective date of this AD in accordance with paragraph 2.C of GEAE CF6–50 SB No. 72–1092, dated November 18, 1994. Refurbishment of side links in accordance with this paragraph constitutes terminating action to the on-wing inspection requirements of paragraph (a) of this AD.

(c) For the purpose of this AD, an engine shop visit is defined as the induction of an engine into a shop for maintenance involving the separation of the fan and core modules.

(d) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Engine Certification Office. The request should be forwarded through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Engine Certification Office.

Note: Information concerning the existence of approved alternative methods of compliance with this airworthiness directive, if any, may be obtained from the Engine Certification Office.

(e) The actions required by this AD shall be done in accordance with the following service bulletin:

Document No.	Pages	Date
GEAE CF6–50 SB No. 72–1092.	1–7	Nov. 18, 1994.

Total Pages: 7.

This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from General Electric Aircraft Engines, CF6 Distribution Clerk, Room 132, 111 Merchant Street, Cincinnati, OH 45246. Copies may be inspected at the FAA, New England Region, Office of the Assistant Chief Counsel, 12 New England Executive Park, Burlington, MA; or at the Office of the Federal Register, 800 North Capitol Street NW., suite 700, Washington, DC.

(f) This amendment becomes effective on October 10, 1995.

Issued in Burlington, Massachusetts, on August 15, 1995.

Jay J. Pardee,

Manager, Engine and Propeller Directorate, Aircraft Certification Service.

14 CFR Part 39

[Docket No. 94–ANE–41; Amendment 39–9347; AD 95–17–16]

Airworthiness Directives; General Electric Company CF6 Series Turbofan Engines

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to General Electric Company (GE) CF6–80A series turbofan engines, that requires an initial and repetitive on-wing eddy current inspection or an on-wing spot fluorescent penetrant inspection of the compressor rear frame (CRF) midflange for cracks, and replacement, if necessary, with serviceable parts. This amendment also requires removal from service of certain CRF's as a terminating action to the on-wing inspection program. This amendment is prompted by a report of a CRF separation that resulted in a rejected takeoff. The actions specified by this AD are intended to prevent a CRF separation, which could result in a rejected takeoff and damage to the aircraft.

DATES: Effective November 7, 1995.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of November 7, 1995.

ADDRESSES: The service information referenced in this AD may be obtained from General Electric Aircraft Engines, CF6 Distribution Clerk, Room 132, 111 Merchant Street, Cincinnati, OH 45246. This information may be examined at the Federal Aviation Administration (FAA), New England Region, Office of the Assistant Chief Counsel, 12 New England Executive Park, Burlington, MA; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Richard Woldan, Aerospace Engineer, Engine Certification Office, FAA, Engine and Propeller Directorate, 12 New England Executive Park, Burlington, MA 01803–5299; telephone (617) 238–7136; fax (617) 238–7199.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) to include an airworthiness directive (AD) that is applicable to General Electric Company (GE) CF6–80A series turbofan engines was published in the **Federal Register** on February 22, 1995 (60 FR 9792). That action proposed to require an initial and repetitive on-wing eddy current inspection or on- wing spot fluorescent penetrant inspection of the compressor rear frame (CRF) midflange for cracks, and replacement, if necessary, with serviceable parts. This action also proposed to require removal from service of non-modified CRF's as a terminating action to the on-wing inspection program. The actions would be required to be accomplished in accordance with GE CF6–80A Service Bulletin (SB) No. 72-593, Revision 2, dated March 19, 1992.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the comments received.

Three commenters request that the FAA move the compliance end date ahead one year to December 31, 1997. One commenter based that request on that commenter's planned acquisition of some affected engines that have not undergone the required modifications. The FAA does not concur. The commenters all recognize and accept the FAA's determination that AD action is necessary. The stated reasons for the requested extension in complying with the AD is the added cost of non-scheduled engine removals to perform the required modifications, and since the on-wing inspections have been successful in detecting cracks to date. The FAA has already considered the fleet-wide costs to operators in complying with this AD. In the normal course of that analysis, the FAA has determined that December 31, 1996, fairly and reasonably balances the safety need to eliminate this unsafe condition from the fleet as quickly as possible with operators' needs to avoid unscheduled maintenance actions. Individual operators who believe their circumstances warrant relief from this compliance schedule may submit requests for alternative methods of compliance or adjustments to the compliance times.

One commenter requests that the FAA broaden its economic analysis to include items beyond direct labor and parts costs to accomplish the required actions of the AD, such as maintenance scheduling costs. The FAA does not concur. In making a finding that an unsafe condition exists, the FAA has determined that the level of safety attained by the approved type design is no longer achieved, and the required actions are necessary to restore that level of safety. Because the type design must maintain that level of safety, necessary actions to restore that level of safety do not add additional regulatory requirements, and do not require a full cost-benefit analysis. The cost analysis is therefore limited to the direct costs of performing the required actions to restore the type design to that level of safety. When establishing compliance times, however, the FAA does try to strike a balance between the need to restore the type design to its certified level of safety with operators' need to avoid unscheduled maintenance actions.

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed.

The FAA estimates that 81 engines installed on aircraft of U.S. registry will be affected by this AD, that it will take approximately 85 work hours per engine to accomplish the required actions, and that the average labor rate is $60 per work hour. Required parts will cost approximately $20,644 per engine. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $2,085,264.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44

FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES.**

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 USC 106(g), 40101, 40113, 44701.

§39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

95–17–16 General Electric Company: Amendment 39–9347. Docket 94–ANE–41.

Applicability: General Electric Company (GE) CF6–80A series turbofan engines installed on, but not limited to, Airbus A310 series and Boeing 767 series aircraft.

Note: This airworthiness directive (AD) applies to each engine identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For engines that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must use the authority provided in paragraph (d) to request approval from the Federal Aviation Administration (FAA). This approval may address either no action, if the current configuration eliminates the unsafe condition, or different actions necessary to address the unsafe condition described in this AD. Such a request should include an assessment of the effect of the changed configuration on the unsafe condition addressed by this AD. In no case does the presence of any modification, alteration, or repair remove any engine from the applicability of this AD.

Compliance: Required as indicated, unless accomplished previously.

To prevent a compressor rear frame (CRF) separation, which could result in a rejected takeoff and damage to the aircraft, accomplish the following:

(a) Inspect CRF, Part Numbers (P/N) 9283M77G07, 9283M77G08, 9283M77G09, 9283M77G11, 9283M77G14, 7283M77G15, 9283M77G16, 9283M77G17, 9283M77G18, 9283M77G19, 1338M77G01, 1338M77G02, 1338M77G03, 1338M77G04, 1338M77G05, and 1338M77G06, that have not accomplished the midflange rework or replacement in accordance with any revision level of GE CF6–80A Service Bulletin (SB) No. 72–600 or 72–611, prior to the effective date of this AD, as follows:

(1) Perform an on-wing eddy current inspection (ECI) or an on-wing spot fluorescent penetrant inspection (FPI) of the CRF midflange for cracks in accordance with the Accomplishment Instructions and the schedule outlined in Table 1 of GE CF6–80A SB No. 72–593, Revision 2, dated March 19, 1992, or within 1,000 cycles in service since the last shop level FPI, whichever occurs later, after the effective date of this AD.

(2) Thereafter, reinspect the CRF midflange for cracks in accordance with the Accomplishment Instructions and schedule outlined in Table 2 of GE CF6–80A SB No. 72–593, Revision 2, dated March 19, 1992.

(3) Remove from service prior to further flight CRF's with cracked midflanges that exceed the on-wing serviceable limits specified in Table 2 of GE CF6–80A SB No. 72–593, Revision 2, dated March 19, 1992, and replace with a serviceable part.

(b) Remove from service CRF's identified in paragraph (a) of this AD at the next piece-part exposure, or by December 31, 1996, whichever occurs earlier, and replace with a serviceable part. Removal and replacement of CRF's in accordance with this paragraph constitutes terminating action to the on-wing inspection requirements of paragraph (a) of this AD.

(c) For the purpose of this AD, a serviceable part is defined as a CRF that has accomplished the midflange rework or replacement in accordance with any revision level of GE CF6–80A SB No. 72–600 or 72–611.

(d) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Engine Certification Office. The request should be forwarded through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Engine Certification Office.

Note: Information concerning the existence of approved alternative methods of compliance with this airworthiness directive, if any, may be obtained from the Engine Certification Office.

(e) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the aircraft to a location where the requirements of this AD can be accomplished.

(f) The actions required by this AD shall be done in accordance with the following SB:

Document No.	Pages	Revision	Date
GE CF6–80A SB No. 72–593.	1–4	2	Mar. 19, 1992.
	5–8	1	Oct. 30, 1991.
	9	2	Mar. 19, 1992.
	10–12	1	Oct. 30, 1991.
	13–15	2	Mar. 19, 1992.
	16–22	1	Oct. 30, 1991.

Total Pages: 22.

This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from General Electric Aircraft Engines, CF6 Distribution Clerk, Room 132, 111 Merchant Street, Cincinnati, OH 45246. Copies may be inspected at the FAA, New England Region, Office of the Assistant Chief Counsel, 12 New England Executive Park, Burlington, MA; or at the Office of the Federal Register, 800 North Capitol Street NW., suite 700, Washington, DC.

(g) This amendment becomes effective on November 7, 1995.

Issued in Burlington, Massachusetts, on August 15, 1995.

James C. Jones,

Acting Manager, Engine and Propeller Directorate, Aircraft Certification Service.

[Docket No. 95–NM–13–AD; Amendment 39–9351; AD 95–18–03]

Airworthiness Directives; Boeing Model 767 Series Airplanes Equipped With BFGoodrich Off-Wing Ramp/Slide Evacuation Systems

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain Boeing Model 767 series airplanes, that requires modication of the off-wing ramp/slide evacuation systems. This amendment is prompted by reports of punctured tubes on certain BFGoodrich off-wing ramp/slide evacuation systems installed on these airplanes. The actions specified by this AD are intended to prevent such tube punctures, which could delay or impede the evacuation of passengers during an emergency.

DATES: Effective October 10, 1995.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of October 10, 1995.

ADDRESSES: The service information referenced in this AD may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124–2207; and BFGoodrich Company, Aircraft Evacuation Systems, Sustaining Engineering, Department 7916, Phoenix, Arizona 85040. This information may be examined at the Federal Aviation Administration (FAA), Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue, SW., Renton, Washington; or at the FAA, Los Angeles Aircraft Certification Office, Transport Airplane Directorate, 3960 Paramount Boulevard, Lakewood, California; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Andrew Gfrerer, Aerospace Engineer, ANM–130L, FAA, Transport Airplane Directorate, Los Angeles Aircraft Certification Office, 3960 Paramount Boulevard, Lakewood, California 90712; telephone (310) 627–5338; fax (310) 627–5210.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations (14 GFR part 39) to include an airworthiness directive (AD) that is applicable to certain Boeing Model 767 series airplanes was published in the **Federal Register** on May 22, 1995 (60 FR 27054). That action proposed to require modication of the off-wing ramp/slide evacuation systems.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the single comment received.

The commenter supports the proposed rule.

After careful review of the available data, including the comment noted above, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed.

There are approximately 992 Model BFGoodrich off-wing ramp/slide evacuation systems installed on 496 Model 767 series airplanes (2 evacuation systems per airplane) of the affected design in the worldwide fleet. The FAA estimates that 376 BFGoodrich off-wing ramp/slide evacuation systems installed on 188 Model 767 series airplanes of U.S. registry will be affected by this AD, that it will take approximately 9 work hours per airplane to accomplish the required actions, and that the average labor rate is $60 per work hour. Required parts will cost approximately $200 per evacuation system. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $278,240, or $740 per airplane.

The total cost impact figure discussed above is based on assumptions that no operator has yet accomplished any of the requirements of this AD action, and that no operator would accomplish those actions in the future if this AD were not adopted.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 USC 106(g), 40101, 40113, 44701.

§39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

95–18–03 Boeing: Amendment 39–9351. Docket 95–NM–13–AD.

Applicability: Model 767 series airplanes, equipped with BFGoodrich off-wing ramp/slide evacuation systems having part number (P/N) 101630, 101655, or 101656; certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must use the authority provided in paragraph (b) of this AD to request approval from the FAA. This approval may address either no action, if the current configuration eliminates the unsafe condition; or different actions necessary to address the unsafe condition described in this AD. Such a request should include an assessment of the effect of the changed configuration on the unsafe condition addressed by this AD. In no case does the presence of any modification, alteration, or repair remove any airplane from the applicability of this AD.

Compliance: Required as indicated, unless accomplished previously.

To prevent tube puncture of the ramp/slide evacuation system, which could delay or impede the evacuation of passengers during an emergency, accomplish the following:

(a) Within 36 months after the effective date of this AD, modify the off-wing ramp/slide evacuation systems in accordance with Boeing Service Bulletin 767–25–0218, dated December 15, 1994, and BFGoodrich Service Bulletin 101630/655/656–25–269, dated October 28, 1994.

(b) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Los Angeles Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Los Angeles ACO.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Los Angeles ACO.

(c) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

(d) The modification shall be done in accordance with Boeing Service Bulletin 767–25–0218, dated December 15, 1994, and BFGoodrich Service Bulletin 101630/655/656–25–269, dated October 28, 1994. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124–2207. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the FAA, Los Angeles Aircraft Certification Office, Transport

Airplane Directorate, 3960 Paramount Boulevard, Lakewood, California; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(e) This amendment becomes effective on October 10, 1995.

Issued in Renton, Washington, on August 17, 1995.

James V. Devany,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

14 CFR Part 39

[Docket No. 95–NM–26–AD; Amendment 39–9350; AD 95–18–02]

Airworthiness Directives; Boeing Model 757 and 767 Series Airplanes Equipped With Sundstrand Ram Air Turbine (RAT)/Hydraulic Pumps

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain Boeing Model 757 and 767 series airplanes, that requires replacement of the hydraulic pressure transfer tube of the ram air turbine (RAT) system with a new hose assembly. This amendment is prompted by reports that, during flight tests, the hydraulic pressure transfer tube of the RAT cracked when the RAT was extended on a Model 767 series airplane due to overload of the hydraulic transfer tube. The actions specified by this AD are intended to prevent such overload, which could result in cracking of the hydraulic transfer tube. Such cracking subsequently could lead to the loss of hydraulic fluid of the center system and the inability of the RAT to pressurize the center system; this situation could lead to loss of all hydraulic system power in the event that power is lost in both engines.

DATES: Effective October 10, 1995.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of October 10, 1995.

ADDRESSES: The service information referenced in this AD may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124–2207. This information may be examined at the Federal Aviation Administration (FAA), Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Kathi Ishimaru, Aerospace Engineer, Systems and Equipment Branch, ANM–130S, FAA, Transport Airplane Directorate, Seattle Aircraft Certification Office, 1601 Lind Avenue, SW., Renton, Washington, 98055–4056; telephone (206) 227–2674; fax (206) 227–1181.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) to include an airworthiness directive (AD) that is applicable to certain Boeing Model 757 and 767 series airplanes was published in the **Federal Register** on May 1, 1995 (60 FR 21054). That action proposed to require replacement of the hydraulic pressure transfer tube of the ram air turbine (RAT) system with a new hose assembly.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the comments received.

One commenter supports the proposed rule.

One commenter notes that the description of the cause of the unsafe condition that appeared in the Discussion section of the preamble to the notice states that "* * * cracking has been attributed to overload due to mishandling or improper installation of the pressure transfer tubes on the strut of the RAT system." The commenter states that this description is inaccurate, since the overload condition could only occur as a result of maintenance action on in-service airplanes. The commenter suggests that a more accurate description would be "* * * cracking has been attributed to overload of the pressure transfer tube due to mishandling or improper installation during in-service RAT maintenance." The FAA concurs that the commenter's wording is more accurate; however, since the Discussion section is not restated in this final rule, no change to the final rule is necessary.

This commenter also provides further clarification of the unsafe condition described throughout the notice. That description states that "cracking of the hydraulic transfer tube, if not corrected, could result in loss of hydraulic fluid * * *" The commenter states that a more complete description of the unsafe condition would be "* * * overload of the hydraulic transfer tube, if not corrected, may cause the tube to crack and could result in loss of hydraulic fluid * * *" The FAA concurs and has revised all references to the unsafe condition accordingly throughout this final rule.

The same commenter further notes that the Discussion section of the preamble to the notice states that "such overloads are likely to have occurred on other tubes * * *" The commenter states that, since only one operator has reported cracking on two pressure transfer tubes, it does not provide a basis to conclude that overload is "likely" to occur on other airplanes. The commenter suggests that a more accurate description of this situation would be, "such overloads may have occurred on other tubes * * *" Further, the commenter states that testing has demonstrated that the RAT transfer tubes performed acceptably during an in-flight RAT deployment when shimmed in accordance with the maintenance manual. The FAA has reviewed the relevant data currently available. The FAA finds no basis to support the commenter's suggestion that the RAT transfer tubes perform acceptably when shimmed. In fact, the testing showed abnormally high stresses in the tube when the tube was shimmed in accordance with the maintenance manual. However, the FAA concurs that the commenter's suggested wording relative to the fact that overload conditions "may have occurred" is more accurate. Since the Discussion section is not restated in this final rule, no change to the final rule is necessary.

Additionally, this commenter points out a statement that appeared in the Discussion section of the preamble to the notice that reads, "since an unsafe condition has been identified that is likely to exist * * *" The commenter suggests that this phrase would be more accurate if it were changed to read, "since an unsafe condition has been identified that may exist * * *" The FAA does not concur. The phrasing used in that particular statement in the preamble is not accidental. Part 39.1, "Applicability," of the Federal Aviation Regulations (FAR) (14 CFR 39.1) states:

"This part prescribes airworthiness directives that apply to aircraft * * * when—

(a) An unsafe condition exists in a product; and

(b) That condition is likely to exist or develop in other products of the same type design."

Therefore, the finding that the condition "is likely to exist or develop" is necessary to ensure that the AD falls within the scope of part 39; its absence would arguably subject the FAA to legal challenge for inappropriately using the AD process to issue rules that do not meet the criteria for AD's. While it is understandable that a manufacturer would like to minimize any adverse implications regarding the safety of its products, the FAA reiterates that the purpose of an AD is to correct an identified unsafe condition in aircraft, regardless of where it is or what it is caused by. In essence, the AD serves to protect the flying public from the consequences of the unsafe condition. The AD also serves to protect the manufacturer from the liability that would be faced should the unsafe condition not be corrected.

Two commenters request that the compliance time be extended from the proposed 24 months to 36 months. One of these commenters states that such an extension will allow operators to accomplish the replacement during a regularly scheduled heavy maintenance visit and will allow time for procurement of additional parts.

The FAA does not concur with the commenters' request to extend the compliance time. In developing an appropriate compliance time for this action, the FAA considered not only the degree of urgency associated with addressing the subject unsafe condition, but the availability of required parts and the practical aspect of accomplishing the required replacement within an interval of time that parallels normal scheduled maintenance for the majority of affected operators. The manufacturer has advised that an ample number of required parts will be available for modification of the U.S. fleet within the proposed compliance period. Further, the FAA estimates that it would take approximately 2 work hours per airplane to accomplish the replacement; therefore, the FAA has determined that a heavy maintenance visit is not required to accomplish the replacement. However, under the provisions of paragraph (b) of the final rule, the FAA may approve requests for adjustments to the compliance time if data are presented to justify such an adjustment.

One commenter requests that the proposed rule be revised to cite the latest revision of Boeing Alert Service Bulletin 767–29A0077. The FAA concurs. Since the issuance of the proposed rule, the FAA has reviewed and approved Revision 1, dated June 8, 1995, of that Boeing alert service bulletin. This revised service bulletin is essentially identical to the original version; the only relevant change in Revision 1 is a revision to the effectivity listing that removes the airplane having serial number 565. The FAA has revised paragraph (a) of the final rule to reflect the latest revision to the alert service bulletin as an additional source of service information. The FAA has also revised the applicability of the final rule to remove serial number 565 from those Model 767 series airplanes that are subject to the AD.

The same commenter requests that NOTE 3 of the proposal be revised to cite the latest revision of Sundstrand Service Bulletins 730814–29–9 and 729548–29–12. The FAA concurs. The FAA has reviewed and approved Sundstrand Service Bulletin 729548–29–12, Revision 3, dated March 31, 1995; and Sundstrand Service Bulletin 730814–29–9, Revision 2, dated March 31, 1995. These revised service bulletins are essentially identical to the corresponding earlier versions, but contain certain minor editorial changes. The FAA has revised NOTE 3 of the final rule to reflect the latest revision to the service bulletins as additional sources of service information.

Since issuance of the notice, the FAA also has reviewed and approved Sundstrand Service Bulletin 729548–29–14, Revision 1, dated May 3, 1995, and Sundstrand Service Bulletin 730814–29–11, Revision 1, dated May 3, 1995. These revised service bulletins are essentially identical to the corresponding earlier versions, but contain certain minor editorial changes. The FAA has revised NOTE 2 of the final rule to reflect these latest revisions to those service bulletins as additional sources of service information.

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule with the changes previously described. The FAA has determined that these changes will neither increase the economic burden on any operator nor increase the scope of the AD.

There are approximately 1,215 Model 757 and 767 series airplanes of the affected design in the worldwide fleet. The FAA estimates that 582 airplanes of U.S. registry will be affected by this AD, that it will take approximately 2 work hours per airplane to accomplish the required actions, and that the average labor rate is $60 per work hour. Required parts will be supplied by the manufacturer at no cost to the operators. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $69,840, or $120 per airplane.

The total cost impact figure discussed above is based on assumptions that no operator has yet accomplished any of the requirements of this AD action, and that no operator would accomplish those actions in the future if this AD were not adopted.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES**.

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40101, 40113, 44701.

§39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

95–18–02 Boeing: Amendment 39–9350. Docket 95–NM–26–AD.

Applicability: Model 757 series airplanes having line positions 1 through 650 inclusive, and equipped with Sundstrand ram air turbine (RAT)/hydraulic pumps having part number (P/N) 730814 series, serial numbers 0001 through 0735 inclusive; and Model 767 series airplanes having line positions 1 through 564 inclusive, and equipped with Sundstrand RAT/hydraulic pumps having P/N 729548 series, serial numbers 0001 through 0620 inclusive; certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must use the authority provided in paragraph (b) of this AD to request approval from the FAA. This approval may address either no action, if the current configuration eliminates the unsafe condition; or different actions necessary to address the unsafe condition described in this AD. Such a request should include an assessment of the effect of the changed configuration on the unsafe condition addressed by this AD. In no case does the presence of any modification, alteration, or repair remove any airplane from the applicability of this AD.

Compliance: Required as indicated, unless accomplished previously.

To prevent overload of the hydraulic pressure transfer tube, which could result in cracking of the tube of the ram air turbine (RAT), and subsequently could lead to the loss of all center systems hydraulic fluid and the inability of the RAT to pressurize the center hydraulic system, accomplish the following:

(a) Within 24 months after the effective date of this AD, replace the hydraulic pressure transfer tube of the RAT system with a new hose assembly, in accordance with Boeing Alert Service Bulletin 757–29A0046, dated October 6, 1994 (for Model 757 series airplanes); or Boeing Alert Service Bulletin 767–29A0077, dated October 6, 1994, or Revision 1, dated June 8, 1995 (for Model 767 series airplanes); as applicable.

Note 2: Boeing Alert Service Bulletin 757–29A0046 references Sundstrand Service Bulletin 730814–29–11, dated November 3, 1994, or Revision 1, dated May 3, 1995; and Boeing Alert Service Bulletin 767–29A0077 references Sundstrand Service Bulletin 729548–29–14, dated November 3, 1994, or Revision 1, dated May 3, 1995; as additional sources of service information for procedures to replace the pressure tube.

Note 3: Modification of the hydraulic pressure transfer tube of the RAT system in accordance with Sundstrand Service Bulletin 730814–29–9, Revision 1, dated November 3, 1994, or Revision 2, dated March 31, 1995 (for Model 757 series airplanes); or Sundstrand Service Bulletin 729548–29–12, Revision 2, dated November 3, 1994, or Revision 3, dated March 31, 1995 (for Model 767 series airplanes); is considered acceptable for compliance with the modification requirements of paragraph (a) of this AD.

(b) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Seattle ACO.

Note 4: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Seattle ACO.

(c) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

(d) The replacement shall be done in accordance with Boeing Alert Service Bulletin 757–29A0046, dated October 6, 1994 (for Model 757 series airplanes); or in accordance with Boeing Alert Service Bulletin 767–29A0077, dated October 6, 1994, or Boeing Alert Service Bulletin 767–29A0077, Revision 1, dated June 8, 1995 (for Model 767 series airplanes); as applicable. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124–2207. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(e) This amendment becomes effective on October 10, 1995.

Issued in Renton, Washington, on August 17, 1995.

James V. Devany,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

14 CFR Part 39

[Docket No. 95–NM–31–AD; Amendment 39–9352; AD 95–18–04]

Airworthiness Directives; Beech Model 400 and 400A Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain Beech Model 400 and 400A airplanes, that requires modification of the autopilot and rudder boost interlock. This amendment is prompted by a report indicating that the rudder boost system installed on these airplanes does not operate correctly during deployment of a thrust reverser. The actions specified by this AD are intended to prevent incorrect operation of the rudder boost system during deployment of a thrust reverser and to prevent the autopilot from exceeding certain bank angle limits; these conditions could result in reduced controllability of the airplane.

DATES: Effective October 10, 1995.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of October 10, 1995.

ADDRESSES: The service information referenced in this AD may be obtained from Beech Aircraft Corporation, Commercial Service Department, P.O. Box 85, Wichita, Kansas 67201–0085. This information may be examined at the Federal Aviation Administration (FAA), Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue, SW., Renton, Washington; or at the FAA, Wichita Aircraft Certification Office, Small Airplane Directorate, 1801 Airport Road, Room 100, Mid-Continent Airport, Wichita, Kansas; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Dale Vassalli, Aerospace Engineer, Systems and Equipment Branch, ACE–130W, FAA, Wichita Aircraft Certification Office, Small Airplane Directorate, 1801 Airport Road, Room 100, Mid-Continent Airport, Wichita, Kansas 67209; telephone (316) 946–4132; fax (316) 946–4407.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) to include an airworthiness directive (AD) that is applicable to certain Beech Model 400 and 400A airplanes was published in the **Federal Register** on May 4, 1995 (60 FR 22013). That action proposed to require modification of the autopilot and rudder boost interlock.

Interested persons have been afforded an opportunity to participate in the making of this amendment. No comments were submitted in response to the proposal or the FAA's determination of the cost to the public. The FAA has determined that air safety and the public interest require the adoption of the rule as proposed.

There are approximately 92 Model 400 and 400A series airplanes of the affected design in the worldwide fleet. The FAA estimates that 69 airplanes of U.S. registry will be affected by this AD, that it will take approximately 24 work hours per airplane to accomplish the required actions, and that the average labor rate is $60 per work hour. Required parts will be provided by the manufacturer at no cost to operators. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $99,360, or $1,440 per airplane.

The total cost impact figure discussed above is based on assumptions that no operator has yet accomplished any of the requirements of this AD action, and that no operator would accomplish those actions in the future if this AD were not adopted.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 USC 106(g), 40101, 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

95–18–04 Beech Aircraft Corporation: Amendment 39–9352. Docket 95–NM–31–AD.

Applicability: Model 400 airplanes, serial RJ–61; and Model 400A airplanes, serials RK–1 through RK–77 inclusive, and RK–79 through RK–92 inclusive; certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must use the authority provided in paragraph (b) of this AD to request approval from the FAA. This approval may address either no action, if the current configuration eliminates the unsafe condition; or different actions necessary to address the unsafe condition described in this AD. Such a request should include an assessment of the effect of the changed configuration on the unsafe condition addressed by this AD. In no case does the presence of any modification, alteration, or repair remove any airplane from the applicability of this AD.

Compliance: Required as indicated, unless accomplished previously.

To prevent reduced controllability of the airplane, accomplish the following:

(a) At the next scheduled inspection, but no later than 200 hours time-in-service after the effective date of this AD, install an autopilot and rudder boost improvement kit in accordance with Beechcraft Service Bulletin No. 2533, dated October 1994.

(b) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Wichita Aircraft Certification Office (ACO), FAA, Small Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Wichita ACO.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Wichita ACO.

(c) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

(d) The installation shall be done in accordance with Beechcraft Service Bulletin No. 2533, dated October 1994. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Beech Aircraft Corporation, Commercial Service Department, P.O. Box 85, Wichita, Kansas 67201–0085. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the FAA, Wichita Aircraft Certification Office, Small Airplane Directorate, 1801 Airport Road, Room 100, Mid-Continent Airport, Wichita, Kansas; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(e) This amendment becomes effective on October 10, 1995.

Issued in Renton, Washington, on August 22, 1995.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 95–21256 Filed 9–7–95; 8:45 am]

BILLING CODE 4910–13–U

DEPARTMENT OF LABOR

Wage and Hour Division

29 CFR Part 552

RIN 1215–AA82

Application of the Fair Labor Standards Act to Domestic Service

AGENCY: Wage and Hour Division, Employment Standards Administration, Labor.

ACTION: Final rule.

SUMMARY: This rule revises regulations to incorporate changes necessitated by amendments to Title II of the Social Security Act which were enacted October 22, 1994, as Public Law 103–387 (Social Security Domestic Employment Reform Act), and makes other updating and technical revisions. A separate document published elsewhere in this issue reopens the comment period regarding the proposed revision to § 552.109, which was published in the **Federal Register** on December 30, 1993 (58 FR 69310), to clarify the minimum wage and overtime exemption under the Fair Labor Standards Act (FLSA) for certain employees of third-party employers who provide domestic companionship services.

DATES: This regulation is effective October 10, 1995.

FOR FURTHER INFORMATION CONTACT: Richard M. Brennan, Acting Director, Division of Policy and Analysis, Wage and Hour Division, Employment Standards Administration, U.S. Department of Labor, room s–3506, 200 Constitution Avenue, NW., Washington, DC 20210, (202) 219–8412. This is not a toll-free number.

SUPPLEMENTARY INFORMATION:

I. Paperwork Reduction Act

This regulation contains no reporting or recordkeeping requirements subject to the Paperwork Reduction Act of 1980 (Pub. L. 96–511). The general FLSA information collection requirements (including requirements contained in part 552) were approved by the Office of Management and Budget under the control number 1215–0017.

II. Background

The Department published a notice of proposed rulemaking in the **Federal Register** on December 30, 1993 (58 FR 69310), inviting public comments until February 28, 1994, on the following technical modifications to 29 CFR part 552:

(1) Revise § 552.100(a)(1) to delete references to former minimum wage levels that have been overtaken by subsequent statutory increases in the minimum wage since part 552 was last revised;

(2) Revise § 552.100(c) to reflect updated credits, in a percentage format, that can be taken by an employer for meals and lodging furnished to a domestic service employee;

(3) Revise § 552.101(a)(1) to change the reference "20 CFR 404.1027(j)" to "20 CFR 404.1057" pursuant to a redesignation in regulations issued under the Social Security Act;

(4) Revise § 552.105(a) to change the FLSA reference "section 3(s)(4)" to "section 3(s)(1)(B)" in accordance with the Fair Labor Standards Amendments of 1989, 103 Stat. 938;

(5) Revise § 552.2(b) to change the reference in the third sentence from "Section 7(1)" to "Section 7(l) (substituting a lower case letter "l" for the number "1" in the parentheses); and

(6) Revise the last sentence of § 552.104(b) to correct two spelling errors.

In addition, the Department invited public comments on a proposal to revise § 552.109 to clarify that, in order for the exemptions in FLSA sections 13(a)(15) and 13(b)(21) to apply, employees engaged in providing companionship services and live-in domestic service employees who are employed by a third-party employer or agency must also be "jointly" employed by the family or household using their services.

A total of 7 comments were received in response to the notice. All focused their remarks on the proposed revision to § 552.109 concerning joint employment and third-party employers. The Department is continuing to consider this particular proposal, and a separate document published elsewhere in this issue reopens and extends the comment period regarding the proposed revision to § 552.109.

III. Summary of Final Rule

A. Updates and Technical Revisions

No public comments were received on the updating and technical changes that were proposed in the December 1993 notice, and such revisions are adopted in the final rule as proposed.

B. Revisions Required by the "Social Security Domestic Employment Reform Act of 1994"

The Social Security Domestic Employment Reform Act of 1994 (Pub. L. 103–387, 108 Stat. 4071) was enacted into law on October 22, 1994. Among other things, this law amended section 3121(x) of the Internal Revenue Code of 1986 to change the "threshold" for withholding and paying social security taxes on domestic workers from $50 per quarter to $1,000 annually in 1995. In the case of years after 1995, the applicable $1000 threshold is to be indexed in $100 increments rounded down to the nearest $100. The new law also amended section 209(a)(6) (formerly designated as 209(g)) of the Social Security Act (42 U.S.C. 409(a)(6)(B)) to exclude from the term "wages" cash remuneration paid by an employer for domestic service employment if the cash remuneration is less than the applicable dollar threshold as defined in section 3121(x) of the Internal Revenue Code of 1986.

As a consequence, the reference in § 552.2(b)(1) to FLSA's coverage of domestic service employees under section 6(f) of FLSA based on section 209(g) of the Social Security Act and to a $50 cash threshold must be modified to conform the regulatory language to the recent statutory changes. This revision of § 552.2(b)(1) is technical in nature and based on the Social Security Domestic Employment Reform Act of 1994 (Pub. L. 103–387, 108 Stat. 4071), about which the Department has no discretion under section 6(f) of the FLSA. Pursuant to 5 U.S.C. 553(b)(3) (A) and (B), this minor, clarifying revision does not require prior notice and comment.

Executive Order 12866/§ 202 of the Unfunded Mandates Reform Act or 1995

This final rule is not a "significant regulatory action" within the meaning of Executive Order 12866, nor does it require a section 202 statement under the Unfunded Mandates Reform Act of 1995. The revisions adopted in this rule are technical in nature or are otherwise required by a recent statutory enactment of the Congress. In any event, the revisions will not have a significant impact on the employment of domestic service employees. Accordingly, these changes are not expected to result in a rule that may: (1) Have an annual effect on the economy of $100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities; (2) create a serious inconsistency or otherwise interfere with an action taken or planned by another agency; (3) materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof; or (4) raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in Executive Order 12866. Therefore, no regulatory impact analysis has been prepared.

Regulatory Flexibility Analysis

This final rule will not have a significant economic impact on a substantial number of small entities. The changes being adopted in this rule simply conform the regulations to updates in related legislation and are technical in nature. Therefore, the rule is not expected to have a "significant economic impact on a substantial number of small entities" within the meaning of the Regulatory Flexibility Act. A regulatory flexibility analysis is not required.

Document Preparation

This document was prepared under the direction and control of Maria Echaveste, Administrator, Wage and Hour Division, Employment Standards Administration, U.S. Department of Labor.

List of Subjects in 29 CFR Part 552

Domestic service workers, Employment, Labor, Minimum wages, Overtime pay, Wages.

Accordingly, part 552 of title 29 of the Code of Federal Regulations is amended as set forth below.

Signed at Washington, DC, on this 31st day of August, 1995.

Maria Echaveste,

Administrator, Wage and Hour Division.

PART 552—APPLICATION OF THE FAIR LABOR STANDARDS ACT TO DOMESTIC SERVICE

1. The authority citation for part 552 is revised to read as follows:

Authority: Secs. 13(a)(15) and 13(b)(21) of the Fair Labor Standards Act, as amended (29 U.S.C. 213(a)(15), (b)(21)), 88 Stat. 62; Sec. 29(b) of the Fair Labor Standards Amendments of 1974 (Pub. L. 93–259, 88 Stat. 76), unless otherwise noted.

2. Section 552.2(b)(1) is revised to read as follows:

§ 552.2 Purpose and scope.

(a) * * *

(b) * * *

(1) If the employee's compensation for such services from his/her employer would constitute wages under section 209(a)(6) of title II of the Social Security Act, that is, if the cash remuneration during a calendar year is not less than $1,000 in 1995, or the amount designated for subsequent years pursuant to the adjustment provision in

section 3121(x) of the Internal Revenue Code of 1986; or

* * * * *

§ 552.2 [Amended]

3. In § 552.2, paragraph (b), the reference in the first sentence of the concluding text is revised to read "Section 7(l)" instead of "Section 7(1)" (substituting a lower case letter "l" for the number "1" in the parentheses).

4. In Section 552.100 (paragraphs (a)(1), (c) and (d) are revised to read as follows:

§ 552.100 Application of minimum wage and overtime provisions.

(a)(1) Domestic service employees must receive for employment in any household a minimum wage of not less than that required by section 6(a) of the Fair Labor Standards Act.

* * * * *

(c) For enforcement purposes, the Administrator will accept a credit taken by the employer of up to 37.5 percent of the statutory minimum hourly wage for a breakfast (if furnished), up to 50 percent of the statutory minimum hourly wage for a lunch (if furnished), and up to 62.5 percent of the statutory minimum hourly wage for a dinner (if furnished), which meal credits when combined do not in total exceed 150 percent of the statutory minimum hourly wage for any day. Nothing herein shall prevent employers from crediting themselves with the actual cost or fair value of furnishing meals, whichever is less, as determined in accordance with part 531 of this chapter, if such cost or fair value is different from the meal credits specified above: *Provided, however,* That employers keep, maintain and preserve (for a period of 3 years) the records on which they rely to justify such different cost figures.

(d) In the case of lodging furnished to live-in domestic service employees, the Administrator will accept a credit taken by the employer of up to seven and one-half times the statutory minimum hourly wage for each week lodging is furnished. Nothing herein shall prevent employers from crediting themselves with the actual cost or fair value of furnishing lodging, whichever is less, as determined in accordance with part 531 of this chapter, if such cost or fair value is different from the amount specified above, *provided however,* that employers keep, maintain, and preserve (for a period of 3 years) the records on which they rely to justify such different cost figures. In determining reasonable cost or fair value, the regulations and rulings in 29 CFR part 531 are applicable.

§ 552.101 [Amended]

5. In § 552.101, the parenthetical reference in the first sentence of paragraph (a) is revised to read "(20 CFR 404.1057)".

6. In § 552.104, paragraph (b) is revised to read as follows:

§ 552.104 Babysitting services performed on a casual basis.

* * * * *

(b) Employment in babysitting services would usually be on a "casual basis," whether performed for one or more employees, if such employment by all such employers does not exceed 20 hours per week in the aggregate. Employment in excess of these hours may still be on a "casual basis" if the excessive hours of employment are without regularity or are for irregular or intermittent periods. Employment in babysitting services shall also be deemed to be on a "casual basis" (regardless of the number of weekly hours worked by the babysitter) in the case of individuals whose vocations are not domestic service who accompany families for a vacation period to take care of the children if the duration of such employment does not exceed 6 weeks.

* * * * *

§ 552.105 [Amended]

7. In § 552.105, the reference in the fourth sentence of paragraph (a) is revised to read "section 3(s)(1)(B) of the Act * * *"

[PA 52–1–7109, PA 53–1–7110, PA 55–1–7111, PA 61–1–7112, PA 66–1–7113; FRL–5272–6]

Approval and Promulgation of Air Quality Implementation Plans; Pennsylvania; Approval of Source-Specific VOC and NOx RACT and Synthetic Minor Permit Conditions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Direct final rule.

SUMMARY: EPA is approving a State Implementation Plan (SIP) revision submitted by the Commonwealth of Pennsylvania. This revision establishes and requires reasonably available control technology (RACT) on eleven major sources and establishes permit conditions to limit one source's emissions to below major source levels. The intended effect of this action is to approve source-specific plan approvals and operating permits, which establish the above-mentioned requirements in accordance with the Clean Air Act. This action is being taken under section 110 of the Clean Air Act.

DATES: This final rule is effective November 7, 1995 unless notice is received on or before October 10, 1995 that adverse or critical comments will be submitted. If the effective date is delayed, timely notice will be published in the **Federal Register**.

ADDRESSES: Comments may be mailed to Marcia L. Spink, Associate Director, Air Programs, Mailcode 3AT00, U.S. Environmental Protection Agency, Region III, 841 Chestnut Building, Philadelphia, Pennsylvania 19107. Copies of the documents relevant to this action are available for public inspection during normal business hours at the Air, Radiation, and Toxics Division, U.S. Environmental Protection Agency, Region III, 841 Chestnut Building, Philadelphia, Pennsylvania 19107; the Air and Radiation Docket and Information Center, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460; and Pennsylvania Department of Environmental Resources, Bureau of Air Quality Control, P.O. Box 8468, 400 Market Street, Harrisburg, Pennsylvania 17105.

FOR FURTHER INFORMATION CONTACT: Cynthia H. Stahl, (215) 597–9337, at the EPA Region III address above.

SUPPLEMENTARY INFORMATION: On January 6, 1995, April 24, 1995 and May 31, 1995, the Commonwealth of Pennsylvania submitted formal revisions to its State Implementation Plan (SIP). The SIP revision consists of a group of plan approvals and operating permits for individual sources of volatile organic compounds and/or nitrogen oxides located in Pennsylvania. This rulemaking addresses those plan approvals and operating permits pertaining to the following sources: (1) PECO Energy—Eddystone, (2) Gilberton Power Company, (3) Bethlehem Steel Structural Products Corp., (4) Westwood Energy Properties, Inc., (5) PECO Energy Co.—Front Street, (6) Crawford Furniture Manufacturing Corp., (7) Schuylkill Energy Resources, (8) Panther Creek Partners, (9) Columbia Gas Transmission Co.—Milford, (10) Texas Eastern Transmission Corp.—Entriken, (11) Columbia Gas Transmission Corp.—Greencastle, (12) Lord Corporation. The other plan approvals and operating permits submitted together with these being approved today will be addressed in another rulemaking action.

Pursuant to section 182(b)(2) and 182(f) of the Clean Air Act (CAA), Pennsylvania is required to implement RACT for all major VOC and NOx sources by no later than May 31, 1995. The major source size is determined by its location, the classification of that area and whether it is located in the ozone transport region (OTR), which is established by the CAA. The Pennsylvania portion of the Philadelphia ozone nonattainment area consists of Bucks, Chester, Delaware, Montgomery, and Philadelphia Counties and is classified as severe. The remaining counties in Pennsylvania are classified as either moderate or marginal nonattainment areas or are designated attainment for ozone. However, under section 184 of the CAA, at a minimum, moderate ozone nonattainment area requirements (including RACT as specified in section 182(b)(2) and 182(f)) apply throughout the OTR. Therefore, RACT is applicable statewide in Pennsylvania. The January 6, 1995, April 24, 1995 and May 31, 1995 Pennsylvania submittals that are the subject of this document are meant to satisfy the RACT requirements for eleven sources in Pennsylvania and to limit the potential VOC emissions at a source to below the major source size threshold in order to avoid RACT.

Summary of SIP Revision

The details of the RACT requirements for the source-specific plan approvals and operating permits can be found in the docket and accompanying technical support document and will not be reiterated in this document. Briefly, EPA is approving one plan approval and fourteen operating permits as RACT and one operating permit as a revision to the Pennsylvania SIP to limit a source's emissions to below the major source threshold. Several of the plan approvals and operating permits contain conditions irrelevant to the determination of VOC or NOx RACT. Consequently, these provisions are not being included in this approval for VOC or NOx RACT.

RACT

EPA is approving the plan approval (PA 23–0017) and operating permit (OP 23–0017) for PECO Energy—Eddystone, located in Delaware County. PECO Energy—Eddystone is a utility and considered a major source of NOx emissions. EPA is approving the operating permit (OP 54–0004) for Gilberton Power Company, located in Schuylkill County. Gilberton Power is a utility and considered a major source of NOx emissions. EPA is approving four operating permits (OP 48–0010, OP 48–0013, OP 48–0014, and OP 48–0015) for Bethelehem Structural Products Corporation, located in Northampton County. Bethlehem Structural Products is a steel manufacturer and considered a major source of VOC and NOx emissions. EPA is approving the operating permit (OP 54–0006) for Westwood Energy Properties, Inc., located in Schuylkill County. Westwood Energy Properties, Inc. is a utility and is considered a major source of NOx emissions. EPA is approving the operating permit (OP 46–0045) for PECO Energy Company—Front Street, located in Montgomery County. PECO Energy Company—Front Street is a utility with a natural gas combustion turbine and is considered a major source of NOx emissions. EPA is approving the operating permit (OP 16–021) for Crawford Furniture Manufacturing Corporation, located in Clarion County. Crawford Furniture Manufacturing Corp. is a wood furniture manufacturer and is considered a major source of VOC emissions. EPA is approving the operating permit (OP 54–0003) for Schuylkill Energy Resources, located in Schuylkill County. Schuylkill Energy Resources is a cogeneration plant and is considered a major source of NOx emissions. EPA is approving the operating permit (OP 13–0003) for Panther Creek Partners, located in Carbon County. Panther Creek Partners is a utility and is considered a major source of NOx emissions. EPA is approving the operating permit (OP 52–0001) for Columbia Gas Transmission Company—Milford Compressor Station, located in Pike County. Columbia Gas Transmission Co.—Milford consists of twenty-seven (27) compressor stations and is considered a major source of NOx emissions. EPA is approving the operating permit (OP 31–2003) for Texas Eastern Transmission Corporation—Entriken Compressor Station, located in Huntingdon County. Texas Eastern Transmission Corp. is a natural gas pipeline compressor station and is considered a major source of NOx emissions. EPA is approving the operating permit (OP 28–2003) for Columbia Gas Transmission Corporation—Greencastle Compressor Station, located in Franklin County. Columbia Gas Transmission Corp.—Greencastle is a compressor station and is considered a major source of NOx emissions. The specific emission limitations and other RACT requirements for these sources are summarized in the accompanying technical support document, which is available from the EPA Region III office. Several of the plan approvals/operating permits contain a provision that allows for future changes to the emission limitations based on CEM or other monitoring data. Since EPA cannot approve emission limitations that are not currently before it, any changes to the emission limitations as submitted on January 6, 1995, April 24, 1995 and May 31, 1995 to EPA must be resubmitted to and approved by EPA in order for these changes to be incorporated into the Pennsylvania SIP. Consequently, the source-specific RACT emission limitations that are being approved into the Pennsylvania SIP are those that were submitted on the above-mentioned dates and are the subject of this rule. These emission limitations will remain unless and until they are replaced pursuant to 40 CFR Part 51 and approved by the U.S. EPA.

Synthetic Minor Source Permit

EPA is approving the operating permit (OP 25–095) for Lord Corporation, located in Erie County. Lord Corporation is an aerospace surface coater and had potential VOC emissions greater than 50 TPY. The approval of these conditions will limit the emissions at this facility to less than 50 TPY and would allow Lord Corp. to avoid being considered a major VOC source, subject to the major source RACT requirements of the Clean Air Act and the Pennsylvania regulation.

EPA is approving this SIP revision without prior proposal because the Agency views this as a noncontroversial amendment and anticipates no adverse comments. However, in a separate document elsewhere in this **Federal Register**, EPA is proposing to approve the SIP revision should adverse or critical comments be filed. This action will be effective November 7, 1995 unless, by October 10, 1995, adverse or critical comments are received.

If EPA receives such comments, this action will be withdrawn before the effective date by publishing a subsequent document that will withdraw the final action. All public comments received will then be addressed in a subsequent final rule based on this action serving as a proposed rule. EPA will not institute a second comment period on this action. Any parties interested in commenting on this action should do so at this time. If no such comments are received, the public is advised that this action will be effective on November 7, 1995.

Final Action

EPA is approving the one plan approval and fourteen operating permits as RACT and one operating permit to limit emissions at Lord Corporation to below major source levels.

Nothing in this action should be construed as permitting or allowing or establishing a precedent for any future request for revision to any state implementation plan. Each request for revision to the state implementation plan shall be considered separately in light of specific technical, economic, and environmental factors and in relation to relevant statutory and regulatory requirements.

Under the Regulatory Flexibility Act, 5 U.S.C. 600 *et seq.*, EPA must prepare a regulatory flexibility analysis assessing the impact of any proposed or final rule on small entities. 5 U.S.C. 603 and 604. Alternatively, EPA may certify that the rule will not have a significant impact on a substantial number of small entities. Small entities include small businesses, small not-for-profit enterprises, and government entities with jurisdiction over populations of less than 50,000.

Under Section 202 of the Unfunded Mandates Reform Act of 1995 ("Unfunded Mandates Act"), signed into law on March 22, 1995, EPA must prepare a budgetary impact statement to accompany any proposed or final that includes a Federal mandate that may result in estimated costs to State, local, or tribal governments in the aggregate; or to the private sector, of $100 million or more. Under section 205, EPA must select the most cost-effective and least burdensome alternative that achieves the objectives of the rule and is consistent with statutory requirements. Section 203 requires EPA to establish a plan for informing and advising any small governments that may be significantly or uniquely impacted by the rule.

EPA has determined that the approval action proposed/promulgated does not include a Federal mandate that may result in estimated costs of $100 million or more to either State, local, or tribal governments in the aggregate, or to the private sector. This Federal action approves pre-existing requirements under State or local law, and imposes no new Federal requirements. Accordingly, no additional costs to State, local, or tribal governments, or to the private sector, result from this action.

This action has been classified as a Table 3 action for signature by the Regional Administrator under the procedures published in the **Federal Register** on January 19, 1989 (54 FR 2214–2225), as revised by an October 4, 1993 memorandum from Michael H. Shapiro, Acting Assistant Administrator for Air and Radiation. The OMB has exempted this regulatory action from E.O. 12866 review.

Under section 307(b)(1) of the Clean Air Act; petitions for judicial review of this action, pertaining to the VOC and NOx RACT approval of eleven sources and the synthetic minor permit conditions for Lord Corporation, must be filed in the United States Court of Appeals for the appropriate circuit by November 7, 1995. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

Environmental protection, Air pollution control, Hydrocarbons, Incorporation by reference, Intergovernmental relations, Nitrogen dioxide, Ozone, Reporting and recordkeeping requirements.

Dated: July 18, 1995.

W. Michael McCabe,

Regional Administrator, Region III.

40 CFR part 52 is amended as follows:

PART 52—[AMENDED]

1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401–7671q.

Subpart NN—Pennsylvania

2. Section 52.2020 is amended by adding paragraphs (c)(102) to read as follows:

§ 52.2020 Identification of plan.

* * * * *

(c) * * *

(102) Revisions to the Pennsylvania Regulations Chapter 129.91 submitted on January 6, 1995, April 24, 1995 and May 31, 1995 by the Pennsylvania Department of Environmental Resources:

(i) Incorporation by reference.

(A) Four letters, two dated January 6, 1995, one dated April 24, 1995, and one dated May 31, 1995, from the Pennsylvania Department of Environmental Resources transmitting source-specific VOC and/or NOx RACT determinations in the form of plan approvals and/or operating permits for the following sources: (1) PECO Energy—Eddystone (Delaware Co.)—utility, (2) Gilberton Power Company (Schuylkill Co.)—utility, (3) Bethlehem Steel Structural Products Corp. (Northampton Co.)—steel manufacturer, (4) Westwood Energy Properties, Inc. (Schuylkill Co.)—utility, (5) PECO Energy Co.—Front Street (Montgomery Co.)—utility, (6) Crawford Furniture Manufacturing Corp. (Clarion Co.)—furniture manufacturer, (7) Schuylkill Energy Resources (Schuylkill Co.)—cogeneration plant, (8) Panther Creek Partners (Carbon Co.)—utility, (9) Columbia Gas Transmission Co.—Milford (Pike Co.), (10) Texas Eastern Transmission Corp.—Entriken (Huntingdon Co.)—Natural gas pipeline compressor station, (11) Columbia Gas Transmission Corp.—Greencastle (Franklin Co.). In addition, the operating permit for Lord Corporation (Erie Co.), aerospace surface coating operation containing provisions limiting this source as a synthetic minor source (below RACT threshold level of 50 TPY potential VOC emissions) is being approved.

(B) Plan approvals (PA), Operating permits (OP):

(*1*) PECO Energy—Eddystone—PA 23–0017, effective December 28, 1994, except the expiration date of the plan approval, and OP 23–0017, effective December 28, 1994, except the expiration date of the operating permit and conditions 6.C.(1) through (7), 6.D.(1)(c), 7.C.(1) through (5), 7.D.(1)(a) and 8.D.(1)(a) pertaining to SO_2 or PM10 requirements.

(*2*) Gilberton Power Company—OP 54–0004, effective December 20, 1994, except the expiration date of the operating permit and condition 5 pertaining to SO_2 and PM10 requirements.

(*3*) Bethlehem Structural Products Corp.—OP 48–0010, effective December 20, 1994, except the expiration date of the operating permit, OP 48–0013, effective December 20, 1994, except the expiration date of the operating permit and condition (11)(d) through (f) pertaining to sulfur and metals, OP 48–0014, effective December 20, 1994, except the expiration date of the operating permit and conditions (8) and (9) pertaining to particulate matter, and OP 48–0015, effective December 20, 1994, except the expiration date of the operating permit and conditions (9) and (10) pertaining to visible emissions and particulate matter.

(*4*) Westwood Energy Properties, Inc.—OP 54–0006, effective December 27, 1994, except the expiration date of the operating permit and the particulate and SO_2 emission limitations in condition (5).

(*5*) PECO Energy Company—Front Street—OP 46–0045, effective March 31, 1995, except the expiration date of the operating permit.

(*6*) Crawford Furniture Manufacturing Corp.—OP 16–021, effective March 27, 1995.

(*7*) Schuylkill Energy Resources—OP 54–0003, effective May 19, 1995, except the expiration date of the operating permit.

(*8*) Panther Creek Partners—OP 13–0003, effective May 19, 1995, except the expiration date of the operating permit, the non-VOC emission requirements in condition (7), and conditions (8) and (9).

(*9*) Columbia Gas Transmission Company—Milford—OP 52–0001, effective May 19, 1995, except the expiration date of the operating permit.

(*10*) Texas Eastern Transmission Corp.—OP 31–2003, effective May 16, 1995, except the expiration date of the operating permit.

(*11*) Columbia Gas Transmission Corp.—Greencastle—OP 28–2003, effective April 21, 1995, except the expiration date of the operating permit.

(*12*) Lord Corporation—OP 25–095, effective March 30, 1995.

40 CFR Part 70

[AR–FRL–5293–1]

Clean Air Act Final Interim Approval of Operating Permits Program; the State of Arkansas

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final Interim Approval.

SUMMARY: The EPA is promulgating interim approval of the Operating Permits program submitted by the Arkansas Department of Pollution Control and Ecology (ADPCE) for the State of Arkansas for the purpose of complying with Federal requirements for an approvable State program to issue operating permits to all major stationary sources, and to certain other sources.

EFFECTIVE DATE: October 10, 1995.

ADDRESSES: Copies of the State's submittal and other supporting information used in developing the final interim approval are available for inspection during normal business hours at the following location:

U. S. Environmental Protection Agency, Region 6, Air Programs Branch (6PD–R), 1445 Ross Avenue, Suite 700, Dallas, Texas 75202–2733.
Arkansas Department of Pollution Control and Ecology, 8001 National Drive, Little Rock, Arkansas 72219–8913.

FOR FURTHER INFORMATION CONTACT: Wm. Nicholas Stone, Air Permits Section (6PD–R), Environmental Protection Agency, Region 6, 1445 Ross Avenue, Suite 700, Dallas, Texas 75202–2733, telephone (214) 665–7226.

SUPPLEMENTARY INFORMATION:

I. Background and Purpose

A. Introduction

Title V of the 1990 Clean Air Act Amendments, sections 501–507 of the Clean Air Act ("the Act"), and implementing regulations at 40 Code of Federal Regulations (CFR) part 70 require that States develop and submit Operating Permits programs to the EPA by November 15, 1993, and that the EPA act to approve or disapprove each program within one year after receiving the submittal. The EPA's program review occurs pursuant to section 502 of the Act and the part 70 regulations, which together outline criteria for approval or disapproval. Where a program substantially, but not fully, meets the requirements of part 70, the EPA may grant the program interim approval for a period of up to two years. If the EPA has not fully approved a program by two years after the date of November 15, 1993, or by the end of an interim program, it must establish and implement a Federal program.

On September 19, 1994, the EPA proposed interim approval of the Operating Permits program for the State of Arkansas. See 59 FR 47828 (September 19, 1994). The EPA received public comment on the proposal and compiled a Technical Support Document which describes the Operating Permits program in greater detail. In this document, the EPA is taking final action to promulgate interim approval of the Operating Permits program for the State of Arkansas.

II. Final Action and Implications

A. Analysis of State Submission

The State of Arkansas submitted to the EPA, under a cover letter from the Governor dated October 29, 1993, the State's Operating Permits program. The submittal has adequately addressed all 16 elements required for full approval as discussed in part 70, with the exception of five interim issues listed in the proposal: (1) Reference of Prevention of Significant Deterioration (PSD) applicability for new construction and modification, (2) incorporation by reference of the part 70 provisions regarding complete application requirements and permit content requirements, (3) revision of the minor modification procedure, (4) providing a definition of the term "prompt", and (5) submission of a State Implementation Plan (SIP) revision for Regulation 19 consistent with Regulation 26. The State of Arkansas appropriately addressed all requirements necessary to receive interim approval of the State Operating Permits program pursuant to title V of the Act and 40 CFR part 70.

B. Response to Comments

Comments were received from three groups during the comment period that ran from September 19, 1994, until October 19, 1994. Listed below are the responses to comments received on the proposed interim approval for the Arkansas Operating Permits program.

1. Section 112(g) Implementation

Comments were made that the EPA should not allow Arkansas to implement section 112(g) until Federal rulemaking is complete. Also, objections were made to the State's use of its preconstruction permit process to implement section 112(g) requirements.

The EPA does not agree with the comment. In its proposed interim approval of Arkansas' part 70 program, the EPA proposed to approve the State's preconstruction review program for the purpose of implementing section 112(g) during the transition period before promulgation of a Federal rule implementing section 112(g). This proposal was based in part on an interpretation of the Act that would require sources to comply with section 112(g) beginning on the date of approval of the title V program, regardless of whether the EPA had completed its section 112(g) rulemaking. The EPA has since revised this interpretation of the Act in a **Federal Register** notice published on February 14, 1995, 60 FR 8333. The revised interpretation postpones the effective date of section 112(g) until after the EPA has promulgated a rule addressing that provision. The revised notice sets forth in detail the rationale for the revised interpretation.

The section 112(g) interpretive notice explains that the EPA is still considering whether the effective date of section 112(g) should be delayed beyond the date of promulgation of the Federal rule so as to allow States time to adopt rules implementing the Federal rule, and that the EPA will provide for any such additional delay in the final section 112(g) rulemaking. Unless and until the EPA provides for such an additional postponement of section 112(g), Arkansas must be able to implement section 112(g) during the transition period between promulgation of the Federal section 112(g) rule and adoption of implementing State regulations.

For this reason, the EPA is finalizing its approval of Arkansas' preconstruction review program. This approval clarifies that the preconstruction review program is available as a mechanism to implement section 112(g) during the transition period between promulgation of the section 112(g) rule and adoption by Arkansas of rules established to implement section 112(g). However, since the approval is for the single purpose of providing a mechanism to implement section 112(g) during the transition period, the approval itself will be without effect if the EPA decides in the final section 112(g) rule that sources are not subject to the requirements of the rule until State regulations are adopted. Further, the EPA is limiting the duration of this approval to 18 months following promulgation by EPA of the section 112(g) rule.

The EPA believes that, although Arkansas currently lacks a program designed specifically to implement section 112(g), the preconstruction review program will serve as an adequate implementation vehicle during a transition period because it will allow Arkansas to select control measures that would meet Maximum Achievable Control Technology, as defined in section 112, and incorporate these measures into a federally enforceable preconstruction permit.

2. Title I Modification Definition

Comments were made that the EPA has proposed interim approval of the Arkansas program because the State definition of title I modification is inconsistent with the new definition of "title I modification" which the EPA has proposed in the revision to 40 CFR part 70 (59 FR 44460, August 29, 1994). Comments objected to the EPA's reinterpretation of title I modification as an interim approval issue.

The EPA does not agree with the comment. As noted in the proposal for interim approval, the Arkansas Plan of Implementation for Air Pollution Control SIP at Regulation 19.2 clearly defines a modification as any increase in emissions. This definition does not provide for a threshold of emissions that could avoid New Source Review. Therefore, the threshold of emission levels at Regulation 26.10(b)(1) is inconsistent with the approved SIP definition of a modification. The Operating Permits program is consistent with part 70 by disallowing "title I modifications" from using the minor modification procedure at Regulation 26.10(b)(7) which includes actions under the SIP. Because the SIP is federally approved and the provision at Regulation 26.10(b)(7) is consistent with part 70, it is clear that the provision at Regulation 26.10(b)(1) is inconsistent with both the existing State law (the SIP) and with the Federal rule at 40 CFR 70.7(e)(2)(i)(A)(5). This inconsistency is discussed further under Number 3 below.

The EPA required the State to revise the Operating Permits regulation because of this inconsistency and required the State to delete Regulation 26.10(b)(1) because it was inconsistent with the federally approved definition in the State's SIP. The EPA explained its reasoning for not allowing the use of a narrower definition of "title I modifications" in the Washington State final approval notice (see 59 FR 55813, November 9, 1994) and incorporates that discussion here by reference.

3. Minor Modification Process

Comments were made that the EPA lacked the authority to require the State to revise its minor modification process to delete the emissions level threshold for minor modification applicability. Comments stated their belief that the "20% of the applicable definition of major source" constituted a de minimus emissions increase and was allowable under the minor modification rule contained in part 70.

The EPA does not agree. The Federal rule, 40 CFR 70.7(e)(3)(i), allows group processing of minor modifications that collectively meet an emission threshold of 10% of the emissions allowed by the permit for the emissions unit for which the change is requested, 20% of the applicable definition of major source, or five tons per year whichever is less, provided the minor modification criteria for individual changes at 40 CFR 70.7(e)(2)(i)(A) are also met. The criteria at 40 CFR 70.7(e)(2)(i)(A)(5) and Regulation 26.10(b)(7) disallow changes that are title I modifications. As discussed under Number 2 above, the SIP at Regulation 19.2 defines "modification" as any increase in emissions. Because Regulation 26.10(b)(1) allows certain emissions increases to be processed under the minor modification procedure, the EPA considers the minor modification process in Regulation 26 to be inconsistent with itself and the Federal part 70 rule.

The EPA is currently revising part 70 to clarify the definition of "title I modification" (see 59 FR 44460, August 29, 1994). After this revision, the provision at Regulation 26.10(b)(1) might be interpreted as a de minimis threshold. As the promulgated Federal rule exists and the federally approved SIP exist, any increase in emissions would not be allowed under the minor modification procedure. The title I modification issue is discussed in detail in Number 2 above. The State's regulations must be consistent with the Federal rule as currently promulgated. Therefore, the EPA maintains that the State's regulations are inconsistent with the Federal rule because an emissions increase is allowed for individual changes under Regulation 26.10(b)(1) while the State's regulations at Regulation 26.10(b)(7) and the Federal rule at 40 CFR 70.7(e)(2)(i)(A)(5) disallow emissions increases.

4. Incorporation by Reference of PSD Requirements

Comment was made that the State should not have to formally incorporate by reference the PSD requirements into Regulation 26 as stated in the proposal for this action.

The EPA concurs with this comment. The proposal recommended incorporation of the PSD requirements in order to clarify the regulation for major sources. The State can effectively meet this requirement by amending the regulations at 26.3(b) with:

(4) Any source subject to § 19.9 of the *Compilation of Regulations of the Arkansas State Implementation Plan for Air Pollution Control.*

5. PSD Applicability for Constructed/Modified Sources

Comment was made that the EPA should require Arkansas to revise its operating permit regulation so that the operating permit need only be revised before a change is placed in operation, rather than before construction begins.

The EPA does not agree with this comment. The State of Arkansas has clearly demonstrated that major sources will be regulated by Regulation 26. These sources are required to obtain a modification to the operating permit that incorporates the applicable requirements reflected in the SIP (Regulation 19) before construction begins. This procedure allows the facility to obtain a pre-construction permit as well as a modification to the operating permit. Also, this process allows for adequate public comment without duplicating the public notice process.

If the State chose to revise the regulation as the comment suggests, the facility would still have to obtain a pre-construction permit under Regulation 19 before construction. This includes the requirement of full public review for significant modifications. Then, the

facility would have to obtain a significant modification for the operating permit under Regulation 26 before operating the modified unit.

6. Deviation Reporting

All three comments objected to the EPA requirement that the State define "prompt" in the regulations with respect to deviations.

The EPA concurs with these comments. The notice for proposed approval reflected the most prudent position the EPA could take that would offer clear guidance to the regulated community while protecting the environment. Since publication of the notice, the EPA has reconsidered this position and agrees with the comments that the term "prompt" may be defined in the permit.

The EPA maintains that "prompt" should be defined as two to ten days after a deviation. This timeframe is sufficient in most cases to protect public health and safety as well as provide a forewarning of potential problems. The regulating authority should give consideration to shorter timeframes where potential health and safety concerns exist. Where "prompt" is defined in the individual permit but not in the program regulations, the EPA may veto permits that do not require sufficiently prompt reporting of deviations.

7. Variance Provisions

Comments objected to the EPA's position that variance provisions under State statute do not apply to title V permits unless title V processes are followed.

The EPA does not agree with these comments. As discussed in the proposed notice, the EPA recognizes the State's statutory authority to grant variances. However, 40 CFR part 70 does not allow States to grant variances from title V requirements. The EPA recognizes that title V permits may include compliance schedules for sources which are out of compliance with applicable requirements. However, such measures to bring a source into compliance are not the same as variances, which normally provide a complete exemption from a requirement for the duration of the variance. The EPA also recognizes that Arkansas may exercise enforcement discretion when addressing permit violations, but such discretion is not unlimited.

8. Incorporation by Reference of Application and Permit Content

Comment was made that the State should not have to formally incorporate by reference the application and permit content requirements from 40 CFR 70.5(c) and 70.6(a–c) into Regulation 26 as stated in the proposal.

The EPA does not agree with this comment. Though it may appear clear that the application content and permit content are fully incorporated into the State regulations, formal incorporation by reference will provide a date of promulgation to the incorporated provisions. Changes to the State's program are certain as the Clean Air Act Amendments are implemented, and in this way the State regulations are made clear for enforcement and implementation purposes.

C. Final Action

The EPA is promulgating interim approval of the operating permits program submitted by the State of Arkansas on November 9, 1994. The State must make the following changes to receive full approval:

1. Incorporation by Reference

The State must amend Regulation 26.4 and 26.7 to incorporate the date of promulgation of the rule at 40 CFR part 70 as referenced in the regulation. By incorporating the promulgation date of July 21, 1992, the State regulations will be made clear.

2. Minor Modification Procedures

The language in the State's Regulation 26.10(b)(1) regarding emission levels must be deleted to make the regulations consistent with the Federal rule at 40 CFR 70.7(e)(2)(i)(A) and the State's Regulations 26.10(b)(7) and 19.2.

3. Submission of Regulation 19

The State of Arkansas must ensure consistency between the operating permits program (Regulation 26) and the SIP (Regulation 19). The State is working on a revision to Regulation 19.4 to make the SIP consistent with Regulation 26. A SIP revision must be submitted that is consistent with the rule at 40 CFR part 70 during the interim approval period.

Arkansas' part 70 program approved in this notice applies to all part 70 sources (as defined in the approved program) within the State of Arkansas, except any sources of air pollution over which an Indian Tribe has jurisdiction. *See, e.g.*, 59 FR 55813, 55815–55818 (November 9, 1994). The term "Indian Tribe" is defined under the Act as "any Indian tribe, band, nation, or other organized group or community, including any Alaska Native village, which is Federally recognized as eligible for the special programs and services provided by the United States to Indians because of their status as Indians." *See* section 302(r) of the Clean Air Act; *see also* 59 FR 43956, 43962 (August 25, 1994); 58 FR 54364 (October 21, 1993).

This interim approval, which may not be renewed, extends until October 8, 1997. During this interim approval period, the State of Arkansas is protected from sanctions, and the EPA is not obligated to promulgate, administer and enforce a Federal Operating Permits program in the State of Arkansas. Permits issued under a program with interim approval have full standing with respect to part 70, and the one year time period for submittal of permit applications by subject sources begins upon the effective date of this interim approval, as does the three year time period for processing the initial permit applications.

If Arkansas fails to submit a complete corrective program for full approval by April 8, 1997, the EPA will start an 18 month clock for mandatory sanctions. If Arkansas then fails to submit a corrective program that the EPA finds complete before the expiration of that 18 month period, the EPA will apply sanctions as required by section 502(d)(2) of the Act, which will remain in effect until the EPA determines that the State of Arkansas has corrected the deficiency by submitting a complete corrective program.

If the EPA disapproves Arkansas' complete corrective program, the EPA will apply sanctions as required by section 502(d)(2) on the date 18 months after the effective date of the disapproval, unless prior to that date Arkansas has submitted a revised program and the EPA has determined that it corrected the deficiencies that prompted the disapproval.

In addition, discretionary sanctions may be applied where warranted any time after the expiration of an interim approval period if the State of Arkansas has not timely submitted a complete corrective program or the EPA has disapproved its submitted corrective program. Moreover, if the EPA has not granted full approval to the Arkansas program by the expiration of this interim approval and that expiration occurs after November 15, 1995, the EPA must promulgate, administer and enforce a Federal permits program for the State of Arkansas upon interim approval expiration.

Requirements for approval, specified in 40 CFR 70.4(b), encompass section 112(l)(5) requirements for approval of a program for delegation of section 112 standards as promulgated by the EPA as they apply to part 70 sources. Section 112(l)(5) requires that the State's program contain adequate authorities, adequate resources for implementation, and an expeditious compliance schedule, which are also requirements under part 70. Therefore, the EPA is also promulgating approval under section 112(l)(5) and 40 CFR 63.91 of the State's program for receiving delegation of section 112 standards that are unchanged from Federal standards as promulgated. This program for delegations only applies to sources covered by the part 70 program.

III. Administrative Requirements

Docket

Copies of the State's submittal and other information relied upon for the final interim approval, including the eight public comments received and reviewed by the EPA on the proposal, are contained in docket number OPP–2–9–1 maintained at the EPA Regional Office. The docket is an organized and complete file of $100 million or more. Under Section 205, the EPA must select the most cost-effective and least burdensome alternative that achieves the objectives of the rule and is consistent with statutory requirements. Section 203 requires the EPA to establish a plan for informing and advising any small governments that may be significantly or uniquely impacted by the rule.

The EPA has determined that the approval action promulgated today does not include a Federal mandate that may result in estimated costs of $100 million or more to either State, local, or tribal governments in the aggregate, or to the private sector. This Federal action approves pre-existing requirements under State or local law, and imposes no new Federal requirements. Accordingly, no additional costs to State, local, or tribal governments, or to the private sector, result from this action.

List of Subjects in 40 CFR Part 70

Environmental protection, Administrative practice and procedure, Air pollution control, Intergovernmental relations, Operating permits, Reporting and recordkeeping requirements.

Dated: August 25, 1995.

A. Stanley Meiburg,

Acting Regional Administrator (6RA).

Part 70, title 40 of the Code of Federal Regulations is amended as follows:

PART 70—[AMENDED]

1. The authority citation for part 70 continues to read as follows:

Authority: 42 U.S.C. 7401, *et seq.*

2. Appendix A to part 70 is amended by adding the entry for the State of Arkansas in alphabetical order to read as follows:

Appendix A to Part 70—Approval Status of State and Local Operating Permits Programs

* * * * *

Arkansas

(a) The ADPCE submitted its Operating Permits program on November 9, 1993, for approval. Interim approval is effective on October 10, 1995. Interim approval will expire October 8, 1997.

(b) (Reserved)

National Oceanic and Atmospheric Administration

50 CFR Part 301

[Docket No. 950106003–5070–02; I.D. 090195A]

Pacific Halibut Fisheries; Inseason Actions Off California, Oregon, and Washington

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Inseason actions.

SUMMARY: The Assistant Administrator for Fisheries, NOAA, on behalf of the International Pacific Halibut Commission (IPHC), publishes these inseason actions pursuant to IPHC regulations approved by the U.S. Government to govern the Pacific halibut fishery. These actions are intended to enhance the conservation of the Pacific halibut stock.

EFFECTIVE DATES: Area 2A non-treaty commercial fishery reopening 8 a.m. through 6 p.m., local time, August 29, 1995; north Washington coast sport fishery reopening 8 a.m., local time, September 3, 1995, through 6 p.m., local time, September 4, 1995; Columbia River Area closure 6 p.m., local time, September 30, 1995, through December 31, 1995; California coastal waters closure 6 p.m., September 30, 1995 through December 31, 1995.

FOR FURTHER INFORMATION CONTACT: Steven Pennoyer, 907–586–7221; William W. Stelle, Jr., 206–526–6140; or Donald McCaughran, 206–634–1838.

SUPPLEMENTARY INFORMATION: The IPHC, under the Convention between the United States of America and Canada for the Preservation of the Halibut Fishery of the Northern Pacific Ocean and Bering Sea (signed at Ottawa, Ontario, on March 2, 1953), as amended by a Protocol Amending the Convention (signed at Washington, DC, on March 29, 1979), has issued these inseason actions pursuant to IPHC regulations governing the Pacific halibut fishery. The regulations have been approved by NMFS (60 FR 14651, March 20, 1995). On behalf of the IPHC, these inseason actions are published in the **Federal Register** to provide additional notice of its effectiveness, and to inform persons subject to the inseason actions of the restrictions and requirements established therein.

Inseason Actions

1995 Halibut Landing Report Number 13

Area 2A Non-Treaty Commercial Fishery to Reopen

The August 15 fishing period in Area 2A resulted in a catch of 25,000 lb (11.3 metric tons (mt)). The revised total commercial catch from Area 2A to date is 73,000 lb (33.11 mt), leaving approximately 32,000 lb (14.51 mt) to be taken.

Area 2A will reopen on August 29 for 10 hours from 8 a.m. to 6 p.m. local time. The fishery is restricted to waters that are south of Point Chehalis, WA (46°53'18" N. lat.) under regulations promulgated by NMFS. Fishing period limits as indicated in the following table will be in effect for this opening.

Vessel class		Fishing period limit (lb)	
Length	Letter	Dressed, head-on	Dressed, head-off*
0–25	A	225	200
26–30	B	240	210
31–35	C	380	335
36–40	D	1,050	925
41–45	E	1,130	995
46–50	F	1,350	1,190
51–55	G	1,510	1,330
56+	H	2,275	2,000

*Weights are after 2 percent has been deducted for ice and slime if fish are not washed prior to weighing.

The appropriate vessel length class and letter is printed on each halibut license.

The fishing period limit is shown in terms of dressed, head-off weight as well as dressed, head-on weight, although fishermen are reminded that regulations require that all halibut from Area 2A be landed with the head on.

The fishing period limit applies to the vessel, not the individual fisherman, and any landings over the vessel limit will be subject to forfeiture and fine.

North Washington Coast Sport Fishery to Reopen

The North Washington Coast (waters west of the Bonilla-Tatoosh line and south to the Queets River) sport halibut fishery will reopen for 2 days, September 3 and 4, 1995. Approximately 7,000 lb (3.17 mt) of the 71,410 lb (32.20 mt) quota remain to be harvested. Catch and effort during previous openings on July 1 and July 29 were low, allowing an additional opening. The daily bag limit will be one halibut per person, with no size limit. All other published sport fishery regulations, including the closed area southwest of Cape Flattery, will be in effect.

Columbia River Area

This area (Leadbetter Point to Cape Falcon) remains open 7 days a week with a one fish daily bag limit and a minimum size limit of 32 inches (12.59 centimeters (cm)). Approximately 1,200 lb (.54 mt) of a 4,617 lb (2.09 mt) catch limit has been harvested. All reported landings have occurred in WA. This fishery will close September 30, 1995, or when the catch limit is reached, whichever occurs earlier.

California Coastal Waters

Coastal waters from the Oregon-California border remain open 7 days per week with a daily bag limit of one halibut and a minimum size limit of 32 inches (12.59 cm). This area will close for the year on September 30, 1995.

Dated: September 1, 1995.

Richard H. Schaefer,

Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.

RIN 0648–AH75

Atlantic Swordfish Fishery; Quotas and Closure of Directed Fishery

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Interim and final rule; Annual quotas and closure; request for comments.

SUMMARY: By final rule, NMFS amends the regulations governing the Atlantic swordfish fishery by: 1) Reducing the total allowable catch (TAC) to 2,984 metric tons (mt); 2) increasing the swordfish bycatch limit to 15 fish for longline vessels when the directed longline swordfish fishery is closed; 3) providing authority for NMFS to modify the bycatch limit; 4) increasing the minimum notice of a closure to 14 days; and 5) reducing the minimum days allowed for the public comment on proposed quota adjustments to 30 days. By interim rule, NMFS amends the regulations to establish a 1996 trip limit of 31,600 pounds (lb) (14,334 kg) dressed weight of swordfish. The intent of this action is to protect the swordfish resource while allowing harvests of swordfish consistent with the recommendations of the International Commission for the Conservation of Atlantic Tunas (ICCAT) and to provide authority to NMFS to make adjustments to the trip limits. NMFS also announces a closure of the directed swordfish fishery for longliners.

DATES: Effective September 8, 1995. The closure for the directed longline fishery for swordfish is effective from 12 noon on October 31, 1995 through 11:59 p.m. December 31, 1995.

Comments on the 1996 trip limits must be submitted by November 1, 1995, and will be considered in establishing final trip limits.

ADDRESSES: Copies of an Environmental Assessment/Regulatory Impact Review (EA/RIR) supporting this action may be obtained from Richard B. Stone, Chief, Highly Migratory Species Management Division, Office of Fisheries Conservation and Management, National Marine Fisheries Service, 1315 East-West Highway, Silver Spring, MD 20910. Comments on the interim rule for trip limits should be sent to the same address.

FOR FURTHER INFORMATION CONTACT: Ronald G. Rinaldo or Rebecca Lent, 301–713–2347, fax 301–713–0596.

SUPPLEMENTARY INFORMATION: The Atlantic swordfish fishery is managed under the Fishery Management Plan for Atlantic Swordfish and its implementing regulations at 50 CFR part 630 under the authority of the Magnuson Fishery Conservation and Management Act (16 U.S.C. 1801 *et seq.*) (Magnuson Act) and the Atlantic Tunas Convention Act (ATCA) (16 U.S.C. 971 *et seq.*). Regulations issued under the authority of ATCA carry out the recommendations of ICCAT.

Background information about the need for revisions to the regulations governing the Atlantic swordfish fishery was provided in the notice of proposed rulemaking (60 FR 29543, June 5, 1995) and is not repeated here.

These regulatory changes will improve NMFS' ability to implement the ICCAT recommendations and further the management objectives for the Atlantic swordfish fishery. NMFS has re-evaluated the annual TAC, the annual directed-fishery quota, the annual bycatch quota, bycatch limits in the non-directed fishery, and the harpoon gear set-aside quotas in the Atlantic swordfish fishery in accordance with the procedures and factors specified in 50 CFR 630.24(d), including consideration of the latest stock assessment and recommendations of ICCAT. The final regulations are summarized as follows:

1. Total Allowable Catch (TAC)

NMFS is decreasing the annual TAC by 449 mt to 2,984 mt. All weights are in dressed weight of swordfish, unless indicated otherwise. The TAC is divided between a directed-fishery quota of 2,730 mt and a bycatch quota of 254 mt. The directed-fishery quota is divided into two 1,365 mt semiannual quotas for each of the 6-month periods, January 1 through June 30, and July 1 through December 31. Each of the 1,365 mt semiannual quotas is further subdivided into a drift gillnet quota of

27 mt and a longline and harpoon quota of 1,338 mt. This allocation by gear types employs the same percentages that were in effect in 1994.

NMFS estimates that approximately 113 mt of swordfish semiannually will be discarded dead, based on estimates from 1992 and 1993, recent estimated rates of discards, and expected improvement by the fleet in avoiding small fish. Therefore, the semiannual landing quota for the longline and harpoon swordfish fishery is the semiannual catch quota of 1,338 mt minus the estimated semiannual dead discards of 113 mt, or 1,225 mt for each of the two semiannual periods.

Following a closure of the directed longline fishery, any overharvest or underharvest will be added or subtracted, respectively, to the bycatch reserve of 254 mt. The ability to add or subtract underage or overage ensures that the United States will abide by ICCAT quotas while meeting the requirement under ATCA to provide U.S. fishermen with a reasonable opportunity to harvest their full quota.

NMFS has no new information sufficient to justify changes in the existing 10 mt special set-aside quota for harpoon gear.

2. Swordfish Bycatch in the Non-Directed Fishery

There are no new data or analyses that indicate a need for revision to the existing bycatch limits of five swordfish per trip in the squid trawl fishery and two swordfish per trip for all other bycatch fisheries, except the non-directed season in the longline fleet for 1995. Data analyzed by NMFS on longline vessels not directing at swordfish indicate that an increased bycatch limit of 15 swordfish per vessel trip would minimize the discards for 75 percent of the trips in 6 of the 7 fishing areas analyzed, without exceeding the bycatch reserve. Therefore, a bycatch limit of 15 fish per trip is established for longline vessels during the non-directed fishing season. This bycatch limit is based, in part, on the estimated period of time during which the directed fishery will be closed. The rule authorizes the Assistant Administrator for Fisheries, NOAA (AA) to modify the bycatch limits based upon the estimated period of time that the directed fishery is closed as well as the swordfish bycatch in the non-directed fishery.

3. Trip Limits

The reduced TAC and additional fishing capacity in the 1996 swordfish fishery will likely result in early closure of the directed fishery, resulting in economic disruption and hardship to the fleet. NMFS solicited comments on measures to extend the fishing season, including possible trip limits. The interim rule imposes a trip limit for swordfish for permitted longline commercial fishing vessels, and authorizes the AA to make adjustments in the management measures in order to achieve Atlantic swordfish management objectives. These adjustments may include changes in commercial trip limits. Under the interim trip limit, permitted longline vessels may harvest and possess up to 31,600 lb (14,334 kg) of swordfish per trip in 1996. This trip limit is based on the maximum catch of 90 percent of the trips in the Grand Banks (distant-water) fishing trips in 1992 and 1993. Trip limits are not defined by vessel type due to the difficulty of classifying distant-water versus coastal-water vessels. NMFS is soliciting further comments and suggestions from industry on how to clearly classify and monitor trip limits by vessel type and/or area fished.

Implementation of this trip limit for permitted vessels is intended to lower total daily landings, extend the open season, reduce the possibility that the semiannual quota will be exceeded, and reduce the waste, economic disruption and safety problems associated with a derby-style fishery.

4. Other

This rule reduces the minimum number of days allowed for public comment on proposed adjustments to the annual quota from 45 to 30. This reduction is intended to help expedite the rulemaking process for the swordfish fishery, particularly given the relatively brief period between the ICCAT recommendations and the commencement of the fishing season. NMFS also requests comments on whether the fishing year should be changed from January through December to July through June. Such a change would allow NMFS to implement ICCAT recommendations prior to the start of the fishing year.

This rule also changes the address of the Director, NMFS Southeast Region, whose office has moved.

Finally, this rule increases the minimum notice required for a closure from 8 days to 14 days, due to the difficulty for distant water vessels to return to port and offload within 8 days. Thus, a vessel will have a minimum of 14 days to return to port and offload.

Comments and Responses

1. ICCAT Quota Recommendations

Comment: Many fishery participants stated their concern over the country swordfish quotas set by ICCAT for 1995 and 1996. Some commenters suggested that the total quota was set too high to allow for stock recovery, while others indicated that the 1996 U.S. quota should be renegotiated, so that countries that did not comply with previous ICCAT recommendations would be penalized. The 1994 underage should be added to the 1995 quota.

Response: NMFS agrees that the total swordfish quota for the North Atlantic may not ensure stock recovery. The swordfish stock assessment will be reviewed at the 1995 meeting of the Scientific and Statistical Committee of ICCAT. Pending this review, NMFS is obligated under ATCA to implement the ICCAT-recommended quotas. The issue of renegotiating the U.S. quota at ICCAT is beyond the scope of this rulemaking. NMFS agrees that overage/underage is a useful concept that should be discussed at the 1995 ICCAT meeting for future implementation.

2. June-July Application of Total Allowable Catch (TAC)

Comment: Some commenters suggested that quotas be applied on a July-June basis rather than calendar-year basis.

Response: The United States will discuss this issue at ICCAT and NMFS is seeking additional comment from the public on this issue.

3. Measures to Extend the Fishing Season

Comment: NMFS solicited and received numerous suggestions regarding methods to extend the fishing season. Several suggestions were made for extending the fishing season, given the reduced TAC for 1995 and 1996 and the increased fishing capacity due to the return of highliners that had left the Atlantic over the past 4 years to operate in the Pacific. These suggestions included trip limits, seasonal closure of the directed fishery, and establishment of set-aside quotas; the bulk of these were to be applied by vessel size, operation (distant-water versus coastal-water), or by region. There was considerable concern that the landings of larger, distant-water vessels would result in a closure of the fishery, with detrimental effects on smaller operators that provide year-round fresh and high-quality fish. Others were concerned that whatever is done be done equitably and not to the detriment of the distant water fleet or fishermen in northern areas. Some commenters suggested that NMFS classify the vessels according to individual fishing records.

Response: NMFS agrees that the reduced TAC and the additional fishing

capacity will result in early closure of the directed fishery, resulting in economic disruption and hardship to the fleet. The interim rule establishes a limit of 31,600 lb (14,334 kg) of swordfish per trip for 1996 for all vessels in all regions. The difficulty of classifying distant-water vs. coastal-water vessels and of enforcing different trip limits for them requires the establishment of one trip limit at this time. There is insufficient analysis to enable classification based on an individual vessel's past performance. The trip limit is based on 90 percent of the trips taken in the Grand Banks (distant-water) fishery in 1992 and 1993. The trip limit should extend the season while affecting only the larger, distant-water vessels, rather than the smaller, inshore boats that take shorter trips. NMFS will continue to analyze appropriate trip limits for smaller vessels and vessels in other geographical regions to determine equitable limits for all vessels. NMFS will consider comments and suggestions from the industry, particularly with regards to methods for clearly distinguishing distant-water versus smaller, inshore vessels, in promulgating final trip limits for 1996.

4. Swordfish Bycatch in the Non-directed Fishery

Comment: NMFS solicited and received numerous comments on revisions of the longline bycatch limit during closure of the directed longline fishery. Commenters indicated that the catch limit during closure of the directed swordfish fishery should be reviewed in order to minimize the waste from dead discards and to minimize the economic disruption and hardship caused by the closure of the directed fishery.

Response: NMFS agrees that the bycatch limit warrants revision given the high probability of a closure under a reduced TAC and increased fishing capacity. The final rule establishes a bycatch limit for longliners of 15 swordfish per trip during the non-directed fishing season. This limit is based on analysis of catch data for longline vessels not targeting swordfish. Bycatch by other gear types remains at the current levels.

5. Undersized Swordfish Discards

Comment: There were numerous comments regarding dead discards of undersized swordfish. Some commenters indicated that it may be possible to reduce undersized bycatch through area and season closures, and possibly gear modifications, including the use of size-selective gear-types such as harpoons. Comments were made regarding the Second Harvest Program; some feel the program should be implemented while others are concerned about the possible problems due to lack of observers and tax-saving incentives.

Response: NMFS continues to support research and analysis that would provide information on how to reduce the catch of undersized swordfish. This reduction is increasingly critical given the reduced TAC and increased fishing capacity. NMFS believes that this issue should be addressed at ICCAT and will raise the issue at the ICCAT Advisory Committee meeting. Regarding Second Harvest, NMFS is proceeding with this program under strict observation and enforcement requirements.

6. Limited Access for the Atlantic Swordfish Fishery

Comment: Many commenters reiterated the long-standing request on the part of some industry participants to implement limited access in the swordfish fishery and feel that NMFS should implement limited access for the Atlantic swordfish fishery as soon as possible. Some firms may go out of business unless limited access is implemented by 1996.

Response: NMFS has published an Advance Notice of Proposed Rulemaking announcing the availability of discussion papers on limited access options for the Atlantic swordfish and shark fisheries, as well as a concept paper on rationalization of fisheries for Atlantic highly migratory species. These discussion papers will serve as the basis for proposed rulemaking on limited access in these fisheries in the fall of 1995.

7. Procedures for Fishery Closures

Comment: Numerous comments were offered on the optimal method for announcing and implementing a closure of the directed fishery. Announcement of a closure should be made at least 14 days in advance, and provide an additional 14-day period for offloading the catch.

Response: NMFS agrees that adequate closure notification is necessary to prevent market gluts as well as safety problems with closure announcements. This rule increases the minimum notice of a closure from 8 to 14 days. Thus, once NMFS issues a closure notice, a vessel will have a minimum of 14 days to return to port and offload. At this time, NMFS is not providing an additional 14 days to offload because of enforcement concerns that need further analysis.

Changes from the Proposed Rule

In accordance with a review of the factors specified in 50 CFR 630.24(d), consideration of the comments received, and further analysis of available data, the following changes were made to the proposed rule:

1. Swordfish Bycatch in the Non-directed Fishery

The final rule establishes a bycatch limit of 15 fish per trip for longline vessels during the non-directed fishing season.

2. Trip Limits

The interim rule allows all permitted vessels to harvest and possess up to and including 31,600 lb (14,334 kg) of swordfish per trip in 1996.

3. Other

The final rule changes the minimum number of days allowed for public comment for proposed adjustments to annual quotas from 45 to 30, and the minimum notification of a closure from 8 days to 14 days.

Closure of the Directed Fishery

The regulations governing the Atlantic swordfish fisheries at 50 CFR 630.25 provide for a specified annual quota (modified to 2,450 mt dressed weight in this final rule, including estimated dead discards) to be harvested by the directed longline fishery. NMFS is required, under § 630.25(a)(1), to monitor the catch and landing statistics and, on the basis of these statistics, to project a date when the catch of will equal the quota, and to publish a **Federal Register** document announcing the closure. The current projected date on which the directed Atlantic swordfish catch by the longline fleet is estimated to reach or exceed the quota is October 31, 1995.

Therefore, NMFS announces that the directed longline fishery for swordfish is closed at 12 noon on October 31, 1995. During the closure of the directed longline fishery, aboard a vessel using or having on board a longline and not having on board harpoon gear, a person may not fish for swordfish from the North Atlantic stock, and no more than 15 swordfish per trip may be possessed or landed. Beginning at 12:01 p.m., October 31, 1995, a non-directed longline fleet fishing season will be in effect through 11:59 p.m. December 31, 1995. The AA may modify or close the non-directed longline fleet fishing season upon publication of notification in the **Federal Register**.

Classification

This final rule is published under the authority of ATCA. The AA has determined that the regulations contained in this rule are necessary to implement the recommendations of ICCAT and are necessary for management of the Atlantic swordfish fishery. The Assistant General Counsel for Legislation and Regulation of the Department of Commerce certified to the Chief Counsel for Advocacy of the Small Business Administration at the proposed rule stage that, if adopted, this rule would not have a significant economic impact on a substantial number of small entities. That certification remains valid. While the 1995 TAC represents about a 13–percent reduction from the TAC of the previous 2 years, the allowable catch is slightly higher than last year's catch; as a result, a regulatory flexibility analysis was not prepared. The RIR provides further discussion of the economic effects of the final rule.

This action is exempt from review under E.O. 12866.

NMFS issued a biological opinion under the Endangered Species Act (ESA) on September 1, 1995, indicating that the level of impact and marine mammal takes from the longline and harpoon swordfish fishery is not likely to jeopardize the continued existence of any sea turtle species or any marine mammal populations. Prior to the beginning of the 1996 drift gillnet fishery, NMFS will conduct a formal consultation on the fishery under the ESA. Based on the results of the consultation, NMFS may then conduct a rulemaking to promulgate any protective measures prior to the beginning of the drift gillnet fishing season. Since there is no gillnet fishery for the remainder of 1995, no ESA consultation on the drift gillnet fishery is necessary at this time.

The AA has determined that there is good cause to waive partially the 30-day delay in effective date normally required by 5 U.S.C. 553(d), because implementing the U.S. ICCAT-recommended quota for 1995 is necessary for achieving management objectives and meeting ICCAT treaty obligations. The effective date is 7 days from the date of filing with the Office of the Federal Register.

List of Subjects in 50 CFR Part 630

Fisheries, Fishing, Reporting and recordkeeping requirements, Treaties.

Dated: September 1, 1995.

Gary Matlock,

Program Management Officer, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR part 630 is amended as follows:

PART 630—ATLANTIC SWORDFISH FISHERY

1. The authority citation for part 630 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.* and 16 U.S.C. 971 *et seq.*

2. In § 630.2, the definition for "Regional Director" is revised, and the definition for "Trip limit" is added, in alphabetical order, to read as follows:

§ 630.2 Definitions.

* * * * *

Regional Director means the Director, Southeast Region, NMFS, 9721 Executive Center Drive North, St. Petersburg, FL 33702–2432; telephone 813–570–5301, or a designee.

* * * * *

Trip limit means the total allowable take from a single trip as defined in this section.

* * * * *

3. In § 630.7, paragraph (z) is added to read as follows:

§ 630.7 Prohibitions.

* * * * *

(z) Exceed the vessel trip limits specified in § 630.23.

4. In § 630.23, paragraph (d) is added to read as follows:

§ 630.23 Harvest limitations.

* * * * *

(d) *Vessel trip limits.* In 1996, vessels issued a swordfish permit under § 630.4 may not land from, or possess during, a single trip more than 31,600 lb (14,334 kg) dressed weight of swordfish, unless a closure has been effected under § 630.25.

5. In § 630.24, paragraph (b)(1), the first sentence of paragraph (d)(6), and paragraph (f) are revised to read as follows:

§ 630.24 Quotas.

* * * * *

(b) * * *

(1) The annual quota for the directed fishery for swordfish is 2,730 mt, dressed weight, divided into two semiannual quotas as follows:

(i) For the semiannual period January 1 through June 30:

(A) 27 mt dressed weight, that may be harvested by drift gillnet; and

(B) 1,338 mt, dressed weight, that may be harvested by longline and harpoon. To account for harvested fish that are discarded dead, only 1,225 mt, dressed weight, may be landed in this category.

(ii) For the semiannual period July 1 through December 31:

(A) 27 mt, dressed weight, that may be harvested by drift gillnet; and

(B) 1,338 mt, dressed weight, that may be harvested by longline and harpoon. To account for harvested fish that are discarded dead, only 1,225 mt, dressed weight, may be landed in this category.

* * * * *

(d) * * *

(6) NMFS will announce any adjustments to the annual quotas by publication of a proposed rule in the **Federal Register**, providing for a minimum of a 30-day comment period. * * *

* * * * *

(f) *Inseason adjustments to the bycatch and directed fishery quotas.* (1) If NMFS determines that the annual bycatch quota will not be taken before the end of the fishing year, the excess quota may be allocated to the directed-fishery quotas pursuant to the requirements and procedures in paragraphs (g) and (h) of this section.

(2) If NMFS determines that it is necessary to close the directed fishery, any estimated overharvest or underharvest directed-fishery quota available immediately prior to that closure will be applied to the annual bycatch quota and will be used to adjust the annual bycatch quota accordingly.

* * * * *

7. In § 630.25, the second sentences of paragraphs (a)(1) and (a)(2), and paragraph (c)(2)(ii) are revised to read as follows:

§ 630.25 Closures and bycatch limits.

(a) * * * (1) * * * The effective date of such notice will be at least 14 days after the date such notice is filed at the Office of the Federal Register. * * *

(2) * * * The effective date of such notice will be at least 14 days after the date such notice is filed at the Office of the Federal Register. * * *

* * * * *

(c) * * *

(2) * * *

(ii) No more than 15 swordfish per trip may be possessed in the North Atlantic Ocean, including the Gulf of Mexico and Caribbean Sea, north of 5° N. lat., or landed in an Atlantic, Gulf of Mexico, or Caribbean coastal state. The Assistant Administrator may modify or change the bycatch limits upon publication of notice in the **Federal Register** pursuant to the requirements and procedures in paragraphs (a)(1) and (a)(2) of this section. Changes in the

bycatch limits will be based upon the length of the directed fishery closure as well as the estimated catch per vessel in the non-directed fishery.

* * * * *

[FR Doc. 95–22238 Filed 9–1–95; 4:39 pm]

BILLING CODE 3510–22–F

Proposed Rules

Federal Register

Vol. 60, No. 174

Friday, September 8, 1995

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 300

RIN 3206–AE80

Employment (General); Use of Private Sector Temporaries

AGENCY: Office of Personnel Management.

ACTION: Proposed rule with request for comments.

SUMMARY: The Office of Personnel Management (OPM) proposes to authorize Federal agencies to use private sector temporaries for 120 work days instead of 120 calendar days as currently permitted. Agencies would continue to purchase temporary help services through the Federal procurement process following all applicable laws and regulations relating to the purchase of goods or services from the private sector. The proposed change would give agencies more flexibility to conduct their operations, as recommended by the National Performance Review.

DATES: Comments must be received on or before November 7, 1995.

ADDRESSES: Send or deliver written comments to Leonard R. Klein, Associate Director for Employment, U.S. Office of Personnel Management, 1900 E Street NW., Room 6F08, Washington, DC 20415.

FOR FURTHER INFORMATION CONTACT: Ellen Russell on 202–606–0830, FAX 202–606–2329, or TDD 202–606–0023.

SUPPLEMENTARY INFORMATION: On January 25, 1989, OPM published [at 54 FR 3762] regulations authorizing Federal agencies to use commercial temporary help services in two situations: certain employee absences and critical unexpected workload needs. Because the authority was new and there were concerns about the possibility of misuse, the timeframes were deliberately tight. Moreover, the regulations contained two sets of time limits: a 45-work day limit on using a particular individual from a temporary help service firm and an overall 120-calendar-day limit on using temporary help services for any one situation. When justified, OPM approved agency requests for extensions.

Our review indicates that in the more than 6 years the authority has been in effect, Federal agencies have appropriately used the services of temporary help firms. Agencies indicated that their employees favor the policy because using temporary help services alleviates extra work pressure and stress during workload peaks and also makes it easier for employees to get time off for critical personal needs. Agencies recommended continuing the authority for temporary help service firms without the 45-day restriction on the use of same individual from a firm because it was inefficient to retrain a new person after 45 days.

Although this proposal would permit agencies to use temporary help services for longer periods, there is no change in the Office of Personnel Management view that continuing work is most appropriately performed by permanent Federal employees. On September 13, 1994, OPM published final regulations [at 59 FR 46895] to ensure that temporary Federal appointments are used to meet truly short-term needs. As in those regulations, the limits in this proposal are designed to restrict the use of temporary help services to short-term needs.

In exercising the discretion to use temporary help services, agencies are reminded of their labor relations obligations under Chapter 71 of Title 5 of the U.S. Code and Executive Order 12871.

This proposal would lengthen the time agencies could use temporary help services for an individual situation from 120 calendar days to 120 workdays. The new 120-workday limit would also apply to an agency's use of a particular individual from a firm; a change from the current 45-workday limit in a 6-month period. The proposal would continue the provision for agencies to request an extension from local OPM service centers when the need for temporary help services continued beyond the initial 120 workdays and would specify that OPM could approve an extension for up to a total of 240 workdays. This would mean that an agency with OPM approval could use the same individual from a firm for up to 240 workdays on the same assignment or on a different assignment. In this context, "agency" means a major organizational element, headquarters or field, of an agency.

The proposal continues the current prohibitions against using temporary help services to displace Federal employees or in place of regular civil service procedures for permanent appointment and would add a prohibition against use of temporary help services to circumvent controls on employment levels. The proposal also continues current provisions permitting the use of temporary help services only when there are no current agency employees who could be spared to do the work, there are no former employees available on the agency's reemployment priority list, and when there are no applicants available for temporary Federal employment within the timeframe needed.

The proposal would change the reporting requirement to OPM from annual reports to reports on an as-requested basis. Agencies would have to maintain the records necessary for such reports and for internal evaluation. The proposed wording more accurately reflects the fact that agencies have the primary responsibility for oversight. Agency contracting officers are responsible for proper performance of the contract for temporary help services. Additionally, agency expenditures for temporary help services are subject to the full range of internal controls and oversight, Inspector General reviews, and audits which apply to every service contract. Agency adherence with these regulations is subject to review under OPM's regular compliance and evaluation activities.

Finally, the proposal would make several editorial changes, for example, deleting reference to the Federal Personnel Manual, a document abolished on December 31, 1994, and adding a reference to temporary reassignments and time-limited promotions as mechanisms for agencies to accomplish work instead of using temporary help firms. The proposal would also clarify that agencies may not use temporary help services for the Senior Executive Service or for the work of managerial or supervisory positions.

Regulatory Flexibility Act

I certify that these regulations will not have a significant economic impact on a substantial number of small entities for the following reasons:

1. OPM is not regulating entities (including businesses) of any size, or imposing record keeping, reporting, or other compliance requirements on them. OPM is regulating the conduct of Federal agencies if they choose to use temporary help firms.

2. The requirements an entity must observe are generated through an agency-initiated contracting process featuring competitive bidding under the already-established, statutory Federal procurement system. That system applies to all contractors providing goods and services to the Government. The entities affected by that system are those who seek a contract. Those who win a contract receive a beneficial economic impact.

Executive Order 12866, Regulatory Review

This rule has been reviewed by the Office of Management and Budget in accordance with Executive Order 12866.

List of Subjects in 5 CFR Part 300

Freedom of information, Government employees, Reporting and recordkeeping requirements, Selective Service System.

Office of Personnel Management.

James B. King,

Director.

Accordingly, OPM proposes to amend part 300 of title 5, Code of Federal Regulations, as follows:

PART 300—EMPLOYMENT (GENERAL)

1. The authority citation for part 300 is revised to read as follows:

Authority: 5 U.S.C. 552, 3301, 3302; E.O. 10577, 3 CFR, 1954–1958 Comp., page 218, unless otherwise noted.

Secs. 300.101 through 300.104 also issued under 5 U.S.C. secs. 7201, 7204, 7701; E.O. 11478, 3 CFR, 1966–1970 Comp., page 803.

Secs. 300.301 also issues under 5 U.S.C. 1104 and 3341.

Secs. 300.401 through 300.408 also issued under 5 U.S.C. secs. 1302(c), 2301, and 2302.

Secs. 300.501 through 300.507 also issued under 5 U.S.C. 1103(a)(5).

Sec. 300.603 also issued under 5 U.S.C. 1104.

Secs. 300.801 through 300.802 issued under 5 U.S.C. 3328.

1. Section 300.502 is revised to read as follows:

§ 300.502 Coverage

(a) The regulations in this subpart apply to the competitive service and to Schedules A and B in the excepted service.

(b) Agencies may not use temporary help services for Senior Executive Service or for the work of managerial or supervisory positions.

2. In § 300.503 paragraph (c)(3) is added to read as follows:

§ 300.503 Conditions for using private sector temporaries.

* * * * *

(c) * * *

(3) To circumvent controls on employment levels.

3. In § 300.504, paragraphs (a) and (b) are revised to read as follows:

§ 300.504 Prohibition on employer-employee relationship.

* * * * *

(a) In accordance with the regulations in this subpart, an agency may use private sector temporaries in a particular situation for no more than 120 workdays. If the situation justifies use of temporary help services beyond the initial 120 workdays, the agency may request OPM authorization for an additional period not to exceed 120 workdays, up to a total of 240 workdays.

(b) An individual employee of a temporary help firm may work at a major organizational element (headquarters or field) of an agency for no more than 120 workdays in a 12 month period. An agency may request OPM authorization to keep the individual for an additional period not to exceed 120 workdays up to a total of 240 workdays:

(1) In conjunction with an extension of the overall time limit for a particular situation, or

(2) For a different situation if the using of the same individual would be in the interest of good administration.

* * * * *

4. Section 300.505 is revised to read as follows:

§ 300.505 Relationship of civil service procedures.

Agencies continue to have full authority to meet their temporary needs by various means, for example, redistributing work, authorizing overtime, using in-house pools, and making details or time-limited promotions of current employees. In addition, agencies may appoint individuals as civil service employees on various work schedules appropriate for the work to be performed.

5. Section 300.507 is revised to read as follows:

§ 300.507 Documentation and oversight.

Agencies are required to maintain records and provide oversight to establish that their use of temporary help service firms is consistent with the regulations in this subpart. As needed, OPM may request agencies to provide information on the extent of their use of temporary help service firms.

BILLING CODE 6325–01–M

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 1260

[No. LS–95–007]

Beef Promotion and Research; Reapportionment

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule would adjust representation on the Cattlemen's Beef Promotion and Research Board (Board), established under the Beef Promotion and Research Act (Act) of 1985, to reflect changes in cattle inventories and cattle and beef imports that have occurred since the Board was reapportioned in 1993. These adjustments are required by the Beef Promotion and Research Order (Order) and would result in an increase in Board membership from 107 to 111, effective with the Secretary's 1996 appointments.

DATES: Comments must be received by October 10, 1995.

ADDRESSES: Send two copies of comments to Ralph L. Tapp, Chief; Marketing Programs Branch; Livestock and Seed Division; Agricultural Marketing Service (AMS), USDA, Room 2606–S; P.O. Box 96456; Washington, D.C. 20090–6456. Comments will be available for public inspection during regular business hours at the above office in Room 2606–South Building, 14th and Independence Avenue, Southwest, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Ralph L. Tapp, Chief, Marketing Programs Branch, on 202/720–1115.

SUPPLEMENTARY INFORMATION:

Executive Orders 12866 and 12778 and the Regulatory Flexibility Act

The Department of Agriculture is issuing this rule in conformance with Executive Order 12866.

This proposed rule has been reviewed under Executive Order 12778, Civil Justice Reform. It is not intended to have retroactive effect. Section 11 of the

Act provides that nothing in the Act may be construed to preempt or supersede any other program relating to beef promotion organized and operated under the laws of the United States or any State. There are no administrative proceedings that must be exhausted prior to any judicial challenge to the provisions of this rule.

This action was also reviewed under the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 et seq.). The Administrator of AMS has determined that this proposed action will not have a significant impact on a substantial number of small entities as defined by RFA since it only adjusts representation on the Board to reflect changes in domestic cattle inventory and imports.

The Board was initially appointed August 4, 1986, pursuant to the provisions of the Act (7 U.S.C. 2901 et seq.) and the Order issued thereunder (7 CFR 1260.101 et seq.). Domestic representation on the Board is based on cattle inventory numbers, and importer representation is based on the conversion of the volume of imported cattle, beef, or beef products into live animal equivalencies.

Section 1260.141(b) of the Order provides that the Board shall be composed of cattle producers and importers appointed by the Secretary from nominations submitted by certified producer organizations. A producer may only be nominated to represent the unit in which that producer is a resident.

Section 1260.141(c) of the Order provides that at least every 3 years and not more than every 2 years, the Board shall review the geographic distribution of cattle inventories throughout the United States and the volume of imported cattle, beef, and beef products and, if warranted, shall reapportion units and/or modify the number of Board members from units in order to reflect the geographic distribution of cattle production volume in the United States and the volume of cattle, beef, or beef products imported into the United States.

Section 1260.141(d) of the Order authorizes the Board to recommend to the Secretary modifications in the number of cattle per unit necessary for representation on the Board.

Section 1260.141(e)(1) provides that each geographic unit or State that includes a total cattle inventory equal to or greater than 500,000 head of cattle shall be entitled to one representative on the Board. Section 1260.141(e)(2) provides that States that do not have total cattle inventories equal to or greater than 500,000 head shall be grouped, to the extent practicable, into geographically-contiguous units, each of which have a combined total inventory of not less than 500,000 head. Such grouped units are entitled to at least one representative on the Board. Each unit that has an additional one million head of cattle within a unit qualifies for additional representation on the Board as provided in § 1260.141(e)(4). As provided in § 1260.141(e)(3), importers are represented by a single unit, with the number of Board members based on a conversion of the total volume of imported cattle, beef, or beef products into live animal equivalencies.

The initial Board appointed in 1986 was composed of 113 members. Reapportionment based on a 3-year average of cattle inventory numbers and import data, reduced the Board to 111 members in 1990 and 107 members in 1993.

The current Board representation by States or units has been based on an average of the January 1, 1990, 1991, and 1992 inventory of cattle in the various States as reported by the National Agricultural Statistics Service of the Department of Agriculture (USDA). Importer representation has been based on a combined total average of the 1989, 1990, and 1991 live cattle imports as published by the Foreign Agricultural Service (FAS) of USDA and the average of the 1989, 1990, and 1991 live animal equivalents for imported beef products.

Recommendations concerning Board reapportionment were approved by the Board at its July 24, 1995, meeting. In considering reapportionment, the Board reviewed cattle inventories as well as cattle, beef, and beef product import data for the period January 1, 1993, to January 1, 1995. The Board recommended that a 3-year average of cattle inventories and import numbers should be continued. The Board determined that an average of the January 1, 1993, 1994, and 1995 USDA cattle inventory numbers would best reflect the number of cattle in each State or unit since the 1993 reapportionment.

The Board reviewed the March 1995 FAS circular, "U.S. Trade and Prospects, Dairy, Livestock, and Poultry," to determine proper importer representation. The Board recommended the use of a combined total of the average of the 1992, 1993, and 1994 cattle import data and the average of the 1992, 1993, and 1994 live animal equivalents for imported beef products. The method used to calculate the total number of live cattle equivalents was the same as that used in the previous reapportionment of the Board. The recommendation for importer representation is based on the most recent 3-year average of data available to the Board at its July 24, 1995, meeting to be consistent with the procedures used for domestic representation.

The Board's recommended reapportionment plan would increase the number of representatives on the Board from 107 to 111. Two States—Iowa and Ohio—lose one member each; three States—Missouri, Montana, and South Dakota—gain one member each; Texas, gains two members; and the importer unit gains one member. Nevada would lose its only member. Because Nevada does not have sufficient cattle inventory to qualify for a position on the Board, the Board proposes that Nevada be merged with Oregon, a contiguous State that has only one member, to form a Western unit. The combined cattle inventory of Nevada and Oregon would entitle that Western unit to two seats on the Board, thus enabling both States to be jointly represented. The States and units affected by the reapportionment plan and the current and proposed member representation per unit are as follows: (Units are listed with the State makeup recommended by the Board.)

States	Current representation	Proposed representation
1. Iowa	5	4
2. Missouri	4	5
3. Montana	2	3
4. Ohio	2	1
5. South Dakota	3	4
6. Texas	13	15
7. Western	0	2
Nevada	1	....
Oregon	1	....

The 1995 nomination and appointment process was in progress while the Board was developing its recommendations. Thus, the Board reapportionment as proposed by this rulemaking would be effective, if adopted, with 1996 nominations and appointments.

List of Subjects in 7 CFR Part 1260

Administrative practice and procedure, Advertising, Agricultural research, Imports, Marketing agreement, Meat and meat products, Reporting and recordkeeping requirements.

For reasons set forth in the preamble, it is proposed that 7 CFR part 1260 be amended as follows:

PART 1260—BEEF PROMOTION AND RESEARCH

1. The authority citation for 7 CFR part 1260 continues to read as follows:

Authority: 7 U.S.C. 2901 et seq.

2. In § 1260.141, paragraph (a) and the table immediately following it, are revised to read as follows:

§ 1260.141 Membership of Board.

(a) For Board nominations and appointments beginning with those in 1996, the United States shall be divided into 39 geographical units and one unit representing importers, and the number of Board members from each unit shall be as follows:

CATTLE AND CALVES[1]

State/Unit	(1,000 head)	Directors
1. Alabama	1,677	2
2. Arizona	863	1
3. Arkansas	1,837	2
4. California	4,617	5
5. Colorado	2,967	3
6. Florida	1,977	2
7. Georgia	1,477	1
8. Idaho	1,720	2
9. Illinois	1,813	2
10. Indiana	1,163	1
11. Iowa	4,183	4
12. Kansas	6,067	6
13. Kentucky	2,617	3
14. Louisiana	943	1

Dated: September 1, 1995

Lon Hatamiya,

Administrator.

[FR Doc. 95–22282 Filed 9–7–95; 8:45 am]

BILLING CODE 3410–02–P

Animal and Plant Health Inspection Service

9 CFR Parts 1 and 3

[Docket No. 93–076–7]

RIN 0579–AA59

Animal Welfare; Marine Mammals

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice of meeting.

SUMMARY: The purpose of this notice is to announce the first meeting of the Marine Mammal Negotiated Rulemaking Advisory Committee.

DATES: September 25 and 26, 1995, from 9 a.m. to 5 p.m. each day.

ADDRESSES: The meeting will be held at the Holiday Inn at College Park, 10000 Baltimore Boulevard, Route 1, College Park, MD 20740, (301) 345–6700.

FOR FURTHER INFORMATION CONTACT: Dr. Barbara Kohn, Senior Staff Veterinarian, Animal Care Staff, REAC, APHIS, 4700 River Road Unit 84, Riverdale, MD 20737–1234, (301) 734–7833.

SUPPLEMENTARY INFORMATION: In a **Federal Register** notice published on May 22, 1995 (60 FR 27049–27051, Docket No. 93–076–3), we announced our intent to establish a Marine Mammal Negotiated Rulemaking Advisory Committee (Committee), chartered under the Federal Advisory Committee Act (Pub. L. 92–463). The Committee will advise the Department on the content of regulations to revise and update the standards for the handling, care, treatment, and transportation of marine mammals in captivity.

The purpose of the meeting is to bring together members of the Animal and Plant Health Inspection Service, representatives of the marine mammal industry, and representatives of other parties with a definable stake in marine mammal issues to frame a recommended rulemaking proposal as an alternative to the current standards for the care of captive marine mammals.

The proposed agenda for the meeting is as follows:

First Day

Morning Session—9 a.m.

APHIS Opening Remarks
Presentation of Agenda
Self-Introductions and Statements of Perspective by Committee Members and Facilitator
Development of Committee Procedures and Protocols

Afternoon Session—1:30 p.m.

Development of Committee Procedures and Protocols
Public Comments

Second Day

Morning Session—9 a.m.

Presentation of Agenda
Review of Substantive Marine Mammal Issues

Afternoon Session—1:30 p.m.

Review of Substantive Marine Mammal Issues

Discussion of Future Committee Meeting Agendas
Comments from the Public

The meetings will be open to the public. Public participation at the meetings will be allowed during periods announced at the meeting for this purpose. Anyone who wants to file a written statement with the Committee may do so at the time of the meeting or may do so after the meeting by sending the statement to Docket No. 93–076–7, Regulatory Analysis and Development, PPD, APHIS, Suite 3C03, 4700 River Road Unit 118, Riverdale, MD 20737–1238. Comments mailed in should state that they refer to Docket No. 93–076–7 and must be received on or before October 10, 1995, to ensure consideration by the Committee.

This notice is given pursuant to section 10 of the Federal Advisory Committee Act.

Done in Washington, DC, this 1st day of September 1995.

Terry L. Medley,

Acting Administrator, Animal and Plant Health Inspection Service.

[FR Doc. 95–22328 Filed 9–7–95; 8:45 am]
BILLING CODE 3410–34–P

NUCLEAR REGULATORY COMMISSION

10 CFR Parts 30, 40, and 70

RIN 3150–AF38

One-Time Extension of Certain Byproduct, Source, and Special Nuclear Materials Licenses

AGENCY: Nuclear Regulatory Commission.

ACTION: Proposed rule.

SUMMARY: The Nuclear Regulatory Commission (NRC) is proposing, on a one-time basis, a five-year extension of certain byproduct, source, and special nuclear materials licenses. The provisions of the licenses under extension would provide the same authorizations and limits on licensee activities as they do now. The proposed rule specifies the licenses whose expiration dates would not be extended. On a separate but related matter, the Commission is considering the appropriate duration of materials licenses and seeks comments on this topic.

DATES: Submit comments by October 10, 1995. Comments received after this date will be considered if it is practical to do so, but the Commission is able to assure consideration only for comments received on or before this date.

ADDRESSES: Mail written comments to: Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555. ATTN: Docketing and Service Branch. Hand deliver comments to: 11555 Rockville Pike, Rockville, MD, 20852, between 7:45 am and 4:15 pm Federal workdays. Copies of comments received may be examined at the NRC Public Document Room, 2120 L Street NW. (Lower Level), Washington, DC. For information on submitting comments electronically, see the discussion under Electronic Access in the Supplementary Information Section.

FOR FURTHER INFORMATION CONTACT: John Pelchat, NRC, Region II, 101 Marietta Street, NW., suite 2900, Atlanta, GA 30323, telephone (404) 331–5083; or C.W. Nilsen, Office of Nuclear Regulatory Research, NRC, Washington, DC 20555, telephone (301) 415–6209.

SUPPLEMENTARY INFORMATION:

Background

The materials licensing ("licensing") process sets out provisions for licensing medical, academic, and industrial users of byproduct materials as well as some small scope users of source and special nuclear materials. This process does not apply to the licensing of power and non-power reactors, uranium milling and processing facilities, or fuel production facilities. Recent NRC internal reviews and regulatory impact surveys of materials licensees ("licensees") have highlighted areas in which the current materials licensing process can be improved. The NRC has completed the preliminary phases of an effort to redesign this process. The goals of the licensing process redesign project are (1) to maintain or raise the level of public safety achieved by the current process; (2) to perform licensing reviews and associated tasks an order of magnitude faster than the current process; (3) to utilize modern information technology as a fundamental part of the new process; and, (4) to reduce the resources needed to carry out the licensing program to meet the projected 1998–1999 staffing levels.

In order to make resources available to expedite the development, design, and testing of the proposed new materials licensing process, the Commission proposes to extend, by rulemaking, certain specific materials licenses ("licenses") by five years from the current expiration dates shown on those licenses. Resources that would have otherwise been used to renew these licenses would be devoted to the redesign project. The extension would be a one-time occurrence and the Commission does not envision that any similar extensions would be granted in any future rulemaking. The extended licenses are not considered to be the equivalent of a renewed license because they would provide the same authorizations and limits on licensee activities as they do now. Accordingly, the extended licenses would not be based on or reference pending renewal applications, including requests, if any, in those renewal applications for NRC approval of changes in current operations. The frequency at which the licensee is inspected would not change. The Commission estimates that more than 80 percent of its 6,500 materials licenses would be extended by this proposed rulemaking.

The Commission believes that it may take this action because no legislative mandate requires that materials licenses have a five-year term. Many years ago, materials licenses were issued for two-year periods. As the uses of radioactive materials became more stable and predictable, the typical duration of licenses was changed to the current five years. The Commission believes that certain specific materials licenses may be extended once by rule for an additional five years beyond their stated expiration date without the normal renewal review and without adverse effect on public health and safety. The Commission's belief is based upon three factors. First, certain specific licenses for which the Commission believes that a renewal review should not be delayed five years would not be affected by this rule. Licenses that may present, in the Commission's view, a greater potential risk from a health and safety standpoint would not be extended by this rulemaking. These licenses are discussed in greater detail below and these licenses would be renewed in accordance with current schedules. Second, the extended licenses would not change the authorized activities or the regulatory requirements with which the licensees must comply. Third, the NRC will continue to inspect licenses that would be extended by this proposed rule. Significant inspection findings would be resolved through the issuance of Notices of Violations that require written responses describing corrective actions or Orders that would modify, suspend, or revoke the license. Accordingly, the Commission believes that there would be reasonable assurance of public health and safety under this rule.

The Commission believes that certain licenses, specified below, should be subject to the health and safety review currently required as part of the 5-year renewal review. These licenses would not have their license terms extended by this proposed rule. The criteria listed below would be applied as of the effective date of the final rule so as to assure that any extensions are based on the most current information available.

- Any specific license that, on the effective date of the final rule, must have prepared an evaluation or an emergency plan for responding to the release of radioactive materials as required by 10 CFR 30.32(i), 40.31(j), or 70.22(i). The Commission believes that these licenses authorize activities that may pose a significant potential for release of radioactive materials and may result in potential exposure to the public and contamination of the environment. Therefore, renewals of these licenses should continue to be reviewed under existing procedures.
- Any specific licenses whose holders are subject to the financial assurance requirements specified in 10 CFR 30.35, 40.36, or 70.25; and on the effective date of the final rule the holders either (a) have not submitted a decommissioning funding plan or certification of financial assurance for decommissioning, or (b) have not received written notice that the decommissioning funding plan or certification of financial assurance for decommissioning is acceptable. These licenses authorize possession of quantities and forms of licensed materials that pose a potential need for extensive decontamination before termination of the license and release of decommissioned facilities. The Commission believes that renewals of these licenses should continue to be reviewed under existing procedures to ensure that the process of obtaining sufficient funding continues so that appropriate resources are available to support decommissioning activity.
- Any license, as of the effective date of the final rule, that is on the Site Decommissioning Management Plan (SDMP) list. Generally, licenses on the SDMP list are no longer actively using licensed materials. The Commission believes that these licenses should continue to be reviewed under existing procedures to ensure proper evaluation of site remediation activities at facilities where the licensee's radiation safety program may be inactive or scaled back.
- Any specific license whose issuance, amendment, or renewal, as of the effective date of the final rule, is not a categorical exclusion under 10 CFR 51.22(c)(14) and therefore needs an environmental assessment or environmental impact statement pursuant to Subpart A of Part 51 of this chapter. The Commission believes that these licenses authorize activities that may have a potential for impacting the environment. Therefore, renewals of these licenses should continue to be reviewed under existing procedures.
- Any specific license issued pursuant to 10 CFR Part 70 for which, as of the effective date of the final rule, the license holder is authorized to possess sufficient quantities of special nuclear material to be subject to the criticality accident requirements of 10 CFR 70.24. The Commission believes that renewals of these licenses should continue to be reviewed under existing procedures to ensure the adequacy of the licensees' important criticality safety procedures.
- Specific licenses whose holders have not had at least one prior NRC inspection of licensed activities as of the effective date of the final rule. The Commission believes that it is inappropriate to extend these licenses when it has not verified the effectiveness of the licensees' radiation safety programs by inspection. This verification is part of the safety basis upon which the NRC is relying. NRC inspection procedures require that all new licensees be inspected within six months of the issue date of their license. A few new licenses that might otherwise be extended may not be extended because they have not been inspected. Because the NRC is continually issuing new licenses, it is not practical to immediately inspect all new licensees to determine whether they satisfy the other criteria for the extension of their license expiration dates.
- Specific licenses whose holders, as the result of the most recent NRC inspection of licensed activities conducted before the effective date of the final rule, have either been (a) cited for a Severity Level I, II, or III violation in a Notice of Violation, (b) subject to an Order issued by the NRC, or (c) subject to a Confirmatory Action Letter issued by the NRC. The NRC has identified significant safety or other regulatory issues in these programs as a result of their most recent NRC inspection. The Commission believes that applications for renewal of these licenses should continue to be reviewed under existing procedures.

Apart from these licenses that the Commission has determined may pose a relatively greater risk to public health and safety, the Commission recognizes that there is another set of licenses that will not be extended by this rule. This set includes those licenses with expiration dates before July 1, 1995, whose holders have submitted applications for renewal pursuant to the renewal provisions specified in 10 CFR parts 30, 40, or 70. The Commission intends to continue to review the submissions of these licensees who have already submitted applications and fees for the renewal of their licenses and are deemed as being in timely renewal. Renewal requests will be granted as the NRC completes its review of those applications that satisfy the requirements specified in the regulations.

The proposed rule will extend the expiration date of those licenses with expiration dates after July 1, 1995, that are in a timely renewal status. As specified in the proposed rule, NRC will consider that these licensees have withdrawn their requests for renewal. Renewal fees paid by these licensees will be refunded.

The July 1, 1995, expiration date was chosen based on resource considerations. The NRC staff has begun the review of many applications for renewal of licenses with expiration dates before July 1, 1995, and it is not appropriate to waste the resources already expended in that effort. On the other hand, most of the applications for renewal of licenses with expiration dates after July 1,1995, have been received only recently, their review has not begun, and resources will be conserved by extending those licenses.

The Commission recognizes that an entity may hold more than one materials license issued under one or more parts of Title 10 of the Code of Federal Regulations. It is the Commission's intent that each license be considered separately in determining whether its expiration date should be extended under this rule. For example, assume that an entity holds two licenses, A and B, and License A is of the type listed in paragraph (a)(3) of §§ 30.36, 40.42, and 70.38 of this proposed rule, but License B is not. In this situation, the expiration date of License A would not be affected by the rule, but the expiration date of License B would be extended by a period of five years from the expiration date stated in the license.

The selective extension of byproduct, source, and special nuclear materials licenses would result in the freeing of Commission resources that would otherwise be used in the review of these renewal applications. These resources will then be redirected, in part, into the detailed design and testing of the proposed new materials licensing process.

Nothing in this rule relieves licensees from the requirements to file for appropriate amendments to their licenses, when changes in licensed activities occur.

If a licensee should elect not to take full advantage of the license extension, the licensee may request termination of its license in accordance with the applicable requirements of 10 CFR parts 30, 40, or 70.

The Commission seeks comments on the issue of license duration. In conjunction with the licensing process redesign effort, the Commission also intends to consider the appropriate duration of materials licenses, including whether the duration should differ depending on the nature of the activities permitted under the license. The Commission is aware that for some types of licensed activities the industry has matured and it may be appropriate to consider issuing licenses for longer times, perhaps 10–20 years. The Commission is also aware that some Agreement States routinely issue licenses for periods longer than 5 years. The Commission seeks comments at this time on the general topic of the appropriate duration of licenses. If the Commission ultimately revises its policy on materials license duration, licensees with pending renewal applications that fulfill all regulatory requirements would be granted licenses consistent with the Commission's resolution of the license duration issue.

Agreement State Compatibility

The Commission has determined that the amended provisions of 10 CFR parts 30, 40, and 70 are not matters of compatibility for evaluating the regulations of States that have entered into agreements (Agreement States) with the Commission pursuant to Section 274.b of the Atomic Energy Act, as amended. Therefore, the States are not required to amend their regulations or licensing practices as a result of this rulemaking. However, the Commission is interested in receiving comments from the Agreement States on the regulatory implications of this proposed rule.

Electronic Access

Comments may be submitted through the Internet by addressing electronic mail to INTERNET:SECY@NRC.GOV. Comments may also be submitted electronically, in either ASCII text or WordPerfect format (version 5.1 or later), by calling the NRC Electronic Rulemaking Bulletin Board (BBS) on FEDWORLD.

The BBS is an electronic information system operated by the National Technical Information Service of the Department of Commerce. The purpose of this bulletin board BBS is to facilitate public participation in the NRC regulatory process, particularly rulemakings. With publication of this notice, proposed rulemakings and appropriate supporting documents will be available for review and comment on the BBS. These same documents are also available for review and comment at the NRC's Public Document Room, 2120 L Street NW. (Lower Level), Washington, DC. The BBS may be accessed using a personal computer, a modem, and one of the commonly available communications software packages, or directly via Internet.

The NRC rulemaking bulletin board (rulemaking subsystem) on FEDWORLD can be accessed directly by using a personal computer and modem, dialing the toll free number 1–800–303–9672. Communication software parameters should be set as follows: parity to none, data bits to 8, and stop bits to 1 (N,8,1). Using ANSI or VT–100 terminal emulation, the NRC rulemaking subsystem can then be accessed by selecting the "Rules Menu" option from the "NRC Main Menu." For further information about options available for NRC at FEDWORLD consult the "Help/Information Center" from the "NRC Main Menu." Users will find the "FEDWORLD Online User's Guides" particularly helpful. Many NRC subsystems and databases also have a "Help/Information Center" option that is tailored to the particular subsystem.

The NRC subsystem on FEDWORLD also can be accessed by a direct dial phone number for the main FEDWORLD BBS at 703–321–3339, or by using Telnet via Internet: fedworld.gov. Using the 703 number to contact FEDWORLD, the NRC subsystem will be accessed from the main FEDWORLD menu by selecting the "Regulatory, Government Administration and State Systems," then selecting "Regulatory Information Mall." At that point, a menu will be displayed that has the option "U.S. Nuclear Regulatory Commission" that will take you to the NRC Online main menu. The NRC Online area also can be accessed directly by typing "/go nrc" at a FEDWORLD command line. If you access NRC from FEDWORLD's main menu, you may return to FEDWORLD by selecting the "Return to FEDWORLD" option from the NRC Online Main Menu. However, if you access NRC at FEDWORLD by using NRC's toll-free number, you will have full access to all NRC systems, but you will not have access to the main FEDWORLD system.

If you contact FEDWORLD using Telnet, you will see the NRC area and menus, including the "Rules Menu." Although you will be able to download documents and leave messages, you will not be able to write comments or upload files. If you contact FEDWORLD using File Transfer Program (FTP), all files can be accessed and downloaded, but uploads are not allowed, and all you will see is a list of files without descriptions (normal Gopher look). An index file listing all files within a subdirectory, with descriptions, is available. There is a 15-minute time limit for FTP access.

Although FEDWORLD can be accessed through the World Wide Web as well, like FTP, that mode only provides access for downloading files and does not display the NRC "Rules Menu."

For more information on NRC bulletin boards call Mr. Arthur Davis, Systems Integration and Development Branch, U.S. Nuclear Regulatory Commission, Washington, DC 20555, telephone (301) 415–5780; e-mail AXD3@nrc.gov.

Environmental Impact: Categorical Exclusion

The NRC has determined that these regulations are the type of actions described in categorical exclusion 10 CFR 51.22(c)(3). Therefore, neither an environmental impact statement nor an environmental assessment has been prepared for this regulation.

Paperwork Reduction Act

This proposed rule does not contain a new or amended information collection requirement subject to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*). Existing requirements were approved by the Office of Management and Budget approval number 3150–0009 (Part 70) and 3150–0120 (Parts 30 and 40).

Regulatory Analysis

A regulatory analysis has not been prepared for this rule because it is not expected to have any adverse impact on licensees subject to the proposed rule. These licensees will be postponing, for five years, submission of license renewal applications and the associated fees.

Regulatory Flexibility Analysis

The NRC is seeking public comments on the potential impact of the proposed rule on small entities. The NRC particularly desires comments from small entities (i.e., small businesses, small organizations, and small jurisdictions under the Regulatory Flexibility Act) as to how the regulations will affect them and how the regulations may be tiered or otherwise modified to impose less stringent requirements on small entities while still adequately protecting the public health and safety. Those small entities that offer comments on how the regulations could be modified to take into account the differing needs of small entities should specifically discuss the following:

(a) The size of their business and how the proposed regulations would result in a significant economic burden upon them as compared to larger organizations in the same business community.

(b) How the proposed regulations could be modified to take into account their needs or capabilities.

(c) The benefits that would accrue, or the detriment that would be avoided, if the proposed regulations were modified as suggested by the commenter.

(d) How the proposed regulations, as modified, would more closely equalize the impact of NRC regulations or create more equal access to the benefits of Federal programs as opposed to providing special advantages to individuals or groups; and

(e) How the proposed regulations, as modified, would still adequately protect the public health and safety.

Backfit Analysis

The NRC has determined that the backfit rule, 10 CFR 50.109, does not apply to this proposed rule and, therefore, that a backfit analysis is not required for this proposed rule because these amendments do not involve any provisions that would impose backfits as defined in 10 CFR 50.109(a)(1).

List of Subjects

10 CFR Part 30

Byproduct material, Criminal penalties, Government contracts, Intergovernmental relations, Isotopes, Nuclear materials, Radiation protection, Reporting and recordkeeping requirements.

10 CFR Part 40

Criminal penalties, Government contracts, Hazardous materials transportation, Nuclear materials, Reporting and recordkeeping requirements, Source material, Uranium.

10 CFR Part 70

Criminal penalties, Hazardous materials transportation, Material control and accounting, Nuclear materials, Packaging and containers, Radiation protection, Reporting and recordkeeping requirements, Scientific equipment, Security measures, Special nuclear material.

For the reasons set out in the preamble and under the authority of the Atomic Energy Act of 1954, as amended; the Energy Reorganization Act of 1974, as amended; and 5 U.S.C. 552 and 553; the Nuclear Regulatory Commission is proposing to adopt the following amendments to 10 CFR Parts 30, 40, and 70.

PART 30—RULES OF GENERAL APPLICABILITY TO DOMESTIC LICENSING OF BYPRODUCT MATERIAL

1. The authority citation for Part 30 continues to read as follows:

Authority: Secs. 81, 82, 161, 182, 183, 186, 68 Stat. 935, 948, 953, 954, 955, as amended, sec. 234, 83 Stat. 444, as amended (42 U.S.C. 2111, 2112, 2201, 2232, 2233, 2236, 2282); secs. 201, as amended, 202, 206, 88 Stat. 1242, as amended, 1244, 1246 (42 U.S.C. 5841, 5842, 5846).

Section 30.7 also issued under Pub. L. 95–601, sec. 10, 92 Stat. 2951 as amended by Pub. L. 102–486, sec. 2902, 106 Stat. 3123 (42 U.S.C. 5851). Section 30.34(b) also issued under sec. 184, 68 Stat. 954, as amended (42 U.S.C. 2234). Section 30.61 also issued under sec. 187, 68 Stat. 955 (42 U.S.C. 2237).

2. In § 30.36, paragraph (a) is revised to read as follows:

§ 30.36 Expiration and termination of licenses and decommissioning of sites and separate buildings or outdoor areas.

(a)(1) Except as provided in paragraph (a)(2) of this section, each specific license expires at the end of the day on the expiration date stated in the license unless the licensee has filed an application for renewal under § 30.37 not less than 30 days before the expiration date stated in the existing license (or, for those licenses subject to paragraph (a)(2) of this section, 30 days before the deemed expiration date in that paragraph). If an application for renewal has been filed at least 30 days prior to the expiration date stated in the existing license (or, for those licenses subject to paragraph (a)(2) of this section, 30 days before the deemed expiration date in that paragraph), the existing license expires at the end of the day on which the Commission makes a final determination to deny the renewal application or, if the determination states an expiration date, the expiration date stated in the determination.

(2) Each specific license which has an expiration date after July 1, 1995, and is not one of the licenses described in paragraph (a)(3) of this section, shall be deemed to have an expiration date which is 5 years after the expiration date stated in the current license.

(3) The following specific licenses are not subject to, or otherwise affected by, the provisions of paragraph (a)(2) of this section:

(i) Specific licenses for which, on the [effective date of the final rule], an evaluation or an emergency plan is required in accordance with § 30.32(i);

(ii) Specific licenses whose holders are subject to the financial assurance requirements specified in § 30.35, and on the [effective date of the final rule], the holders either:

(A) Have not submitted a decommissioning funding plan or certification of financial assurance for decommissioning; or

(B) Have not received written notice that the decommissioning funding plan or certification of financial assurance for decommissioning is acceptable;

(iii) Specific licenses whose holders are listed in the Site Decommissioning Management Plan List [which will be available by the effective date of the final rule].

(iv) Specific licenses whose issuance, amendment, or renewal, as of the effective date of the final rule, is not a categorical exclusion under 10 CFR 51.22(c)(14) and, therefore, need an environmental assessment or environmental impact statement pursuant to subpart A of part 51 of this chapter;

(v) Specific licenses whose holders have not had at least one NRC inspection of licensed activities before [effective date of the final rule];

(vi) Specific licenses whose holders, as the result of the most recent NRC inspection of licensed activities conducted before the effective date of the final rule, have been:

(A) Cited for a Severity Level I, II, or III violation in a Notice of Violation;

(B) Subject to an Order issued by the NRC; or

(C) Subject to a Confirmatory Action Letter issued by the NRC.

(vii) Specific licenses with expiration dates before July 1, 1995, for which the holders have submitted applications for renewal under § 30.37 of this part.

* * * * *

3. In § 30.37, a new paragraph (b) is added to read as follows:

§ 30.37 Application for renewal of licenses.

* * * * *

(b) If any licensee granted the extension described in § 30.36(a)(2) has a currently pending renewal application for the extended license, that application will be considered withdrawn by the licensee and any renewal fees paid by the licensee for that application will be refunded.

PART 40—DOMESTIC LICENSING OF SOURCE MATERIAL

4. The authority citation for Part 40 continues to read as follows:

Authority: Secs. 62, 63, 64, 65, 81, 161, 182, 183, 186, 68 Stat. 932, 933, 935, 948, 953, 954, 955, as amended, secs. 11e(2), 83, 84, Pub. L. 95–604, 92 Stat. 3033, as amended, 3039, sec. 234, 83 Stat. 444, as

amended (42 U.S.C. 2014(e)(2), 2092, 2093, 2094, 2095, 2111, 2113, 2114, 2201, 2232, 2233, 2236, 2282); sec. 274, Pub. L. 86–373, 73 Stat. 688 (42 U.S.C. 2021); secs. 201, as amended, 202, 206, 88 Stat. 1242, as amended, 1244, 1246 (42 U.S.C. 5841, 5842, 5846); sec. 275, 92 Stat. 3021, as amended by Pub. L. 97–415, 96 Stat. 2067 (42 U.S.C. 2022).

Section 40.7 also issued under Pub. L. 95–601, sec. 10, 92 Stat. 2951 as amended by Pub. L. 102–486, sec. 2902, 106 Stat. 3123, (42 U.S.C. 5851). Section 40.31(g) also issued under sec. 122, 68 Stat. 939 (42 U.S.C. 2152). Section 40.46 also issued under sec. 184, 68 Stat. 954, as amended (42 U.S.C. 2234). Section 40.71 also issued under sec. 187, 68 Stat. 955 (42 U.S.C. 2237).

5. In § 40.42, paragraph (a) is revised to read as follows:

§ 40.42 Expiration and termination of licenses and decommissioning of sites and separate buildings or outdoor areas.

(a)(1) Except as provided in paragraph (a)(2) of this section, each specific license expires at the end of the day on the expiration date stated in the license unless the licensee has filed an application for renewal under § 40.43 not less than 30 days before the expiration date stated in the existing license (or, for those licenses subject to paragraph (a)(2) of this section, 30 days before the deemed expiration date in that paragraph). If an application for renewal has been filed at least 30 days prior to the expiration date stated in the existing license (or, for those licenses subject to paragraph (a)(2) of this section, 30 days before the deemed expiration date in that paragraph), the existing license expires at the end of the day on which the Commission makes a final determination to deny the renewal application or, if the determination states an expiration date, the expiration date stated in the determination.

(2) Each specific license which has an expiration date after July 1, 1995, and is not one of the licenses described in paragraph (a)(3) of this section, shall be deemed to have an expiration date which is 5 years after the expiration date stated in the current license.

(3) The following specific licenses are not subject to, or otherwise affected by, the provisions of paragraph (a)(2) of this section:

(i) Specific licenses for which, on [effective date of the final rule], an evaluation or an emergency plan is required in accordance with § 40.31(j);

(ii) Specific licenses whose holders are subject to the financial assurance requirements specified in § 40.36, and on the effective date of the final rule, the holders either:

(A) Have not submitted a decommissioning funding plan or certification of financial assurance for decommissioning; or

(B) Have not received written notice that the decommissioning funding plan or certification of financial assurance for decommissioning is acceptable;

(iii) Specific licenses whose holders are listed in the Site Decommissioning Management Plan List [which will be available by the effective date of the final rule].

(iv) Specific licenses whose issuance, amendment or renewal, as of [effective date of the final rule], is not a categorical exclusion under 10 CFR 51.22(c)(14) and, therefore, need an environmental assessment or environmental impact statement pursuant to subpart A of part 51 of this chapter;

(v) Specific licenses whose holders have not had at least one NRC inspection of licensed activities before [effective date of the final rule];

(vi) Specific licenses whose holders, as the result of the most recent NRC inspection of licensed activities conducted before the effective date of the final rule, have been:

(A) Cited for a Severity Level I, II, or III violation in a Notice of Violation;

(B) Subject to an Order issued by the NRC; or

(C) Subject to a Confirmatory Action Letter issued by the NRC.

(vii) Specific licenses with expiration dates before July 1, 1995, for which the holders have submitted applications for renewal under § 40.43 of this part.

6. In § 40.43, a new paragraph (b) is added to read as follows:

§ 40.43 Renewal of licenses.

* * * * *

(b) If any licensee granted the extension described in § 40.42(a)(2) has a currently pending renewal application for the extended license, that application will be considered to be withdrawn by the licensee and any renewal fees paid by the licensee for that application will be refunded.

PART 70—DOMESTIC LICENSING OF SPECIAL NUCLEAR MATERIAL

7. The authority citation for Part 70 continues to read as follows:

Authority: Secs. 51, 53, 161, 182, 183, 68 Stat. 929, 930, 948, 953, 954, as amended, sec. 234, 83 Stat. 444, as amended, sec. 1701, 106 Stat. 2951, 2952, 2953 (42 U.S.C. 2071, 2073, 2201, 2232, 2233, 2282, 2297f); secs. 201, as amended, 202, 204, 206, 88 Stat. 1242, as amended, 1244, 1245, 1246 (42 U.S.C. 5841, 5842, 5845, 5846).

Sections 70.1(c) and 70.20a(b) also issued under secs. 135, 141, Pub. L. 97–425, 96 Stat. 2232, 2241 (42 U.S.C. 10155, 10161). Section 70.7 also issued under Pub. L. 95–601, sec. 10, 92 Stat. 2951 (42 U.S.C. 5851). Section 70.21(g) also issued under sec. 122, 68 Stat. 939 (42 U.S.C. 2152). Section 70.31 also issued under sec. 57d, Pub. L. 93–377, 88 Stat. 475 (42 U.S.C. 2077). Sections 70.36 and 70.44 also issued under sec. 184, 68 Stat. 954, as amended (42 U.S.C. 2234). Section 70.61 also issued under secs. 186, 187, 68 Stat. 955 (42 U.S.C. 2236, 2237). Section 70.62 also issued under sec. 108, 68 Stat. 939, as amended (42 U.S.C. 2138).

8. In § 70.38, paragraph (a) is revised to read as follows:

§ 70.38 Expiration and termination of licenses and decommissioning of sites and separate buildings or outdoor areas.

(a)(1) Except as provided in paragraph (a)(2) of this section, each specific license expires at the end of the day on the expiration date stated in the license unless the licensee has filed an application for renewal under § 70.33 not less than 30 days before the expiration date stated in the existing license (or, for those licenses subject to paragraph (a)(2) of this section, 30 days before the deemed expiration date in that paragraph). If an application for renewal has been filed at least 30 days prior to the expiration date stated in the existing license (or, for those licenses subject to paragraph (a)(2) of this section, 30 days before the deemed expiration date in that paragraph), the existing license expires at the end of the day on which the Commission makes a final determination to deny the renewal application or, if the determination states an expiration date, the expiration date stated in the determination.

(2) Each specific license which has an expiration date after July 1, 1995, and is not one of the licenses described in paragraph (a)(3) of this section, shall be deemed to have an expiration date which is 5 years after the expiration date stated in the current license.

(3) The following specific licenses are not subject to, or otherwise affected by, the provisions of paragraph (a)(2) of this section:

(i) Specific licenses for which, on [effective date of the final rule], an evaluation or an emergency plan is required in accordance with § 70.22(i);

(ii) Specific licenses whose holders are subject to the financial assurance requirements specified in § 70.25, and on [effective date of the final rule], the holders either:

(A) Have not submitted a decommissioning funding plan or certification of financial assurance for decommissioning; or

(B) Have not received written notice that the decommissioning funding plan or certification of financial assurance for decommissioning is acceptable;

(iii) Specific licenses whose holders are listed in the Site Decommissioning Management Plan List [which will be available by the effective date of the final rule].

(iv) Specific licenses whose issuance, amendment or renewal, as of [effective date of the final rule], is not a categorical exclusion under 10 CFR 51.22(c)(14) and, therefore, need an environmental assessment or environmental impact statement pursuant to subpart A of part 51 of this chapter;

(v) Specific licenses whose holders have not had at least one NRC inspection of licensed activities before [effective date of the final rule];

(vi) Specific licenses whose holders, as the result of the most recent NRC inspection of licensed activities conducted before the effective date of the final rule, have been:

(A) Cited for a Severity Level I, II, or III violation in a Notice of Violation:

(B) Subject to an Order issued by the NRC; or

(C) Subject to a Confirmatory Action Letter issued by the NRC.

(vii) Specific licenses with expiration dates before July 1, 1995, for which the holders have submitted applications for renewal under § 70.33 of this part.

(viii) Specific licenses issued pursuant to § 70.31 that, as of [effective date of the final rule], are also subject to the requirements in § 70.24.

9. In § 70.33, a new paragraph (b) is added to read as follows:

§ 70.33 Renewal of licenses.

* * * * *

(b) If any licensee granted the extension described in § 70.38(a)(2) has a currently pending renewal application for that extended license, that application will be considered withdrawn by the licensee and any renewal fees paid by the licensee for that application will be refunded.

Dated at Rockville, Maryland, this 29th day of August, 1995.

For the Nuclear Regulatory Commission.

James M. Taylor,
Executive Director for Operations.

BILLING CODE 7590–01–P

SMALL BUSINESS ADMINISTRATION

13 CFR Part 108

Loans to State and Local Development Companies Section 504 Loan Program Amendments

AGENCY: Small Business Administration.

ACTION: Notice of proposed rulemaking.

SUMMARY: This proposed rule revises the regulations governing the collection of fees and the utilization of interest accruing in accounts established to administer the 504 loan program in order to permit the flexibility required in negotiating with private sector entities for the delivery of the 504 program.

DATES: Comments must be received on or before October 10, 1995.

ADDRESSES: Comments should be sent to LeAnn M. Oliver, Acting Director, Office of Rural Affairs and Economic Development, Small Business Administration, 409 3rd Street SW., suite 8300, Washington DC 20416.

FOR FURTHER INFORMATION CONTACT: LeAnn M. Oliver, Acting Director, Office of Rural Affairs and Economic Development, Small Business Administration, Telephone (202) 205–6485.

SUPPLEMENTARY INFORMATION: The proposed rule would amend the rule governing the Central Servicing Agent (CSA) functions. The existing 504 program regulations were promulgated based upon the Agency's experience with a predecessor program. Sufficient experience has accumulated to allow the codification of approaches that have arisen in the administration of the program. This rule clarifies that: (1) Fees can be collected from the borrower of the proceeds of a debenture guaranteed under the program as a one-time initiation fee or a monthly servicing fee, (2) fees can be paid to the CSA from either a specific borrower's payment or from aggregated funds collected pursuant to a master service agreement, and (3) clarifies that 503 companies are to receive periodic pro rata disbursements of interest accruing on loan payments in the Master Reserve Account pending the debenture payment date.

Compliance with Executive Orders 12612, 12778, and 12866, the Regulatory Flexibility Act and the Paperwork Reduction Act.

Executive Order 12866 and Regulatory Flexibility Act

SBA certifies that this proposed rule, if adopted, would *not* be a significant regulatory action for purposes of Executive Order 12866 and, for purposes of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, would not have a significant economic impact on a substantial number of small entities, for the following reasons:

1. It would *not* result in an annual economic effect of $100 million or more or adversely affect in a material way the economy, a sector or the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities.

2. It would *not* create a serious inconsistency or otherwise interfere with an action taken or planned by another agency.

3. It would *not* materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof.

4. It would *not* raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in E.O. 12866

Executive Order 12612

SBA certifies that this rule, if adopted, would have no Federalism implications warranting the preparation of a Federalism Assessment in accordance with Executive Order 12612.

Paperwork Reduction Act

For purposes of the Paperwork Reduction Act, 44 U.S.C. Ch. 35, SBA hereby certifies that this proposed rule, if adopted, would impose no new reporting or recordkeeping requirements.

Executive Order 12778

SBA certifies that this proposed rule is drafted, the extent practicable, in accordance with the standards set forth in section 2 of E.O. 12778.

List of Subjects in 13 CFR Part 108

Loan programs/business, Small businesses.

For the reasons set forth above, part 108 of the Code of Federal Regulations is amended as follows:

PART 108—[AMENDED]

1. The authority citation for part 108 continues to read as follows:

Authority: 15 U.S.C. 687(c), 695, 696, 697a, 697b, 697c.

Assistance Under Sections 504 and 505

§ 108.504 [Amended]

2. Section 108.504(e) is revised to read as follows:

* * * * *

(e) *Central Servicing Agent.* This subsection supersedes § 108.503–11 for loans funded under Section 504 and is applicable to all such loans whenever funded.

(1) SBA, in a master servicing agreement, shall designate a Central Servicing Agent (CSA) to act for all 503 companies participating in the sale of 504 Debentures, to ensure uniformity

and the orderly flow of funds among 504 loan recipients, 503 companies, and the Trustee or Transfer Agent (see § 108.505(f)(3) of this part). Pursuant to such master servicing agreement, in consideration of SBA's guaranty of the 503 company's debenture(s), the 503 Company, with the borrower's consent shall enter into a servicing agent agreement (504 program), SBA Form 1506, with the CSA. Execution of such form shall constitute acceptance by the 503 company and the borrower of the terms of the master servicing agreement. Amendments may be made in the terms and conditions of the master servicing agreement as necessary to adapt to changing program needs.

(2) The borrower may be charged an initiation fee and/or a monthly servicing fee as prescribed by Form 1506, which shall be in addition to the fees and charges permitted by § 108.503–6 of this part.

(3) The CSA may be compensated through an initiation fee and/or a monthly service fee. Pursuant to instructions in the master servicing agreement, the CSA's compensation may be paid from initiation fees on specific loans or from aggregated service fees.

(4) SBA Form 1506 shall prescribe the deposits into and the disbursements from a master reserve account, set up by the CSA pursuant to said master servicing agreement. The master reserve account shall be funded by a reserve deposit, and a funding fee to be published from time to time in the **Federal Register**, and by principal and interest payments of 504 loans. SBA shall add funds pursuant to its guaranty to insure the full and timely payment of the debentures in the event a borrower fails to make full and timely payment on its 504 loan. Funds in the master reserve account shall be used to defray expenses of the program described under paragraph (b) of this section. Interest accruing on loan payments between the date of monthly payment and the debenture payment date shall be paid to the 503 company servicing the loan and shall be disbursed to 503 companies periodically on a pro rata basis. Funds in the master reserve escrow account representing interest earned prior to October 1991 and not distributed to a specific 503 company may be expended by SBA for the purposes of program administration.

* * * * *

(Catalog of Federal Domestic Assistance 59.036 Certified Development Company Loans (503 Loans); 59.041 Certified Development Company Loans (504 Loans)).

Dated: June 29, 1995.

Philip Lader,

Administrator.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 94–SW–16–AD]

Airworthiness Directives; Bell Helicopter Textron, Inc. Model 206A and 206B Helicopters

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of Proposed Rulemaking (NPRM).

SUMMARY: This document proposes the supersedure of an existing airworthiness directive (AD), applicable to Bell Helicopter Textron, Inc. (BHTI) Model 206A and 206B helicopters, that currently requires an inspection of the main transmission input driveshaft assembly (driveshaft) at intervals of 300 hours time-in-service (TIS); the application of a zinc chromate primer inspection visual aid; and, daily visual checks of the driveshaft. This action would require inspections of the driveshaft at intervals of 300 hours TIS; the application of a self-adhesive temperature indicator visual inspection aid; and, preflight visual owner/operator (pilot) checks of the driveshaft. This proposal is prompted by recent studies that indicate that self-adhesive temperature indicators are a more reliable means of detecting overheat conditions on grease-lubricated couplings than the zinc chromate primers that are currently in use. The actions specified by the proposed AD are intended to prevent failure of the driveshaft due to coupling wear or overheating, which could result in loss of power to the main rotor and a subsequent forced emergency landing.

DATES: Comments must be received by November 7, 1995.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Office of the Assistant Chief Counsel, Attention: Rules Docket No. 94–SW–16–AD, 2601 Meacham Blvd., Room 663, Fort Worth, Texas 76137. Comments may be inspected at this location between 9:00 a.m. and 3:00 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from Bell Helicopter Textron, Inc., Product Support Dept., P.O. Box 482, Fort Worth, Texas 76101. This information may be examined at the FAA, Office of the Assistant Chief Counsel, 2601 Meacham Blvd., Room 663, Fort Worth, Texas.

FOR FURTHER INFORMATION CONTACT: Mr. Jurgen Priester, Aerospace Engineer, Rotorcraft Certification Office, Rotorcraft Directorate, FAA, Fort Worth, Texas 76193–0170, telephone (817) 222–5159; fax (817) 222–5959.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 94–SW–16–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 94–SW–16–AD, 2601 Meacham Blvd., Room 663, Fort Worth, Texas 76137.

Discussion

On January 26, 1981, the FAA issued AD 81–04–08, Amendment 39–4037 (46 FR 12469, February 17, 1981), to require an inspection of the driveshaft at intervals of 300 hours TIS; the application of a zinc chromate primer inspection visual aid; and, daily visual checks of the driveshaft that may be performed by the pilot. That action was prompted by reports of excessive wear and failures of the driveshaft. The requirements of that AD are intended to prevent failure of the driveshaft due to coupling wear or overheating, which would result in loss of power to the main rotor and a forced emergency landing.

Since the issuance of that AD, manufacturer's studies have shown that self-adhesive temperature indicators are a more reliable means of detecting overheat conditions on grease-lubricated couplings than zinc chromate primers. BHTI has issued Alert Service Bulletin (ASB) No. 206–93–76, Revision B, dated September 6, 1994, which describes procedures for the application of a self-adhesive temperature indicator, as well as for repetitive visual checks of the driveshaft for grease leakage from the grease-lubricated couplings, overheating, and security of the clamps and bolts used to attach the driveshaft to transmission and engine couplings. The checks described in this proposal before the first flight of each day may be performed by a pilot, but must be entered into the aircraft records showing compliance with the AD in accordance with sections 43.11 and 91.417(a)(2)(v) of the Federal Aviation Regulations. This notice proposes to allow a pilot to perform these checks because they involve only a visual check for grease leakage, overheating, and security of the clamps and bolts used to attach the driveshaft to transmission and engine couplings. These checks can be performed equally well by a pilot or a mechanic. They involve checking items similar to those items that a pilot checks during a preflight check. This notice proposes that a mechanic inspect the driveshaft and driveshaft couplings at intervals of 300 hours TIS.

Since an unsafe condition has been identified that is likely to exist or develop on other BHTI Model 206A and 206B helicopters of the same type design, the proposed AD would supersede AD 81–04–08 to require inspections of the driveshaft at intervals of 300 hours TIS; the application of a self-adhesive visual over-temperature indicator; and, preflight visual pilot checks of the driveshaft. The actions would be accomplished in accordance with BHTI ASB No. 206–93–76, Revision B, dated September 6, 1994, described previously.

The FAA estimates that 4,312 helicopters of U.S. registry would be affected by this proposed AD, that it would take approximately one and one-half work hours per helicopter to accomplish the proposed actions, and that the average labor rate is $60 per work hour. Required parts would be provided by the manufacturer at no charge, but installation materials would cost approximately $10 per helicopter. Based on these figures, the total cost impact of the proposed AD on U.S. operators is estimated to be $431,200.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES.**

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40101, 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by removing Amendment 39–4037 (46 FR 12469, February 17, 1981), and by adding a new airworthiness directive (AD), to read as follows:

Bell Helicopter Textron, Inc.: Docket No. 94–SW–16–AD. Supersedes AD 81–04–08, Amendment 39–4037.

Applicability: Model 206A and 206B helicopters, certificated in any category.

Note 1: This AD applies to each helicopter identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For helicopters that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must use the authority provided in paragraph (e) to request approval from the FAA. This approval may address either no action, if the current configuration eliminates the unsafe condition, or different actions necessary to address the unsafe condition described in this AD. Such a request should include an assessment of the effect of the changed configuration on the unsafe condition addressed by this AD. In no case does the presence of any modification, alteration, or repair remove any helicopter from the applicability of this AD.

Compliance: Required as indicated, unless accomplished previously.

To prevent failure of the main transmission input driveshaft assembly (driveshaft) due to coupling wear or overheating, which could result in loss of power to the main rotor and a subsequent forced emergency landing, accomplish the following:

(a) Before the first flight of each day after the effective date of this AD, visually check the driveshaft, part number (P/N) 206–040–100–13, for: (1) Grease leakage from the driveshaft coupling, P/N 206–040–108–005; and (2) visual damage and security of the clamps and bolts used to attach the driveshaft to the transmission and engine couplings. After compliance with paragraph (d) of this AD, also check the self-adhesive visual over-temperature indicators (over-temperature indicators) for overheating, deterioration, debonding, or discoloration in accordance with Part II of the Accomplishment Instructions of Bell Helicopter Textron, Inc. (BHTI) Alert Service Bulletin (ASB) No. 206–93–76, Revision B, dated September 6, 1994. If any grease leakage exists, or if there are indications of overheating, disassemble and inspect the driveshaft in accordance with the applicable maintenance manual, and replace the over-temperature indicators in accordance with Part III of the Accomplishment Instructions of BHTI ASB 206–93–76, Revision B, dated September 6, 1994.

(b) The visual check required by paragraph (a) may be performed by an owner/operator (pilot) holding at least a private pilot certificate, and must be entered into the aircraft records showing compliance with this AD in accordance with sections 43.11 and 91.417(a)(2)(v) of the Federal Aviation Regulations.

(c) Inspect and lubricate the driveshaft assembly, P/N 206–040–100–13, and driveshaft grease-lubricated couplings, P/N 206–040–108–005, in accordance with the helicopter's maintenance manual and according to the compliance schedule that follows, and thereafter, inspect and lubricate at intervals not to exceed 300 hours time-in-service (TIS):

(1) For helicopters with 250 hours TIS or more, compliance is required within the next 50 hours TIS; or,

(2) For helicopters with less than 250 hours TIS, compliance is required prior to attaining 300 hours TIS.

(d) Install the over-temperature indicators at the next 300 hours TIS driveshaft coupling inspection and lubrication in accordance with Part I of the Accomplishment Instructions of BHTI ASB 206–93–76, Revision B, dated September 6, 1994.

(e) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used when approved by the Manager, Rotorcraft Certification Office, Rotorcraft Directorate, FAA. Operators shall submit their requests through an FAA Principal Maintenance Inspector, who may concur or comment and then send it to the Manager, Rotorcraft Certification Office.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Rotorcraft Certification Office.

(f) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the helicopter to a location where the requirements of this AD can be accomplished.

Issued in Fort Worth, Texas, on August 31, 1995.

Daniel P. Salvano,

Manager, Rotorcraft Directorate, Aircraft Certification Service.

14 CFR Part 39

[Docket No. 94–NM–237–AD]

Airworthiness Directives; Jetstream Model 4101 Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the supersedure of an existing airworthiness directive (AD), applicable to certain Jetstream Model 4101 airplanes, that currently requires repetitive purging of the hydraulic system and installation of a spoiler actuator that has been previously certified. That AD was prompted by a report of damage to the locking mechanisms on some pistons of the spoiler actuators. The actions specified by the AD are intended to prevent uncommanded extension of the lift spoiler in the event of loss of hydraulic pressure in the spoiler actuator. This action would establish an increased life limit for certain spoiler actuators, and provide an optional terminating action for the requirements of the AD. It would also limit the applicability of the rule to fewer airplanes.

DATES: Comments must be received by October 16, 1995.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–103, Attention: Rules Docket No. 94–NM–237–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056. Comments may be inspected at this location between 9:00 a.m. and 3:00 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from Jetstream Aircraft, Inc., P.O. Box 16029, Dulles International Airport, Washington, DC 20041–6029. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: William Schroeder, Aerospace Engineer, Standardization Branch, ANM–113, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (206) 227–2148; fax (206) 227–1320.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 94–NM–237–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM–103, Attention: Rules Docket No. 94–NM–237–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056.

Discussion

On August 12, 1994, the FAA issued AD 94–17–12, amendment 39–9007 (59 FR 43025, August 22, 1994), applicable to certain Jetstream Model 4101 airplanes, to require repetitive purging of the hydraulic system and repetitive installation of an actuator that has been previously certified. That action was prompted by a report of damage to the locking mechanisms on some pistons of the spoiler actuators. The cause of this damage has been attributed to inadequate purging of the spoiler hydraulic system. In some instances, the spoiler operation was out of sequence and may have caused damage to the locking mechanisms on the pistons of the spoiler actuators. The requirements of that AD are intended to prevent uncommanded extension of the lift spoiler in the event of loss of hydraulic pressure in the spoiler actuator.

Since the issuance of that AD, the Civil Aviation Authority (CAA), which is the airworthiness authority for the United Kingdom, has advised the FAA that a standard life limit has been established for Lucas Aerospace spoiler actuators having part numbers TY1763–01A and TY1763–01B. The new life limit has been established at the current declaration of design performance (DDP) life of 5,000 hours time-in-service since new. Therefore, unless a spoiler actuator would fail to perform correctly beforehand, these actuators are permitted to remain installed on the airplane for an interval not to exceed 5,000 hours time-in-service, at which time they must be replaced. The CAA also has advised that compliance with this 5,000-hour life limit on these particular spoiler actuators terminates the need for the currently required repetitive purging of the actuators' hydraulic system and repetitive installation of newly-certified actuators (those marked with an "R" after the serial number) each 500 hours time-in-service.

Additionally, the CAA has advised that, based on further review, fewer airplanes are subject to the identified unsafe condition than previously considered.

Jetstream has issued Service Bulletin J41–A27–034, Revision 1, dated October 28, 1994, which describes procedures for a one-time removal of the left and right spoiler actuators, purging the hydraulic system, and installation of a previously certified spoiler actuator. This revised service bulletin specifies a life limit of 5,000 hours time-in-service for certain Lucas Aerospace spoiler actuators; if these spoiler actuators are replaced at this life limit, the need for repetitive purging of the hydraulic system and repetitive installation of newly-certified actuators is eliminated. Additionally, the effectivity listing of the revised service bulletin eliminates certain airplanes that were specified in the original issue of the service bulletin; these airplanes have been eliminated because they have been determined not to be subject to the addressed unsafe condition. The CAA classified this revised service bulletin as mandatory in order to assure the continued airworthiness of these airplanes in the United Kingdom.

Jetstream has also issued Service Bulletin J41–27–037, dated November 7, 1994, which describes the installation of Modification JM 41381. This modification involves the installation of improved spoiler actuators (having improved purging capability) on the left and right wings. Installation of these improved actuators eliminates: (1) the need for repetitive purging of the hydraulic system and repetitive installation of newly-certified actuators; and (2) the need for a 5,000 hour time-in-service life limit on the (Lucas Aerospace) actuators. The CAA classified this revised service bulletin as optional.

This airplane model is manufactured in the United Kingdom and is type certificated for operation in the United States under the provisions of section 21.29 of the Federal Aviation Regulations (14 CFR 21.29) and the applicable bilateral airworthiness agreement. Pursuant to this bilateral airworthiness agreement, the CAA has kept the FAA informed of the situation described above. The FAA has examined the findings of the CAA, reviewed all available information, and determined that AD action is necessary for products of this type design that are certificated for operation in the United States.

Since an unsafe condition has been identified that is likely to exist or develop on other airplanes of the same type design registered in the United States, the proposed AD would supersede AD 94–17–12. It would continue to require repetitive purging of the hydraulic system and installation of an actuator that has been previously certified marked with an "R" after the serial number. These actions are required to be performed every 500 landings.

This proposal would revise the existing AD by requiring that certain Lucas Aerospace spoiler actuators be replaced at intervals of 5,000 hours time-in-service (on the actuator). Such replacement would terminate the current requirement to repetitively purge the hydraulic system and install newly-certified actuators every 500 landings. It would also revise the applicability of the existing rule to delete certain airplanes. The actions would be required to be accomplished in accordance with Jetstream Service Bulletin J41–A27–034, Revision 1, described previously.

This proposal would also provide for an optional action to terminate both the repetitive purging and installation requirements, as required by the existing AD; and the 5,000 hour time-in-service life limit on certain actuators, as required by this new AD. This optional terminating action consists of installing improved actuators (Modification JM 41381) in accordance with Jetstream Service Bulletin J41–27–037, described previously.

As a result of recent communications with the Air Transport Association (ATA) of America, the FAA has learned that, in general, some operators may misunderstand the legal effect of AD's on airplanes that are identified in the applicability provision of the AD, but that have been altered or repaired in the area addressed by the AD. The FAA points out that all airplanes identified in the applicability provision of an AD are legally subject to the AD. If an airplane has been altered or repaired in the affected area in such a way as to affect compliance with the AD, the owner or operator is required to obtain FAA approval for an alternative method of compliance with the AD, in accordance with the paragraph of each AD that provides for such approvals. A note has been included in this notice to clarify this long-standing requirement.

The FAA estimates that 17 airplanes of U.S. registry would be affected by this proposed AD.

The repetitive purging and installation actions that are currently required by AD 94–17–12 take approximately 6 work hours per airplane to accomplish, at an average labor rate of $60 per work hour. Based on these figures, the total cost impact on U.S. operators of the actions currently required is estimated to be $6,120, or $360 per airplane.

Replacement of the spoiler actuator at the newly established life limit would add no new costs to affected operators. In fact, it would reduce the economic burden for most operators, since: (1) Repetitive purging of the actuators would be eliminated, and (2) replacement of the actuators will not have to be accomplished as often as was previously required. Additionally, some of the replacement actuators would be provided to operators free of charge by the manufacturer.

Further, since this proposed AD would be applicable to fewer airplanes than was AD 94–17–12, the total cost impact of the AD would be reduced by the amount of labor and parts costs that would previously have been applied to those additional airplanes.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 USC 106(g), 40101, 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by removing amendment 39–9007 (59 FR

43025, August 22, 1994), and by adding a new airworthiness directive (AD), to read as follows:

Jetstream Aircraft, Limited: Docket 94–NM–237–AD. Supersedes AD 94–17–12, Amendment 39–9007.

Applicability: Model 4101 airplanes; having constructors numbers 41004 through 41015 inclusive, 41018 through 41026 inclusive, 41028 through 41030 inclusive, and 41032; certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must use the authority provided in paragraph (d) of this AD to request approval from the FAA. This approval may address either no action, if the current configuration eliminates the unsafe condition; or different actions necessary to address the unsafe condition described in this AD. Such a request should include an assessment of the effect of the changed configuration on the unsafe condition addressed by this AD. In no case does the presence of any modification, alteration, or repair remove any airplane from the applicability of this AD.

Compliance: Required as indicated, unless accomplished previously.

To prevent uncommanded extension of the lift spoiler in the event of loss of hydraulic pressure in the spoiler actuator, accomplish the following:

(a) Within 21 days after September 6, 1994 (the effective date of AD 94–17–12, amendment 39–9007), remove the spoiler actuators in accordance with Jetstream Alert Service Bulletin J41–A27–034, dated June 9, 1994, or Revision 1, dated October 28, 1994. Following removal of the actuators, accomplish the requirements of paragraphs (a)(1) and (a)(2) of this AD, in accordance with the service bulletin. Thereafter, repeat the requirements of this paragraph at intervals not to exceed 500 landings.

(1) Prior to further flight, purge the hydraulic system to ensure that there is no contamination.

(2) Prior to further flight, install a spoiler actuator that has been previously certified and marked with an "R" after the serial number on the nameplate of the actuator.

(b) For spoiler actuators having Lucas Aerospace part number (P/N) TY1763–01A or P/N TY1763–01B: Prior to the accumulation of 5,000 total hours time-in-service on the spoiler actuator, or within 30 days after the effective date of this AD, whichever occurs later, replace the actuator with a new or serviceable part, in accordance with Jetstream Service Bulletin J41–A27–034, Revision 1, dated October 28, 1994. Thereafter, prior to the accumulation of 5,000 hours time-in-service on the spoiler actuator, replace the actuator with a new or serviceable part, in accordance with the service bulletin. Such replacement constitutes terminating action for the repetitive purging and repetitive installation requirements of paragraph (a) of this AD.

(c) Installation of improved spoiler actuators (Modification JM 41381) on the left and right wings, in accordance with Jetstream Service Bulletin J41–27–037, dated November 7, 1994, constitutes terminating action for the requirements of paragraphs (a) and (b) of this AD.

(d) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Standardization Branch, ANM–113, FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Standardization Branch, ANM–113.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Standardization Branch, ANM–113.

(e) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

Issued in Renton, Washington, on September 1, 1995.

Darrell M. Pedersen,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–O

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Parts 312 and 314

[Docket No. 95N–0010]

Investigational New Drug Applications and New Drug Applications

AGENCY: Food and Drug Administration, HHS.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is proposing to amend its regulations pertaining to investigational new drug applications (IND's) and new drug applications (NDA's). The proposed rule would clearly define in the NDA format and content requirements the need to present effectiveness and safety data for important demographic subgroups, specifically gender, age, and racial subgroups. The rule would codify expectations that FDA has previously described in guidance. The proposed amendments would also require IND sponsors of drugs, including biological products, to characterize, in their annual reports, the number of subjects in a clinical study according to age group, gender, and race. The proposed rule does not address the requirements for the conduct of clinical studies and would not require sponsors to conduct any more studies than they have already conducted. It also would not require the inclusion of particular numbers of individuals from specific subgroups in any study or overall. The rule refers only to the presentation of data already collected. The scope of this proposal does not extend to requiring additional studies or data.

DATES: Written comments by December 7, 1995.

ADDRESSES: Submit written comments to the Dockets Management Branch (HFA–305), Food and Drug Administration, rm. 1–23, 12420 Parklawn Dr., Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Deborah A. Wolf, Center for Drug Evaluation and Research (HFD–362), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855, 301–594–1046.

SUPPLEMENTARY INFORMATION: The proposed rule would amend the NDA content and format regulations at 21 CFR 314.50 to explicitly require that sponsors submit effectiveness and safety data by gender, age, and racial subgroups and other subgroups of the population of patients treated, as appropriate, such as patients with renal failure or patients with different levels of severity of disease. In the **Federal Register** of July 22, 1993 (58 FR 39406), FDA published a guideline entitled "Guideline for the Study and Evaluation of Gender Differences in the Clinical Evaluation of Drugs." The guideline provided guidance on FDA's expectations regarding inclusion of both men and women in drug development, analyses of clinical data by gender, assessment of potential pharmacokinetic differences between genders, and conduct of specific additional studies in women, where indicated. The preamble to the guideline described the development of the agency's policy regarding the evaluation of clinical data by gender. The guideline noted that over the preceding decade there had been growing concern that the drug development process did not produce adequate information about the effects of drugs in women (58 FR 39406). Analyses of published clinical trials in certain therapeutic areas had indicated that there had been little or no participation by women in many of the studies. There had also been little study of the effects of such aspects of female

physiology as the menstrual cycle and menopause or of the effects of oral contraceptives and systemic progestins and estrogens on drug action and pharmacokinetics.

The guideline also explained that concerns about the adequacy of data on the effects of drugs in women have arisen in the context of an increasing awareness of the need to individualize treatment in the face of the wide variety of demographic, disease-related, and individual patient-related factors that can lead to different responses in subsets of the population. Optimal use of drugs requires identification of these factors so that appropriate adjustments in dose, concomitant therapy, or monitoring can be made. The guideline was part of FDA's effort to address the need to gather and evaluate data from various subpopulations in clinical drug trials. The agency had previously addressed the need to develop information on the elderly in the 1989 guideline entitled, "Guideline for the Study of Drugs Likely to be Used in the Elderly." That guideline provided similar guidance regarding inclusion of elderly patients in clinical trials and assessment of clinical and pharmacokinetic differences between older and younger patients.

In 1983 and 1989, FDA examined the relative numbers of individuals from two important demographic subgroups, women and the elderly, in the data bases of NDA's. The agency found that, in general, the proportions of women and men included in the clinical trials were similar to the respective proportions of women and men who had the diseases for which the drugs were being studied, taking into account the age range of the population studied. The General Accounting Office (GAO) conducted a larger study of drugs approved during the period 1988 through 1991, and found similar proportions. Women were found to typically represent a majority of patients in NDA data bases of drugs used to treat conditions more common, or more commonly treated, in women, and a minority, generally a sizable one, in tests of drugs for conditions that occur predominantly in males in the age range usually included in the clinical trials.

Although women have been included in the later phases of clinical trials, the agency believes that inclusion alone is not sufficient for adequate assessment of potential gender differences. There must be an effort to use the data to discover such differences, and the agency found that this effort was not made. Various documents published by the agency have reflected the need to examine gender as well as other characteristics for their effects on drug response. FDA's regulations on NDA content and format require the clinical data section of the NDA to include, among other things, "An integrated summary of the data demonstrating substantial evidence of effectiveness for the claimed indications. Evidence is also required to support the dosage and administration section of the labeling, including support for the dosage and dose interval recommended, and modifications for specific subgroups (for example, pediatrics, geriatrics, patients with renal failure)" and an integrated summary of safety. (See 21 CFR 314.50(d)(5)(v) and (d)(5)(vi)(*a*)). The examples of subgroups listed in § 314.50(d)(5)(v) were not intended to be a complete list or to limit the subgroups for which data should be submitted. In 1988, in a guideline entitled, "Guideline for the Format and Content of the Clinical and Statistical Sections of New Drug Applications," FDA discussed analyses of population subsets within NDA data bases to look for differences in effectiveness and adverse reactions to drugs. The guideline describes the population subsets to include subsets such as different genders, age groups, and races, and other subsets such as people receiving other drug therapy and people with concurrent illnesses. See, "Guideline for the Format and Content of the Clinical and Statistical Sections of New Drug Applications" at pages 32 and 40. The guideline describes the need for clinical data beyond the specific subgroups and categories of information set forth in the current regulations.

The current wording of § 314.50, while not intended to limit the analyses to be carried out does not fully reflect the need to present the safety and effectiveness data by subgroup and omits important subgroups, including gender and racial groups. The proposal would make explicit the agency's requirements concerning the data that are presented in NDA's. It would make clear the need to present safety and effectiveness data by gender, age, and racial subgroups to allow a determination, to the extent the data permit, of whether these factors affect results of treatment or alter dosing requirements.

FDA believes that it is important to make such an explicit requirement. After the publication of the 1988 guideline, FDA and GAO examined data bases for NDA's to see whether the analyses to which the guideline refers were being conducted and submitted. Both of the examinations found that in about half of the cases the data bases were not being analyzed to determine whether there were differences in response to drugs between the two genders or among different racial groups and age groups. Thus, changes that the proposal would make to § 314.50 would codify what the agency has already identified as important elements of clinical data.

FDA also believes that to codify the need for presentations of data by subgroups will provide industry with clear information regarding potential consequences of the absence of subgroup data. The agency's regulation governing the filing of an application, which is set forth in 21 CFR 314.101, provides that the Center for Drug Evaluation and Research may refuse to file an NDA that, among other things, is not submitted in the form required under § 314.50 or that is incomplete because it does not on its face contain information required under section 505(b) of the Federal Food, Drug and Cosmetic Act. 21 CFR 314.101(d)(3). The refusal to file policy attempts to direct FDA's resources to applications complete enough for review. The agency's "New Drug Evaluation Guidance Document: Refusal to File" describes situations in which FDA applies the provision in § 314.101(d)(3) to make refusal to file decisions. In particular, the document explains that omission of critical data, information or analyses needed to evaluate effectiveness and safety or provide adequate directions for use is an appropriate basis for a refusal to file. Among the particular considerations in refusal to file decisions is a "clearly inadequate evaluation for safety and/or effectiveness of the population intended to use the drug, including pertinent subsets, such as gender, age, and racial subsets." Thus, the proposal would allow sponsors to know from the beginning that data that are not presented with regard to gender, age, and racial groups are grounds for a refusal to file.

It is important to note that the rule does not address the requirements for the conduct of clinical studies and that this proposal would not require sponsors to conduct any more studies than they have already conducted. It also does not require the inclusion of particular numbers of individuals from specific subgroups in any study or overall. The rule refers only to the presentation of data already collected. The scope of this proposal does not extend to requiring additional studies or data.

Environmental Impact

The agency has determined under 21 CFR 25.24(a)(8) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

Paperwork Reduction Act of 1980

This proposed rule contains information collections which are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1980. The title, description, and respondent description of the information collection are shown below with an estimate of the annual reporting and recordkeeping burden. Included in the estimate is the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

Title: Investigational New Drug Applications and New Drug Applications.

Description: The information submitted by respondents pursuant to the proposed regulatory revisions would assist the agency in monitoring the success of drug companies in enrolling in clinical drug trials subjects representing various subgroups of the population expected to use the drug being tested once it is approved and marketed and in better evaluating the safety and efficacy profiles of drugs for various subgroups.

Description of respondents: Businesses, nonprofit institutions, small businesses.

Section	Annual number of respondents	Annual frequency	Average burden per response	Annual burden hours
312.33(a)(2)	1,616 (noncommercial)	1	2 hours	3,232
312.33(a)(2)	362 (commercial)	1	8 hours	2,896
314.50	50	1	40 hours	2,000
Total				8,128

The agency has submitted a copy of this proposed rule to OMB for review of these information collections. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to FDA's Dockets Management Branch (address above) and to the Office of Information and Regulatory Affairs, OMB, Washington, DC 20503.

Analysis of Impacts

FDA has examined the impacts of the proposed rule under Executive Order 12866 and the Regulatory Flexibility Act (Pub. L. 96–354). Executive Order 12866 directs agencies to assess all costs and benefits of available regulatory alternatives and, when regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety, and other advantages; distributive impacts; and equity). The agency believes that this proposed rule is consistent with the regulatory philosophy and principles identified in the Executive Order. The proposed rule does not require any change in the studies a drug manufacturer needs to conduct or impose any requirements on the conduct of those studies. It requires only a presentation of data already collected. In addition, the proposed rule is not a significant regulatory action as defined by the Executive Order and so is not subject to review under the Executive Order.

This proposed rule would amend the IND regulations to enable FDA and sponsors of drugs, including biological products, to monitor the sponsor's success in studying the populations that are likely to receive the drug once it is approved. Under the current IND regulations in § 312.33(a)(2) (21 CFR 312.33(a)(2)), sponsors are required to submit an annual report that includes for each study, among other things, "The total number of subjects initially planned for inclusion in the study, the number entered into the study to date, the number whose participation in the study was completed as planned, and the number who dropped out of the study for any reason." The proposed rule would amend § 312.33(a)(2) to require that the annual report include the number of subjects entered into the study "characterized by age group, gender, and race." Reporting and reviewing this information would not itself represent a need for new studies or patients. The agency is aware that many clinical trials do not contain enough patients from various subgroups to perform statistically rigorous comparisons of outcomes between subgroups. The Regulatory Flexibility Act requires agencies to analyze regulatory options that would minimize any significant impact of a rule on small entities. The agency certifies that the proposed rule will not have a significant economic impact on a substantial number of small entities. Therefore, under the Regulatory Flexibility Act, no further analysis is required.

Request for Comments

Interested persons may, on or before December 7, 1995, submit to the Dockets Management Branch (address above) written comments regarding this proposal. Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. Received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

21 CFR Part 314

Administrative practice and procedure, Confidential business information, Drugs, Reporting and recordkeeping requirements.

Therefore, under the Federal Food, Drug, and Cosmetic Act, the Public Health Service Act, and under authority delegated to the Commissioner of Food and Drugs, it is proposed that 21 CFR parts 312 and 314 be amended to read as follows:

PART 312—INVESTIGATIONAL NEW DRUG APPLICATION

1. The authority citation for 21 CFR part 312 continues to read as follows:

Authority: Secs. 201, 301, 501, 502, 503, 505, 506, 507, 701 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321, 331, 351, 352, 353, 355, 356, 357, 371); sec. 351 of the Public Health Service Act (42 U.S.C. 262).

2. Section 312.33 is amended by revising paragraph (a)(2) to read as follows:

§ 312.33 Annual reports.

* * * * *

(a) * * *

(2) The total number of subjects initially planned for inclusion in the study; the number entered into the study to date, characterized by age group, gender, and race; the number whose participation in the study was completed as planned; and the number who dropped out of the study for any reason.

* * * * *

PART 314—APPLICATIONS FOR FDA APPROVAL TO MARKET A NEW DRUG OR AN ANTIBIOTIC DRUG

3. The authority citation for 21 CFR part 314 continues to read as follows:

Authority: Secs. 201, 301, 501, 502, 503, 505, 506, 507, 701, 704, 721 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321, 331, 351, 352, 353, 355, 356, 357, 371, 374, 379e).

4. Section 314.50 is amended by revising the second sentence and adding two new sentences after the second sentence in paragraph (d)(5)(v) and by adding two new sentences after the first sentence in paragraph (d)(5)(vi)(a) to read as follows:

§ 314.50 Content and format of an application.

* * * * *

(d) * * *

(5) * * *

(v) * * * Evidence is also required to support the dosage and administration section of the labeling, including support for the dosage and dose interval recommended. The effectiveness data shall be presented by gender, age, and racial subgroups. Effectiveness data from other subgroups of the population of patients treated, as appropriate, such as patients with renal failure or patients with different levels of severity of disease, shall also be presented.

(vi) * * *

(a) * * * The safety data shall be presented by gender, age, and racial subgroups. Safety data from other subgroups of the population of patients treated, as appropriate, such as patients with renal failure or patients with different levels of severity of disease, shall also be presented. * * *

* * * * *

Dated: July 11, 1995.

William B. Schultz,

Deputy Commissioner for Policy.

BILLING CODE 4160–01–F

DEPARTMENT OF LABOR

Wage and Hour Division

29 CFR Part 552

RIN 1215–AA82

Application of the Fair Labor Standards Act to Domestic Service

AGENCY: Wage and Hour Division, Employment Standards Administration, Labor.

ACTION: Proposed rule; reopening and extension of comment period.

SUMMARY: This document reopens and extends the period for filing written comments on a proposed revision to § 552.109 of Regulations, 29 CFR part 552, which was published in the **Federal Register** on December 30, 1993 (58 FR 69310), to clarify the minimum wage and overtime exemption under the Fair Labor Standards Act (FLSA) for certain employees of third-party employers who provide domestic companionship services. The Department is continuing to consider this particular proposal, and this action is taken in order to obtain additional comments from interested parties. A separate final rule published elsewhere in this issue amends 29 CFR part 552 to incorporate changes necessitated by amendments to Title II of the Social Security Act, which were enacted October 22, 1994, as Pub. L. 103–387 (Social Security Domestic Employment Reform Act), and makes other updating and technical revisions as proposed in the notice of December 30, 1993.

DATES: Comments are due on or before November 7, 1995.

FOR FURTHER INFORMATION CONTACT: Richard M. Brennan, Acting Director, Division of Policy and Analysis, Wage and Hour Division, Employment Standards Administration, U.S. Department of Labor, Room S–3506, 200 Constitution Avenue NW., Washington, DC 20210, (202) 219–8412. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: The Fair Labor Standards Act of 1938 (52 Stat. 1060, as amended; 29 U.S.C. 201 *et seq.*), as amended by the Fair Labor Standards Amendments of 1974 (Pub. L. 93–259, 88 Stat. 55), extended with certain exceptions the FLSA's minimum wage, overtime pay, and recordkeeping provisions to domestic service employees whose compensation for services would constitute wages under section 209(g) of Title II of the Social Security Act, *or* who are employed by one or more employers for more than 8 hours in the aggregate in any workweek. Section 13(a)(15) of the FLSA provides an exemption from the minimum wage and overtime pay requirements of the Act for "employees employed on a casual basis in domestic service employment to provide babysitting services," and for domestic service employees employed "to provide companionship services for individuals who * * * are unable to care for themselves." Section 13(b)(21) provides an overtime exemption for domestic service employees who reside in the household in which they are employed. On February 20, 1975, regulations and interpretations implementing the domestic service employment provisions of the FLSA were published in the **Federal Register** (40 FR 7405) at 29 CFR part 552.

The Department published a notice of proposed rulemaking in the **Federal Register** on December 30, 1993 (58 FR 69310), inviting public comments until February 28, 1994, which, among other things, would revise § 552.109 to clarify that, in order for the exemptions in FLSA sections 13(a)(15) and 13(b)(21) to apply, employees engaged in providing companionship services and live-in domestic service employees who are employed by a third-party employer or agency must also be "jointly" employed by the family or household using their services. In addition, the Department invited public comments on certain updating and technical changes to 29 CFR part 552.

The Department proposed to revise § 552.109 to provide, consistent with rulings of the Wage-Hour Administrator, that companions and live-in domestics employed by third-party employers are eligible for the exemptions in FLSA sections 13(a)(15) and 13(b)(21) only where the individuals are also employed by the family or household using their services. This clarification was considered necessary in order to make the underlying definition of "domestic service employees" (*i.e.*, someone who performs services of a household nature "in or about a private home * * * of the person *by whom he or she is employed* * * *") at § 552.101 internally consistent with § 552.109, applicable to domestic service employees who provide "companionship services."

A total of 7 comments were received in response to the notice. All focused their remarks on the proposed revision to § 552.109 concerning joint employment and third-party employers. After review of the comments received to date, the Department has concluded that it is appropriate to continue the rulemaking on the proposed revision to § 552.109. With respect to the updating and technical changes that were proposed in the December 1993 notice, they are adopted in a final rule published elsewhere in this issue. This separate document also revises Regulations, 29 CFR part 552, to incorporate changes necessitated by amendments to Title II of the Social Security Act which were enacted October 22, 1994, as Public Law 103–387 (Social Security Domestic Employment Reform Act).

Based on the comments received to date, the Department wishes to consider the implications of its proposed revision on situations where State and local governments provide companion services to the elderly or infirm, as well as situations where the companion is employed by a family member. The Department is considering revising the proposal to allow the exemption to apply to employment, either jointly with a third party agency or otherwise, by a government agency or family member, where the government agency or family member is acting on behalf of an elderly or infirm person who is unable to act on his or her own behalf. The Department is therefore reopening the comment period in order to receive additional comments relating to this proposal.

The Department is particularly interested in receiving information on the companion services provided by State and local governments, and the relationship between the government and the elderly or infirm person to whom the service is provided.

Signed at Washington, DC, on this 31st day of August 1995.

Maria Echaveste,

Administrator, Wage and Hour Division.

As a convenience to the readers of this document, the proposed revisions to § 552.109 which were published in the **Federal Register** document of December 30, 1993 (53 FR 69310), are republished as follows:

PART 552—APPLICATION OF THE FAIR LABOR STANDARDS ACT TO DOMESTIC SERVICE

7. In § 552.109, paragraphs (a) and (c) are proposed to be revised to read as follows:

§ 552.109 Third party employment.

(a) Employees who are engaged in providing companionship services, as defined in § 552.6, and who are employed by an employer or agency other than the family or household using their services, are exempt from the Act's minimum wage and overtime pay requirements by virtue of section 13(a)(15), provided that they are also employed by the person in whose home the services are provided, *i.e.*, a joint employment relationship must exist (*see* 29 CFR Part 791). The assignment of such an employee to more than one household or family in the same workweek would not defeat the exemption for that workweek, provided that the services rendered during each assignment come within the definition of companionship services.

(b) * * *

(c) Live-in domestic service employees who are employed by an employer or agency other than the family or household using their services are exempt from the Act's overtime requirements by virtue of section 13(b)(21), provided that they are also employed by the person in whose home the services are provided, *i.e.*, a joint employment relationship must exist. This exemption, however, will not apply where the employee works only temporarily for any one family or household, since the employee would not be "residing" on the premises of such family or household.

BILLING CODE 4510–27–M

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

36 CFR Part 1206

[RIN 3095–AA43]

National Historical Publications and Records Commission; Grant Program Procedures

AGENCY: National Archives and Records Administration.

ACTION: Notice of proposed rulemaking.

SUMMARY: The National Archives and Records Administration (NARA) proposes to update and clarify current regulations in 36 CFR Part 1206 relating to the National Historical Publications and Records Commission (NHPRC) grant program. In particular, language has been revised to reflect an internal reorganization; to address revisions to the state historical records coordinator and advisory board program; to include mention of archival administration and documentary editing fellowships for individuals; to include prior approval requirements for changes in the grant project; to cite Office of Management and Budget Circulars A–110, A–128 and A–133, which stipulate requirements for grant administration and audit; and to make grantees aware of the lobbying certification requirement for grants of $100,000 or more. The rule will affect NHPRC applicants and grantees.

DATES: Comments must be received by November 7, 1995.

ADDRESSES: Comments should be sent to Director, Policy and Planning Division (PIRM–POL), National Archives and Records Administration, 8601 Adelphi Rd., College Park, MD 20740–6001.

FOR FURTHER INFORMATION CONTACT: Mary Ann Hadyka or Nancy Allard at 301–713–6730.

SUPPLEMENTARY INFORMATION:

Background

The purpose of the National Historical Publications and Records Commission (NHPRC) is to promote the preservation and use of historically significant documents. The Archivist of the United States awards grants recommended by the NHPRC. Publications grants are made for the preparation (compiling, editing and publishing) of printed, microform, and electronic publications. Subvention grants are made to nonprofit presses to help defray publication costs of Commission-supported editions. Records grants are made for activities relating to the preservation, arrangement and description of historical records. Educational programs sponsored by the NHPRC include an institute to provide training in documentary editing and fellowships in the fields of documentary editing and archival administration. The Catalog of Federal Domestic Assistance (CFDA) number for this program is 89.003.

Provisions of the Proposed Rule

In 1991, the publications and records programs of the NHPRC were merged. The proposed rule updates program descriptions and procedures to reflect this internal reorganization. The NHPRC has also been working with the state historical records coordinators and advisory boards to revise their program sections and has made changes accordingly. In addition, we have added language to reflect current guidelines that stipulate prior approval requirements for changes in a grant project once an award has been made, and to mention specifically the archival administration and documentary editing fellowships.

The proposed rule also seeks to clarify Governmentwide requirements for applicants and grantees by including language that specifies the certification regarding lobbying for grants of $100,000 or more; adds a new section regarding audits, citing OMB Circulars A–128, "Audits of State and Local Governments," and A–133, "Audits of Institutions of Higher Education and Other Nonprofit Organizations"; and cites OMB Circular A–110, "Uniform Requirements for Grants and Agreements with Institutions of Higher Education, Hospitals, and Other Nonprofit Organizations."

Finally, the proposed rule revises reporting requirements to reflect reductions in reporting frequency that are being made as part of the President's regulatory reform initiative.

The information collections contained in this proposed rule have been approved by the Office of Management and Budget under the Paperwork Reduction Act. This rule is not a significant regulatory action for purposes of Executive Order 12866 of September 30, 1993, and has not been reviewed by the Office of Management and Budget. As required by the Regulatory Flexibility Act, it is hereby certified that this rule will not have a significant impact on small entities.

List of Subjects in 36 CFR Part 1206

Grant programs—Archives and records, Grant administration.

For the reasons set forth in the preamble, NARA proposes to amend Part 1206 of Title 36 of the Code of Federal Regulations as follows:

PART 1206—NATIONAL HISTORICAL PUBLICATIONS AND RECORDS COMMISSION

1. The authority citation of part 1206 continues to read as follows:

Authority: 44 U.S.C. 2104(a); 44 U.S.C. 2501–2506.

2. Section 1206.1 is revised to read as follows:

§ 1206.1 Scope of part.

This part prescribes the procedures and rules governing the operation of the grant program of the National Historical Publications and Records Commission.

3. Section 1206.2 is amended by revising paragraphs (e), (f), and (g) to read as follows:

§ 1206.2 Definitions.

* * * * *

(e) The term *State projects* means records projects directed by organizations operating within and involving records or activities within one State. Records or activities of such projects will typically be under the administrative control of the organization applying for the grant. The records or activities need not relate to the history of the State.

(f) The term *regional projects* means records projects involving records or activities in more than one State in a region. Regional projects include those undertaken by regional archival groups or consortia.

(g) The term *national projects* means records projects involving records or activities in several regions or in widely separated States. In general, the location of the records and/or the site of grant-funded activities will determine the category of submission.

4. Section 1206.6 is revised to read as follows:

§ 1206.6 The Commission's Grant Program.

The Commission operates primarily through a grant program supporting publications projects (subpart B) and records projects (subpart C). Fellowships for individuals in archival administration and documentary editing are also offered, as well as an annual institute for the editing of historical documents.

5. Section 1206.7 is added to subpart A to read as follows:

§ 1206.7 Organization.

The Executive Director, Program Director, and the staff of the Commission administer the publications and records grants, fellowships, and institute under the guidance of the Commission and the immediate administrative direction of its chairman, the Archivist of the United States.

6. Section 1206.10 is revised to read as follows:

§ 1206.10 General.

This subpart describes the scope, purpose, and operation of that part of the grant program relating to publications projects and prescribes requirements applicable to printed, microform, and electronic publication projects. Grant application and administration procedures are given in subpart D of this part.

7. Section 1206.12 is revised to read as follows:

§ 1206.12 Scope and purpose.

Publications projects are intended to ensure the dissemination and accessibility of documentary source material important to the study and understanding of U.S. history. Projects should therefore be based upon material of widespread interest among scholars, students, and informed citizens. Documents should have historical value and interest that transcend local and State boundaries.

§ 1206.14 [Removed]

8. Section 1206.14 is removed.

9. Section 1206.16 is revised to read as follows:

§ 1206.16 Project requirements.

(a) Each publications project shall include either the papers of a U.S. leader in a significant phase of life in the United States or documents relating to some outstanding event or to some topic or theme of national significance in U.S. history. These projects shall consist of collecting, compiling, editing, and publishing, either selectively or comprehensively, the papers or documents. Publication may be in the form of printed, microform, or electronic editions. Electronic formats for publication of documentary sources will be considered only when suitable preservation of the data can be assured. Three copies of each book publication should be deposited with the National Historical Publications and Records Commission (NHPRC), Washington, DC 20408. These copies may be included as part of the five complimentary copies to be sent by presses receiving subvention grants.

(b) For microform projects, the grantee shall make positive prints and all finding aids available to institutions, scholars, or students through interlibrary loan and for purchase. Five complimentary copies of guides and indexes produced by the projects shall be sent to the Commission.

10. In § 1206.18, paragraphs (a) and (c) are revised to read as follows:

§ 1206.18 Subsidies for printing costs.

(a) The Commission will consider grant applications from university and other nonprofit presses for the subvention of part of the costs of manufacturing and disseminating volumes that have been formally endorsed by the Commission. Grants not exceeding $10,000 per volume ($3,000 for reprints) are awarded upon recommendation of the Commission to promote the availability of Commission-supported documentary editions.

* * * * *

(c) The Commission shall receive five complimentary copies of each published volume for which a subvention grant is made.

11. Section 1206.20 is revised to read as follows:

§ 1206.20 Microform publication standards.

Technical standards for NHPRC-sponsored microform projects are stated in the brochure "National Historical Publications and Records Commission: Microform Guidelines," which will be supplied to applicants upon request and to grantee institutions at the time a grant is made for a microform project.

12. Section § 1206.30 is revised to read as follows:

§ 1206.30 General.

This subpart describes the scope, purpose, and operation of that part of the grant program relating to records projects. Grant application and administration procedures are given in subpart D of this part.

13. Section 1206.32 is revised to read as follows:

§ 1206.32 Scope and purpose.

Through its support for records projects, the National Historical Publications and Records Commission encourages a greater effort at all levels of government and by private organizations to preserve and make available for use those records, generated in every facet of life, that further an understanding and appreciation of U.S. history. In the public sector, these historical records document significant activities of State, county, municipal, and other units of government. In the private sector, historical records include manuscripts, personal papers, and family or corporate archives that are maintained by a variety of general repositories as well as materials in special collections relating to particular fields of study, including the arts, business, education, ethnic and minority groups, immigration, labor, politics, professional services, religion, science, urban affairs, and women. In addition to recommending the supporting of projects relating directly to a body of records, the Commission may also recommend support for projects to advance the state of the art, to promote cooperative efforts among institutions and organizations, and to improve the knowledge, performance, and professional skills of those who work with historical records.

§ 1206.34 [Removed]

14. Section 1206.34 is removed.

15. Section 1206.36 is revised to read as follows:

§ 1206.36 State historical records coordinator.

(a) The governor of each State desiring to participate fully in the program shall appoint a State historical records coordinator (coordinator), who shall be the full-time professional official in charge of the State archival program or agency. If the State has another state-funded historical agency or agencies, the official(s) in charge shall be a member of the State historical records advisory board (board). The coordinator is appointed to a minimum four-year term, but may continue to serve until replaced by the governor or until resignation. The coordinator shall serve as chair of the board and shall be the central coordinating officer for the historical records grant program in the State. The person appointed will not be deemed to be an official or employee of the Federal Government and will receive no Federal compensation for such service. The pamphlet "Guidelines for State Historical Records Coordinators and State Historical Records Advisory Boards," which is available from the Commission and from State historical records coordinators, provides further information on the role of the coordinator.

(b) In the event of the resignation of the coordinator or other inability to serve, a deputy coordinator, if one has been designated, will serve as acting State coordinator until the governor makes an appointment. In the absence of a deputy coordinator, the NHPRC will recognize an acting coordinator, selected by the state board, who shall serve until the governor appoints a coordinator in order to conduct the necessary business of the board.

16. Section 1206.38 is revised to read as follows:

§ 1206.38 State historical records advisory board.

(a) Each State desiring to participate in the program shall define an appointment process and appoint a State historical records advisory board consisting of at least seven members, including the State historical records coordinator, who chairs the board. The coordinator shall provide the Commission with a description of the appointment process. A majority of the members shall have recognized experience in the administration of government records, historical records, or archives. The board should be as broadly representative as possible of the public and private archives, records offices, and research institutions and organizations in the State. Board members will not be deemed to be officials or employees of the Federal Government and will receive no Federal compensation for their service on the board. They are appointed for three years with the possibility of renewal; and preferably terms are staggered so that one-third of the board is newly appointed or reappointed each year. If the board is not established in State law, members' terms continue until replacements are appointed. The board may adopt standards for attendance and may declare membership positions open if those standards are not met.

(b) The board is the central advisory body for historical records planning and for Commission-funded projects developed and carried out within the State. The board serves as a coordinating body to facilitate cooperation among historical records repositories and other information agencies within the state and as a state-level review body for grant proposals as defined in the Commission's guidelines. Specifically, the board may perform such duties as sponsoring and publishing surveys of the conditions and needs of historical records in the State; soliciting or developing proposals for projects to be carried out in the State with NHPRC grants; reviewing proposals by institutions in the State and making recommendations about these to the Commission; developing, revising, and submitting to the Commission State priorities for historical records projects following guidelines developed by the Commission; promoting an understanding of the role and value of historical records; acting in an advisory capacity to the state archives and other statewide archival or records agencies; and reviewing, through reports and otherwise, the operation and progress of projects in the State financed by NHPRC grants.

17. In § 1206.50, paragraph (c) is revised to read as follows:

§ 1206.50 Types of grants.

* * * * *

(c) *Matching grants.* An application for a matching grant should be made when an applicant has prospects of securing financial support from a third party or, in the case of a State or local government agency, new funds from the institution's own appropriation source are provided expressly for the project proposed in the application. Upon Commission approval of a matching grant request, the applicant shall present written documentation certifying that matching funds have been provided for the project by the non-Federal source. In the case of a State or local government agency, the matching requirement may also be met through matching funds from the State or local government, provided that it can be demonstrated to the Commission's satisfaction that the matching amount has been provided above and beyond funds previously allocated or planned for the agency's budget and that the funds are set aside exclusively to support the project proposed for an NHPRC grant. Applicants need not, however, have

money in hand to make a matching grant request; they need only assure the Commission that they have reasonable prospects of obtaining the needed amounts.

* * * * *

18. Section 1206.52 is revised to read as follows:

§ 1206.52 Grant limitations.

Grant limitations are described in the grant program guidelines pamphlet, available on request from the Commission.

19. Section 1206.54 is revised to read as follows:

§ 1206.54 Who may apply.

The Commission will consider applications from State and local government agencies, nonprofit organizations and institutions, Federally acknowledged or state-recognized Native American tribes or groups, and, under certain conditions, from individuals. Proposals for State projects falling under the Commission's goals, "To Assure the Preservation of the Nation's Documentary Heritage through State Collaborative Efforts" and "To Achieve Progress in the Preservation and Use of Original Source Material," as defined in the grant program guidelines, will be accepted only from applicants in States in which a State historical records coordinator and a State historical records advisory board are currently appointed. This requirement does not apply to regional or national projects.

20. Section 1206.56 is revised to read as follows:

§ 1206.56 When to apply.

Grant proposals are considered during Commission meetings held three times during the year. For current application deadlines contact the grant program staff or State historical records coordinators (for records grant proposals). Some State boards have established pre-submission review deadlines for records proposals; further information is available from State coordinators.

21. In § 1206.58, paragraphs (b), (c), and (d) are revised to read as follows:

§ 1206.58 How to apply.

* * * * *

(b) *Application forms.* Applicants for NHPRC grants shall use Standard Form 424, Application for Federal Assistance, and NA Form 17001, Budget Form (OMB Control Number 3095–0004). Applicants for subvention grants also submit the NHPRC subvention grant application (OMB Control Number 3095–0021), and applicants for archival administration fellowship host institution grants submit a special application (OMB Control Number 3095–0015). Applicants for NHPRC-sponsored fellowships complete the appropriate fellowship application. Copies of these applications and forms are available from the Commission. Project proposals and related correspondence should be sent to the National Historical Publications and Records Commission (NHPRC), Washington, DC 20408.

(c) *Assurances and certifications.* All grant applications to the Commission must include the following assurances and certifications signed by an authorized representative of the applicant institution, or in the case of an individual applicant, by that individual: Standard Form 424B, Assurances: Non-Construction Programs; the Certification Regarding Debarment, Suspension, and Other Responsibility Matters specified in part 1209, appendix B; the Certification Regarding Drug-free Workplace Requirements specified in part 1209, appendix C, of this chapter; and, if the application requests more than $100,000 in Federal funds, a signed Certification for Grants, Loans, or Cooperative Agreements in Excess of $100,000 (certification regarding lobbying). Assurance and certification language is included in the program pamphlet.

(d) *Program guidelines pamphlet.* Supplementary information for applicants is contained in the pamphlet, "Program Guidelines: Applications and Grants," which is available from the Commission upon request. The pamphlet is also available from State historical records coordinators. This pamphlet includes copies of the application form and certifications, guidelines on the preparation of project budgets and program narrative statements, and other guidance on applying for and administering NHPRC grants. OMB Control Number 3095–0013 has been assigned to this information collection.

22. In § 1206.66, paragraphs (b) and (c) are revised to read as follows:

§ 1206.66 Review and evaluation of grant proposals.

* * * * *

(b) *Publications grant proposals.* The Commission staff reviews publications grant proposals for completeness, conformity with application requirements, and relevance to the objectives of the grant program. Proposals are sent to specialists in American history and documentary editing for review and recommendations. The recommendations are considered by the full Commission at regular meetings.

(c) *Subvention grant applications.* The Commission staff reviews subvention grant applications to ensure their adherence to established technical standards for the production of printed volumes, particularly in the quality of paper and ink. Staff recommendations are considered by the full Commission at regular meetings.

23. Section 1206.68 is revised to read as follows:

§ 1206.68 Grant administration responsibilities.

Primary responsibility for the administration of grants is shared by the grantee institution and the project director designated by the institution. In the case of grants made to individuals, the individual named as project director has primary responsibility for the administration of the grant. Grants shall be administered in conformance with either OMB Circular A–110, "Uniform Requirements for Grants and Agreements with Institutions of Higher Education, Hospitals, and Other Nonprofit Organizations" (available from the Commission office by writing to NHPRC, National Archives and Records Administration, Washington,DC 20408, or OMB by writing to the Executive Office of the President, Publications Service, 725 17th Street NW, Suite G2200, Washington, DC 20503) or, in the case of State and local governments, with the regulations in part 1207 of this chapter. All grants shall be in conformance with part 1209 of this chapter.

(a) *Changes in the grant project:*

(1) *Extension of the grant period.* Requests for extension of the grant period must be made before the end of the grant period and must be signed by the grantee institution's authorized representative as indicated on the grant application form (SF 424). No extensions will be allowed unless grantees are up-to-date in their submission of financial and narrative reports.

(2) *Rebudgeting.* To meet unanticipated program needs, grantees may adjust the amounts allocated to existing budget lines for both grant funds and cost sharing and may transfer grant funds among existing NHPRC-funded direct cost categories that appear in the final project budget approved by the Commission at the time of the grant award. Cost-sharing funds may also be shifted among existing cost-sharing categories. For grants where the NHPRC's award is less than $100,000, grantees may make these transfers without NHPRC approval. When

Commission grant awards are for $100,000 or more, grantees must obtain prior approval from the NHPRC when cumulative transfers among direct cost categories total more than 10 percent of the total project budget (i.e., grant funds plus other funds). In addition, the Program Director of the Commission may approve the use of NHPRC grant funds for new cost categories for which Commission funds were not provided in the final approved budget where such action seems appropriate for the fulfillment of the original purposes of the grant and where the amount of funds involved does not exceed 10 percent of the amount of the award or $5,000, whichever is less. Requests to establish these new cost categories must be made in writing and signed by the grantee institution's authorized representative. Requests that exceed this limit are subject to approval by the full Commission.

(3) *Other changes requiring prior approval.* Prior written approval from the Commission must be obtained for financial or programmatic changes in all cases involving the following: revision of the scope or objectives of the project; change of the project director or other key project personnel who have been specifically named in the grant application or award or related correspondence; and, contracting out, subgranting, or otherwise obtaining the services of a third party to perform activities central to the purposes of the grant, unless specified in the grant proposal.

(b) *Submission of requests for changes.* All requests for approval of budget or programmatic changes must be submitted in the form of a letter signed by the grantee institution's authorized representative for the grant and addressed to the Program Director. A written response signed by the Program Director of the Commission will constitute approval for the changes.

24. Section 1206.78 is revised to read as follows:

§ 1206.78 Grant reports.

(a) Financial status reports and narrative progress reports are required for all grants. Standard Form 269, Financial Status Report, shall be used for all financial reports. The pamphlet, "Program Guidelines: Applications and Grants," which is provided to each grantee and is available from the Commission on request, specifies the content of the narrative progress reports.

(b) Financial reports are due annually 30 days after the end of each reporting period. Narrative progress reports are due 30 days after the end of each six-month period. Final financial and narrative reports are due within 90 days after the expiration or termination of the grant period. Grants with a duration of six months or less require a final report only. Additional rules on financial and performance reports are found in OMB Circular A–110 and §§ 1207.40 and 1207.41 of this chapter, as appropriate.

25. Section 1206.79 is added to read as follows:

§ 1206.79 Audits.

Grantees are responsible for obtaining audits in accordance with either the Single Audit Act of 1984 (31 U.S.C. 7501–7), for which audit requirements have been set forth in Office of Management and Budget (OMB) Circular A–128, "Audits of State and Local Governments," or requirements established under OMB Circular A–133, "Audits of Institutions of Higher Education and Other Nonprofit Organizations," as appropriate. Copies are available from the Commission office or from OMB at the addresses given in § 1206.68 of this part. The grantee is responsible for ensuring that the NHPRC receives a copy of the audit report for any audit performed during the grant period or for three years thereafter. A reasonable portion of grant funds, as defined in the OMB Circular, may be used to comply with audit requirements. The Commission prefers that the grantee assume such costs as institutional cost sharing.

26. Section 1206.94 is revised to read as follows:

§ 1206.94 Compliance with Governmentwide requirements.

In addition to the grant application and grant administration requirements outlined in this part 1206, grantees are responsible for complying with applicable Governmentwide requirements contained in OMB Circular A–110 or part 1207 of this chapter, as appropriate, and part 1209 of this chapter.

Dated: August 30, 1995.

John W. Carlin,

Archivist of the United States.

Approval and Promulgation of Air Quality Implementation Plans; Pennsylvania; Approval of Source-Specific VOC and NO_X RACT and Synthetic Minor Permit Conditions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA proposes to approve the State Implementation Plan (SIP) revision submitted by the Commonwealth of Pennsylvania. This revision establishes and requires reasonably available control technology (RACT) on eleven major sources and establishes permit conditions to limit one source's emissions to below major source levels. In the Final Rules section of this **Federal Register**, EPA is approving the State's SIP revision as a direct final rule without prior proposal because the Agency views this as a noncontroversial SIP revision and anticipates no adverse comments. A detailed rationale for the approval is set forth in the direct final rule and the technical support document. If no adverse comments are received in response to this proposed rule, no further activity is contemplated in relation to this rule. If EPA receives adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this proposed rule. EPA will not institute a second comment period on this action. Any parties interested in commenting on this action should do so at this time.

DATES: Comments must be received in writing by October 10, 1995.

ADDRESSES: Written comments on this action should be addressed to Marcia L. Spink, Associate Director, Air Programs, Mailcode 3AT00, U.S. Environmental Protection Agency, Region III, 841 Chestnut Building, Philadelphia, Pennsylvania 19107. Copies of the documents relevant to this action are available for public inspection during normal business hours at the Air, Radiation, and Toxics Division, U.S. Environmental Protection Agency, Region III, 841 Chestnut Building, Philadelphia, Pennsylvania 19107; and the Pennsylvania Department of Environmental Resources Bureau of Air Quality Control, P.O. Box 8468, 400 Market Street, Harrisburg, Pennsylvania 17105.

FOR FURTHER INFORMATION CONTACT: Cynthia H. Stahl, (215) 597–9337, at the EPA Region III address above.

SUPPLEMENTARY INFORMATION: See the information provided in the Direct Final action of the same title which is located in the Rules and Regulations Section of this **Federal Register**.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 36

[CC Docket No. 80–286; FCC 95–282]

Establishment of a Joint Board

AGENCY: Federal Communications Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Federal Communications Commission has adopted a notice of proposed rulemaking (Notice) inviting comment on proposals to revise the assistance mechanisms contained in the jurisdictional separations rules applicable to Dial Equipment Minutes ("DEM") weighting and the Universal Service Fund ("USF"). The Commission invited comment on whether DEM weighting should be phased out or, if it is retained, whether it should be merged with the USF or otherwise reformed. The Commission also proposed three basic approaches to revising the USF, by either reforming the current mechanism, which bases assistance on the carriers' reported costs, or introducing a system basing assistance on proxy factors, or allocating the fund among the States, which would design their own distribution programs, according to the Commission's guidelines. The Commission referred the proposals to the Federal-State Joint Board in this proceeding for a recommended decision. In addition, the Commission issued a Notice of Inquiry ("NOI") seeking comment regarding: the need for further rulemaking to develop a program to reduce the USF in competitive markets through least-cost bidding, and the appropriate long-range treatment of universal service issues.

DATES: Comments are due October 10, 1995; Reply Comments are due November 9, 1995.

ADDRESSES: Federal Communications Commission, 1919 M Street NW., Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Jon Reel, (202) 418–0834, or Deborah A. Dupont, (202) 418–0873, Common Carrier Bureau, Accounting and Audits Division.

SUPPLEMENTARY INFORMATION: This is a summary of the Federal Communication Commission's Notice of Proposed Rulemaking in Amendment of Part 36 of the Commission's Rules and Establishment of a Joint Board, FCC 95–282, CC Docket No. 80–286, adopted and released July 13, 1995. The Commission has made the full text of the Notice of Proposed Rulemaking available for inspection and copying during normal business hours in the Commission's Reference Center, Room 239, 1919 M Street NW., Washington, DC 205543, and will publish it in the FCC Record. The full text of the Notice of Proposed Rulemaking may also be purchased from the Commission's duplicating contractor, International Transcription Service, 2100 M Street NW., Suite 140, Washington, DC 20037, telephone number (202) 857–3800.

Synopsis of Notice of Proposed Rulemaking

In this Notice, the Commission seeks comment on proposed improvements to two subsidies intended to promote universal service at reasonable rates in high-cost, predominantly rural areas: dial equipment minute ("DEM") weighting,[1] and the Universal Service Fund.[2] Changes in technology, market structure, and regulatory policies prompted the Commission to reevaluate these programs, with particular concern that the programs not act as *de facto* barriers to entry in the emerging competitive local exchange market. Commenters are asked to evaluate the proposals in the light of four basic principles. First, assistance should be targeted to support only those providers or users who need it; second, the programs should promote efficient investment and operation; third, the programs should not impose excessive costs on interstate carriers and ratepayers; and fourth, the rules should not impede competitive entry or disrupt normal market forces. The Commission refers the proposals to the Federal-State Joint Board in this proceeding for a recommended decision, as required by the Communications Act of 1934, as amended.[3]

Proposals for Revision of the DEM Weighting Rules

The Commission's rules for allocating equipment costs between the federal and state jurisdictions divide the cost of local switching equipment based on relative dial equipment minutes, or DEM, of use. LEC study areas with 50,000 or fewer access lines "weight" (i.e. multiply) the DEM for their interstate switching costs—thus allocating a higher percentage of their overall switching costs to the interstate jurisdiction—on the theory that smaller LECs, because they cannot take advantage of economies of scale, have higher switching costs. Technological developments, however, may have diminished the importance of switch size to the point where the subsidy should be gradually eliminated, and the Notice requests comment on this option.

If DEM weighting is not eliminated, the Notice requests comment on two possible approaches for its reform. First, the switching costs used for DEM weighting could be combined with the loop costs that determine USF assistance, thereby creating a single, need-based subsidy. Second, if DEM weighting is kept separate from the USF, it could be modified in one or more of the following ways: (1) establish a high-cost test for LECs to qualify for DEM weighting, (2) determine DEM weighting factors on the basis of average local switch size, or (3) keep the existing program, but determine the level of assistance through use of a sliding scale. The Notice requests comment on all these measures, with particular emphasis on whether small LECs actually have higher switching costs per unit of traffic than large LECs.

Proposals for Revision of the Universal Service Fund

The Universal Service Fund was adopted in 1984 to support exchange carriers ("LECs") in study areas with above-average loop costs.[4] The Notice seeks comment on several approaches for reforming the USF, any of which would be compatible with the use of a high-cost credit system. Distributing USF assistance through high-cost credits—money credited on a subscriber's telephone bill that the subscriber could then assign either to the incumbent LEC or to a competing local carrier—is intended to make the program competitively neutral. The Notice requests comment on (1) whether the existence of local service competition should be prerequisite for distributing assistance through a high-cost credit system, (2) whether eligibility for high-cost assistance should depend upon a carrier's assuming minimum service requirements, (3) how best to distribute assistance to carriers that have not been subject to the Commission's separations rules, and (4) the significance of subscriber need in determining high-cost credits.

---

[1] *See* 47 CFR 36.125 (1994).

[2] *See* 47 CFR subpart F (1994).

[3] 47 U.S.C. 410(c).

[4] Amendment of Part 67 of the Commission's Rules and Establishment of a Joint Board, 96 F.C.C. 2d 781 (1984).

Besides requesting comment on a high-cost credit system, the Notice sets forth for comment three primary approaches to reform of the USF. The first of these would modify the USF while continuing to base assistance on carrier's reported costs. If this "reported costs" approach is adopted, the Notice proposes, at a minimum, three reforms: (1) require carriers to calculate the costs and number of loops in a study area based on all loops served by affiliated companies in the same state, (2) exclude administrative costs from the loop costs that form the basis for high-cost assistance, and (3) base assistance on the average number of lines in a study area over a year, rather than the number of lines at the end of the year.

In addition to these reforms, the Notice seeks comment on reforming the "reported costs" approach by adopting one or more of the following measures: (1) increase the threshold for receiving assistance, (2) reconsider the current rules' distinctions between small and large study areas, (3) eliminate assistance to LECs receiving minimal assistance per line per month, and (4) adopt a permanent indexed cap. The Notice also requests comment on whether to implement the use of high-cost credits in a "reported costs" system, and whether to base high-cost assistance on local switching and loop costs combined, thereby combining the DEM weighting and USF programs.

The second primary approach would base assistance not on carriers' reported costs, but instead on objectively ascertainable factors that would serve as proxies for the cost of providing service. Using proxy factors rather than reported costs would encourage recipients to control their costs, and would further the policy of competitive neutrality. The Notice seeks comment on four proxy factors: (1) subscriber density per square mile, (2) average distance from the nearest wire center, (3) terrain, and (4) climate. The Notice also seeks comment on whether it is advisable to incorporate local switching costs into the proxy model, and whether the use of a proxy methodology should be limited to the larger LECs.

The third primary approach would allow State utility commissions significant control over distribution of the USF. The Notice proposes a three-step process. First, proxy factors would be used to determine the amount of high-cost assistance allocated for distribution within each State. Second, within each State, the State utility commission would decide, in accordance with general guidelines adopted by the Commission, the process for allocating the assistance among the carriers serving high-cost areas. Third, the Commission would review the distribution plans filed by the State commissioners. The Commission would prescribe a default mechanism for States that decline to participate in the distribution process.

Notice of Inquiry: Comment Requested Regarding the Need for Further Rulemaking

Market-based Incentives to Reduce the USF Through Least-cost Bidding

The NOI sets out for comment a possible methodology to harness market forces to reduce the size of the USF once competition for local phone service is established. Local service providers would reverse-bid to set the amount of USF assistance, with the lowest bidder setting the level of subsidy per subscriber in an area for all carriers serving that area. To encourage carriers to bid, the winner would receive an additional incentive or bonus, such as a percentage of the savings to the fund. To bid, carriers would have to serve as an essential carrier, or "carrier of last resort," by providing ubiquitous service at a reasonable rate within the specified area.

More generally, the NOI solicits suggestions, information, and analyses regarding the appropriate long-term treatment of universal service issues in the light of rapidly-changing technologies and advances in competitive markets.

Regulatory Flexibility Act

In the Notice the Commission certifies that the Regulatory Flexibility Act of 1980 does not apply to this rulemaking proceeding because, if the proposals in this proceeding are adopted, there will not be a significant economic impact on a substantial number of small business entities, as defined by Section 601(3) of the Regulatory Flexibility Act.[5] Because of the nature of local exchange and access service, the Commission has concluded that LECs, including small LECs, are dominant in their fields of operation and therefore are not "small entities" as defined by that act.[6] The Secretary has sent a copy of this Notice of Proposed Rulemaking, including the certification, to the Chief Counsel for Advocacy of the Small Business Administration in accordance with Section 603(a) of that act.[7]

Ordering Clauses

Accordingly, it is ordered that, pursuant to Sections 1, 4(i), 4(j), 403, and 410(c) of the Commissions Act of 1934, as amended, 47 U.S.C. §§ 151, 154(i), 154(j). 403 and 410(c), notice is hereby given of proposed amendments to Part 36 of the Commission's Rules, 47 CFR Part 36, as described in this Notice of Proposed Rulemaking.

It is further ordered that, pursuant to Section 410(c) of the Communications Act of 1934, 47 U.S.C. § 410(c), the proposals set forth in the Notice of Proposed Rulemaking are hereby referred to the Federal-State Joint Board established in this proceeding for the preparation of a recommended decision.

It is further ordered that, pursuant to Sections 1, 4(i), 4(j), and 403 of the Communications Act of 1934, as amended, 47 U.S.C. §§ 151, 154(1), 154(j), and 403, notice is hereby given of the initiation of a Notice of Inquiry regarding the need for further rulemaking to address the use of a competitive bidding process to establish levels of high cost assistance, and regarding the appropriate long-range treatment of universal service issues.

47 CFR Part 76

[CS Docket No. 95–143; DA 95–1881]

Cable Television Service; List of Major Television Markets

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission, through this action, invites comments on its proposal to amend its rules regarding the listing of major television markets, to change the designation of the Pittsburgh, Pennsylvania television market to include the community of Greensburg, Pennsylvania. This action is taken at the request of Cornerstone Television, Inc., licensee of television station WPCB–TV, channel 40, Pittsburgh, Pennsylvania and it is taken to test the proposal for market hyphenation through the record established based on comments filed by interested parties.

DATES: Comments are due on or before October 31, 1995 and reply comments are due on or before November 15, 1995.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: William H. Johnson, Cable Services Bureau, (202) 416–0800.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's *Notice of Proposed Rulemaking,* CS Docket 95–143, adopted August 30, 1995 and released September 8, 1995. The full text of this decision is available for inspection and copying during normal business hours in the FCC Reference Center (room 239), 1919 M Street, NW, Washington, D.C. 20554, and may be purchased from the Commission's copy contractor, International Transcription Service, (202) 857–3800, 1919 M Street, NW, Washington, D.C. 20554.

Synopsis of the Notice of Propose Rule Making

1. The Commission, in response to a Petition for Rule Making filed by the petitioner, proposed to amend Section 76.51 of the Rules to add the community of Greensburg to the Pittsburgh television market.

2. In evaluating past requests for hyphenation of a market, the Commission has considered the following factors as relevant to its examination: (1) The distance between the existing designated communities and the community proposed to be added to the designation; (2) whether cable carriage, if afforded to the subject station, would extend to areas beyond its Grade B signal coverage area; (3) the presence of a clear showing of a particularized need by the station requesting the change of market designation; and (4) an indication of benefit to the public from the proposed change. Each of these factors helps the Commission to evaluate individual market conditions consistent "with the underlying competitive purpose of the market hyphenation rule to delineate areas where stations can and do, both actually and logically, compete."

3. Based on the facts presented, the Commission believes that a sufficient case for redesignation of the subject market has been set forth so that this proposal should be tested through the rule making process, including the comments of interested parties. It appears from the information before the Commission that the television stations licensed to Pittsburgh, Pennsylvania do compete throughout much of the proposed combined market area, and that sufficient evidence has been presented tending to demonstrate commonality between the proposed communities to be added to the market designation and the market as a whole that "hyphenation" of the market should be proposed. Moreover, the petitioners' proposal appears to be consistent with the Commission's policies regarding redesignation of a hyphenated television market. accordingly, comment is requested on the proposed addition of Greensburg to the Pittsburgh, Pennsylvania television market.

Initial Regulatory Flexibility Analysis

4. The Commission certifies that the Regulatory Flexibility Act of 1980 does not apply to this rulemaking proceeding because if the proposed rule amendment is promulgated, there will not be a significant economic impact on a substantial number of small business entities, as defined by Section 601(3) of the Regulatory Flexibility Act. A few cable television system operators will be affected by the proposed rule amendment. The Secretary shall send a copy of this *Notice of Proposed Rule Making,* including the certification, to the Chief Counsel for Advocacy of the Small Business Administration in accordance with paragraph 603(a) of the Regulatory Flexibility Act. Pub. L. No. 96–354, 94 Stat. 1164, 5 U.S.C. Section 601 *et seq.* (1981).

Ex Parte

5. This is a non-restricted notice and comment rule making proceeding. *Ex parte* presentations are permitted, provided they are disclosed as provided in the Commission's Rules. *See generally* 47 CFR 1.1202, 1.1203 and 1.1206(a).

Comment Dates

6. Pursuant to applicable procedures set forth in §§ 1.415 and 1.419 of the Commission's Rules, interested parties may file comments on or before October 31, 1995, and reply comments on or before November 15, 1995.

All relevant and timely comments will be considered before final action is taken in this proceeding. To file formally in this proceeding, participants must file an original and four copies of all comments, reply comments, and supporting comments. If participants want each Commissioner to receive a personal copy of their comments, an original plus nine copies must be filed. Comments and reply comments should be sent to the Office of the Secretary, Federal Communications Commission, Washington, D.C. 20554. Comments and reply comments will be available for public inspection during regular business hours in the FCC Reference Center (Room 239) of the Federal Communications Commission, 1919 M Street, N.W., Washington, D.C. 20554.

7. Accordingly, this action is taken by the Deputy Chief, Cable Services Bureau, pursuant to authority delegated by Section 0.321 of the Commission's Rules.

BILLING CODE 6712-01-M

DEPARTMENT OF DEFENSE

48 CFR Part 225

Defense Federal Acquisition Regulation Supplement; Applicability of Trade Agreements

AGENCY: Department of Defense (DoD).

ACTION: Proposed rule with request for comment.

SUMMARY: The Director of Defense Procurement is proposing to amend the Defense Federal Acquisition Regulation Supplement (DFARS) to provide that the value of an acquisition for purposes of determining the applicability of both NAFTA and the Trade Agreements Act is the total estimated value of all end products subject to the acts.

DATES: *Comment Date:* Comments on the proposed rule should be submitted in writing to the address below on or before November 7, 1995, to be considered in the formulation of the final rule.

ADDRESSES: Interested parties should submit written comments to: Defense Acquisition Regulations Council, Attn: Ms. Amy Williams, PDUSD (A&T) DP (DAR), IMD 3D139, 3062 Defense Pentagon, Washington, DC 20301–3062. Telefax number (703) 602–0350. Please cite DFARS Case 95–D022 in all correspondence related to this issue.

FOR FURTHER INFORMATION CONTACT: Ms. Amy Williams, (703) 602–0131.

SUPPLEMENTARY INFORMATION:

A. Background

This proposed rule amends language in the Defense Federal Acquisition Regulation Supplement (DFARS) to change the valuation basis for the purpose of meeting thresholds under the North American Free Trade Agreement (NAFTA) and the Trade Agreements Act (TAA) to the estimated combined value of all line items subject to the acts, rather than valuing each line item separately. The purpose of the change is to comply with the requirements of NAFTA. For consistency, since all acquisitions subject to the Trade Agreements Act are also subject to NAFTA, this valuation method is made applicable to the Trade Agreements Act threshold as well.

B. Regulatory Flexibility Act

The proposed rule may have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because the proposed rule changes the valuation method used by contracting officers to determine whether a procurement is subject to a trade agreement. The proposed rule will not diminish existing preferences for small businesses because purchases under small and small disadvantaged business preference programs are exempted from the trade agreements. An initial Regulatory Flexibility Analysis has been prepared and may be obtained from the address stated herein. Comments are invited from small businesses and other interested parties. Comments form small entities concerning the affected subpart will be considered in accordance with Section 610 of the Act. Such comments must be submitted separately and cite DFARS Case 95–D022 in correspondence.

C. Paperwork Reduction Act

This rule does not impose any additional information collection requirements which require the approval of the Office of Management and Budget under 44 U.S.C. 3501, *et seq.*

List of Subjects in 48 CFR Part 225

Government procurement.

Michele P. Peterson,
Executive Editor, Defense Acquisition Regulations Council.

Therefore, 48 CFR Part 225 is proposed to be amended as follows:

PART 225—FOREIGN ACQUISITION

1. The authority citation for 48 CFR Part 225 continues to read as follows:

Authority: 41 U.S.C. 421 and 48 CFR Chapter 1.

2. Section 225.402 is amended by revising paragraph (a) to read as follows:

225.402 Policy.

(a) To estimate the value of the acquisition, use the total estimated value of end products subject to trade agreement acts (see 225.403–70).

(1) See 225.105 for evaluation of eligible products and U.S. made end products.

RIN 0648–AE47

Coral Reef Resources of Puerto Rico and the U.S. Virgin Islands; Initial Regulations

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; request for comments.

SUMMARY: NMFS issues this proposed rule to implement the Fishery Management Plan for Corals and Reef Associated Plants and Invertebrates of Puerto Rico and the U.S. Virgin Islands (FMP). This rule proposes restrictions on the taking of coral reef resources in or from the exclusive economic zone (EEZ) around Puerto Rico and the U.S. Virgin Islands. NMFS, based on a preliminary evaluation of the FMP, has disapproved two measures involving the adoption of state permit and reporting requirements because the state permit systems are not yet fully developed, and the state regulations authorizing these permits, where they exist, do not satisfy the requirements of the Administrative Procedure Act, the Magnuson Fishery Conservation and Management Act (Magnuson Act), and other applicable laws. The proposed rule would implement the remaining measures in the FMP. The intended effect is to protect important marine resources.

DATES: Written comments must be received on or before October 16, 1995.

ADDRESSES: Comments on the proposed rule must be sent to the Southeast Regional Office, NMFS, 9721 Executive Center Drive N., St. Petersburg, FL 33702.

Requests for copies of the FMP, which includes a regulatory impact review and an environmental impact statement, should be sent to the Caribbean Fishery Management Council, 268 Muñoz Rivera Avenue, Suite 1108, San Juan, PR 00918-2577.

Comments regarding the collection-of-information requirement contained in this proposed rule should be sent to Edward E. Burgess, Southeast Regional Office, NMFS, 9721 Executive Center Drive N., St. Petersburg, FL 33702, and to the Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), Washington, DC 20503 (Attention: NOAA Desk Officer).

FOR FURTHER INFORMATION CONTACT: Georgia Cranmore, 813-570-5305.

SUPPLEMENTARY INFORMATION: The FMP was prepared by the Caribbean Fishery Management Council (Council) under the authority of the Magnuson Act.

Background

The FMP addresses corals and reef-associated plants and invertebrates (coral reef resources) in the waters of the Commonwealth of Puerto Rico and the Territory of the U.S. Virgin Islands (states) and the waters of the adjoining EEZ. The proposed regulations would govern conservation and management of coral reef resources in or from the adjoining EEZ. The FMP was developed to address general concern for the effects of man's activities on coral reef resources, including pollution resulting from coastal development, and the new and rapidly expanding fishery for the marine aquarium industry, especially in Puerto Rico.

The waters off Puerto Rico could become the principal source of live coral reef resources for the U.S. marine aquarium market, because other areas of the Caribbean and Florida have restricted commercial harvest operations by gear regulations and some quotas. The Council is concerned about the potential impacts of the aquarium fishery on targeted organisms and the reef habitat where they are collected, because of increasing demand and current harvesting methods, including the use of chemicals and the removal of substrate.

The Council has noted the current rate of degradation of coral reef resources, their limited distribution and the consequent potential for overexploitation, and the growing demand for reef-associated invertebrates for aquariums. The FMP, in association with corresponding state laws, is expected to provide consistent protection for coral reef resources throughout the U.S. Caribbean.

The FMP proposes to: (1) Prohibit the use of chemicals, plants, plant-derived toxins, and explosives to take coral reef resources in the EEZ; (2) limit allowable harvest in the EEZ to dip nets and slurp guns or by hand; and (3) prohibit the possession or sale of stony corals, gorgonians, and live rock (prohibited species) taken from the EEZ.

Additionally, the FMP proposes the adoption of state permit systems for harvesters and dealers of coral reef resources and for the taking of prohibited species for scientific, educational, or restoration purposes. However, these portions of the FMP are being disapproved because the state permit systems for coral reef resources are not yet fully developed and state regulations authorizing such permits, where the regulations exist, do not meet the requirements of the Administrative Procedure Act, the Magnuson Act and other applicable laws, as discussed below.

Gear Restrictions

A ban on the use of chemicals and explosives to take coral reef resources, and the specification of hand-held slurp guns and dip nets as the only allowable gear, are designed to increase survival of targeted species and to protect non-targeted species from incidental mortality. Quinaldine, the most commonly used chemical agent, is a coal tar derivative used in the manufacture of dyes and explosives. Quinaldine anesthetizes reef fish, lobsters, and other invertebrates, and makes them easier to collect, but reportedly also decreases their survival rates and damages surrounding organisms including coral.

The prohibition on the use of a plant or a plant-derived toxin to harvest coral reef resources would eliminate the historical practice of using plants native to the U.S. Caribbean, such as *Sapindus saponarea*, or their products to stun fish. Harvest by hand in a non-habitat destructive manner would ensure that no coral heads, or other reef habitats, are overturned or otherwise disturbed during harvest to allow access to targeted organisms sheltered beneath them. The proposed gear restrictions are not expected to adversely affect experienced harvesters of coral reef resources. The restrictions are designed to allow the harvest of these species without bycatch or increased capture mortality.

Protected Species

Current scientific research indicates that corals and live rock are relatively slow-growing and may be considered nonrenewable fishery resources. Although certain of the soft coral species, such as gorgonians, are faster-growing, the Council determined that there are insufficient data on growth and replacement rates to propose safe harvest levels for these species. Consequently, the FMP proposes a prohibition on taking: (1) Stony coral, which includes fire corals, hydrocorals, and black corals; (2) gorgonians, including sea fans; and (3) live rock, except when such taking can be authorized for scientific, educational, or restoration purposes. Live rock means coral reef resources attached to a hard substrate, including dead coral or rock. Live rock is collected by scuba divers and sold to the marine aquarium industry for use in minireef tanks. NMFS will continue to monitor relevant scientific data and will revisit the issue if and when the data show that these corals may be sustainably harvested.

Current harvest of stony coral in the U.S. Caribbean appears to be negligible. However, pressure to exploit gorgonians and live rock is expected to grow rapidly as market demand for live marine invertebrates increases and as regulations elsewhere (e.g., Florida) become increasingly restrictive. In Puerto Rico, about 40 individuals harvest live fish and invertebrates for the aquarium trade. About 25 percent of the exports, by number, are invertebrates, especially anemones and starfish. Less than 4 percent is live rock or corals. The wholesale (exvessel) value of the approximately 45,500 live coral reef resources reported exported annually is about $114,000; therefore, the reported export of stony corals, gorgonians, and live rock is valued at less than $5,000 annually.

Restriction on Sale

Since harvest of prohibited species would be allowed only for a scientific, educational, or restoration purpose, sale of prohibited species in or from the EEZ would not be allowed. Harvest of these species in state waters is also prohibited. To put a limitation on sale into effect, it is necessary to be able to distinguish between prohibited species from the EEZ or adjoining state waters and prohibited species harvested elsewhere and imported for sale in Puerto Rico or the U.S. Virgin Islands. Such distinction cannot be made by appearance or test. Accordingly, the FMP proposes that a species prohibited for sale in Puerto Rico or the U.S. Virgin Islands will be presumed to have been harvested from the EEZ or from adjoining state waters unless it is accompanied by documentation showing that it was harvested elsewhere.

The proposed documentation of having been harvested elsewhere would consist of (1) information specified in 50 CFR Part 246 for marking containers or packages of organisms that are imported, exported, or transported in interstate commerce; (2) the name and home port of the vessel or the name and address of the individual harvesting the prohibited species; (3) the date and port of landing of the species; and (4) a statement signed by the person holding the prohibited species for sale attesting that, to the best of his or her knowledge, information and belief, the species was harvested from an area other than the EEZ or adjoining state waters. If approved, the requirement for documentation of prohibited species that were harvested elsewhere would become effective approximately 3 months after publication of the final rule implementing the FMP. Thus, dealers would have a period during which they could sell existing stocks or obtain the required documentation.

Permit Requirements/Partial Disapproval of the FMP

Because most of the fishery for coral reef resources occurs in state waters, the FMP anticipates that permits for harvesters and dealers, and permits exempting certain activities for scientific, educational, or restoration purposes, in or from the EEZ, would be issued by state agencies. For example, a harvest permit currently required by each state for its waters would be valid for the harvest of coral reef resources from the adjoining EEZ. State permit requirements would encompass all species in the approved Federal management unit.

On August 9, 1995, the Regional Director, Southeast Region, NMFS (Regional Director), disapproved the permit and reporting requirements contained in the FMP, because the state permit systems on which the FMP permit provisions depend cannot satisfy the requirements of the Magnuson Act and other applicable law. Puerto Rico has no harvest permit requirement for coral reef resources. The U.S. Virgin Islands has a system for reporting catch, but it does not currently include all the species in the Federal management unit. A dealer's permit is not currently required in either state,

The FMP suggests that the state permit and reporting procedures could provide additional information on landings, gear, capture mortality, and trade, but it does not appear that current state systems could provide this information. In addition, the FMP envisions that state permit systems can provide exceptions to certain gear restrictions and the taking of prohibited species for scientific, educational, or restoration purposes. However, research permit provisions of state regulations are largely discretionary, and the FMP does not provide details of application requirements, conditions, and criteria for issuance that could allow for meaningful public comment. Also, any state authorities that apply in the EEZ would have to be consistent with the Magnuson Act and other applicable law. These determinations cannot be made until complete state systems are in effect.

Since the most easily accessible reef formations are found in state waters, it is unlikely that any significant number of requests will need to be made for activities in the EEZ for scientific, educational, or restoration purposes. Consequently, the proposed rule merely provides a mechanism to authorize such exceptions on a case-by-case basis should the need arise. Such authorizations would not relieve individuals of the obligation to comply with other legal or regulatory requirements, such as those that may apply in a national marine sanctuary. (See § 670.24.)

When the state permit and reporting systems for coral reef resources are fully developed and sufficient detail on their operations is available, the Council may resubmit these disapproved provisions, incorporating the state permit systems by an amendment to the FMP.

Additional background and rationale for the measures discussed above are contained in the FMP, the availability of which was announced in the **Federal Register** on August 8, 1995, (60 FR 40340).

Classification

Section 304(a)(1)(D) of the Magnuson Act requires NMFS to publish regulations proposed by a council within 15 days of receipt of an FMP and implementing regulations. At this time NMFS has not determined that the FMP is consistent with the national standards, other provisions of the Magnuson Act, and other applicable laws, except for those parts of the FMP specifically disapproved, as discussed above. NMFS, in making that determination with respect to the remaining parts of the FMP, will take into account the data, views, and comments received during the comment period.

This proposed rule has been determined to be not significant for purposes of E.O. 12866.

The Council prepared a final environmental impact statement (FEIS) for the FMP that will be filed with the Environmental Protection Agency for public review and comment. A notice of its availability for public comment for 30 days will be published in the **Federal Register**. According to the FEIS, the proposed actions would benefit the natural environment by prohibiting activities that damage live bottom habitat areas.

The Assistant General Counsel for Legislation and Regulation of the Department of Commerce certified to the Chief Counsel for Advocacy of the Small Business Administration that this proposed rule, if adopted, would not have a significant economic impact on a substantial number of small entities. The proposed rule would restrict the taking of coral reef resources in or from the EEZ of the U.S. Caribbean. There are about 16 small businesses in the U.S. Caribbean which are potentially involved in the collection, sale and export of coral reef resources. These firms employ less than 100 workers in all phases of the business (harvesters, packers, shippers). In addition, to firms involved in the commercial aspects of harvest, there are an estimated 65 businesses which provide recreational diving services. Since the FMP can affect collecting for personal use, there is the chance that these businesses could be marginally affected by the rule. However, of the total of about 81 businesses identified, less than 20 percent are expected to be affected by the proposed rule because the volume of current harvest is quite low.

Since neither the substantial number nor significant impact criteria are expected to be met, a determination has been made that the proposed rule will not result in a significant impact on a substantial number of small entities. As a result, a regulatory flexibility analysis was not prepared.

This rule contains a collection-of-information requirement subject to the Paperwork Reduction Act—namely, documentation of origin of prohibited species that are for sale in Puerto Rico or the U.S. Virgin Islands. This requirement has been submitted to OMB for approval. The public reporting burden for this collection of information is estimated to average 15 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this reporting burden estimate or any other aspect of the collection of information, including suggestions for reducing the burden, to NMFS and OMB (see **ADDRESSES**).

List of Subjects in 50 CFR Part 670

Fisheries, Fishing, Puerto Rico, Reporting and recordkeeping requirements, Virgin Islands.

Dated: September 1, 1995.

Gary Matlock,

Program Management Officer, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR is proposed to be amended by adding part 670 as follows:

PART 670—CORAL REEF RESOURCES OF PUERTO RICO AND THE U.S. VIRGIN ISLANDS

Subpart A—General Provisions

Sec.

670.1 Purpose and scope.
670.2 Definitions.
670.3 Relation to other laws.
670.4 Permits. [Reserved]
670.5 Recordkeeping and reporting.
670.6 Vessel identification.
670.7 Prohibitions.
670.8 Facilitation of enforcement.
670.9 Penalties.

Subpart B—Management Measures

670.20 Fishing year.
670.21 Harvest limitations.
670.22 Gear restrictions.
670.23 Restrictions on sale or purchase.
670.24 Specifically authorized activities.

Authority: 16 U.S.C. 1801 *et seq.*

Subpart A—General Provisions

§ 670.1 Purpose and scope.

(a) The purpose of this part is to implement the Fishery Management Plan for Corals and Reef Associated Plants and Invertebrates of Puerto Rico and the U.S. Virgin Islands prepared by the Caribbean Fishery Management Council under the Magnuson Act.

(b) This part governs conservation and management of coral reef resources in or from the EEZ around Puerto Rico and the U.S. Virgin Islands. "EEZ" in this part refers to the EEZ in those geographical areas, unless the context clearly indicates otherwise.

§ 670.2 Definitions.

In addition to the definitions in the Magnuson Act and in § 620.2 of this chapter, the terms used in this part have the following meanings:

Coral reef resource means one or more of the following, or a part thereof, whether living or dead:

Sponges—Class Demospongiae

Aphimedon compressa, Erect rope sponge
Chondrilla nucula, Chicken liver sponge
Cynachirella alloclada
Geodia neptuni, Potato sponge
Haliclona sp., Finger sponge
Myriastra sp.
Niphates digitalis, Pink vase sponge
N. erecta, Lavender rope sponge
Spinosella policifera
S. vaginalis
Tethya crypta

Hydrocorals—Class Hydrozoa

Hydroids—Order Hydroida
Fire Corals—Order Milleporina
Millepora sp.
Lace Corals—Order Stylasterina
Stylaster roseus, Rose lace corals

Anthozoans—Class Anthozoa

Soft corals—Order Alcyonacea

Family Anthothelidae
Erythropodium caribaeorum, Encrusting gorgonian
Iciligorgia schrammi, Deepwater sea fan
Family Briareidae
Briareum asbestinum, Corky sea finger
Family Telestacea
Telesto riisei, Telesto

Gorgonians—Order Gorgonacea

Family Gorgoniidae
Gorgonia flabellum, Venus sea fan
G. mariae, Wide-mesh sea fan
G. ventalina, Common sea fan
Pseudopterogorgia acerosa, Sea plume
P. albatrossae
P. americana, Slimy sea plume
P. bipinnata, Bipinnate plume
P. rigida
Pterogorgia anceps, Angular sea whip
P. citrina, Yellow sea whip
Family Plexauridae
Eunicea calyculata, Warty sea rod
E. clavigera
E. fusca, Doughnut sea rod
E. knighti
E. laciniata
E. laxispica
E. mammosa, Swollen-knob
E. succinea, Shelf-knob sea rod
E. touneforti
Muricea atlantica
M. elongata, Orange spiny rod
M. laxa, Delicate spiny rod
M. muricata, Spiny sea fan
M. pinnata, Long spine sea fan
Muriceopsis sp.
M. flavida, Rough sea plume
M. sulphurea
Plexaura flexuosa, Bent sea rod
P. homomalla, Black sea rod
Pseudoplexaura crucis
P. flagellosa
P. porosa, Porous sea rod
P. wagenaari
Plexaurella dichotoma, Slit-pore sea rod
P. fusifera
P. grandiflora
P. grisea
P. nutans, Giant slit-pore
Family Ellisellidae
Ellisella spp., Sea whips

Hard Corals—Order Scleractinia

Family Astrocoeniidae
Stephanocoenia michelinii, Blushing star
Family Pocilloporidae
Madracis decactis, Ten-ray star coral
M. mirabilis, Yellow pencil
Family Acroporidae
Acropora cervicornis, Staghorn coral
A. palmata, Elkhorn coral
A. prolifera, Fused staghorn
Family Agaricidae
Agaricia agaricities, Lettuce leaf coral
A. fragilis, Fragile saucer
A. lamarcki, Lamarck's sheet
A. tenuifolia, Thin leaf lettuce
Leptoseris cucullata, Sunray lettuce
Family Siderastreidae
Siderastrea radians, Lesser starlet
S. siderea, Massive starlet
Family Poritidae
Porites astreoides, Mustard hill coral
P. branneri, Blue crust coral
P. divaricata, Small finger coral
P. porites, Finger coral
Family Faviidae
Cladocora arbuscula, Tube coral
Colpophyllia natans, Boulder coral
Diploria clivosa, Knobby brain coral
D. labyrinthiformis, Grooved brain
D. strigosa, Symmetrical brain
Favia fragum, Golfball coral
Manicina areolata, Rose coral
M. mayori, Tortugas rose coral
Montastrea annularis, Boulder star coral
M. cavernosa, Great star coral
Solenastrea bournoni, Smooth star coral
Family Rhizangiidae
Astrangia solitaria, Dwarf cup coral
Phyllangia americana, Hidden cup coral
Family Meandrinidae
Dendrogyra cylindrus, Pillar coral
Dichocoenia stellaris, Pancake star
D. stokesi, Elliptical star
Meandrina meandrites, Maze coral
Family Mussidae
Isophyllastrea rigida, Rough star coral
Isophyllia sinuosa, Sinuous cactus
Mussa angulosa, Large flower coral
Mycetophyllia aliciae, Thin fungus coral
M. danae, Fat fungus coral
M. ferox, Grooved fungus
M. lamarckiana, Fungus coral
Scolymia cubensis, Artichoke coral
S. lacera, Solitary disk
Family Caryophyllidae
Eusmilia fastigiata, Flower coral
Tubastrea aurea, Cup coral
Family Oculinidae
Oculina diffusa, Ivory bush coral

Black Corals—Order Antipatharia

Antipathes spp., Bushy black coral
Stichopathes spp., Wire coral

Anemones—Order Actiniaria

Aiptasia tagetes, Pale anemone
Bartholomea annulata, Corkscrew anemone
Condylactis gigantea, Giant pink-tipped anemone
Hereractis lucida, Knobby anemone
Lebrunia spp., Staghorn anemone
Stichodactyla helianthus, Sun anemone
Colonial Anemones—Order Zoanthidea
Zoanthus spp., Sea mat
False Corals—Order Corallimorpharia
Ricordia florida, Florida false coral
Discosoma spp. (formerly *Rhodactis*), false coral

Polychaetes—Class Polychaeta

Family Sabellidae, Feather duster worms
Sabellastarte spp., Tube worms
S. magnifica, Magnificent duster
Family Serpulidae
Spirobranchus giganteus, Christmas tree worm

Gastropods—Class Gastropoda

Family Strombidae, Winged conchs
Strombus spp. (except Queen conch, *S. gigas*)
Family Ovulidae
Cyphoma gibbosum, Flamingo tongue
Charonia tritonis, Atlantic triton trumpet
Family Olividae
Oliva reticularis, Netted olive
Family Elysiidae
Tridachia crispata, Lettuce sea slug

Bivalves—Class Bivalvia

Family Limidae
Lima spp., Fileclams
L. scabra, Rough fileclam
Family Spondylidae
Spondylus americanus, Atlantic thorny oyster

Cephalopods—Class Cephalopoda

Octopuses—Order Octopoda
Family Octopodidae
Octopus spp. (except the Common octopus, *O. vulgaris*)

Crustaceans—Class Crustacea

Decapods—Order Decapoda
Family Stenopodidae, Coral shrimp
Stenopus hispidus, Banded shrimp
S. scutellatus, Golden shrimp
Family Hippolytidae
Lysmata spp., Peppermint shrimp
Thor amboinensis, Anemone shrimp
Family Palaemonida
Periclimenes spp., Cleaner shrimp
Family Alpheidae
Alpheaus armatus, Snapping shrimp
Family Diogenidae
Paguristes spp., Hermit crabs
P. cadenati, Red reef hermit
Family Majidae, Coral crabs
Mithrax spp., Clinging crabs
M. cinctimanus, Banded clinging
M. sculptus,, Green clinging
Stenorhynchus seticornis, Yellowline arrow
Family Grapsidae
Percnon gibbesi, Nimble spray crab
Family Squillidae, Mantis crabs
Gonodactylus spp.
Lysiosquilla spp.

Bryozoans—Phylum Bryozoa

Starfish—Class Stelleroidea

Analcidometra armata, Swimming crinoid
Astropecten spp., Sand stars
Astrophyton muricatum, Giant basket star
Davidaster spp., Crinoids
Linckia guildingii, Common comet star
Nemaster spp., Crinoids
Ophidiaster guildingii, Comet star
Ophiocoma spp., Brittlestars
Ophioderma spp., Brittlestars
O. rubicundum, Ruby brittlestar
Oreaster reticulatus, Cushion sea star

Sea Urchins—Class Echinoidea

Diadema antillarum, Long-spined urchin
Echinometra spp., Purple urchin
Eucidaris tribuloides, Pencil urchin
Lytechinus spp., Pin cushion urchin
Tripneustes ventricosus, Sea egg

Sea Cucumbers—Class Holothuroidea

Holothuria spp., Sea cucumbers

Tunicates—Subphylum Urochordata

Green Algae—Phylum Chlorophyta

Caulerpa spp., Green grape algae
Halimeda spp., Watercress algae
Penicillus spp., Neptune's brush
Udotea spp., Mermaid's fan
Ventricaria ventricosa, Sea pearls

Red Algae—Phylum Rhodophyta

Sea grasses—Phylum Angiospermae

Halodule wrightii, Shoal grass
Halophila spp., Sea vines
Ruppia maritima, Widgeon grass
Syringodium filiforme, Manatee grass
Thalassia testudium, Turtle grass

Gorgonian means a coral reef resource of the Class Anthozoa, Subclass Octocorallia, Order Gorgonacea.

Live rock means a coral reef resource attached to a hard substrate, including dead coral or rock (excluding individual mollusk shells).

Prohibited species means a gorgonian, a live rock, or a stony coral, or a part thereof.

Regional Director means the Director, Southeast Region, NMFS, 9721 Executive Center Drive N., St. Petersburg, FL 33702, telephone: 813-570-5301; or a designee.

Science and Research Director means the Science and Research Director, Southeast Fisheries Science Center, NMFS, 75 Virginia Beach Drive, Miami, FL 33149, telephone 305-361-5761; or a designee.

Scientific, educational, or restoration purpose means the objective of gaining knowledge for the benefit of science, humanity, or management of coral reef resources or restoring a disturbed habitat as closely as possible to its original condition.

Stony coral means a coral reef resource—

(1) Of the Class Hydrozoa (fire corals and hydrocorals); or

(2) Of the Class Anthozoa, Subclass Hexacorallia, Orders Scleractinia (stony corals) and Antipatharia (black corals).

§ 670.3 Relation to other laws.

The relation of this part to other laws is set forth in § 620.3 of this chapter.

§ 670.4 Permits. [Reserved]

§ 670.5 Recordkeeping and reporting.

A person possessing a coral reef resource in or from the EEZ is required upon request to make such coral reef resource available for inspection by the Science and Research Director or an authorized officer.

§ 670.6 Vessel identification.

(a) *Official number.* A vessel that fishes for or possesses coral reef resources in or from the EEZ must display its official number—

(1) On the port and starboard sides of the deckhouse or hull, and on an appropriate weather deck, so as to be clearly visible from an enforcement vessel or aircraft;

(2) In block arabic numerals in contrasting color to the background;

(3) At least 18 inches (45.7 cm) in height for fishing vessels over 65 ft (19.8 m) in length and at least 10 inches (25.4 cm) in height for all other vessels; and

(4) Permanently affixed to or painted on the vessel.

(b) *Duties of operator.* The operator of a vessel that fishes for or possesses coral reef resources in or from the EEZ must—

(1) Keep the official number clearly legible and in good repair; and

(2) Ensure that no part of the fishing vessel, its rigging, fishing gear, or any other material on board obstructs the view of the official number from an enforcement vessel or aircraft.

§ 670.7 Prohibitions.

In addition to the general prohibitions specified in § 620.7 of this chapter, it is unlawful for any person to do any of the following:

(a) Fail to make a coral reef resource in or from the EEZ available for inspection, as specified in § 670.5.

(b) Falsify or fail to display and maintain vessel identification, as required by § 670.6.

(c) Fish for or possess a prohibited species in or from the EEZ, as specified in § 670.21.

(d) Use an explosive to harvest a coral reef resource in the EEZ or possess dynamite or a similar explosive substance on board a vessel, as specified in § 670.22(a).

(e) Use a chemical, plant, or plant derived toxin to harvest a coral reef resource in the EEZ, as specified in § 670.22(b).

(f) Harvest a coral reef resource in the EEZ other than as specified in § 670.22(c).

(g) Purchase, barter, trade, or sell, or attempt to purchase, barter, trade, or sell a prohibited species harvested in the EEZ, as specified in § 670.23(a).

(h) Make any false statement, oral or written, to an authorized officer concerning the taking, catching, harvesting, landing, purchase, sale, possession, or transfer of a coral reef resource.

(i) Interfere with, obstruct, delay, or prevent by any means an investigation, search, seizure, or disposition of seized property in connection with enforcement of the Magnuson Act.

§ 670.8 Facilitation of enforcement.

See § 620.8 of this chapter.

§ 670.9 Penalties.

See § 620.8 of this chapter.

Subpart B—Management Measures

§ 670.20 Fishing year.

The fishing year for coral reef resources begins on January 1 and ends on December 31.

§ 670.21 Harvest limitations.

No person may fish for or possess a prohibited species in or from the EEZ. The taking of a prohibited species in the EEZ as incidental catch will not be considered unlawful possession of a prohibited species provided it is returned immediately to the sea in the general area of fishing.

§ 670.22 Gear restrictions.

(a) An explosive may not be used to harvest a coral reef resource in the EEZ. Dynamite or a similar explosive substance may not be possessed on board a vessel that possesses a coral reef resource in or from the EEZ.

(b) No person may use a chemical, plant, or plant derived toxin to harvest a coral reef resource in the EEZ.

(c) A coral reef resource in the EEZ may be harvested only with a hand-held dip net or slurp gun, or by hand in a manner that does not injure or destroy a coral reef resource or its habitat. For the purposes of § 670.7(f) and this paragraph (c), a hand-held slurp gun is a device that rapidly draws seawater containing fish into a self-contained chamber.

§ 670.23 Restrictions on sale or purchase.

(a) No person may purchase, barter, trade, or sell, or attempt to purchase, barter, trade, or sell a prohibited species harvested in the EEZ.

(b) A prohibited species that is sold or exchanged, or offered for sale or exchange, in Puerto Rico or the U.S. Virgin Islands will be presumed to have been harvested in the EEZ unless it is accompanied by documentation showing that it was harvested elsewhere. Such documentation must contain:

(1) The information specified in 50 CFR part 246 for marking containers or packages of fish or wildlife that are imported, exported, or transported in interstate commerce;

(2) The name and home port of the vessel, or the name and address of the individual, harvesting the prohibited species;

(3) The port and date of landing the prohibited species; and

(4) A statement signed by the person selling or exchanging, or offering for sale or exchange, the prohibited species attesting that, to the best of his or her knowledge, information, and belief, such prohibited species was harvested other than in the EEZ or the waters of Puerto Rico or the U.S. Virgin Islands.

§ 670.24 Specifically authorized activities.

The Regional Director may authorize the harvest and possession of a prohibited species in or from the EEZ for a scientific, educational, or restoration purpose and may authorize activities otherwise prohibited by the regulations in this part for the acquisition of information and data.

[Docket No. 950830223–5223–01; I.D. 082395C]

RIN 0648–AE97

Groundfish of the Bering Sea and Aleutian Islands Area; Chinook Salmon Savings Areas

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; request for comments.

SUMMARY: NMFS proposes regulations that would implement Amendment 21b to the Fishery Management Plan for the Groundfish Fishery of the Bering Sea and Aleutian Islands Area (FMP). This amendment proposes to prohibit the use of trawl gear in specified areas of the Bering Sea and Aleutian Islands (BSAI) management area through April 15 of each fishing year once a chinook salmon bycatch of 48,000 fish has been reached in the BSAI management area trawl fisheries. This action is necessary to limit chinook salmon bycatch in the BSAI management area and is intended to promote the goals and objectives of the FMP.

DATES: Comments on the FMP amendment must be received by October 20, 1995.

ADDRESSES: Comments may be sent to Ronald J. Berg, Chief, Fisheries Management Division, Alaska Region, NMFS, P.O. Box 21668, Juneau, AK, 99802, Attention: Lori Gravel, or delivered to the Federal Building, 709 West 9th Street, Juneau, AK. Copies of Amendment 21b and the environmental assessment/regulatory impact review/initial regulatory flexibility analysis (EA/RIR/IRFA) prepared for Amendment 21b are available from the North Pacific Fishery Management Council, P.O. Box 103136, Anchorage, AK 99510; telephone: 907–271–2809.

FOR FURTHER INFORMATION CONTACT: Sally Bibb, 907–586–7228.

SUPPLEMENTARY INFORMATION: Fishing for groundfish by U.S. vessels in the exclusive economic zone of the BSAI management area is managed by NMFS according to the FMP. The FMP was prepared by the North Pacific Fishery Management Council (Council) under the Magnuson Fishery Conservation and Management Act (16 U.S.C. 1801 *et seq.*) (Magnuson Act), and is implemented by regulations governing the U.S. groundfish fisheries at 50 CFR parts 675 and 676. General regulations that also pertain to U.S. fisheries are codified at 50 CFR part 620.

This action proposes regulations to implement Amendment 21b to the FMP. If approved by NMFS, this amendment would prohibit the use of trawl gear in specified areas of the BSAI management area that historically contributed to relatively high chinook salmon bycatch rates during winter months.

Chinook salmon are caught incidentally in trawl fisheries in the BSAI management area. They are a prohibited species in the trawl fisheries and must be discarded after being counted by a NMFS-certified observer.

During the foreign fisheries, the estimated chinook salmon bycatch reached a high of 115,000 salmon in 1980. As a result, the foreign fleet was put on a bycatch reduction schedule starting at 65,000 chinook salmon and decreasing to 16,500 chinook by 1986. According to reported bycatch, the foreign fleet did not exceed the reduction schedule bycatch level in any year.

The domestic groundfish trawl fleet has caught the majority of the chinook salmon bycatch since 1987. Chinook salmon bycatch exceeded 20,000 fish in 1987, 1988, and 1989 and exceeded 40,000 fish in 1991, 1992, 1993, and 1994. Estimated chinook salmon bycatch in the domestic trawl fisheries from 1990 to the present is summarized below:

Year	No. of Chinook
1990	13,990
1991	48,821
1992	41,903
1993	45,964
1994	44,437
[1] 1995	17,701

[1] Preliminary through 7/29/95.

Observer data from the foreign, joint-venture, and domestic trawl fisheries for pollock and Pacific cod were examined for seasonal and spacial patterns in chinook salmon bycatch and groundfish catch. The pollock and Pacific cod fisheries were selected because nearly all chinook salmon bycatch occurs in these fisheries (92 percent in 1994). These data showed that chinook salmon bycatch was largely associated with groundfish catches along the 200-m contour (continental shelf break), in the "horseshoe" area of the contour, and north of Unimak Island. Chinook salmon bycatch did not extend, for the most part, far from the contour, from the horseshoe, or from north of Unimak Island. In addition, analysis of haul-by-haul observer data showed that chinook salmon bycatch rates were higher in the winter months—from September or October through April.

Analysis of scale patterns, tagging study results, and parasite information indicates that from about 50 percent to over 90 percent of the chinook salmon encountered in the Bering Sea are of Western Alaskan origin. Therefore, chinook salmon bycatch likely reduces the number of chinook salmon available for escapement and subsistence, commercial, and recreational fisheries in Western Alaska and elsewhere.

Salmon fishery managers have been concerned about the health of chinook salmon stocks on the Yukon River, Kuskokwim River, and portions of Bristol Bay, where minimum escapement goals in several systems were not met in the mid- and late-1980's. Although escapement has improved in recent years, these goals are only being met through careful management of directed fisheries by time and area and through gear restrictions.

Chinook salmon is one of the major food items of the Yup'ik Eskimo and Athabaskan Indians of Western and Interior Alaska and plays an important role in supporting the indigenous cultures and mixed, subsistence-cash socioeconomic systems of these peoples. In addition, commercial and recreational fishing provides an important source of income in Western Alaska communities. Further description of the biological, economic, and cultural importance of chinook salmon in Western Alaska is contained in the EA/RIR/IRFA (see **ADDRESSES**).

The Council began developing alternatives for chinook salmon bycatch management in the domestic groundfish trawl fisheries in 1992 under Amendment 21 to the FMP. A draft analysis was released for public review in January 1993. However, in April 1993, the Council decided to separate the chinook salmon bycatch management alternatives; identify them as Amendment 21b; and postpone action to allow public review of a Vessel Incentive Program and industry development of the Salmon Research Foundation. During its June 1993 meeting, the Council voted to endorse the Salmon Research Foundation (SRF), a non-profit corporation that uses income generated from a $20 per chinook salmon assessment to develop a salmon bycatch avoidance program and to fund research on the origin of salmon caught in the trawl fisheries. In 1994, the SRF developed a program to disseminate inseason observer data and other information about individual vessel chinook salmon bycatch to the trawl fleet. The intent of this program was to provide vessel operators timely information to help reduce salmon bycatch rates. The long-term effectiveness of the SRF in reducing chinook salmon bycatch is difficult to evaluate, given the short time it has been in operation.

In June 1993, the Council voted to recommend the issuance of regulations to: (1) Prohibit the discard of salmon until the number of salmon are determined by a NMFS-certified observer, (2) implement data gathering and analysis of bycatch patterns, and (3) require posting on the NMFS bulletin board of salmon bycatch numbers for each vessel. These regulations became effective May 20, 1994 (59 FR 18575, April 20, 1994).

In the meantime, the Council continued to consider additional chinook salmon bycatch management alternatives, including a chinook salmon prohibited species catch (PSC) limit and closures in times or areas of historic high salmon bycatch. PSC limits ranging from 8,000 to 48,000 chinook salmon were analyzed. The lower bound of this range was determined by applying the lowest average annual chinook salmon bycatch rate since 1980 (0.004 salmon per metric ton of groundfish in 1986) to current BSAI management area groundfish harvests. Additional PSC limits analyzed included annual bycatch rates of 0.008 (16,000 salmon), 0.012 (24,000 salmon), and 0.024 (48,000 salmon).

The Council considered nine alternatives or options for area closures once a PSC limit was reached, including the entire BSAI management area, specific Federal statistical areas, a 30 mile-wide (48,280 m) buffer strip along the 200-m contour, and specific ½° lat. by 1° long. blocks. In addition, alternatives or options to close these areas during specific seasons, for specific directed fisheries, or in the absence of a PSC limit also were considered. Chinook Salmon Savings Areas.

At its April 1995 meeting, the Council voted to recommend an FMP amendment that would close three non-contiguous areas of the BSAI management area comprised of nine ½° lat. by 1° long. blocks to all trawling through April 15, once an annual PSC limit of 48,000 chinook salmon was reached. The areas would reopen April 15 for the remainder of the year, regardless of the amount of chinook salmon bycatch. Accounting of chinook salmon towards the bycatch limit would start at the beginning of each fishing year (January 1).

The Chinook Salmon Savings Areas (CHSSA) are:

(1) The area defined by straight lines connecting the following coordinates in the order listed:

56° 30′ N., 171° 00′ W.;
56° 30′ N., 169° 00′ W.;
56° 00′ N., 169° 00′ W.;
56° 00′ N., 171° 00′ W.; and
56° 30′ N., 171° 00′ W.

(2) The area defined by straight lines connecting the following coordinates in the order listed:

54° 00′ N., 171° 00′ W.;
54° 00′ N., 170° 00′ W.;
53° 00′ N., 170° 00′ W.;
53° 00′ N., 171° 00′ W.; and
54° 00′ N., 171° 00′ W.

(3)The area defined by straight lines connecting the following coordinates in the order listed:

56° 00′ N., 165° 00′ W.;
56° 00′ N., 164° 00′ W.;
5° 00′ N., 164° 00′ W.;
55° 00′ N., 165° 00′ W.;
54° 30′ N., 165° 00′ W.;
54° 30′ N., 167° 00′ W.;
55° 00′ N., 167° 00′ W.;
55° 00′ N., 166° 00′ W.;
55° 30′ N., 166° 00′ W.;
55° 30′ N., 165° 00′ W.; and
56° 00′ N., 165° 00′ W.

Data from observed trawl vessels participating in the pollock and Pacific cod fisheries from 1990 through 1993 were used to compare catch and bycatch in the CHSSA and other areas of the BSAI management area. During the high bycatch months of January through April and September through December, the CHSSA represented 52, 66, 64, and 60 percent of the chinook bycatch, and 20, 36, 38, and 49 percent of the total groundfish catch in observed hauls between 1990 and 1993. In other words, the CHSSA represented a larger share of chinook salmon bycatch relative to total groundfish catch. The importance of these areas, in terms of both groundfish catch and chinook salmon bycatch, increased between 1990 and 1993. However, the increase in groundfish catch in the areas was greater than the increase in chinook salmon bycatch over the 4-year period.

Although high chinook salmon bycatch was identified in two seasons (January through April and September through December), through analysis of observer data aggregated by month, the Council recommended a closure only from January 1 through April 15, because the majority of the chinook salmon bycatch in recent years has been caught between January and April. For example, in 1993, approximately 71 percent of the chinook salmon bycatch by observed trawl vessels in the pollock and Pacific cod fisheries in the CHSSA occurred between January and April.

Since 1990, chinook salmon bycatch between January 1 and April 15 was estimated to be:

Year	No. of Chinook by April 15
1990	11,626
1991	44,234
1992	30,703
1993	23,129
1994	37,967
[1] 1995	17,064

[1] Preliminary through 7/29/95.

Based on historical bycatch estimates, reaching the 48,000 PSC limit or closing the CHSSA in future years is not likely. In selecting this preferred alternative, the Council expressed the view that current levels of chinook salmon bycatch probably did not represent biological harm to Western Alaska chinook salmon stocks. Furthermore, existing groundfish fisheries should not be constrained in order to reduce the current level of chinook salmon bycatch. However, future increases in bycatch in the BSAI management area trawl fisheries need to be limited to prevent detrimental impact on Western Alaska chinook salmon stocks and fisheries.

If bycatch amounts before April 15 of future years exceed amounts caught in recent years, closure of the CHSSA would prevent trawlers from fishing in areas that historically represented from 20 percent to 49 percent of annual groundfish catch. Although other areas of the BSAI management area would continue to be open to trawling, vessels displaced from the CHSSA would likely incur increased operating costs and lower catch per unit effort.

Classification

Section 304(a)(1)(D) of the Magnuson Act requires NMFS to publish regulations proposed by a Council within 15 days of receipt of the FMP amendment and regulations. At this time, NMFS has not determined that the FMP amendment these rules would implement is consistent with the national standards, other provisions of the Magnuson Act, and other applicable laws. NMFS in making that determination, will take into account the data, views, and comments received during the comment period.

The Council prepared an IRFA as part of the RIR, which describes the impact this proposed rule would have on small entities, if adopted. Approximately 107 trawl catcher vessels participate in the BSAI management area groundfish fisheries. Most of these vessels are considered small entities. Closure of the CHSSA is unlikely because the PSC limit is higher than any bycatch estimate for the domestic fisheries. However, the CHSSA represent a large proportion of groundfish catch and many of these catcher vessels are likely to fish in these areas. Therefore, closure of the CHSSA could result in a significant impact on a substantial number of small entities in years of high chinook salmon bycatch. On the other hand, the absence of a mechanism to limit chinook salmon bycatch may adversely impact other small entities that rely on chinook salmon returns to Western Alaska and other areas. A copy of this analysis is available from the Council (see **ADDRESSES**).

This proposed rule has been determined to be not significant for purposes of E.O. 12866.

List of Subjects in 50 CFR Part 675

Fisheries, Reporting and recordkeeping requirements.

Dated: September 1, 1995.

Gary Matlock,

Program Management Officer, National Marine Fisheries Service.

For reasons set out in the preamble, 50 CFR part 675 is proposed to be amended as follows:

PART 675—GROUNDFISH OF THE BERING SEA AND ALEUTIAN ISLANDS AREA

1. The authority citation for part 675 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

2. In § 675.22, paragraph (i) is added to read as follows:

§ 675.22 Time and area closures.

* * * * *

(i) *Chinook Salmon Savings Areas.* When the Regional Director determines that 48,000 chinook salmon (*Oncorhynchus tshawytscha*) have been caught by vessels using trawl gear during the time period of January 1 through April 15 in the Bering Sea and Aleutian Islands management area, NMFS will prohibit fishing with trawl gear for the remainder of the period January 1 through April 15 within the following three areas:

(1) The area defined by straight lines connecting the following coordinates in the order listed:

56° 30′ N., 171° 00′ W.;
56° 30′ N., 169° 00′ W.;
56° 00′ N., 169° 00′ W.;
56° 00′ N., 171° 00′ W.; and
56° 30′ N., 171° 00′ W.

(2) The area defined by straight lines connecting the following coordinates in the order listed:

54° 00′ N., 171° 00′ W.;
54° 00′ N., 170° 00′ W.;
53° 00′ N., 170° 00′ W.;
53° 00′ N., 171° 00′ W.; and
54° 00′ N., 171° 00′ W.

(3) The area defined by straight lines connecting the following coordinates in the order listed:

56° 00′ N., 165° 00′ W.;
56° 00′ N., 164° 00′ W.;
55° 00′ N., 164° 00′ W.;
55° 00′ N., 165° 00′ W.;
54° 30′ N., 165° 00′ W.;
54° 30′ N., 167° 00′ W.;
55° 00′ N., 167° 00′ W.;
55° 00′ N., 166° 00′ W.;
55° 30′ N., 166° 00′ W.;
55° 30′ N., 165° 00′ W.; and
56° 00′ N., 165° 00′ W.

Notices

Federal Register

Vol. 60, No. 174

Friday, September 8, 1995

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Forms Under Review by Office of Management and Budget

August 31, 1995.

The Department of Agriculture has submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35) since the last list was published. This list is grouped into new proposals, revisions, extension, or reinstatements. Each entry contains the following information:

(1) Agency proposing the information collection; (2) Title of the information collection; (3) Form number(s), if applicable; (4) Who will be required or asked to report; (5) An estimate of the number of responses; (6) An estimate of the total number of hours needed to provide the information; (7) Name and telephone number of the agency contact person.

Questions about the items in the listing should be directed to the agency person named at the end of each entry. Copies of the proposed forms and supporting documents may be obtained from: Department Clearance Officer, USDA, OIRM, room 404–W, Jamie L. Whitten Bldg., Washington, DC 20250, (202) 690–2118.

Forest Service

Northwest Sacramento Province Advisory Committee (PAC)

AGENCY: Forest Service, USDA.

ACTION: Notice of meeting.

SUMMARY: The Northwest Sacramento Province Advisory Committee will meet on September 19 and 20, 1995, for a field trip and meeting. The field trip portion of the meeting will start at 1:00 p.m. September 19, at the Red Bluff Community Center, 1500 South Jackson Street, Red Bluff, CA. The focus of the afternoon field trip will be the Deer Creek Watershed Conservancy. Agenda items will include: (1) An overview on the reasons for initiating the Conservancy organization; (2) Description of current issues and strategies to address those issues; (3) Description of opportunities for enhancement of the Deer Creek Watershed; (4) Overview of elements important to organizational formation, decision making processes, and strategies to help ensure future continuation of the Conservancy. The field trip will return to the Red Bluff Community between 4:30 p.m. and 5:30 p.m. The meeting on September 20, 1995, will begin at 8:00 a.m. at the Red Bluff Community Center. Agenda topics include: (1) Old business from the August '95 meeting; (2) Report on the Interagency Advisory Committee; (3) Report by Sub-communittee for the Timber Salvage Act, (4) Response by Federal agency representatives on key issues related to implementation of the Northwest Record of Decision; (5) Staff reports on Key Issue(s) action items; (6) Development of issue priorities (including the top six issues identified by the Advisory Committee during their May '95 meeting and the key issues identified by Federal agency representatives; (7) Overview on Streamlined Process for Watershed Analysis, (8) Public participation to be available between 3:20 p.m. and 3:50 p.m.; (9) Agenda for next meeting. All Northwest Sacramento Province Advisory Committee meetings are open to the public. Interested citizens are encouraged to attend.

FOR FURTHER INFORMATION CONTACT: Direct questions regarding this meeting to David E. Howell, Designated Federal Official, Northwest Sacramento Province, USDI, Bureau of Land Management, 2550 North State Street, Ukiah, CA 95482–3023, (707 468–4000), or Duane Lyon, Province Coordinator, USDA, Shasta Trinity National Forests, 2400 Washington, Redding, CA, 96001 (916–246–5499).

Dated: August 30, 1995.

David E. Howell,

Designated Federal Official, Northwest Sacramento Province.

ARCTIC RESEARCH COMMISSION

Meetings

August 31, 1995.

Notice is hereby given that the Arctic research Commission will hold its 40th Meeting in Anchorage, Alaska, on September 25–26, 1995. On Monday, September 25, a Business Session open to the public will convene at 9:00 a.m. on the first floor of the Anchorage Museum of History and Art, 121 W. Seventh Avenue. Agenda items include: (1) Chairman's Report; (2) Agency Reports; (3) SCICEX–95 Presentation; (4) CIFAR Presentation. On Tuesday, September 26, the Business Session will reconvene at 9:00 a.m. Agenda items for this session include: (1) Travellers Reports; (2) Correspondence; (3) New Business; an Executive Session will follow the close of the Business Session.

Any person planning to attend this meeting who requires special accessibility features and/or auxiliary aids, such as sign language interpreters, must inform the Commission in advance of those needs.

Contact person for more information: Garrett W. Brass, Executive Director, Arctic Research Commission, 703–525–0111 or TDD 703–306–0090.

Garrett W. Brass,

Executive Director.

BILLING CODE 7555–01–M

DEPARTMENT OF COMMERCE

Agency Form Under Review by the Office of Management and Budget

DOC has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: Bureau of the Census.

Title: Annual Trade Survey.

Form Number(s): B–450, B–451.

Agency Approval Number: 0607–0195.

Type of Request: Extension of the expiration date of a currently approved collection.

Burden: 2,036 hours.

Number of Respondents: 5,200.

Avg Hours Per Response: 23 minutes.

Needs and Uses: The Bureau of the Census conducts the Annual Trade Survey to collect annual sales, purchases, year–end inventory, inventory valuation methods, legal form of organization, cost of goods sold, and gross margin data from a sample of wholesalers who are contained in the Census Bureau's Standard Statistical Establishment List (SSEL). We tabulate the annual wholesale trade data to benchmark data from our Monthly Wholesale Trade Survey. The Bureau of Economic Analysis incorporates the wholesale trade data in its calculations of the gross domestic product. Other government agencies and businesses use the published estimates to gauge the current trends of the economy.

Affected Public: Business or other for–profit.

Frequency: Annually.

Respondent's Obligation: Mandatory.

OMB Desk Officer: Maria Gonzalez, (202) 395–7313.

Copies of the above information collection proposal can be obtained by calling or writing Gerald Tache, DOC Forms Clearance Officer, (202) 482–3271, Department of Commerce, room 5312, 14th and Constitution Avenue, NW, Washington, DC 20230.

Written comments and recommendations for the proposed information collection should be sent to Maria Gonzalez, OMB Desk Officer, room 10201, New Executive Office Building, Washington, DC 20503.

Dated: September 1, 1995.

Gerald Tache,

Departmental Forms Clearance Officer, Office of Management and Organization.

[FR Doc. 95–22288 Filed 9–7–95; 8:45 am]

BILLING CODE 3510–07–F

Agency Form Under Review by the Office of Management and Budget

DOC has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: Bureau of the Census.

Title: Boundary and Annexation Survey.

Form Number(s): BAS–1, 1A, 2, 2A, 3, 3A, 4, 33L, 33LM.

Agency Approval Number: 0607–0151.

Type of Request: Revision of a currently approved collection.

Burden: 10,930 hours.

Number of Respondents: 9,870.

Avg Hours Per Response: 1 hour and 7 minutes.

Needs and Uses: The Census Bureau conducts the Boundary and Annexation Survey (BAS) annually to collect information on the creation of newly incorporated municipalities and minor civil divisions (MCDs), the dissolution of incorporated municipalities and MCDs, and changes to the boundaries of counties, incorporated municipalities, and MCDs. The survey provides accurate identification of geographic areas for the decennial and economic censuses and support for the annual population estimates program. It is also used to update the municipal, MCD, and county inventory for the Federal Information Processing Standards (FIPS) program at the U.S. Geological Survey and the National Institute of Standards and Technology. Other Federal Agencies use BAS results in their legislative programs. This request is for a revision only to the universe of respondents to the BAS. We are increasing the number to support the economic and decennial census.

Affected Public: State, local or tribal government.

Frequency: Annually.

Respondent's Obligation: Voluntary.

OMB Desk Officer: Maria Gonzalez, (202) 395–7313.

Copies of the above information collection proposal can be obtained by calling or writing Gerald Tache, DOC Forms Clearance Officer, (202) 482–3271, Department of Commerce, room 5312, 14th and Constitution Avenue, NW, Washington, DC 20230.

Written comments and recommendations for the proposed information collection should be sent to Maria Gonzalez, OMB Desk Officer, room 10201, New Executive Office Building, Washington, DC 20503.

Dated: September 1, 1995.

Gerald Tache,

Departmental Forms Clearance Officer, Office of Management and Organization.

[FR Doc. 95–22289 Filed 9–7–95; 8:45 am]

BILLING CODE 3510–07–F

Agency Form Under Review by the Office of Management and Budget

DOC has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: Bureau of the Census.

Title: Monthly Wholesale Trade Survey.

Form Number(s): B–310.

Agency Approval Number: 0607–0190.

Type of Request: Extension of the expiration date of a currently approved collection.

Burden: 6,150 hours.

Number of Respondents: 5,985.

Avg Hours Per Response: 9 and one–half minutes.

Needs and Uses: The Bureau of the Census conducts the Monthly Wholesale Trade Survey to obtain sales and inventory data from a sample of merchant wholesalers. From the data we gather, we produce statistics on wholesale sales, end–of–month inventories, methods of inventory valuation, and stock/sales ratios. The Bureau of Economic Analysis uses these statistics in its calculations of the gross domestic product (GDP) and to improve the reliability of inventory adjustments applied in the quarterly GDP estimates. The Bureau of Labor Statistics uses these statistics as input to its Producer Price Indexes and in developing productivity measurements. Other government agencies and businesses use these statistics for planning and development and to gauge the current trends of the economy. Current data on wholesale trade also enable us to make comparisons with the five–year wholesale census data.

Affected Public: Business or other for–profit.

Frequency: Monthly.

Respondent's Obligation: Voluntary.

OMB Desk Officer: Maria Gonzalez, (202) 395–7313.

Copies of the above information collection proposal can be obtained by calling or writing Gerald Tache, DOC Forms Clearance Officer, (202) 482–3271, Department of Commerce, room 5312, 14th and Constitution Avenue, NW, Washington, DC 20230.

Written comments and recommendations for the proposed information collection should be sent to Maria Gonzalez, OMB Desk Officer, room 10201, New Executive Office Building, Washington, DC 20503.

Dated: September 1, 1995.

Gerald Tache,

Departmental Forms Clearance Officer, Office of Management and Organization.

[FR Doc. 95–22290 Filed 9–7–95; 8:45 am]

BILLING CODE 3510–07–F

Agency Form Under Review by the Office of Management and Budget

DOC has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: Bureau of the Census.

Title: Congressional Data User Survey.

Form Number(s): 628, 628(L), 630, 630(L).

Agency Approval Number: 0607–0789.

Type of Request: Revision of a currently approved collection.

Burden: 79 hours.

Number of Respondents: 952.

Avg Hours Per Response: 5 minutes.

Needs and Uses: In October 1993, the Census Bureau, with approval from OMB, surveyed all members of Congress to determine how we can better meet their needs for Census Bureau data. We later obtained OMB clearance to survey all Congressional committees for the same purpose. However, plans for surveying Congressional committees were postponed. The Census Bureau now requests OMB clearance to again survey all current members of Congress and the various committees and subcommittees of Congress. The survey will identify which Congressional members and committees/subcommittees use or do not use our data, how the data are used, which would like a briefing on how to use Census Bureau data, and the medium they prefer, i.e. published reports, CD ROM, internet. We plan to conduct this survey every two years as new members are elected and new committees/subcommittees are formed. This information is needed to determine how the Census Bureau can revise and improve the current program it uses to disseminate data to members and committees/subcommittees of Congress.

Affected Public: Individuals or households.

Frequency: Biannually (every 2 years).

Respondent's Obligation: Voluntary.

OMB Desk Officer: Maria Gonzalez, (202) 395–7313.

Copies of the above information collection proposal can be obtained by calling or writing Gerald Tache, DOC Forms Clearance Officer, (202) 482–3271, Department of Commerce, room 5312, 14th and Constitution Avenue, NW, Washington, DC 20230.

Written comments and recommendations for the proposed information collection should be sent to Maria Gonzalez, OMB Desk Officer, room 10201, New Executive Office Building, Washington, DC 20503.

Dated: September 1, 1995.

Gerald Tache,

Departmental Forms Clearance Officer, Office of Management and Organization.

[FR Doc. 95–22291 Filed 9–7–95; 8:45 am]

BILLING CODE 3510–07–F

Agency Form Under Review by the Office of Management and Budget

DOC has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: Bureau of the Census.

Title: Business and Professional Classification Report.

Form Number(s): B–625(97).

Agency Approval Number: 0607–0189.

Type of Request: Revision of a currently approved collection.

Burden: 9,101 hours.

Number of Respondents: 42,000.

Avg Hours Per Response: 13 minutes.

Needs and Uses: The Bureau of the Census conducts the Business and Professional Classification Report to collect sales and other information from a sample redrawn every quarter of retail, wholesale, service, and unclassified businesses recently assigned Federal Employer Identification numbers (EIN). We are informed of the existence of these new businesses from lists provided by the Internal Revenue Service and the Social Security Administration. From the information we collect in this survey, we determine an appropriate measure of size, company organization and establishment information, taxable or tax–exempt status, wholesale inventories, type of operation, and assign a new or more refined kind–of–business classification. We use this information to include these businesses in our retail, wholesale, and service surveys. This keeps the sampling frames for our current business surveys up–to–date with the business universe. This request for revision revises the data collection form by removing questions that are no longer needed and simplifying the wording and format of the essential questions.

Affected Public: Businesses or other for–profit, Not–for–profit institutions.

Frequency: Annually.

Respondent's Obligation: Voluntary.

OMB Desk Officer: Maria Gonzalez, (202) 395–7313.

Copies of the above information collection proposal can be obtained by calling or writing Gerald Tache, DOC Forms Clearance Officer, (202) 482–3271, Department of Commerce, room 5312, 14th and Constitution Avenue, NW, Washington, DC 20230.

Written comments and recommendations for the proposed information collection should be sent to Maria Gonzalez, OMB Desk Officer, room 10201, New Executive Office Building, Washington, DC 20503.

Dated: September 1, 1995.

Gerald Tache,

Departmental Forms Clearance Officer, Office of Management and Organization.

BILLING CODE 3510–07–F

Bureau of Export Administration

Joint Meeting of the Computer Systems Technical Advisory Committee Electronics Technical Advisory Committee Telecommunications Equipment Technical Advisory Committee; Notice of Partially Closed Meeting

A joint meeting of the Computer Systems Technical Advisory Committee, the Electronics Technical Advisory Committee, and the Telecommunications Equipment Technical Advisory Committee will be held September 28, 1995, 9 a.m., Herbert C. Hoover Building, room 1617–M2, 14th Street and Pennsylvania Avenue NW., Washington, DC. These Committees advise the Office of the Assistant Secretary for Export Administration with respect to technical questions that affect the level of export controls applicable to equipment and technology in the fields of computers, electronics, and telecommunications.

Agenda

General Session

1. Introductions and presentations by the public.
2. Update on technical advisory committee reorganization.
3. Presentation on Asynchronous Transfer Mode (ATM) technology.
4. Discussion on the export control of cryptography.
5. Nomination of candidates for future election of Chairman of joint technical advisory committee meetings.

Executive Session

6. Discussion of matters properly classified under Executive Order 12356, dealing with U.S. export control programs and strategic criteria related thereto.

The General Session of the meeting will be open to the public and a limited number of seats will be available. To the extent time permits, members of the public may present oral statements to the Committee. Written statements may be submitted at any time before or after the meeting. However, to facilitate distribution of public presentation materials to the Committee members, the Committee suggests that you forward your public presentation materials or comments at least one week before the meeting to the address listed below: Ms. Lee Ann Carpenter, TAC Unit/OAS/EA, room 3886C, Bureau of Export Administration, U.S. Department of Commerce, Washington, DC 20230.

The Assistant Secretary for Administration, with the concurrence of the delegate of the General Counsel, formally determined on January 6, 1994, pursuant to section 10(d) of the Federal Advisory Committee Act, as amended, that the series of meetings or portions of meetings of these Committees and of any Subcommittees thereof, dealing with the classified materials listed in 5 U.S.C. 552(c)(1) shall be exempt from the provisions relating to public meetings found in section 10(a)(1) and (a)(3), of the Federal Advisory Committee Act. The remaining series of meetings or portions thereof will be open to the public. A copy of the Notice of Determination to close meetings or portions of meetings of these Committees is available for public inspection and copying in the Central Reference and Records Inspection Facility, room 6020, U.S. Department of Commerce, Washington, DC. For further information or copies of the minutes call Lee Ann Carpenter, 202–482–2583.

Dated: August 31, 1995.

Lee Ann Carpenter,

Director, Technical Advisory Committee Unit.

BILLING CODE 3510–DT–M

International Trade Administration

Initiation of Antidumping Duty Administrative Reviews

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of Initiation of Antidumping Duty Administrative Reviews of Cold-Rolled and Corrosion Resistant Carbon Steel Flat Products and Certain Cut-To-Length Carbon Steel Plate from Various Countries.

SUMMARY: The Department of Commerce (the Department) has received requests to conduct administrative reviews of antidumping duty orders on cold-rolled and corrosion resistant carbon steel flat products and certain cut-to-length carbon steel plate from various countries with August anniversary dates. In accordance with the Department's Regulations, we are initiating these administrative reviews.

EFFECTIVE DATE: September 8, 1995.

FOR FURTHER INFORMATION CONTACT: Linda Ludwig or Jean Kemp, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW, Washington, DC 20230, telephone: (202) 482–3833 or 482–4037, respectively.

SUPPLEMENTARY INFORMATION:

Background

The Department has received timely requests, in accordance with 19 C.F.R. 353.22(a) and 355.22(a) (1994), for administrative reviews of various antidumping duty orders with August anniversary dates.

In contrast to the investigation and first administrative review, we are not establishing a lead case for each country, because there are fewer products under antidumping duty orders than were included in the investigation and we believe the normal procedures will be more convenient for analysts and interested parties. Parties should file their submissions under the case numbers for the appropriate country and class or kind of merchandise listed below. In addition, having found them unnecessary and duplicative, the Department is eliminating the General Issue files for this review.

Initiation of Reviews

In accordance with sections 19 C.F.R. 353.22(c) and 355.22(c), we are initiating administrative reviews of the following antidumping duty orders. We intend to issue the final results of these reviews not later than August 31, 1996. The following list consists of administrative reviews requested. However, the Department may determine at a later date to collapse some related parties.

BILLING CODE 3510–DS–P

National Oceanic and Atmospheric Administration

Notice to Extend the Time Period for the Area to be Temporarily Avoided by the Public During Coral Rubble and Ship Debris Removal Activities in the Looe Key National Marine Sanctuary, Now Part of the Florida Keys National Marine Sanctuary

AGENCY: Sanctuaries and Reserves Division (SRD), Office of Ocean and Coastal Resource Management (OCRM), National Ocean Service (NOS), National Oceanic and Atmospheric Administration (NOAA), Department of Commerce (DOC).

ACTION: Notice of extension of time period.

SUMMARY: The National Oceanic and Atmospheric Administration (NOAA), the U.S. Army Corps of Engineers (COE), and authorized contractors will be conducting coral rubble and ship debris removal activities to prevent and minimize the destruction, or loss of, or injury to Sanctuary resources. The coral rubble and ship debris were generated as a result of the August 10 to 12, 1994, R/V *Columbus Iselin* grounding incident within the Looe Key National Marine Sanctuary (Looe Key NMS), now part of the Florida Keys National Marine Sanctuary (Florida Keys NMS).

To ensure the protection of life and property during these complex activities the public is advised to avoid the area due to the presence of heavy equipment (i.e., barge and crane) and increased localized boat traffic. NOAA requested on August 25, 1995 (60 FR 44307) that Sanctuary users temporarily avoid an area approximately 900 square feet marked by visible construction buoys from on or about August 23 and August 31, 1995. The area is in the vicinity of 24°37′30″ N, 81°24′23″ W, a bank reef located 7 nautical miles (12.9 km) off the southwest tip of Big Pine Key, Florida.

Due to recent tropical storms and hurricanes in the Greater Caribbean and Florida peninsula, activities to remove the coral rubble and ship debris have been delayed. This notice extends the request for the public to temporarily avoid the area until September 15, 1995.

FOR FURTHER INFORMATION CONTACT:

Any comments on the establishment of the area to be temporarily avoided may be sent at any time during or after the effective dates specified, to Dr. Charles M. Wahle, Chief, Technical Projects Branch, Sanctuaries and Reserves Division, National Oceanic and Atmospheric Administration, 1305 East West Highway, SSMC4, 12th Floor, Silver Spring, Maryland, 20910. Telephone number: 301–713–3145 ext. 156.

Locations and Boundaries of Temporary Avoidance Area

The temporary avoidance area is located approximately 7 nautical miles (12.9 kilometers) offshore the southwest tip of Big Pine Key, Florida (24°37′ N, 81° W). The total area to be temporarily avoided is approximately 900 square feet, and is less than one percent of the total area of the Looe Key NMS. The boundary of this area will be marked by visible construction buoys.

The area to be temporarily avoided is bounded by the following coordinates:

Latitude	*Longitude*
A. 24°32′49.5″ N	81°24′25.6″ W
B. 24°32′49.5″ N	81°24′22.4″ W
C. 24°32′25.3″ N	81°24′22.4″ W
D. 24°32′25.3″ N	81°24′25.6″ W

Dates

The area to be temporarily avoided will be in effect until September 15, 1995, or until the construction marker buoys are removed at NOAA's direction if the work is completed prior to September 15, 1995. Public notice of the area to be temporarily avoided will be provided through the **Federal Register**, local news media, and posting of placards on bulletin boards in public areas in Big Pine Key and at Bahia Honda State Park.

Notice of the removal of the area to be temporarily avoided will be issued by NOAA once the rubble and ship debris removal activities are completed.

Dated: September 1, 1995.

W. Stanley Wilson,

Assistant Administrator for Ocean Services and Coastal Zone Management.

BILLING CODE 3510–08–M

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

Procurement List Proposed Additions

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Proposed Additions to Procurement List.

SUMMARY: The Committee has received proposals to add to the Procurement List a commodity and a service to be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities.

COMMENTS MUST BE RECEIVED ON OR BEFORE: October 9, 1995.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, Crystal Square 3, suite 403, 1735 Jefferson Davis Highway, Arlington, Virginia 22202–3461.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman (703) 603–7740.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a) (2) and 41 CFR 51–2.3. Its purpose is to provide interested persons an opportunity to submit comments on the possible impact of the proposed actions.

If the Committee approves the proposed additions, all entities of the Federal Government (except as otherwise indicated) will be required to procure the commodity and service listed below from nonprofit agencies employing persons who are blind or have other severe disabilities.

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the commodity and service to the Government.
2. The action will result in authorizing small entities to furnish the commodity and service to the Government.
3. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46–48c) in connection with the commodity and service proposed for addition to the Procurement List.

Comments on this certification are invited. Commenters should identify the statement(s) underlying the certification on which they are providing additional information.

The following commodity and service have been proposed for addition to Procurement List for production by the nonprofit agencies listed:

Commodity

Basin, Wash
6530–01–166–9035
NPA: The Arc of St. Clair County, Port Huron, Michigan

Service

Janitorial/Custodial
Morgantown U.S. Army Reserve Center
Route 19 South, Comfort Inn Drive, Morgantown, West Virginia
NPA: PACE Training & Evaluation Center, Inc., Star City, West Virginia

E. R. Alley, Jr.,

Deputy Executive Director.

BILLING CODE 6820–33–P

Procurement List Proposed Addition and Deletions

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Proposed Addition to and Deletions from Procurement List.

SUMMARY: The Committee has received a proposal to add to the Procurement List a commodity to be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities, and to delete commodities and a service previously furnished by such agencies.

COMMENTS MUST BE RECEIVED ON OR BEFORE: October 9, 1995.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, Crystal Square 3, suite 403, 1735 Jefferson Davis Highway, Arlington, Virginia 22202–3461.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman (703) 603–7740.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a) (2) and 41 CFR 51–2.3. Its purpose is to provide interested persons an opportunity to submit comments on the possible impact of the proposed actions.

Addition

If the Committee approves the proposed addition, all entities of the Federal Government (except as otherwise indicated) will be required to procure the commodity listed below from nonprofit agencies employing persons who are blind or have other severe disabilities.

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the commodity to the Government.

2. The action does not appear to have a severe economic impact on current contractors for the commodity.

3. The action will result in authorizing small entities to furnish the commodity to the Government.

4. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46–48c) in connection with the commodity proposed for addition to the Procurement List.

Comments on this certification are invited. Commenters should identify the statement(s) underlying the certification on which they are providing additional information.

The following commodity has been proposed for addition to Procurement List for production by the nonprofit agency listed:

Case, Flag
8345–00–178–8495
NPA: North Bay Rehabilitation Services, Inc., San Rafael, California

Deletions

If the Committee approves the proposed deletions, all entities of the Federal Government will no longer be required to procure the commodities and service listed below from nonprofit agencies employing people who are blind or have other severe disabilities.

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities.

2. The action does not appear to have a severe economic impact on future contractors for the commodities and service.

3. The action will result in authorizing small entities to furnish the commodities and service to the Government.

4. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46–48c) in connection with the commodities and service proposed for deletion from the Procurement List.

The following commodities and service have been proposed for deletion from the Procurement List:

Commodities

Harness, Head
4240–01–M14–0174

Modification Kit, Harness Head
4240–01–220–3201

Duplicate Diazo Microfiche Program
7690–00–NSH–0019
(Requirements for the Department of Health and Human Services, National Institute of Safety and Health, Cincinnati, Ohio)

Service

Sanding and Oiling of Picnic Tables
Deschutes National Forest
Bend Ranger District
Bend, Oregon

E. R. Alley, Jr.

Deputy Executive Director.

[FR Doc. 95–22363 Filed 9–7–95; 8:45 am]

BILLING CODE 6820–33–P

Procurement List Additions

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Additions to the Procurement List.

SUMMARY: This action adds to the Procurement List a commodity and services to be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities.

EFFECTIVE DATE: October 9, 1995.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, Crystal Square 3, suite 403, 1735 Jefferson Davis Highway, Arlington, Virginia 22202–3461.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman (703) 603–7740.

SUPPLEMENTARY INFORMATION: On June 23, July 14, 1995, the Committee for Purchase From People Who Are Blind or Severely Disabled published notices (60 F.R. 32658 and 36266) of proposed additions to the Procurement List. After consideration of the material presented to it concerning capability of qualified nonprofit agencies to provide the commodity and services, fair market price, and impact of the additions on the current or most recent contractors, the Committee has determined that the commodity and services listed below are suitable for procurement by the Federal Government under 41 U.S.C. 46–48c and 41 CFR 51–2.4.

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the commodity and services to the Government.

2. The action does not appear to have a severe economic impact on current contractors for the commodity and services.

3. The action will result in authorizing small entities to furnish the commodity and services to the Government.

4. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46–48c) in connection with the commodity and services proposed for addition to the Procurement List.

Accordingly, the following commodity and services are hereby added to the Procurement List:

Commodity

Cleaning Compound, Aircraft Surface
6850–00–005–5305

Services

Janitorial/Custodial
Defense Logistics Agency
Defense Fuel Region West, Building 100, San Pedro, California

Laundry Service
Medical Center
Wright-Patterson Air Force Base, Ohio
Mailroom Operation
Internal Revenue Service
55 Market Street, San Jose, California

This action does not affect current contracts awarded prior to the effective date of this addition or options exercised under those contracts.

E. R. Alley, Jr.,

Deputy Executive Director.

BILLING CODE 6820–33–P

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Adjustment of Import Restraint Limits for Certain Wool Textile Products Produced or Manufactured in Bulgaria

September 1, 1995.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs adjusting limits.

EFFECTIVE DATE: September 11, 1995.

FOR FURTHER INFORMATION CONTACT: Naomi Freeman, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482–4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 927–5850. For information on embargoes and quota re-openings, call (202) 482–3715.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

The current limits for certain categories are being adjusted, variously, for swing, carryover and recrediting of unused carryforward.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 59 FR 65531, published on December 20, 1994). Also see 59 FR 62716, published on December 6, 1994.

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

Rita D. Hayes,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

September 1, 1995.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: This directive amends, but does not cancel, the directive issued to you on November 29, 1994, by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports of certain wool textile products, produced or manufactured in Bulgaria and exported during the twelve-month period beginning on January 1, 1995 and extending through December 31, 1995.

Effective on September 11, 1995, you are directed to adjust the limits for the following categories, pursuant to the current bilateral textile agreement between the Governments of the United States and the Republic of Bulgaria:

Category	Twelve-month restraint limit[1]
410	735,102 square meters.
435	21,830 dozen.
448	21,830 dozen.

[1] The limits have not been adjusted to account for any imports exported after December 31, 1994.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception of the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Rita D. Hayes,

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 95–22371 Filed 9–7–95; 8:45 am]

BILLING CODE 3510–DR–F

Adjustment of an Import Limit for Certain Man-Made Fiber Textile Products Produced or Manufactured in the People's Republic of China

September 1, 1995.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs increasing a limit.

EFFECTIVE DATE: September 6, 1995.

FOR FURTHER INFORMATION CONTACT: Jennifer Aldrich, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482–4212. For information on the quota status of this limit, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 927–6703. For information on embargoes and quota re-openings, call (202) 482–3715.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

The current limit for Category 636 is being increased for carryforward.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 59 FR 65531, published on December 20, 1994). Also see 59 FR 65760, published on December 21, 1994.

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

Rita D. Hayes,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

September 1, 1995.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: This directive amends, but does not cancel, the directive issued to you on December 16, 1994, by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports of certain cotton, wool, man-made fiber, silk blend and other vegetable fiber textile products, produced or manufactured in the People's Republic of China and exported during the twelve-month period which began on January 1, 1995 and extends through December 31, 1995.

Effective on September 6, 1995, you are directed to amend further the directive dated December 16, 1994 to increase the limit for Category 636 to 546,728 dozen[1], as provided under the terms of the bilateral agreement between the Governments of the United States and the People's Republic of China.

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Rita D. Hayes,

Chairman, Committee for the Implementation of Textile Agreements.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

The current limit for Categories 331/631 is being reduced for carryforward used.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 59 FR 65531, published on December 20, 1994). Also see 60 FR 17332, published on April 5, 1995.

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the Uruguay Round Agreements Act and the Uruguay Round Agreement on Textiles and Clothing, but are designed to assist only in the implementation of certain of their provisions.

Donald R. Foote,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

August 31, 1995.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: This directive amends, but does not cancel, the directive issued to you on March 30, 1995, by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports of certain cotton, wool and man-made fiber textiles and textile products and silk blend and other vegetable fiber apparel, produced or manufactured in Malaysia and exported during the twelve-month period which began on January 1, 1995 and extends through December 31, 1995.

Effective on September 11, 1995, you are directed to amend the March 30, 1995 directive to reduce the limit for Categories 331/631 to 1,706,846 dozen pairs [1], as provided for under the terms of the Uruguay Round Agreements Act and the Uruguay Round Agreement on Textiles and Clothing.

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C.553(a)(1).

Sincerely,

Donald R. Foote,

Acting Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510–DR–F

---

[1] The limit has not been adjusted to account for any imports exported after December 31, 1994.

Adjustment of Import Limits for Certain Wool Textile Products Produced or Manufactured in the Slovak Republic

September 1, 1995.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs adjusting limits.

EFFECTIVE DATE: September 6, 1995.

FOR FURTHER INFORMATION CONTACT: Naomi Freeman, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482–4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 927–5850. For information on embargoes and quota re-openings, call (202) 482–3715.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

The current limits for certain categories are being adjusted, variously, for swing and carryforward.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 59 FR 65531, published on December 20, 1994). Also see 59 FR 30346, published on June 13, 1994; and 60 FR 17336, published on April 5, 1995.

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the Uruguay Round Agreements Act and the Uruguay Round Agreement on Textiles and Clothing, but are designed to assist only in the implementation of certain of their provisions.

Rita D. Hayes,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

September 1, 1995.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: This directive amends, but does not cancel, the directive issued to you on June 7, 1994, as amended on March 30, 1995, by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports of certain wool textile products, produced or manufactured in the Slovak Republic and exported during the twelve-month period which began on January 1, 1995 and extends through December 31, 1995.

Effective on September 6, 1995, you are directed to adjust the current limits for the following categories, as provided for under the Uruguay Round Agreements Act and the Uruguay Round Agreement on Textiles and Clothing:

Category	Adjusted twelve-month limit [1]
433	11,923 dozen.
435	15,766 dozen.
443	106,115 numbers.

[1] The limits have not been adjusted to account for any imports exported after December 31, 1994.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Rita D. Hayes,

Chairman, Committee for the Implementation of Textile Agreements.

CORPORATION FOR NATIONAL AND COMMUNITY SERVICE

Agency Information Collection Activities Under OMB Review

AGENCY: Corporation for National and Community Service (CNS).

ACTION: Information Collection Request Submitted to the Office of Management and Budget (OMB) for Review.

SUMMARY: This notice provides information about an information collection proposal by CNS, currently under review by OMB. ACTION is requesting a expedited review by OMB with final action by September 26, 1995.

DATES: OMB and ACTION will consider comments on the proposed collection of

information and recordkeeping requirements received on or before September 18, 1995. Copies of the proposed form and supporting documents may be obtained by contacting CNS.

ADDRESSES: Send comments to both—

Chuck Helfer, Study Director, CNS,
1201 New York Ave. NW.,
Washington, DC 20525

Debra Bond, Desk Officer, OMB, 3002
NEOB, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT:

Chuck Helfer at (202) 606–5000, extension 248.

SUPPLEMENTARY INFORMATION:

Office of the Corporation for National and Community Service

Issuing Notice: Training Conference Evaluation.

Title of Forms: Training Conference Evaluation.

Need and Use: CNS's legislation authorizes it to provide technical assistance to agencies and non-profit organizations which sponsor CNS programs and projects. Information gathered in this information collection will be used to plan and make changes in future training conferences for sponsors and directors of CNS programs.

Type of Request: Reinstatement of a previously approved data collection for which approval has expired.

Respondent's Obligation to Reply: Voluntary.

Frequency of Collection: Once a year.

Estimated Number of Responses: 2,687.

Average Burden Hours per Response: 0.25 hours.

Estimated Annual Reporting or Disclosure Burden: 672 hours.

Regulatory Authority: 42 U.S.C. 4993 and 42 U.S.C. 12653.

Dated: September 1, 1995.

Lance Potter,

Director, Office of Evaluation.

BILLING CODE 6050–28–M

DEPARTMENT OF DEFENSE

Corps of Engineers

Intent To Prepare a Draft Environmental Impact Statement (DEIS) for the Morganza, Louisiana, to the Gulf of Mexico Feasibility Study

AGENCY: U.S. Army Corps of Engineers, DoD.

ACTION: Notice of intent.

SUMMARY: Pursuant to Section 102(2)(C) of the National Environmental Policy Act (NEPA) of 1969, as amended, the U.S. Army Corps of Engineers (COE) will prepare a draft environmental impact statement (EIS) to analyze the direct and indirect beneficial and adverse impacts of implementing a proposed hurricane protection project in Terrebonne and Lafourche Parishes, Louisiana. The purposes of the proposed action are to provide protection to existing development from tropical storm and hurricane-induced tidal flooding such as that which occurred during Hurricane Andrew, and to protect coastal wetlands from hurricane surges in a portion of Terrebonne Parish, Louisiana. The proposed action would consist of upgrading many existing forced-drainage-system levees; using permitted and/or installed flood-control features (e.g., floodgates); constructing some new levees and water-control structures; and, closing the water-control structures and flood gates in a coordinated manner in the event of tropical storm or hurricane tidal surges.

FOR FURTHER INFORMATION CONTACT: Questions regarding the EIS may be directed to Mr. Robert Martinson, CELMN–PD–RS, U.S. Army Corps of Engineers, P.O. Box 60267, New Orleans, Louisiana 70160–0267, telephone: (504) 862–2582.

Questions regarding the proposed action may be directed to Mr. Troy Constance, CELMN–PD–FB, U.S. Army Corps of Engineers, P.O. Box 60267, New Orleans, Louisiana 70160–0267, telephone: (504) 862–2742.

SUPPLEMENTARY INFORMATION: A similar flood protection plan has been proposed by the South Terrebonne Tidewater Management and Conservation District (STTMCD). A Notice of Intent to prepare an EIS for the STTMCD plan under the COE Regulatory Program was issued on April 7, 1993 (**Federal Register**, Volume 58, Number 65, pp. 18084–18085). Because the underlying purposes of the two proposed actions are the same, and in the interest of cost effectiveness, one EIS will be prepared rather than two.

Proposed Action

The STTMCD proposed action would consist of upgrading many existing forced-drainage-system levees from near Larose at the eastern end to Waterproof on the western end; using permitted and/or installed flood-control features (e.g., floodgates) in the area; constructing some new levees and water-control structures, particularly in the Lake gates in a coordinated manner in the event of tropical storm or hurricane tidal surges. The flood gates and water control structures would normally be left open for navigation and tidal ingress and egress. Several communities, including the City of Houma, Dulac, Chauvin, and Montegut, would receive protection from the proposed action.

Alternatives

The no-action alternative must be evaluated. Additionally, several levee alignments around the Lake Boudreaux area will be evaluated, including the STTMCD plan. Non-structural solutions to protecting existing development will also be evaluated.

On May 12, 1993, the COE held a formal NEPA scoping meeting at Houma, Louisiana, for the previously announced regulatory EIS. Fifty-two individuals registered at the meeting. Questions and issues of concern were solicited at the meeting and a summary of the results was made available to participants on April 12, 1994. One of the main areas of concern brought out during the 1993 scoping was potential impacts to Lake Boudreaux, surrounding marshes, and associated marine organisms. Additional meetings with local interests from the various bayou areas will be held in the near future, and leadership and work group meetings will continue to be held to keep the public informed and involved.

The COE does not plan to hold additional formal NEPA scoping meetings at this time, but meetings will continue to be held throughout the planning process, as discussed above.

A draft EIS is scheduled to be available for public review during January 1998.

Kenneth H. Clow,

Colonel, U.S. Army, District Engineer.

[FR Doc. 95–22318 Filed 9–7–95; 8:45 am]

BILLING CODE 3710–84–M

Department of the Air Force

Notice of Intent to Prepare an EIS for a Proposed Golf Course

The Department of the Air Force is issuing this notice to advise the public that an environmental impact statement (EIS) will be prepared for a golf course adjacent to Luke Air Force Base in Arizona.

Luke Air Force Base (AFB) will prepare an EIS on a proposal to construct and operate a golf course and related facilities including a clubhouse, cart storage building, and maintenance building. The golf course will occupy 155 acres in Maricopa County, Arizona, on the northeast corner of Northern

Avenue and Reems Road west of Phoenix. The proposed site, which will soon be deeded to Luke AFB, was used for agricultural purposes in the past. Currently, the site is undergoing construction of the Dysart Drain Improvement Project, which includes a 160-acre detention basin designed to alleviate flooding of the military base property and facilities.

The project is being proposed so that the detention basin provides multiple purpose benefits. It is common practice in the Southwest to place recreational facilities, such as golf courses, in detention basins. Surveys show a high demand for golf by the Luke AFB population, which includes approximately 30,000 active duty and family members as well as military retirees and Department of Defense civilian employees that work at the base. Currently, the eligible members of the Luke AFB population have no military golf alternatives. The competitive environment for golf in the Phoenix metropolitan area make golf unaffordable to many military members as market rates range from $40 to $100 per round during winter months when weather in the area is most conducive for golf.

All potential significant environmental effects will be discussed in the EIS. These include air quality impacts from fugitive dust and various construction emissions generated during the construction period, an analysis of the potential effects caused by increased traffic volume in the area, and the potential for contamination of the detention basin by pesticides and fertilizers used in golf course maintenance.

The only alternative to this action is the no-action alternative, which leaves the site serving as a detention basin without a golf course.

The proposed action would not commence until after completion of the Dysart Drain Improvement Project, which is scheduled for 1997. It is estimated that the time frame for construction of the golf course and its related facilities would take 13 months.

Prior to any construction efforts, and accompanying preparation of the EIS, a public involvement plan will be implemented to solicit public opinion of the proposed action. A public scoping meeting is scheduled for 7:00 p.m. on Tuesday, September 12, 1995 at the Litchfield Park Recreation Center Community Room, 100 South Old Litchfield Road.

To ensure that all significant issues regarding the proposed action and the EIS are identified, comments and questions are invited from all interested parties, and should be addressed to Luke AFB at the address below:

Lisa Q. Carlson, Natural Resources Planner, 56 CES/CEVN, 14002 West Marauder Street, Luke Air Force Base, Arizona 85309–1125, Telephone (602) 856–3823

Patsy J. Conner,

Air Force Federal Register Liaison Officer.

BILLING CODE 3910–01–P

Department of the Navy

Community Redevelopment Authority and Available Surplus Buildings and Land at Military Installations Designated for Closure: Naval Station, Long Beach, CA

AGENCY: Department of the Navy, DOD.

ACTION: Notice.

SUMMARY: This Notice provides information regarding the redevelopment authority established to plan the reuse of the former Naval Station, Long Beach, CA, the surplus property that is located at that base closure site, and the timely election by the redevelopment authority to proceed under the Base Closure Community Redevelopment and Homeless Assistance Act of 1994.

FOR FURTHER INFORMATION CONTACT: John J. Kane, Director, Department of the Navy, Real Estate Operations Division, Naval Facilities Engineering Command, 200 Stovall Street, Alexandria, VA 22332–2300, telephone (703) 325–0474, or LCDR April Heinze, Base Closure Manager, Southwest Division, Naval Facilities Engineering Command, 1420 Kettner Blvd., suite 507, San Diego, CA 92101–2404, telephone (619) 556–0259. For detailed information regarding particular properties identified in this Notice (i.e., acreage, floor plans, condition, exact street address, etc.), contact Lieutenant Commander Kevin Barre, Base Transition Coordinator, Long Beach Naval Shipyard, Building 5, Long Beach, CA 90822–5080, telephone (310) 547–6875.

SUPPLEMENTARY INFORMATION: In 1991, the Naval Station, Long Beach, CA, was designated for closure pursuant to the Defense Base Closure and Realignment Act of 1990, Public Law 101–510, as amended. This notice relates to three parcels of the property which formed a part of that installation, i.e., the Savannah/Cabrillo family housing complex, the Ocean Boulevard parcel, and the Navy Mole and transportation corridor parcel. On March 4, 1993, and April 21, 1994, respectively, the land and facilities located at the Savannah/Cabrillo complex and the Ocean Boulevard parcel were determined to be surplus to the needs of the federal government and available for use by state and local governments, representatives of the homeless and other interested parties. In August 1995, the Navy Mole and transportation corridor were also determined to be surplus to the needs of the federal government.

Election to Proceed Under New Statutory Procedures

Subsequently, the Base Closure Community Redevelopment and Homeless Assistance Act of 1994 (Public Law 103–421) was signed into law. Section 2 of the Act gives the redevelopment authority at base closure sites the option of proceeding under new procedures with regard to the manner in which the redevelopment plan for the base is formulated and how requests are made for future use of the property by homeless assistance providers and non-federal public agencies. Accordingly, this notice of information regarding the redevelopment authority fulfills the **Federal Register** publication requirement of Section 2(e)(3) of the Base Closure Community Redevelopment and Homeless Assistance Act of 1994.

Also, pursuant to paragraph (7)(B) of Section 2905(b) of the Defense Base Closure and Realignment Act of 1990, as amended by the Base Closure Community Redevelopment and Homeless Assistance Act of 1994, the following information regarding the surplus property at the former Naval Station, Long Beach, is published in the **Federal Register**:

Redevelopment Authority

The redevelopment authority for the Savannah/Cabrillo housing complex, Ocean Boulevard parcel, and the Mole and transportation corridor at the former Naval Station, Long Beach, for purposes of implementing the provisions of the Defense Base Closure and Realignment Act of 1990, as amended, is the City of Long Beach. The City has established a local community advisory committee to provide recommendations to the City concerning the redevelopment plan. This committee is known as the "Naval Properties Reuse Committee." Day-to-day operations of the committee are handled by Mr. Gerald Miller. The address of the committee is Economic Development Bureau, City of Long Beach, 200 Pine Avenue, Suite 400, Long Beach, CA 90802, Telephone (310) 570–3851, facsimile (310) 570–3897.

Surplus Property Descriptions

The following is a listing of the land and facilities at the former Naval Station, Long Beach, CA, that are declared surplus to the needs of the federal government.

Land

Approximately 56 acres of improved and unimproved fee simple land at the Savannah/Cabrillo housing complex of the former Naval Station, Long Beach, in the City of Long Beach, Los Angeles County. This area is currently available.

Approximately 3 acres of improved and unimproved fee simple land at the Ocean Boulevard parcel of the former Naval Station, Long Beach, in the City of Long Beach, Los Angeles County. This area is currently available.

Approximately 125 acres of improved and unimproved fee simple land on the Navy Mole, including Piers 9, 10, 11, 15 and 16, and transportation corridor at the former Naval Station, Long Beach, in the City of Long Beach, Los Angeles County. The transportation corridor is generally described as a parcel of land extending north of the Mole to the northern boundary of the installation. The westerly boundary of said parcel is the border between the Cities of Los Angeles and Long Beach. The easterly border extends from a point at the westerly side of the building No. 145, north between buildings 23 and 24 to a point on the north side of Reeves Avenue, thence east to align with the western fence of the softball field, thence north to the property line south of Ocean Boulevard.

The Navy Fuel Pier and associated structures, tanks, and other facilities and equipment are excluded from the determination of surplus. The fenced parcel of approximately five acres containing buildings 700, 719, 720, 757 and 850 is surplus but will not be available until the Department of the Navy has completed relocation plans for material stored on this parcel.

Buildings

The following is a summary of the facilities located at the Savannah/Cabrillo housing complex which are currently available. Property numbers are available on request.

- —Family housing units (150 duplex and 42 quadplex structures with 468 individual housing units). Comments: Approx. 633,930 square feet. All units are vacant.
- —Convenience store (1 structure). Comments: Approx. 4,830 square feet.
- —Storage facilities, utility buildings, and maintenance shops (5 structures). Comments: Approx. 10,737 square feet.
- —Detached carports (21 structures). Comments: Approx. 32,640 square feet.
- —Vehicle carports (26 structures with 264 vehicle spaces). Comments: Approx. 40,239 square feet. There are 4, 6, 8, 12, and 16 vehicle structures.
- —Recreation facilities (2 structures). Comments: Approx. 6,576 square feet tenant activities building and one basketball court.

The following is a summary of the facilities located on the Ocean Boulevard parcel available currently. Property numbers are available on request.

- —Shop facility (1 structure). Comments: Approx. 16,400 square feet.
- —Lumber shed (1 structure). Comments: Approx. 960 square feet.
- —Recreation pavilion (1 structure). Comments: Approx. 280 square feet.

The following is a summary of the facilities located on the former Naval Station Mole and transportation corridor which are available unless otherwise indicated above. Property numbers are available on request.

- —Office buildings (7 structures). Comments: Approx. 62,331 square feet.
- —Auto hobby complex (4 structures). Comments: Approx. 6,800 square feet; includes grease rack, shop/office, covered stalls, and car wash.
- —Recreation facilities (23 structures). Comments: Approx. 5,607 square feet; includes cabanas, restrooms, four tennis courts and eight softball fields.
- —Storage facilities (13 structures). Comments: Approx. 28,885 square feet.
- —Maintenance facilities (10 structures). Comments: Approx. 124,616 square feet.
- —Retail stores (3 structures). Comments: Approx. 161,759 square feet; includes exchange, servmart, and credit union.
- —Marina Complex (7 structures). Comments: Approx. 6,674 square feet; includes marina, hoist, sail club, loft, workshop, and shower.
- —Bachelor Officer Housing (1 structure). Comments: Approx. 45,535 square feet.
- —Restaurants (2 structures). Comments: Approx. 45,000 square feet includes officers' club and Taco Bell that is privately owned.
- —Piers (4 structures). Comments: Approx. 21,597 square yards.
- —Miscellaneous buildings, structures, and utilities (26 structures). Measurement systems vary; includes bus shelters, incinerators, compressor plant, electrical substations, guard and watch towers, landing ramps, mooring platforms, magazines, and salt water pumps.

Expressions of Interest

Pursuant to paragraph 7(C) of Section 2905(b) of the Defense Base Closure and Realignment Act of 1990, as amended by the Base Closure Community Redevelopment and Homeless Assistance Act of 1994, state and local governments, representatives of the homeless, and other interested parties located in the vicinity of the former Naval Station, Long Beach, may submit to said redevelopment authority (City of Long Beach) a notice of interest, of such governments, representatives, and parties in the above described surplus property, or any portion thereof. A notice of interest shall describe the need of the government, representative, or party concerned for the desired surplus property. Pursuant paragraphs 7 (C) and (D) of said Section 2905(b), the redevelopment authority shall assist interested parties in evaluating the surplus property for the intended use and publish in a newspaper of general circulation in Long Beach the date by which expressions of interest must be submitted.

Dated: August 25, 1995.

M.A. Waters,

LCDR, JAGC, USN, Federal Register Liaison Officer.

DEPARTMENT OF EDUCATION

National Educational Research Policy and Priorities Board; Meeting

AGENCY: National Educational Research Policy and Priorities Board, Education.

ACTION: Notice of committee meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of a meeting of the Committee on Regional Educational Laboratories of the National Educational Research Policy and Priorities Board. This notice also describes the functions of the Committee. Notice of this meeting is required under Section 10(a)(2) of the Federal Advisory Committee Act and is intended to notify the public of their opportunity to attend.

DATE AND TIME: September 27, 1995, 4 p.m. to 6 p.m.

ADDRESSES: 555 New Jersey Avenue, NW., room 500 C, Washington, DC 20208.

FOR FURTHER INFORMATION CONTACT: John Christensen, Designated Federal Official, National Educational Research Policy and Priorities Board, 555 New Jersey Avenue NW., Washington, DC 20208–7564. Telephone: (202) 219–2065; Fax: (202) 219–1528.

SUPPLEMENTARY INFORMATION: The National Educational Research Policy and Priorities Board is authorized by Section 921 of the Educational Research, Development, Dissemination, and Improvement Act of 1994 (the Act). The Board works collectively with the Assistant Secretary for the Office of Educational Research and Improvement (the Office) to forge a national consensus with respect to a long-term agenda for educational research, development, and dissemination, and to provide advice and assistance to the Assistant Secretary in administering the duties of the Office.

The Act directs the Board to provide guidance to the Congress in its oversight of the Office; to advise the United States on the Federal educational research and development effort; and to solicit advice from practitioners, policymakers, and researchers to define research needs and suggestions for research topics. The Board has designated the Committee on Regional Educational Laboratories to work on its behalf in these matters in the interim between full meetings of the Board. The meeting of the Committee is open to the public. The agenda for the meeting includes discussions about quality control and set-aside funds for first-year operations of the laboratories. A final agenda will be available from the Board's office on September 20, 1995.

Records are kept of all Board proceedings, and are available for public inspection at the office of the National Educational Research Policy and Priorities Board, 555 New Jersey Avenue NW., Washington, DC 20208–7564.

Dated: September 1, 1995.

ACTION: Notice of meeting.

SUMMARY: This notice sets forth the schedule and agenda of a meeting of the President's Board of Advisors on Historically Black Colleges and Universities. This notice also describes the functions of the Board. Notice of this meeting is required under Section 10(a)(2) of the Federal Advisory Committee Act.

DATE AND TIME: September 26, 1995, from 2 pm to 5 pm.

ADDRESSES: The meeting will be held at the Marriott Metro Center located at 775 12th Street NW., Washington, DC 20005. Call (202) 708–8667 for further information.

FOR FURTHER INFORMATION CONTACT: Nancy Davis, White House Initiative on Historically Black Colleges and Universities, U.S. Department of Education, 1250 Maryland Avenue SW., suite 605, Washington, DC 20202–5120. Telephone: (202) 708–8667.

SUPPLEMENTARY INFORMATION: The President's Board of Advisors on Historically Black Colleges and Universities is established under Executive Order 12876 of November 1, 1993. The Board is established to advise Administration officials on federal issues that impact Historically Black Colleges and Universities.

The meeting of the board is open to the public. The agenda includes a discussion of the impact of budgetary changes on federal support to Historically Black Colleges and Universities.

Records are kept of all Board proceedings, and are available for public inspection at the White House Initiative on Historically Black Colleges and Universities at 1250 Maryland Avenue SW., suite 605, Washington, DC 20202, from the hours of 8:30 am to 5 pm.

Dated: August 24, 1995.

David A. Longanecker,

Assistant Secretary for Postsecondary Education.

BILLING CODE 4000–01–M

DEPARTMENT OF ENERGY

Environmental Management Site Specific Advisory Board, Kirtland Area Office (Sandia)

AGENCY: Department of Energy.

ACTION: Notice of open meeting.

SUMMARY: Pursuant to the provisions of the Federal Advisory Committee Act (Public Law 92–463, 86 Stat. 770) notice is hereby given of the following Advisory Committee meeting: Environmental Management Site Specific Advisory Board (EM SSAB), Kirtland Area Office (Sandia).

DATES: Monday, September 18, 1995: 6:45 pm–10:00 pm (Mountain Daylight Time).

ADDRESSES: Indian Pueblo Cultural Center, 2401 12th St. NW., Albuquerque, NM.

FOR FURTHER INFORMATION CONTACT: Mike Zamorski, Acting Manager, Department of Energy Kirtland Area Office, P.O. Box 5400, Albuquerque, NM 87185 (505) 845–4094.

SUPPLEMENTARY INFORMATION:

Purpose of the Board

The purpose of the Board is to make recommendations to DOE and its regulators in the areas of environmental restoration, waste management, and related activities.

Tentative Agenda

6:45 pm	Public Comment Period
7:00 pm	Issues Discussion: Future Land Use, Corrective Action Management Units
8:30 pm	Board Subcommittee Assignments
9:30 pm	Evaluation
10:00 pm	Adjourn

A final agenda will be available at the meeting Monday, September 18, 1995.

Public Participation

The meeting is open to the public. Written statements may be filed with the Committee either before or after the meeting. Individuals who wish to make oral statements pertaining to agenda items should contact Mike Zamorski's office at the address or telephone number listed above.

Requests must be received 5 days prior to the meeting and reasonable provision will be made to include the presentation in the agenda. The Designated Federal Official is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business. Each individual wishing to make public comment will be provided a maximum of 5 minutes to present their comments.

Minutes

The minutes of this meeting will be available for public review and copying at the Freedom of Information Public Reading Room, 1E–190, Forrestal Building, 1000 Independence Avenue, SW, Washington, DC 20585 between 9:00 a.m. and 4 p.m., Monday-Friday, except Federal holidays. Minutes will also be available by writing to Mike Zamorski, Department of Energy Kirtland Area Office, P.O. Box 5400, Albuquerque, NM 87185, or by calling (505) 845–4094.

Issued at Washington, DC on September 5, 1995.

Rachel M. Samuel,

Acting Deputy Advisory Committee Management Officer.

Environmental Management Site-Specific Advisory Board, Monticello Site

AGENCY: Department of Energy.

ACTION: Notice of open meeting.

SUMMARY: Pursuant to the provisions of the Federal Advisory Committee Act (Public Law 92–463, 86 Stat. 770) notice is hereby given of the following Advisory Board Committee Meeting: Environmental Management Site-Specific Advisory Board, Monticello Site.

DATE AND TIME: Tuesday, September 19, 1995, 7 p.m.–8:30 p.m.

ADDRESS: Monticello City Hall, 17 North 1st East, Monticello, Utah 84535.

FOR FURTHER INFORMATION CONTACT: Audrey Berry, Public Affairs Specialist, Department of Energy Grand Junction Projects Office, P.O. Box 2567, Grand Junction, CO 81502 (303) 248–7727.

SUPPLEMENTARY INFORMATION:

Purpose of the Board

The purpose of the Board is to advise DOE and its regulators in the areas of environmental restoration, waste management, and related activities.

Tentative Agenda

The Environmental Management Site-Specific Advisory Board, Monticello Site, will be discussing reports from subcommittees on health and safety, budget, future land use, and repository design.

Public Participation

The meeting is open to the public. Written statements may be filed with the Committee either before or after the meeting. Individuals who wish to make oral statements pertaining to agenda items should contact Audrey Berry's office at the address or telephone number listed above. Requests must be received 5 days prior to the meeting and reasonable provision will be made to include the presentation in the agenda. The Designated Federal Official is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business. Each individual wishing to make public comment will be provided a maximum of 5 minutes to present their comments.

Minutes

The minutes of this meeting will be available for public review and copying at the Freedom of Information Public Reading Room, 1E–190, Forrestal Building, 1000 Independence Avenue, SW, Washington, DC 20585 between 9:00 a.m. and 4 p.m., Monday-Friday, except Federal holidays. Minutes will also be available by writing to Audrey Berry, Department of Energy Grand Junction Projects Office, P.O. Box 2567, Grand Junction, CO 81502, or by calling her at (303) 248–7727.

Issued at Washington, DC on September 5, 1995.

Environmental Management Site Specific Advisory Board, Nevada Test Site

AGENCY: Department of Energy.

ACTION: Notice of open meeting.

SUMMARY: Pursuant to the provisions of the Federal Advisory Committee Act (Public Law 92–463, 86 Stat. 770) notice is hereby given of the following Advisory Committee meeting: Environmental Management Site Specific Advisory Board (EM SSAB), Nevada Test Site.

DATES: Saturday, September 9, 1995 2:00 pm—6:00 pm.

ADDRESSES: VFW Hall, Caliente, NV.

FOR FURTHER INFORMATION CONTACT: Kevin Rohrer, U.S. DOE, Nevada Operations Office, AMEM, P.O. Box 98518, Las Vegas, NV 89193–8518, ph. 702–295–0197 fax 702–295–1810.

SUPPLEMENTARY INFORMATION:

Purpose of the Committee

The EM SSAB provides input and recommendations to the Department of Energy on Environmental Management strategic decisions that impact future use, risk management, economic development, and budget prioritization activities.

Tentative Agenda

Saturday, September 9, 1995

2:00 p.m.
- Meeting Begins
- Introduction
- Overview of Site Group
- Presentations: Update on Nevada Test Site (NTS) Environmental
- Impact Statement (EIS); Update on Future Land Use at NTS
- Public Comment
- Break
- Approval of Meeting Minutes
- Review of Action Items
- New Business
- Committee Reports:
  - Transportation
  - EIS
  - Charter/Bylaws
  - ER Funding
  - Diversification

6:00 p.m.
- Meeting Adjourns

If needed, time will be allotted after public comments for old business, new business, items added to the agenda, and administrative details. A final agenda will be available at the meeting Saturday, September 9, 1995.

Public Participation

The meeting is open to the public. Written statements may be filed with the Committee either before or after the meeting. Individuals who wish to make oral statements pertaining to agenda items should contact Kevin Rohrer's office at the address or telephone number listed above. The Designated Federal Official is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business. Each individual wishing to make public comment will be provided a maximum of 5 minutes to present their comments. Due to programmatic issues that needed to be resolved, this notice is being published less than 15 days in advance of the meeting.

Minutes

The minutes of this meeting will be available for public review and copying at the Freedom of Information Public Reading Room, 1E–190, Forrestal Building, 1000 Independence Avenue, SW, Washington, DC 20585 between 9:00 a.m. and 4 p.m., Monday-Friday, except Federal holidays.

Issued at Washington, DC on September 5, 1995.

BILLING CODE 6450–01–P

Environmental Management Site Specific Advisory Board, Oak Ridge Reservation

AGENCY: Department of Energy.

ACTION: Notice of open meeting.

SUMMARY: Pursuant to the provisions of the Federal Advisory Committee Act (Public Law 92–463, 86 Stat. 770) notice is hereby given of the following Advisory Committee meeting: Environmental Management Site Specific Advisory Board (EM SSAB), Hanford Site.

DATES: Thursday, September 21, 1995, 6:00 pm—9:00 pm.

ADDRESSES: Oak Ridge Mall Community Room, Oak Ridge, Tennessee.

FOR FURTHER INFORMATION CONTACT: Sandra Perkins, Site Group Coordinator, Department of Energy Oak Ridge Operations Office, 105 Broadway, Oak Ridge, TN 37830, (615) 576–1590.

SUPPLEMENTARY INFORMATION:

Purpose of the Board

The purpose of the Board is to make recommendations to DOE and its regulators in the areas of environmental restoration, waste management, and related activities.

Tentative Agenda

September Meeting Topics

The initial meeting for the EM SSAB, Oak Ridge will be conducted to allow members to begin addressing issues required for the Board to begin functioning. Topics to be discussed are largely organizational, such as: draft operational procedures, chair selection process, future meeting dates and times, goals for the Board, and any training needs for Board members. The Board members will have an opportunity to discuss issues related to the Environmental Management program to help guide the waste management and cleanup program on the Oak Ridge Reservation.

Public Participation

The meeting is open to the public. Written statements may be filed with the Committee either before or after the meeting. Individuals who wish to make oral statements pertaining to agenda items should contact Sandra Perkins' office at the address or telephone number listed above. Requests must be received 5 days prior to the meeting and reasonable provision will be made to include the presentation in the agenda. The Designated Federal Official is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business. Each individual wishing to make public comment will be provided a maximum of 5 minutes to present their comments.

Minutes

The minutes of this meeting will be available for public review and copying at the Freedom of Information Public Reading Room, 1E–190, Forrestal Building, 1000 Independence Avenue, SW, Washington, DC 20585 between

9:00 a.m. and 4 p.m., Monday-Friday, except Federal holidays. Minutes will also be available at the Department of Energy's Information Resource Center at 105 Broadway, Oak Ridge, TN between 8:30 am and 5:00 pm on Monday, Wednesday, and Friday; 8:30 am and 7:00 pm on Tuesday and Thursday; and 9:00 am and 1:00 pm on Saturday, or by writing to Sandy Perkins, Department of Energy Oak Ridge Operations Office, 105 Broadway, Oak Ridge, TN 37830, or by calling her at (615) 576–1590.

Issued at Washington, DC on September 5, 1995.

BILLING CODE 6450–01–P

Environmental Management Site Specific Advisory Board, Savannah River Site

AGENCY: Department of Energy.

ACTION: Notice of open meeting.

SUMMARY: Pursuant to the provisions of the Federal Advisory Committee Act (Public Law 92–463, 86 Stat. 770) notice is hereby given of the following Advisory Committee meeting: Environmental Management Site Specific Advisory Board (EM SSAB), Savannah River Site.

DATES AND TIMES: Monday, September 25, 1995:

1:30 p.m.—5 p.m. (tentative session—group dynamics discussion)

6:00 p.m.—7:00 p.m. (public comment session)

7:00 p.m.—9:00 p.m. (subcommittee meetings Bylaws and issues)

Tuesday, September 26, 1995: 8:30 a.m. to 4:00 p.m.

ADDRESSES: The Holiday Inn, U.S. 21—Loveless Street, Beaufort, South Carolina.

FOR FURTHER INFORMATION CONTACT: Tom Heenan, Manager, Environmental Restoration and Solid Waste, Department of Energy Savannah River Operations Office, P.O. Box A, Aiken, S.C. 29802 (803) 725–8074.

SUPPLEMENTARY INFORMATION:

Purpose of the Board

The purpose of the Board is to make recommendations to DOE and its regulators in the areas of environmental restoration, waste management and related activities.

Tentative Agenda

Monday, September 25, 1995

1:30 p.m. Group Dynamics Discussion (tentative)
6:00 p.m. Public Comment Session (5-minute rule)
7:00 p.m. Subcommittee Meetings
9:00 p.m. Adjourn

Tuesday, September 26, 1995

8:00 a.m. Welcome
8:30 a.m. Approval of minutes, Board discussions
9:00 a.m. Risk Management & Future Use Subcommittee Recommendations
11:45 a.m. Lunch
12:45 p.m. Environmental Remediation & Waste Management Subcommittee Report
2:30 p.m. Agency updates, facilitator report
2:45 p.m. Membership and Nominations Elections
3:30 p.m. Public Comment Session (5-minute rule)
4:00 p.m. Adjourn

If needed, time will be allotted after public comments for items added to the agenda, and administrative details.

A final agenda will be available at the meeting Monday, September 25, 1995.

Public Participation

The meeting is open to the public. Written statements may be filed with the Committee either before or after the meeting. Individuals who wish to make oral statements pertaining to agenda items should contact Tom Heenan's office at the address or telephone number listed above. Requests must be received 5 days prior to the meeting and reasonable provision will be made to include the presentation in the agenda. The Designated Federal Official is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business. Each individual wishing to make public comment will be provided a maximum of 5 minutes to present their comments.

Minutes

The minutes of this meeting will be available for public review and copying at the Freedom of Information Public Reading Room, 1E–190, Forrestal Building, 1000 Independence Avenue, SW, Washington, DC 20585 between 9:00 a.m. and 4 p.m., Monday—Friday except Federal holidays. Minutes will also be available by writing to Tom Heenan, Department of Energy Savannah River Operations Office, P.O. Box A, Aiken, SC 29802, or by calling him at (803) 725–8074.

Issued at Washington, DC on September 5, 1995.

Rachel Murphy Samuel,

Acting Deputy Advisory Committee Management Officer.

BILLING CODE 6450–01–P

[FE Docket No. PP–107]

Application for Presidential Permit, Arizona Public Service Company

AGENCY: Office of Fossil Energy, DOE.

ACTION: Notice of application.

SUMMARY: Arizona Public Service Company (APS) has applied for a Presidential Permit in order to construct a new transmission facility at the U.S. border with Mexico.

DATES: Comments, protests or requests to intervene must be submitted on or before October 10, 1995.

ADDRESSES: Comments, protests or requests to intervene should be addressed as follows: Office of Coal & Electricity (FE–52), Office of Fuels Programs, Office of Fossil Energy, Department of Energy, 1000 Independence Avenue, SW, Washington, DC 20585.

FOR FURTHER INFORMATION CONTACT: Warren E. Williams (Program Office) 202–586–9629 or Mike Skinker (Program Attorney) 202–586–6667.

SUPPLEMENTARY INFORMATION: The construction, connection, operation, and maintenance of facilities at the international border of the United States for the transmission of electrical energy is prohibited in the absence of a Presidential permit pursuant to Executive Order No. 12038. Exports of electricity from the United States to a foreign country are also regulated and require authorization under section 202(e) of the Federal Power Act.

On June 22, 1995, APS filed an application with the Office of Fossil Energy (FE) of the Department of Energy (DOE) for a Presidential permit. This application has been docketed as PP–107. In its application, APS proposes to tap an existing 34.5-kilovolt (kV) line that originates at the existing Fairview Substation in Douglas, Arizona, and to extend the tap approximately 4,000 feet to the international border adjacent to Agua Prieta, Sonora, Mexico. The Fairview substation will be upgraded by adding a transformer and other equipment in order to accommodate the proposed facilities. The proposed power line structures are to be located within a state highway right-of-way.

Procedural Matters

Any person desiring to be heard or to protest this application should file a petition to intervene or protest at the address provided above in accordance with 385.211 or 385.214 of the Rules of Practice and Procedure (18 CFR 385.211, 385.214).

Any such petitions and protests should be filed with the DOE on or before the date listed above. Additional copies of such petitions to intervene or protest also should be filed directly with: Dennis Beals, Manager, Bulk Power Trading & Customer Services, Arizona Public Service Company, P.O. Box 53999, Station 9860, Phoenix, AZ 85072–3999 and Bruce A. Gardner, Esq., Senior Attorney, Arizona Public Service Company, P.O. Box 53999, Station 9820, Phoenix, AZ 85072–3999.

Pursuant to 18 CFR 385.211, protests and comments will be considered by the DOE in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene under 18 CFR 385.214. Section 385.214 requires that a petition to intervene must state, to the extent known, the position taken by the petitioner and the petitioner's interest in sufficient factual detail to demonstrate either that the petitioner has a right to participate because it is a State Commission; that it has or represents an interest which may be directly affected by the outcome of the proceeding, including any interest as a consumer, customer, competitor, or security holder of a party to the proceeding; or that the petitioner's participation is in the public interest.

A final decision will be made on the application for Presidential permit contained in docket PP–107 after a determination is made by the DOE that the proposed action is in the public interest and will not adversely impact on the reliability of the U.S. electric power supply system.

Before a Presidential permit or electricity export authorization may be issued or amended, the environmental impacts of the proposed DOE action must be evaluated pursuant to the National Environmental Policy Act of 1969 (NEPA).

Copies of this application will be made available, upon request, for public inspection and copying at the address provided above.

Issued in Washington, DC on August 31, 1995.

Anthony J. Como,

Director, Office of Coal and Electricity, Office of Fuels Programs, Office of Fossil Energy.

[FR Doc. 95–22217 Filed 9–7–95; 8:45 am]

BILLING CODE 6450–01–P

Federal Energy Regulatory Commission

[Project No. 10867 Indiana]

Holliday Historic Restoration, Associates; Notice of Availability of Final Environmental Assessment

September 1, 1995.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission's) Regulations, 18 CFR Part 380 (Order No. 486, 52 FR 47897), the Office of Hydropower Licensing has reviewed the application for minor license for the proposed Holliday Hydroelectric Project located on the West Fork of the White River in Noblesville, Hamilton County, Indiana, and has prepared a Final Environmental Assessment (FEA) for the proposed project. In the FEA, the Commission's staff has analyzed the potential environmental impacts of the proposed project and has concluded that approval of the proposed project, with appropriate mitigative measures, would not constitute a major federal action significantly affecting the quality of the human environment.

Copies of the FEA are available for review in the Public Reference Branch, Room 3104, of the Commission's offices at 941 North Capitol Street, N.E., Washington, D.C. 20426.

Linwood A. Watson, Jr.,

Acting Secretary.

[FR Doc. 95–22269 Filed 9–7–95; 8:45 am]

BILLING CODE 6717–01–M

[Project No. 2417 Wisconsin]

Northern States Power Company; Notice of Availability of Final Environmental Assessment

September 1, 1995.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission's) Regulations, 18 CFR Part 380 (Order No. 486, 52 F.R. 47897), the Office of Hydropower Licensing has reviewed the application for a subsequent license for the existing Hayward Hydroelectric Project, located on the Namekagon River, in the City of Hayward, Sawyer County, Wisconsin and has prepared a Final Environmental Assessment (FEA) for the project. In the FEA, the Commission's staff analyzed the potential environmental effects of the existing project and has concluded that approval of the project, with appropriate protection or enhancement measures, would not constitute a major federal action significantly affecting the quality of the human environment.

The Notice of Availability of Draft Environmental Assessment for the Hayward Hydroelectric Project was issued on June 16, 1994. In response, the Commission received three comment letters which were reviewed by the Commission's staff and addressed in the FEA.

Copies of the FEA are available for review in the Public Reference Branch, Room 3104, of the Commission's offices at 941 North Capitol Street NE., Washington, DC 20426.

Linwood A. Watson, Jr.,

Acting Secretary.

BILLING CODE 6717–01–M

[Docket No. TM96–1–23–000]

Eastern Shore Natural Gas Company; Notice of Proposed Changes in FERC Gas Tariff

September 1, 1995.

Take notice that on August 30, 1995, Eastern Shore Natural Gas Company (ESNG) tendered for filing certain substitute revised tariff sheets included in Appendix A attached to the filing. Such sheets are proposed to be effective October 1, 1995.

ESNG states that the purpose of the instant filing is to reflect a decrease of $0.0001 per dt in the Annual Charge Adjustment (ACA) in the commodity portion of its sales and transportation rates. Pursuant to Order No. 472, the Commission assessed ESNG its ACA charge based on $0.0023/Mcf for the annual period commencing October 1, 1995. In accordance with Section 25 of the General Terms and Conditions of ESNG's FERC Gas Tariff, ESNG's proposed tariff sheets track the Commission approved ACA rate of $0.0023 per Mcf ($0.0022 per dt on ESNG's system) commencing October 1, 1995.

ESNG states that copies of the filing have been served upon its jurisdictional customers and interested State Commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825

North Capitol Street, NE., Washington, DC 20426, in accordance with Rule 211 and Rule 214 of the Commission's Rules of Practice and Procedure (18 CFR Section 385.211, 385.214). All such motions or protests should be filed on or before September 11, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Linwood A. Watson, Jr.,

Acting Secretary.

BILLING CODE 6717–01–M

[Docket No. TM96–2–23–000]

Eastern Shore Natural Gas Company; Notice of Proposed Changes in FERC Gas Tariff

September 1, 1995.

Take notice that on August 30, 1995, Eastern Shore Natural Gas Company (ESNG), tendered for filing certain substitute revised tariff sheets included in Appendix A to the filing. Such sheets are proposed to be effective October 1, 1995.

ESNG states that the purpose of the instant filing is to track changes made in the rates for storage service purchased from Columbia Gas Transmission under its Rate Schedule FSS and SST, the costs of which are included in the rates and charges payable under ESNG's Rate Schedules CWS and CFSS.

ESNG states that copies of the filing have been served upon its jurisdictional customers and interested State Commissions.

Any person desiring to be heard or to protect said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rule 211 and Rule 214 of the Commission's Rules of Practice and Procedure (18 CFR Sections 385.211, 385.214). All such motions or protests should be filed on or before September 11, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Linwood A. Watson, Jr.,

Acting Secretary.

[FR Doc. 95–22273 Filed 9–7–95; 8:45 am]

BILLING CODE 6717–01–M

[Project No. 11493–001 Utah]

L.B. Industries, Inc.; Notice of Surrender of Preliminary Permit

September 1, 1995.

Take notice that L.B. Industries, Inc., Permittee for the Brink Pumped Storage Project No. 11493, has requested that its preliminary permit be terminated. The preliminary permit for Project No. 11493 was issued November 8, 1994, and would have expired October 31, 1997. The project would have been located on lands administered by the Bureau of Land Management, near Bear Valley, in Sevier County, Utah.

The Permittee filed the request on August 14, 1995, and the preliminary permit for Project No. 11493 shall remain in effect through the thirtieth day after issuance of this notice unless that day is a Saturday, Sunday or holiday as described in 18 CFR 385.2007, in which case the permit shall remain in effect through the first business day following that day. New applications involving this project site, to the extent provided for under 18 CFR Part 4, may be filed on the next business day.

Linwood A. Watson, Jr.,

Acting Secretary.

[FR Doc. 95–22271 Filed 9–7–95; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. RP95–424–000]

Natural Gas Pipeline Company of America; Notice of Proposed Changes in FERC Gas Tariff

September 1, 1995.

Take notice that on August 29, 1995, Natural Gas Pipeline Company of America (Natural) tendered for filing as part of its FERC Gas Tariff, Sixth Revised Volume No. 1 and Second Revised Volume No. 2, revised tariff sheets to be effective December 1, 1995.

Natural states that the purpose of the filing is to comply with the Commission's June 26, 1995 order in Docket Nos. RP95–326–000 and RP95–242–000 under which Natural is to submit revised rates reflecting the customers' August 1 service elections. This filing deals with the Primary Case submitted by Natural. Natural states that while the service elections were generally submitted under the new services pursuant to the Pro Forma Case, those elections provided Natural with specific evidence as to the level of services its customers desire on Natural's system on and after December 1, 1995. This filing is being submitted solely as a fall back in the event the Commission does not allow the Pro Forma Case (revised rates for which were submitted on August 18) to go into effect on December 1, 1995.

Natural states that due to the significant fly-up in maximum rates created by these changes, it is proposed a deferred cost procedure to avoid such rate increases.

Natural requested waiver of the Commission's Regulations to the extent necessary to permit the tariff sheets to become effective December 1, 1995.

Natural states that copies of the filing are being mailed to Natural's jurisdictional customers, interested state regulatory agencies and all parties on the official service list.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Section 385.211 or 385.214 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before October 27, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Linwood A. Watson,

Acting Secretary.

Texas Eastern Transmission Corporation; Notice of Proposed Changes in FERC Gas Tariff

September 1, 1995.

Take notice that on August 30, 1995, Texas Eastern Transmission Corporation (Texas Eastern) submitted for filing as part of its FERC Gas Tariff, Sixth Revised Volume No. 1, the following tariff sheets:

Ninth Revised Sheet No. 546
Eighth Revised Sheet No. 547
Ninth Revised Sheet No. 548
Tenth Revised Sheet No. 549
Ninth Revised Sheet No. 550

Ninth Revised Sheet No. 551
Ninth Revised Sheet No. 553
Eighth Revised Sheet No. 554
Ninth Revised Sheet No. 555
Tenth Revised Sheet No. 556
Ninth Revised Sheet No. 557
Ninth Revised Sheet No. 558
Ninth Revised Sheet No. 560
Eighth Revised Sheet No. 561
Ninth Revised Sheet No. 562
Tenth Revised Sheet No. 563
Ninth Revised Sheet No. 564
Ninth Revised Sheet No. 565
Ninth Revised Sheet No. 567
Eighth Revised Sheet No. 568
Ninth Revised Sheet No. 569
Tenth Revised Sheet No. 570
Ninth Revised Sheet No. 571
Ninth Revised Sheet No. 572
Ninth Revised Sheet No. 575
Eighth Revised Sheet No. 576
Ninth Revised Sheet No. 577
Ninth Revised Sheet No. 578
Eighth Revised Sheet No. 579
Ninth Revised Sheet No. 580
Ninth Revised Sheet No. 581
Eighth Revised Sheet No. 582
Ninth Revised Sheet No. 583
Tenth Revised Sheet No. 599
Ninth Revised Sheet No. 600
Ninth Revised Sheet No. 601

The proposed effective date of the tariff sheets listed above is September 1, 1995.

Texas Eastern states that it is submitting the above referenced tariff sheets to reflect the modifications to Sections 9.2, 9.3, 9.4, 9.5, 9.9, and 14.4 of the General Terms and Conditions of its FERC Gas Tariff, Sixth Revised Volume No. 1, to reflect Base and Operational Segment Entitlements effective September 1, 1995.

Texas Eastern states that copies of the filing were served on firm customers of Texas Eastern and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before September 11, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Linwood A. Watson, Jr.,

Acting Secretary.

BILLING CODE 6717–01–M

[Docket No. OR95–34–000]

Tosco Corporation v. SFPP, L.P.; Notice of Complaint

September 1, 1995.

Take notice that on August 7, 1995, Tosco Corporation (Tosco) filed a complaint pursuant to Section 13(1) of the Interstate Commerce Act (ICA), Section 1803 of the Energy Policy Act of 1992, and Rule 206 of the Commission's Rules of Practice and Procedure against SFPP, L.P. (SFPP) in the above-referenced docket.

The complaint alleges that SFPP violated and continues to violate section 1 of the ICA by establishing and charging unjust and unreasonable rates on its system, pursuant to FERC Tariff Nos. 15, 16, 17, and 18. Tosco requests that the Commission order refunds, reparations, and damages in accordance with the ICA. Tosco also asks that its complaint be consolidated with ongoing proceedings in Docket No. OR92–8–000, *et al.* In the alternative, Tosco asks that the matter be consolidated with the complaint filed against SFPP by Mobil Oil Corporation in Docket No. OR95–5–000.

Any person desiring to be heard or to protest the instant complaint should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before October 2, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection. Answers to this complaint shall be due on or before October 2, 1995.

Linwood A. Watson, Jr.,

Acting Secretary.

BILLING CODE 6717–01–M

[Docket No. GT95–50–001]

Williams Natural Gas Company; Notice of Proposed Changes in FERC Gas Tariff

September 1, 1995.

Take notice that on August 25, 1995, Williams Natural Gas Company (WNG) tendered for filing to become part of its FERC Gas Tariff, Second Revised Volume No. 1, Substitute First Revised Sheet No. 303. The proposed effective date of the tariff sheet is September 17, 1995.

WNG states that the purpose of the instant filing is to amend the August 17 filing to reflect the FTS winter Transportation Market Area MDTQ for City Utilities of Springfield, Mo. and to show the summer MDTQ in a footnote.

WNG states that a copy of its filing was served on all participants listed on the service list maintained by the Commission in the above referenced docket and on all jurisdictional customers and interested state commissions.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Section 385.211 of the Commission's Rules and Regulations. All such protests should be filed on or before September 11, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Linwood A. Watson, Jr.,

Acting Secretary.

ENVIRONMENTAL PROTECTION AGENCY

[ER–FRL–5228–6]

Environmental Impact Statements and Regulations; Availability of EPA Comments

Availability of EPA comments prepared August 21, 1995 Through August 25, 1995 pursuant to the Environmental Review Process (ERP), under Section 309 of the Clean Air Act and Section 102(2)(c) of the National Environmental Policy Act as amended. Requests for copies of EPA comments can be directed to the Office of Federal Activities at (202) 260–5076.

An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in FR dated April 14, 1995 (60 FR 19047).

Draft EISs

ERP No. D–AFS–C65002–PR Rating EC2, Caribbean National Forest Land and Resource Management Plan, Implementation, PR.
SUMMARY: EPA expressed environmental concerns about the

proposed project's potential impacts to wetlands, water quality, and biodiversity. Additional information should be provided in the final EIS to address these issues.

ERP No. D–AFS–K60028–CA Rating EC2, Elsmere Solid Waste Management Facility, Implementation, Angeles National Forest (ANF) Land Adjustment Plan, Conditional Use and Oak Tree Permit, Los Angeles County, CA.
SUMMARY: EPA expressed environmental concerns with potential adverse impacts to air quality and biological resources (e.g., riparian habitat). Additional information is needed regarding environmental justice, faulting, landfill design, groundwater protection, and adequate offsets for air quality emissions.

ERP No. D–AFS–L65245–ID Rating EC2, Main Salmon Post-Fire Project, Implementation, Payette National Forest, New Meadows and McCall Ranger District, Idaho County, ID.
SUMMARY: EPA expressed environmental concerns based on water quality impacts from road construction and timber salvage. Additional information is needed on sediment model validation, monitoring and air quality.

ERP No. D–COE–G39028–TX Rating LO, Gulf Intracoastal Waterway (Section 216 Study), Bank Protection and a Spill Containment Feature, Implementation, Aransas National Wildlife Refuge, Galvestion District, Aransas, Calhoun and Refugio Counties, TX.
SUMMARY: EPA had no objection to the proposed action.

ERP No. D–FHW–L40197–OR Rating EC2, Mount Hood Corridor Study, US 26 Rhodedendron to OR–35 Junction, Improvements, Funding, Clackamas County, OR.
SUMMARY: EPA expressed environmental concerns regarding potential water and air quality issues. EPA requested that these issues be clarified in the final EIS.

ERP No. D–MMS–G02005–00 Rating LO, 1996 Central and Western Gulf of Mexico Outer Continental Shelf (OSC) Oil and Gas Lease Sales No. 157 (March 1996) and No. 161 (August 1996), Lease Offerings, Offshore coastal counties and parishes of Al, MS, LA and TX.
SUMMARY: EPA had no objection to the proposed action.

ERP No. D–USN–G11028–TX Rating LO, Mine Warfare Center of Excellance (MWCE) Establishment, Construction and Operations, Magnitic Silencing Facility (MSF), Aviation Mine Count Measures (AMCM) and Sled Facility, Possible NPDES Permit, COE Section 10 and 404 Permits, Corpus Christi Bay Area, TX.
SUMMARY: EPA had no objection to the proposed action.

Final EISs

ERP No. F–BLM–J02030–WY Texaco's Stagecoach Draw Unit Natural Gas Field Development Project, Implementation, Application for Permit to Drill, Right-of-Way Grant, Temporary Use-Permit and COE Section 404 Permit, Farson, Sweetwater County, WY.
SUMMARY: Based on existing, planned and potential mineral and gas development in S.W. Wyoming, EPA expressed concerns about cumulative impacts.

ERP No. F–UMC–K11058–CA San Onofre Area Sewage Effluent Compliance Project, Cease and Desist Order, Camp Pendleton Marine Corps Base, San Diego County, CA.
SUMMARY: EPA had no objection to the final EIS.

ERP No. FA–AFS–L65147–AK Bohemia Mountain Timber Sale, Updated Information concerning Resolution of Three Appeal Issues Regarding Harvesting Timber, Tongass National Forest, Stikine Area, AK.
SUMMARY: EPA expressed environmental concerns with the effect of the action alternatives on water quality and fisheries.

Other

ERP No. LD–AFS–L65242–OR Rating LO, Dutch Flat Creek, Killamacue Creek and Rock Creek Wild and Scenic River Study, Designation or Nondesignation, National Wild and Scenic River System, Wallowa-Whitman National Forest, American Rivers, Baker County, OR.
SUMMARY: EPA had no objection to the proposed action.

Dated: September 5, 1995.

[FRL–5293–8]

Jack's Creek/Sitkin Smelting Superfund Site De Minimis Settlement; Proposed Administrative Settlement Under the Comprehensive Environmental Response, Compensation and Liability Act

AGENCY: United States Environmental Protection Agency.

ACTION: Request for Public Comment.

SUMMARY: The United States Environmental Protection Agency is proposing to enter into a *de minimis* settlement pursuant to Section 122(g)(4) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended, (CERCLA), 42 U.S.C. 9622(g)(4). This proposed settlement is intended to resolve the liabilities under CERCLA of Diversified Industries, Inc., Scullin Steel Company (formerly Eastern Diversified Metals Corporation), and Theodore Sall, Inc. for response costs incurred by the United States Environmental Protection Agency at the Jack's Creek/Sitkin Smelting Superfund Site, Maitland County, Pennsylvania.

DATES: Comments must be provided on or before October 10, 1995.

ADDRESSES: Comments should be addressed to the Docket Clerk, United States Environmental Protection Agency, Region III, 841 Chestnut Building, Philadelphia, Pennsylvania, 19107, and should refer to: In Re: Jack's Creek/Sitkin Smelting Superfund Site, Maitland County, Pennsylvania, U.S. EPA Docket No. III–94–40–DC.

FOR ADDITIONAL INFORMATION CONTACT: Daniel Isales (215) 597–4774, or Pamela Lazos (215) 597–8504, United States Environmental Protection Agency, Office of Regional Counsel, (3RC22), 841 Chestnut Building, Philadelphia, Pennsylvania, 19107. Notice of De Minimis Settlement: In accordance with Section 122(i)(1) of CERCLA, 42 U.S.C. 9622(i)(1), and Section 7003(d) of the Solid Waste Disposal Act, 42 U.S.C. 6973(d), notice is hereby given of a proposed administrative settlement concerning the Jack's Creek/Sitkin Smelting Superfund Site in Maitland County, Pennsylvania. The administrative settlement was signed by the United States Environmental Protection Agency, Region III's Regional Administrator on March 6, 1995 and is subject to review by the public pursuant to this Notice. The agreement is also subject to the approval of the Attorney General, United States Department of Justice or her designee and for the grant of a covenant not to sue for damages to natural resources, is also subject to agreement in writing by the Department of the Interior ("DOI").

The settling parties collectively agreed to pay $14,478.00 to United States Environmental Protection Agency toward EPA response costs and $522.00 to DOI for damages to natural resources, subject to the contingency that the Environmental Protection Agency may elect not to complete the settlement based on matters brought to its attention during the public comment period established by this Notice.

EPA is entering into this agreement under the authority of Sections 122(g) and 107 of CERCLA, 42 U.S.C. 9622(g) and 9607. Section 122(g) of CERCLA, 42 U.S.C. 9622(g), authorizes early settlements with *de minimis* parties to allow them to resolve their liabilities under, inter alia, Section 107 of CERCLA, 42 U.S.C. 9607, to reimburse the United States for response costs incurred in cleaning up Superfund sites without incurring substantial transaction costs. The grant of a covenant not to sue for damages to natural resources by DOI to those parties paying their share of such allocated costs is subject to agreement in writing by DOI pursuant to Section 122(j) of CERCLA, 42 U.S.C. 9622(j).

The Environmental Protection Agency will receive written comments upon this proposed administrative settlement for thirty (30) days from the date of publication of this Notice. Moreover, pursuant to Section 7003(d) of the Solid Waste Disposal Act, 42 U.S.C. 6973(d), the public may request a meeting in the affected area. A copy of the proposed Administrative Order on Consent can be obtained from the Environmental Protection Agency, Region III, Office of Regional Counsel, (3RC20), 841 Chestnut Building, Philadelphia, Pennsylvania, 19107 by contacting Daniel Isales at (215) 597–4774 or Pamela Lazos at (215) 597–8504.

Peter H. Kostmayer,

Regional Administrator, EPA, Region III.

[FRL–5293–7]

Proposed Administrative Penalty Assessment and Opportunity to Comment

AGENCY: Environmental Protection Agency.

ACTION: Notice of proposed assessment of Clean Water Act Class I administrative penalty and opportunity to comment.

SUMMARY: EPA is providing notice of a proposed administrative penalty for alleged violations of the Clean Water Act. EPA is also providing notice of opportunity to comment on the proposed penalty.

EPA is authorized under section 309(g) of the Act, 33 U.S.C. 1319(g), to assess a civil penalty after providing the person subject to the penalty notice of the proposed penalty and the opportunity for a hearing, and after providing interested persons notice of the proposed penalty and a reasonable opportunity to comment on its issuance. Under section 309(g), any person who without authorization discharges a pollutant to a navigable water, as those terms are defined in section 502 of the Act, 33 U.S.C. 1362, may be assessed a penalty of up to $25,000 by EPA in a "Class I" administrative penalty proceeding. Class I proceedings under section 309(g) are conducted in accordance with the proposed "Consolidated Rules of Practice Governing the Administrative Assessment of Class I Civil Penalties Under the Clean Water Act" ("Part 28"), published at 56 FR 29996 (July 1, 1991).

EPA is providing notice of the following proposed Class I penalty proceeding initiated by the Water Management Division, U.S. EPA, Region 9, 75 Hawthorne St., San Francisco, CA 94105:

In the Matter of Oracle Ridge Mining Partners, Docket No. CWA–IX–FY95–07, filed August 25, 1995; proposed penalty, $25,000; for unauthorized discharges to Gibb Wash and Geesaman Wash between April 1991 and September 1994, and for failure to develop and implement a spill prevention control and countermeasure plan by the deadline required in 40 CFR 112.3, at the Oracle Ridge Mine in Pima County, AZ.

The procedures by which the public may comment on a proposed Class I penalty or participate in a Class I penalty proceeding are set forth in Part 28. The deadline for submitting public comment on a proposed Class I penalty is thirty days after issuance of public notice. The Regional Administrator of EPA, Region 9 may issue an order upon default if the respondent in the proceeding fails to file a response within the time period specified in Part 28.

FOR FURTHER INFORMATION CONTACT: Persons wishing to receive a copy of Part 28, review the complaint, proposed consent order, or other documents filed in this proceeding, comment upon the proposed penalty, or participate in any hearing that may be held, should contact Steven Armsey, Regional Hearing Clerk, U.S. EPA, Region 9, 75 Hawthorne St., San Francisco, CA 94105, (415) 744–1389. Documents filed as part of the public record in this proceeding are available for inspection during business hours at the office of the Regional Hearing Clerk.

In order to provide opportunity for public comment, EPA will not take final action in this proceeding prior to thirty days after issuance of this notice.

Dated: August 29, 1995.

Alexis Strauss,

Acting Director, Water Management Division.

FEDERAL COMMUNICATIONS COMMISSION

[DA 95–1854]

Pleading Cycle Established for Comments on Request for Declaratory Ruling on the Use of Digital Modulation by Multipoint Distribution Service and Instructional Television Fixed Service Stations

AGENCY: Federal Communications Commission.

ACTION: Public notice.

SUMMARY: This Public Notice established a pleading cycle for comments on a Request for Declaratory Ruling filed by a group of parties regarding the use of digital modulation by Multipoint Distribution Service and Instructional Television Fixed Service Stations. The Commission intends to promptly facilitate the use of digital equipment for these services.

DATES: Comments must be received on or before September 22, 1995, and reply comments must be received on or before October 10, 1995.

ADDRESSES: Comments and reply comments may be mailed to Office of the Secretary, Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Charles E. Dziedzic or Brandon J. Bullis at (202) 418–1600, Video Services Division, Mass Media Bureau.

The complete text of the Public Notice follows. The Public Notice and a copy of the Request for Declaratory Ruling are available for public inspection in room 207, 2033 M Street, NW., Washington, DC and may also be obtained from the Commission's copy contractor, ITS, Inc. at (202) 418–0620.

Report No. MM 95–83

Released: August 23, 1995

On July 13, 1995, a request for declaratory ruling on the use of digital modulation by Multipoint Distribution Service (MDS) and Instructional Television Fixed Service (ITFS) stations was filed by a group of ninety-nine parties consisting of MDS and ITFS licensees, wireless cable operators, equipment manufacturers, industry engineers and associations (Petitioners).

Petitioners request that the Commission examine the current MDS and ITFS operational requirements that were adopted before digital compression technology was envisioned and reinterpret them appropriately for digital operations. According to Petitioners, testing conducted in support of this petition demonstrates that the Commission's current MDS and ITFS interference protection rules will safely ensure protection of analog and digital systems during an initial digital transition, with only minimal rule clarifications and waivers necessary. Specifically, Petitioners propose that the Commission apply its current co-channel and adjacent channel desired-to-undesired interference ratios, and for those utilizing digital transmissions, relax the limitations on out-of-band emissions and permit licensees to operate at less than authorized power for an interim period. *See* 47 CFR 21.902, 74.903, 21.908, 74.936(b), 21.107(c) and 74.951(f). Petitioners ask the Commission to clarify whether, under the minimum ITFS programming requirements, additional ITFS programming must be reserved by licensees who expand capacity of their spectrum by utilizing digital compression technology. *See* 47 CFR 74.931. In addition, Petitioners ask the Commission to reinterpret several other requirements that were adopted before digital compression technology was envisioned. For example, Petitioners ask that the Commission determine whether ITFS station identification through the periodic transmission of ITFS call signs must be made over one or all of the channels created through use of digital compression. *See* 47 CFR 74.982.

Petitioners contend that the rapid introduction of digital technology by wireless cable system operators is in the public interest because it will increase the competitive viability of the wireless cable industry and it will also permit educators to increase their transmission capacity. Thus, Petitioners ask the Commission to act promptly on the request in order to have a regulatory framework in place that will permit MDS and ITFS operators to quickly implement digital transmission as soon as equipment is commercially available. Finally, Petitioners suggest that although future testing and information may indicate that further rule changes are appropriate, use of the current rules, with minor rule clarifications and waivers, offered a conservative transitional approach.

Interested parties should file comments on this request by September 22, 1995, and reply comments by October 10, 1995, with the Secretary, FCC, 1919 M Street, NW., Washington, DC 20554. A copy should also be sent to Brandon J. Bullis, Mass Media Bureau, FCC, room 702, 1919 M Street, NW., Washington, DC 20554, and to the Commission's contractor for public service records duplication: ITS, Inc., 2100 M Street, NW., suite 140, Washington, DC 20037. Copies of the above-referenced filings are available for public inspection in room 207, 2033 M Street, NW., Washington, DC and may also be obtained from the Commission's copy contractor, ITS, Inc. at (202) 418–0620. For further information, please contact Charles E. Dziedzic or Brandon J. Bullis at (202) 418–1600.

Federal Communications Commission.

William F. Caton,

Acting Secretary.

BILLING CODE 6712-01-M

FEDERAL RESERVE SYSTEM

Federal Open Market Committee; Domestic Policy Directive of July 5-6, 1995

In accordance with § 271.5 of its rules regarding availability of information (12 CFR part 271), there is set forth below the domestic policy directive issued by the Federal Open Market Committee at its meeting held on July 5-6, 1995.[1] The directive was issued to the Federal Reserve Bank of New York as follows:

The information reviewed at this meeting suggests that the level of economic activity was about unchanged in the second quarter. Nonfarm payroll employment fell in April and May after posting reduced gains in the first quarter, and the civilian unemployment rate, at 5.7 percent in May, was up somewhat from its first-quarter average. Industrial production continued to decline in May, reflecting another cutback in the production of motor vehicles, and capacity utilization was down somewhat further. Total retail sales have been sluggish on average in recent months. Housing starts were about unchanged over April and May, but sales of new homes turned up sharply in May. Orders for nondefense capital goods have moderated somewhat in recent months but still point to considerable further expansion of spending on business equipment; nonresidential construction has continued to trend appreciably higher. The nominal deficit on U.S. trade in goods and services widened in April from its average rate in the first quarter. Broad indexes of consumer and producer prices have increased faster on average thus far this year, though there were signs of some moderation in the most recent data; advances in labor compensation costs have remained subdued.

Most interest rates have declined somewhat further since the Committee meeting on May 23. In foreign exchange markets, the trade-weighted value of the dollar in terms of the other G-10 currencies declined considerably over the intermeeting period.

M2 and M3 strengthened substantially in May and June. For the year through June, M2 expanded at a rate in the upper half of its range for 1995 and M3 grew at a rate well above its range. Total domestic nonfinancial debt has grown at a rate in the upper half of its monitoring range in recent months.

The Federal Open Market Committee seeks monetary and financial conditions that will foster price stability and promote sustainable growth in output. In furtherance of these objectives, the Committee reaffirmed at this meeting the range it had established on January 31-February 1 for growth of M2 of 1 to 5 percent, measured from the fourth quarter of 1994 to the fourth quarter of 1995. The Committee also retained the monitoring range of 3 to 7 percent for the year that it had set for growth of total domestic nonfinancial debt. The Committee raised the 1995 range for M3 to 2 to 6 percent as a technical adjustment to take account of changing intermediation patterns. For 1996, the Committee established on a tentative basis the same ranges as in 1995 for growth of the monetary aggregates and debt, measured from the fourth quarter of 1995 to the fourth quarter of 1996. The behavior of the monetary aggregates will continue to be evaluated in the light of progress toward price level stability, movements in their velocities, and developments in the economy and financial markets.

In the implementation of policy for the immediate future, the Committee seeks to decrease slightly the existing degree of pressure on reserve positions. In the context of the Committee's long-run objectives for price stability and sustainable economic growth, and giving careful consideration to economic, financial, and monetary developments, slightly greater reserve restraint might or slightly lesser reserve restraint would be acceptable in the intermeeting period. The contemplated reserve conditions are expected to be consistent with moderate growth in M2 and M3 over coming months.

By order of the Federal Open Market Committee, August 31, 1995.

Normand R. Bernard,

Deputy Secretary, Federal Open Market Committee.

GENERAL SERVICES ADMINISTRATION

Public Buildings Service; Notice of Availability Environmental Assessment, Port of Entry, Located at Oroville, Okanogan County, Washington

The General Services Administration (GSA) hereby gives notice an Environmental Assessment (EA) has been prepared in accordance with the National Environmental Policy Act (NEPA) of 1969, as amended and the Council on Environmental Quality (CEQ) Regulations, 40 CFR parts 1500–1508 of July 1, 1986. The EA was prepared for the proposed expansion of the Port of Entry located at Oroville, Okanogan County, Washington.

Written comments on the proposed action, impacts and mitigation measures may be submitted to GSA's subconsultant Berger/ABAM Engineers Inc., at the following address: 33301 Ninth Avenue South, Federal Way, Washington 98003–6395, during the 30-day public comment period, which begins on August 18, 1995 and concludes on September 18, 1995. It is anticipated a Finding of No Significant Impact (FONSI) for this project will be prepared, signed and become final after completion of the public comment period, provided no new information leading to a contrary finding is received or is made available during the 30-day comment period.

For further information contact Donna M. Meyer, Regional Environmental Program Officer, General Services Administration, Public Buildings Service (10PC), 400 15th Street SW., Auburn, Washington 98001–6599. Telephone: (206) 931–7675.

---

[1] Copies of the Minutes of the Federal Open Market Committee meeting of July 5-6, 1995, which include the domestic policy directive issued at that meeting, are available upon request to the Board of Governors of the Federal Reserve System, Washington, D.C. 20551. The minutes are published in the Federal Reserve Bulletin and in the Board's annual report.

Dated: August 23, 1995.

L. Jay Pearson,

Regional Administrator (10A).

GOVERNMENT PRINTING OFFICE

Public Meeting for Federal, State and Local Agencies, and Others Interested in a Demonstration of GPO Access, the Online Service Providing the Federal Register and Other Federal Databases

The Superintendent of Documents will hold a public meeting for Federal, state and local government agencies, and any others interested in an overview and demonstration of the Government Printing Office's online service, *GPO Access*, provided under the Government Printing Office Electronic Information Access Enhancement Act of 1993 (Public Law 103–40).

The demonstration will be held Monday, October 16, 1:00 p.m.–2:30 p.m. and 3:00 p.m.–4:30 p.m. at the University of Memphis Libraries, Room 225B, Zach Curlin and Norriswood, Memphis, TN 38152. There is no charge to attend.

The online **Federal Register** Service offers access to the daily issues of the **Federal Register** by 6 a.m. on the day of publication. All notices, rules and proposed rules, Presidential documents, executive orders, separate parts, and reader aids are included in the database as ASCII text files, with graphics provided in TIFF format and as Adobe Acrobat Portable Document Format files (PDF). The online **Federal Register** is available via the Internet or as a dial-in service. Historical data is available from January 1994 forward.

Other databases currently available online through *GPO Access* include the *Congressional Record; Congressional Record Index*, including the *History of Bills;* Congressional Bills; Public Laws; *U.S. Code;* and *GAO Reports*. Individuals interested in attending may reserve a space by contacting John Berger, Product Manager at the GPO's Office of Electronic Information Dissemination Services, by Internet e-mail at john@eids05.eids.gpo.gov; by telephone: 202–512–1525; or by fax: 202–512–1262 . Seating reservations will be accepted through Friday, October 13, 1995.

August 22, 1995.

Michael F. DiMario,

Public Printer.

BILLING CODE 1505-02-F

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

Citizens Advisory Committee on Public Health Service Activities and Research at Department of Energy (DOE) Sites: Savannah River Site Health Effects Subcommittee

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), the Agency for Toxic Substances and Disease Registry (ATSDR) and the Centers for Disease Control and Prevention (CDC) announce the following meeting.

Name: Citizens Advisory Committee on Public Health Service Activities and Research at DOE Sites: Savannah River Site Health Effects Subcommittee (SRS).

Times and Dates: 1 p.m.–5 p.m., September 21, 1995; 9 a.m.–5 p.m., September 22, 1995.

Place: Ramada Plaza Hotel, 640 Broad Street, Augusta, Georgia 30901, telephone 706/722–5541, FAX 706/724–0053.

Status: Open to the public, limited only by the space available. The meeting room accommodates approximately 75 people.

Background

Under a Memorandum of Understanding (MOU) signed in December 1990 with DOE, the Department of Health and Human Services (HHS) has been given the responsibility and resources for conducting analytic epidemiologic investigations of residents of communities in the vicinity of DOE facilities, workers at DOE facilities, and other persons potentially exposed to radiation or to potential hazards from non-nuclear energy production use. HHS delegated program responsibility to CDC.

In addition, an MOU was signed in October 1990 and renewed in November 1992 between ATSDR and DOE. The MOU delineates the responsibilities and procedures for ATSDR's public health activities at DOE sites required under sections 104, 105, 107, and 120 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA or "Superfund"), These activities include health consultations and public health assessments at DOE sites listed on, or proposed for, the Superfund National Priorities List and at sites that are the subject of petitions from the public; and other health-related activities such as epidemiologic studies, health surveillance, exposure and disease registries, health education, substance-specific applied research, emergency response, and preparation of toxicological profiles.

Purpose

The purpose of this meeting is to begin work to update the public on the status of CDC's and ATSDR's community involvement plans, health research, and public health activities and present consensus advise and recommendations to CDC and ATSDR regarding these plans.

Matters to be Discussed

The Subcommittee will take into consideration information provided by technical experts on the history of the Savannah River Site and present operations there, as well as updates on the Savannah River Site Dose Reconstructions Project findings and implications. The Subcommittee will also work on organizational issues relating to its future activities.

Agenda items are subject to change as priorities dictate.

Contact Persons for More Information

Paul G. Renard or Nadine Dickerson, Radiation Studies Branch, Division of Environmental Hazards and Health Effects, NCEH, CDC, 4770 Buford Highway, NE., (F–35), Atlanta, Georgia 30341–3724, telephone 770/488–7040, FAX 770/488–7044.

Dated: September 1, 1995.

Julia M. Fuller,

Acting Director, Management Analysis and Services Office, Centers for Disease Control and Prevention.

BILLING CODE 4163-18-M

Food and Drug Administration

[Docket No. 90F–182]

Allied Colloids Ltd.; Withdrawal of Food Additive Petition

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the withdrawal, without prejudice to future filing, of a food additive petition (FAP 8B4095) proposing that the food additive regulations be amended to provide for the safe use of the copolymer of dimethylamine, epichlorohydrin and diethylenetriamine as a retention and drainage aid in the manufacture of paper and paperboard.

FOR FURTHER INFORMATION CONTACT: Daniel N. Harrison, Center for Food Safety and Applied Nutrition (HFS–216), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–418–3080.

SUPPLEMENTARY INFORMATION: In a notice published in the **Federal Register** of June 14, 1990 (55 FR 24158), FDA announced that a food additive petition (FAP 8B4095) had been filed by Allied Colloids Ltd., P.O. Box 38, Low Moor, Bradford, West Yorkshire, England, BD–12–OJZ. The petition proposed to amend the food additive regulations to provide for the safe use of the copolymer of dimethylamine, epichlorohydrin and diethylenetriamine as a retention and drainage aid in the manufacture of paper and paperboard.

Allied Colloids Ltd. has now withdrawn the petition without prejudice to a future filing (21 CFR 171.7).

Dated: August 18, 1995.

George H. Pauli,

Acting Director, Office of Premarket Approval, Center for Food Safety and Applied Nutrition.

Health Care Financing Administration

[MB–094–N]

RIN 0938–AG61

Medicaid Program; Limitations on Aggregate Payments to Disproportionate Share Hospitals: Federal Fiscal Year 1995

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Notice.

SUMMARY: This notice announces the final Federal fiscal year (FFY) 1995 national target and individual State allotments for Medicaid payment adjustments made to hospitals that serve a disproportionate number of Medicaid recipients and low-income patients with special needs. We are publishing this notice in accordance with the provisions of section 1923(f)(1)(C) of the Social Security Act (the Act) and implementing regulations at 42 CFR 447.297 through 447.299. The final FFY 1995 State disproportionate share hospital (DSH) allotments published in this notice supersede the preliminary FFY 1995 DSH allotments that were published in the **Federal Register** on January 13, 1995 (60 FR 3250).

EFFECTIVE DATE: The final DSH payment adjustment expenditure limits included in this notice apply to Medicaid DSH payment adjustments that are applicable to FFY 1995.

FOR FURTHER INFORMATION CONTACT: Richard Strauss, (410) 966–2019.

SUPPLEMENTARY INFORMATION:

I. Background

Section 1902(a)(13)(A) of the Act requires States to ensure that their Medicaid payment rates include payment adjustments for Medicaid-participating hospitals that serve a large number of Medicaid recipients and other low-income individuals with special needs (referred to as disproportionate share hospitals (DSH)). The payment adjustments are calculated on the basis of formulas specified in section 1923 of the Act.

Section 1923(f) of the Act and implementing Medicaid regulations at 42 CFR 447.297 through 447.299 require us to estimate and publish in the **Federal Register** the national target and each State's allotment for DSH payments for each Federal fiscal year (FFY). The implementing regulations provide that the national aggregate DSH limit for a FFY specified in the Act is a target rather than an absolute cap when determining the amount that can be allocated for DSH payments. The national DSH target is 12 percent of the total amount of medical assistance expenditures (excluding total administrative costs) that are projected to be made under approved Medicaid State plans during the FFY. (Note: Whenever the phrases "total medical assistance expenditures" or "total administrative costs" are used in this notice, they mean both the State and Federal share of expenditures or costs.)

In addition to the national DSH target, there is a specific State DSH limit for each State for each FFY. The State DSH limit is a specified amount of DSH payment adjustments applicable to a FFY above which FFP will not be available. This is called the "State DSH allotment".

Each State's DSH allotment for FFY 1995 is calculated by first determining whether the State is a "high-DSH State," or a "low-DSH State." This is determined by using the State's "base allotment." A State's base allotment is the greater of the following amounts: (1) The total amount of the State's actual and projected DSH payment adjustments made under the State's approved State plan applicable to FFY 1992, as adjusted by HCFA; or (2) $1,000,000.

A State whose base allotment exceeds 12 percent of the State's total medical assistance expenditures (excluding administrative costs) projected to be made in FFY 1995 is referred to as a "high-DSH State." The FFY 1995 State DSH allotment for a high-DSH State is limited to the State's base allotment.

A State whose base allotment is equal to or less than 12 percent of the State's total medical assistance expenditures (excluding administrative costs) projected to be made in FFY 1995 is referred to as a "low-DSH State." The FFY 1995 State DSH allotment for a low-DSH State is equal to the State's DSH allotment for FFY 1994 increased by growth amounts and supplemental amounts, if any. However, the FFY 1995 DSH allotment for a low-DSH State cannot exceed 12 percent of the State's total medical assistance expenditures for FFY 1995 (excluding administrative costs).

The growth amount for FFY 1995 is equal to the projected percentage increase (the growth factor) in a low-DSH State's total Medicaid program expenditures between FFY 1994 and FFY 1995 multiplied by the State's final DSH allotment for FFY 1994. Because the national DSH limit is considered a target, low-DSH States whose programs grow from one year to the next can receive a growth amount that would not be permitted if the national limit was viewed as an absolute cap.

There is no growth factor and no growth amount for any low-DSH State whose Medicaid program does not grow (that is, stayed the same or declined) between FFY 1994 and FFY 1995. Furthermore, because a low-DSH State's FFY 1995 DSH allotment cannot exceed 12 percent of the State's total medical assistance expenditures, it is possible for its FFY 1995 DSH allotment to be lower than its FFY 1994 DSH allotment. This occurs when the State experiences a decrease in its program expenditures between years and its prior FFY DSH allotment is greater than 12 percent of the total projected medical assistance expenditures for the current FFY. This is the case for the State of Indiana for FFY 1995.

There is no supplemental amount available for redistribution for FFY 1995. The supplemental amount, if any, is equal to a low-DSH State's proportional share of a pool of funds (the redistribution pool). The redistribution pool is equal to the national 12 percent DSH target reduced by the total of the base allotments for high-DSH States, the total of the State DSH allotments for the previous FFY for low-DSH States, and the total of the low-DSH State growth amounts. Since the sum of these amounts is above the projected FFY 1995 national 12 percent DSH target, there is no redistribution pool and, therefore, no supplemental amounts for FFY 1995.

As prescribed in the law and regulations, no State's DSH allotment will be below a minimum of $1,000,000.

As an exception to the above requirements, under section 1923(f)(1)(A)(i)(II) of the Act and regulations at 42 CFR 447.296(b)(5) and 447.298(f), a State may make DSH payments for a FFY in accordance with the minimum payment adjustments required by Medicare methodology described in section 1923(c)(1) of the Act. The State of Nebraska's final State DSH allotment has been determined in accordance with this exception.

We are publishing in this notice the final FFY 1995 national DSH target and State DSH allotments based on the best available data we received to date from the States, as adjusted by HCFA. These data are taken from each State's actual Medicaid expenditures for FFY 1994 as reported on the State's quarterly expenditure report Form HCFA–64 submissions and the FFY 1995 projected Medicaid expenditures as reported on the February 1995 Form HCFA–37 submission. All data are adjusted as necessary.

II. Calculations of the Final FFY 1995 DSH Limits

The total of the final State DSH allotments for FFY 1995 is equal to the sum of the base allotments for all high-DSH States, the FFY 1994 State DSH allotments for all low-DSH States, and the growth amounts for all low-DSH States. A State-by-State breakdown is presented in section III of this notice.

We classified States as high-DSH or low-DSH States. If a State's base allotment exceeded 12 percent of its total unadjusted medical assistance expenditures (excluding administrative costs) projected to be made under the State's approved plan in FFY 1995, we classified that State as a "high-DSH" State. If a State's base allotment was 12 percent or less of its total unadjusted medical assistance expenditures projected to be made under the State's approved State plan under title XIX of the Act in FFY 1995, we classified that State as a "low-DSH" State. Based on this classification, there are 34 low-DSH States and 16 high-DSH States for FFY 1995.

Using the most recent data from the States' February 1995 budget projections (Form HCFA–37), we estimate the States' FFY 1995 national total medical assistance expenditures to be $152,830,147,000. Thus, the overall final national FFY 1995 DSH expenditure target is $18,339,618,000 (12 percent of $152,830,147,000).

In the final FFY 1995 State DSH allotments, we provide a total of $644,305,000 ($356,788,000 Federal share) in growth amounts for the 34 low-DSH States. The growth factor percentage for each of the low-DSH States was determined by calculating the Medicaid program growth percentage for each low-DSH State between FFY 1994 and FFY 1995. To compute this percentage, we first ascertained each low-DSH State's total FFY 1994 medical assistance and administrative expenditures as reported on the State's quarterly expenditure reports (Form HCFA–64) for FFY 1994. Next, we compared the FFY 1994 reported expenditures to each low-DSH State's total estimated unadjusted FFY 1995 medical assistance and administrative expenditures as reported to HCFA on the State's February 1995 Form HCFA–37 submission.

The growth factor percentage was multiplied by the low-DSH State's final FFY 1994 DSH allotment amount to establish the State's final growth amount for FFY 1995.

Since the sum of the total of the base allotments for high-DSH States, the total of the State DSH allotments for the previous FFY for low-DSH States, and the growth for low DSH States ($19,084,239,000) is greater than the final FFY 1995 national target ($18,339,618,000), there is no final FFY 1995 redistribution pool.

The low-DSH State's growth amount was then added to the low-DSH State's final FFY 1994 DSH allotment amount to establish the final total low-DSH State DSH allotment for FFY 1995. If a State's growth amount, when added to its final FFY 1994 DSH allotment amount, exceeds 12 percent of its FFY 1995 estimated medical assistance expenditures, the State only receives a partial growth amount that, when added to its final FFY 1994 allotment, limits its total State DSH allotment for FFY 1995 to 12 percent of its estimated FFY 1995 medical assistance expenditures. For this reason, nine of the low-DSH States received partial growth amounts.

As explained above, Indiana's final FFY 1995 DSH allotment is lower than its final FFY 1994 DSH allotment. Also, in accordance with the minimum payment adjustments required by Medicare methodology, Nebraska's FFY 1995 State DSH allotment is $11,000,000.

In summary, the total of all final State DSH allotments for FFY 1995 is $19,084,239,000 ($10,886,177,000 Federal share). This total is composed of the prior FFY's final State DSH allotments ($18,490,099,000) plus growth amounts for all low-DSH States ($644,305,000), minus the amount of reduction in Indiana's FFY 1995 DSH allotment ($50,165,000), plus supplemental amounts for low-DSH States ($0). The total of all final FFY 1995 State DSH allotments is 12.5 percent of the total medical assistance expenditures (excluding administrative costs) projected to be made by these States in FFY 1995. The total of all final DSH allotments for FFY 1995 is $744,621,000 over the FFY 1995 national target amount of $18,339,618,000.

Each State should monitor and make any necessary adjustments to its DSH spending during FFY 1995 to ensure that its actual FFY 1995 DSH payment adjustment expenditures do not exceed its final State DSH allotment for FFY 1995 published in this notice. As the ongoing reconciliation between actual FFY 1995 DSH payment adjustment expenditures and the final FFY 1995 DSH allotments takes place, each State should amend its plan as may be necessary to make any adjustments to its FFY 1995 DSH payment adjustment expenditure patterns so that the State will not exceed its final FFY 1995 DSH allotment.

The FFY 1995 reconciliation of DSH allotments to actual expenditures will take place on an ongoing basis as States file expenditure reports with HCFA for DSH payment adjustment expenditures applicable to FFY 1995. Additional DSH payment adjustment expenditures made in succeeding FFYs that are applicable to FFY 1995 will continue to be reconciled with each State's final FFY 1995 DSH allotment as additional expenditure reports are submitted to ensure that the final FFY 1995 DSH allotment is not exceeded. As a result, any DSH payment adjustment expenditures in excess of the final DSH allotment will be disallowed; and therefore, subject to the normal Medicaid disallowance procedures.

III. Final FFY 1995 DSH Allotments Under Public Law 102–234

Key to Chart

Column	Description
Column A = ...	Name of State.
Column B = ...	Final FFY 1994 DSH Allotments for All States. For a high-DSH State, this is the State's base allotment, which is the greater of the State's FFY 1992 allowable DSH payment adjustment expenditures applicable to FFY 1992, or $1,000,000. For a low-DSH State, this is equal to the final DSH allotment for FFY 1994, which was published in the **Federal Register** on May 2, 1994.

Column	Description
Column C = ...	Growth Amounts for Low-DSH States. This is an increase in a low-DSH State's final FFY 1994 DSH allotment to the extent that the State's Medicaid program grew between FFY 1994 and FFY 1995.
Column D = ...	Final FFY 1995 State DSH Allotments. For high-DSH States, this is equal to the base allotment from column B. For low-DSH States, this is equal to the final State DSH allotments for FFY 1994 from column B plus the growth amounts from column C and the supplemental amounts, if any, from column D.
Column E = ...	High or Low DSH State Designation for FFY 1995. "High" indicates the State is a high-DSH State and "Low" indicates the State is a low-DSH State, after calculation of the final State DSH allotments.

FINAL FEDERAL FISCAL YEAR 1995 DISPROPORTIONATE SHARE HOSPITAL ALLOTMENTS UNDER PUBLIC LAW 102–234

[Amounts are state and Federal shares; dollars are in thousands (000)]

State A	Final FFY 94 DSH allotments for all states B	Growth amounts for low DSH states[1] C	Final FFY95 state DSH allotments D	High or low DSH state designation E

Notes

[1] There was 1 low DSH state which had negative growth and 9 low DSH states which got partial growth up to 12% of FFY 95 MAP.

[2] Due to negative growth, allotment limited to 12% of FFY 95 MAP.

[3] Allotment based upon minimum payment adjustment amount.

IV. Regulatory Impact Statement

We generally prepare a regulatory flexibility analysis that is consistent with the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 through 612), unless the Secretary certifies that a notice would not have a significant economic impact on a substantial number of small entities. For purposes of a RFA, States and individuals are not considered small entities. However, providers are considered small entities. Additionally, section 1102(b) of the Act requires the Secretary to prepare a regulatory impact analysis if a notice may have a significant impact on the operations of a substantial number of small rural hospitals. Such an analysis must conform to the provisions of section 604 of the RFA. For purposes of section 1102(b) of the Act, we define a small rural hospital as a hospital that is located outside of a Metropolitan Statistical Area and has fewer than 50 beds.

This notice sets forth no changes in our regulations; rather, it reflects the DSH allotments for each State as determined in accordance with §§ 447.297 through 447.299.

We have discussed the method of calculating the final FFY 1995 national aggregate DSH target and the final FFY 1995 individual State DSH allotments in the previous sections of this preamble. These calculations should have a positive impact on payments to DSHs. Allotments will not be reduced for high-DSH States since we interpret the 12 percent limit as a target. Low-DSH States will get their prior FFY DSH allotments plus their growth amounts.

In accordance with the provisions of Executive Order 12866, this notice was reviewed by the Office of Management and Budget.

Public Health Service

Announcement of Cooperative Agreement With the American School Health Association

AGENCY: Office of the Assistant Secretary for Health, Office of Disease Prevention and Health Promotion.

ACTION: Final notice.

SUMMARY: The Office of Disease Prevention and Health promotion (ODPHP) on behalf of the Interagency Committee on School Health announces the availability of fiscal year (FY) 1995 funds for a sole source cooperative agreement with the American School Health Association (ASHA) to review and synthesize the health and educational effects of school health programs and to set forth the research agenda. Approximately $100,000 will be available in FY 1995 to support this project. This award will begin on or about September 1, 1995, for a 12 month budget period within a project period of up to 2 years. Funding estimates may vary and are subject to change. Continuation awards within the project period will be made on the basis of satisfactory progress and the availability of funds.

EFFECTIVE DATE: September 30, 1995.

FOR FURTHER INFORMATION CONTACT: Kristine I. McCoy, M.P.H., School Health Coordinator, Office of Disease Prevention and Health Promotion, Office of the Assistant Secretary for Health, PHS U.S. Department of Health and Human Services, 330 C Street, SW, Room 2132, Washington, DC 20201, Phone: 202–205–8180.

SUPPLEMENTARY INFORMATION: The ODPHP will assist in identifying programs and procedures relevant to the project objectives; collaborate in developing, analyzing, and reviewing material for dissemination; and take responsibility for publication of final products.

The Public Health service (PHS) is committed to achieving the health promotion and disease prevention objectives of "Healthy People 2000," a PHS-led national activity to reduce morbidity and mortality and improve the quality of life. This announcement us related to objectives in nearly all priority areas, particularly those pertaining to school-aged children and youth. (To order a copy of "Healthy People 2000," see the section, "Where to Obtain Additional Information.")

Authority

This program is authorized under the Public Health Service Act, section 1701(a)(11).

Smoke-Free Workplace

The PHS strongly encourages all grant recipients to provide a smoke-free workplace and promote the non-use of all tobacco products and Public Law 103–227, the Pro-Children's Act of 1994, prohibits smoking in certain facilities that receive Federal funds in which education, library, day care, health care, and early childhood development services are provided to the children.

Eligible Applicant

Assistance will be provided only to the ASHA. No other applications are solicited. The program announcement and application kit have been sent to ASHA. Eligibility is limited to ASHA because it provides representation from a wide variety of professionals in health, education, and social services around the country who serve children through school health programs or related research. ASHA was created specifically to represent this wide variety of professionals, and is unique in its role as a liaison between the school health community and government and other national organizations. With a current membership of 3500 the ASHA has served as a policy development and capacity building organization for more than 70 years. One of its major objectives is the sharing of information that will support school health programs and protect and improve the well-being of children. Thus, the ASHA membership will benefit directly from a compiled body of knowledge that can be used to improve and create quality school health programs and which helps ASHA affiliated researchers to focus their work on key questions.

The ASHA's commitment to improvement of the health of school-aged children and demonstrated ability to produce and disseminate information accessible to a wide variety of school health professionals are demonstrated by its flagship publication the Journal of School Health whose articles cover all areas of medical and education practice with special application to school health programs, and which circulates in the U.S. and 56 foreign countries. In addition, the ASHA has a long history of special publications including "Achieving the 1990 Health Objectives for the Nation: Agenda for the Nation's Schools" and "Recommendations for Delivery of Comprehensive Primary Health Care to Children and Youth in the School Setting."

The ASHA has established an advisory panel and a review panel of its members representing graduate academic programs training school health professionals within various disciplines to provide expertise in the planning and conduct of this project. Other professional organizations to which the advisory panel members belong and will serve as agents of for this project include the American Alliance for Health, Physical Education, Recreation and Dance, the American Public Health Association, the Society for the Promotion of Health Education, the Association for the Advancement of Health Education, the International Union on Health Education and Promotion, the American Dietetic Association, and the American School Food Service Association. These organizations will serve as resources for the collection of school health evaluations and will benefit from the dissemination of the final review and synthesis.

Executive Order 12372 Review

This application is not subject to Intergovernmental Review of Federal Programs as governed by Executive Order 12372.

Public Health System Reporting Requirements

This program is not subject to the Public Health System Reporting Requirements.

Where to Obtain More Information

A copy of "Healthy People 2000" (Full Report, stock No. 017–001–00474–0) or "Healthy People 2000" (Summary Report, Stock No. 017–001–00473–1) referenced in the "Summary" may be obtained from the Superintendent of Documents, Government Printing Office, P.O. Box 371954, Pittsburgh, PA 15250–7954, telephone (202) 512–2250.

Dated: August 22, 1995.

Susanne A. Stoiber,

Acting Deputy Assistant Secretary for Health, (Disease Prevention and Health Promotion/ Health Planning and Evaluation).

BILLING CODE 4160–17–M

Violent Crime Control and Law Enforcement Act of 1994; Delegation of Authority

Notice is hereby given that I have delegated to the Assistant Secretary for Health, with authority to redelegate, all the authorities vested in the Secretary of Health and Human Services under Section 318—Demonstration Grants for Community Initiatives (42 U.S.C. 10418), of the Family Violence Prevention and Services Act as added by Section 40261 of the Violent Crime Control and Law Enforcement Act of 1994 (Public Law 103–322), as amended hereafter. This delegation excludes the authority to promulgate regulations and to submit reports to the Congress.

This delegation became effective upon date of signature. In addition, I have affirmed and ratified any actions taken by the Assistant Secretary for Health or his subordinates which, in effect, involved the exercise of the authorities delegated herein prior to the effective date of the delegation.

Dated: August 29, 1995.

Donna E. Shalala,

Secretary.

BILLING CODE 4160–18–M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Community Planning and Development

[Docket No. FR–3778–N–63]

Federal Property Suitable as Facilities To Assist the Homeless

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

ACTION: Notice.

SUMMARY: This Notice identifies unutilized, underutilized, excess, and surplus Federal property reviewed by HUD for suitability for possible use to assist the homeless.

ADDRESSES: For further information, contact Mark Johnston, room 7256, Department of Housing and Urban Development, 451 Seventh Street SW, Washington, DC 20410; telephone (202) 708–1226; TDD number for the hearing- and speech-impaired (202) 708–2565 (these telephone numbers are not toll-free), or call the toll-free Title V information line at 1–800–927–7588.

SUPPLEMENTARY INFORMATION: In accordance with 56 FR 23789 (May 24, 1991) and section 501 of the Stewart B. McKinney Homeless Assistance Act (42 U.S.C. 11411), as amended, HUD is publishing this Notice to identify Federal buildings and other real property that HUD has reviewed for suitability for use to assist the homeless. The properties were reviewed using information provided to HUD by Federal landholding agencies regarding unutilized and underutilized buildings and real property controlled by such agencies or by GSA regarding its inventory of excess or surplus Federal property. This Notice is also published in order to comply with the December 12, 1998 Court Order in *National Coalition for the Homeless v. Veterans Administration*, No. 88–2503–OG (D.D.C.).

Properties reviewed are listed in this Notice according to the following categories: Suitable/available, suitable/unavailable, suitable/to be excess, and unsuitable. The properties listed in the three suitable categories have been

reviewed by the landholding agencies, and each agency has transmitted to HUD: (1) Its intention to make the property available for use to assist the homeless, (2) its intention to declare the property excess to the agency's needs, or (3) a statement of the reasons that the property cannot be declared excess or made available for use as facilities to assist the homeless.

Properties listed as suitable/available will be available exclusively for homeless use for a period of 60 days from the date of this Notice. Homeless assistance providers interested in any such property should send a written expression of interest to HHS, addressed to Brian Rooney, Division of Health Facilities Planning, U.S. Public Health Service, HHS, room 17A–10, 5600 Fishers Lane, Rockville, MD 20857; (301) 443–2265. (This is not a toll-free number.) HHS will mail to the interested provider an application packet, which will include instructions for completing the application. In order to maximize the opportunity to utilize a suitable property, providers should submit their written expressions of interest as soon as possible. For complete details concerning the processing of applications, the reader is encouraged to refer to the interim rule governing this program, 56 FR 23789 (May 24, 1991).

For properties listed as suitable/to be excess, that property may, if subsequently accepted as excess by GSA, be made available for use by the homeless in accordance with applicable law, subject to screening for other Federal use. At the appropriate time, HUD will publish the property in a Notice showing it as either suitable/available or suitable/unavailable.

For properties listed as suitable/unavailable, the landholding agency has decided that the property cannot be declared excess or made available for use to assist the homeless, and the property will not be available.

Properties listed as unsuitable will not be made available for any other purpose for 20 days from the date of this Notice. Homeless assistance providers interested in a review by HUD of the determination of unsuitability should call the toll free information line at 1–800–927–7588 for detailed instructions or write a letter to Mark Johnston at the address listed at the beginning of this Notice. Included in the request for review should be the property address (including zip code), the date of publication in the **Federal Register**, the landholding agency, and the property number.

For more information regarding particular properties identified in this Notice (*i.e.*, acreage, floor plan, existing sanitary facilities, exact street address), providers should contact the appropriate landholding agencies at the following addresses: U.S. Navy: John J. Kane, Deputy Division Director, Dept. of Navy, Real Estate Operations, Naval Facilities Engineering Command, 200 Stovall Street, Alexandria, VA 22332–2300; (703) 325–0474; Dept. of Energy: Tom Knox, Realty Specialist, AD223.1, 1000 Independence Ave. SW, Washington, DC 20585; (202) 586–1191; GSA: Ed Guilford, Federal Property Resources Services, GSA, 18th and F Streets NW, Washington, DC 20405; (202) 501–2059; Dept. of Interior: Lola D. Knight, Property Management Specialist, Dept. of Interior, 1849 C St. NW, Mailstop 5512–MIB, Washington, DC 20240; (202) 208–4080; (These are not toll-free numbers).

Dated: September 1, 1995.

Jacquie M. Lawing,

Deputy Assistant Secretary for Economic Development.

Bureau of land Management

[AK–962–1410–00–P; AA–6664–C, AA–6664–D, AA–6664–A2]

Notice for Publication; Alaska Native Claims Selection

In accordance with Departmental regulation 43 CFR 2650.7(d), notice is hereby given that a decision to issue conveyance under the provisions of Sec. 14(a) of the Alaska Native Claims Settlement Act of December 18, 1971, 43 U.S.C. 1601, 1613(a), will be issued to the English Bay Corporation for approximately 16,305.62 acres. The lands involved are in the vicinity of the Kenai Fjords, Alaska.

Seward Meridian, Alaska

U.S. Survey No. 4779,
T. 5 S., R. 3 W.,
T. 5 S., R. 4 W,
T. 7 S., R. 7 W.,
T. 7 S., R. 8 W.

A notice of the decision will be published once a week, for four (4) consecutive weeks, in the Seward Phoenix Log. Copies of the decision may be obtained by contacting the Alaska State Office of the Bureau of Land Management, 222 West Seventh Avenue, #13, Anchorage, Alaska 99513–7599 ((907) 271–5960).

Any party claiming a property interest which is adversely affected by the decision, an agency of the Federal government or regional corporation, shall have until October 10, 1995 to file an appeal. However, parties receiving service by certified mail shall have 30 days from the date of receipt to file an appeal. Appeals must be filed in the Bureau of Land Management at the address identified above, where the requirements for filing an appeal may be obtained. Parties who do not file an appeal in accordance with the requirements of 43 CFR Part 4, Subpart E, shall be deemed to have waived their rights.

Patricia K. Underwood,

Acting Chief, Branch of Gulf Rim Adjudication.

Notice of Meeting for the Gila Box Advisory Committee

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of meeting.

SUMMARY: Notice is hereby given in accordance with 43 CFR 1780 that a meeting of the Gila Box Riparian National Conservation Area (NCA) Advisory Committee will be held.

DATES: September 28, 1995, 9:00 a.m.—4:00 p.m., Safford District Office.

ADDRESSES: BLM Safford District Office, 711 14th Ave., Safford, Arizona.

SUPPLEMENTARY INFORMATION: The NCA Advisory Committee was established by Arizona Desert Wilderness Act of 1990 to provide input to the Safford District on management of the Gila Box Riparian National Conservation Area (NCA). The Committee is continuing work on the Gila Box Interdisciplinary Activity Plan, which will be completed by December 1995.

The agenda for the meeting includes: (1) refine management actions; (2) finalize preferred alternative.

All meetings are open to the public. Interested persons may make oral statements to the Committee between 10:30 and 11:00 a.m. or may file written statements for consideration by the Committee. Anyone wishing to make an oral statement must contact the BLM Gila Resource Area Manager at least two working days prior to the meeting. (Written statements are also accepted at any time during preparation of the draft plan, and will be reviewed by the committee.)

Statements should be mailed to Elmer Walls, Team Leader, Gila Resource Area, 711 14th Ave., Safford, Arizona 85546.

Summary minutes of the meeting will be maintained in the Safford District Office and will be available for public inspection (during regular business hours) within 30 days after each meeting.

FOR FURTHER INFORMATION CONTACT: Meg Jensen, Gila Resource Area Manager, or Elmer Walls, Team Leader, 711 14th Ave., Safford, Arizona 85546, Telephone (520) 428–4040.

Dated: August 29, 1995.

William T. Civish,

District Manager.

BILLING CODE 4310–32–M

[NM–070–1430–01; NMNM 71324]

Issuance of Exchange Conveyance Document; New Mexico.

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: This action informs the public of the conveyance of 39.22 acres of public land out of Federal ownership and the reconveyance of 90.06 acres of land into Federal ownership.

FOR FURTHER INFORMATION CONTACT: Farmington District Manager, 1235 La Plata Highway, Farmington, New Mexico 87401.

SUPPLEMENTARY INFORMATION: The United States issued an exchange conveyance document to Donald G. Myer and Edith Myer and Chalmer R. Myer and Norma Jean Meyer on November 8, 1993, for the surface estate in the following described land in San Juan County, New Mexico, pursuant to Sections 502 and 504 of the Chaco National Historic Park Act of December 19, 1980 (94 Stat. 3221).

New Mexico Principal Meridian

T. 30 N., R. 12 W.,
  Sec. 19, lot 4.
  Containing 39.22 acres.

In exchange for the land described above, Donald G. and Edith Myer and Chalmer R. and Norma Jean Myer conveyed to the United States of America the surface estate in the following described land located in San Juan County, New Mexico. Also, the State of New Mexico donated to the United States of America 33.00 acres of land (surface estate), and an access road easement in San Juan County, New Mexico described as follows:

New Mexico Principal Meridian

T. 32 N., R. 13 W., sec. 15, a tract of land in the E½SW¼ and W½SE¼ (described by metes and bounds).
  Containing 90.06 acres.

The purpose of the exchange was to acquire and protect cultural resources of national significance. The acquired land offers high public values for cultural resources. The acquired land is closed to the public except by authorized personnel.

The values of the Federal public land was $86,284.00 and the non-Federal land exchanged was $139,090.00. The donated land and easement by the State of New Mexico was appraised at $37,000.00. An equalization payment of $15,806.00 was made to the Myers. The public interest was served through the completion of this exchange.

William C. Calkins,

State Director,

Dated: August 28, 1995.

BILLING CODE 4310–FB–P

Bureau of Land Management

[CA–018–1220–00]

Recreation Management; Final Supplementary Rules; California

ACTION: Final Supplementary Rules.

SUMMARY: Establishment of supplementary rules for the management of public lands along the Middle Fork of the Consumnes River, Folsom Resource Area, Bakersfield District, California. The following rules shall apply to public land located adjacent to Mt. Aukum Road, El Dorado County, California; specifically, Township 9 North, Range 12 East, section 19 and Township 9 North, Range 11 East, section 24 of the Mt. Diablo meridian.

1. No person shall camp overnight. Camp overnight is defined as the use, construction, or taking possession of public lands using tents, shacks, lean-tos, vehicles, huts, blankets, or sleeping bags.
2. No person shall build, attend, maintain, or use a campfire. Campfire is defined as a controlled fire occurring out of doors, used for cooking, branding, personal warmth, lighting, ceremonial, or aesthetic purposes.
3. No person shall possess or consume alcoholic beverages. Alcoholic beverages are defined as beer, wine, distilled spirits, or any other beverage as defined as such by California law.
4. No person shall enter the area or park a motor vehicle between the hours of 10 o'clock pm and 6 o'clock am. Persons driving through the area on the road are exempt.

Any person who fails to comply with these supplementary rules may be subject to fines of up to $100,000 and/or imprisonment not to exceed 12 months. These penalties are specified by Title 43 of the United States Code, section 303 and Title 18 of the United States Code, section 3623.

Federal, State, and local law enforcement officers and emergency services personnel, while performing official duties, are exempt from these supplementary rules.

DATES: These final rules will be in effect on September 8, 1995 and be in effect until rescinded or modified.

FOR FURTHER INFORMATION CONTACT: Deane K. Swickard, 63 Natoma Street, Folsom, Ca. 95630, Telephone 916–985–4474.

SUPPLEMETARY INFORMATION: This area has a history of an unusual number of law enforcement incidents. Both the BLM and the El Dorado Sheriff's Department receives a large number of complaints from the public concerning activities occurring in this area. These activities became such a concern to the adjacent residents that they organized a public meeting with county and BLM officials. The purpose of these rules are to allow appropriate use of the public lands and provide for the protection of the public and the resources. These rules were published as proposed rulemaking in the **Federal Register** dated July 20, 1995. No comments were received.

Authority for supplementary rules is contained in Title 43 of the Code of Federal Regulations, subpart 8364.1.

D. K. Swickard,

Resource Area Manager.

BILLING CODE 4310–40–M

[CA–050–05–1610–00]

Proposed Designation of Areas of Critical Environmental Concern (ACEC) for the Arcata Planning Area

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The Bureau of Land Management proposes to designate seven (7) Areas of Critical Environmental Concern (ACECs) as part of the Proposed Amendment to the Arcata Resource Management Plan. The ACECs include: Lack's Creek watershed ACEC, 2978 acres; South Fork Eel River Watershed ACEC, 10,784 acres; Lacks Creek RNA/ACEC, 1520 acres; Red Mountain RNA/ACEC, 6895 acres; Elder Creek RNA/ACEC, 3,775 acres; Gilham Butte RNA/ACEC, 2,550 acres; and the Iaqua Butte RNA/ACEC, 1080 acres.

Resource use limitations associated with the above ACEC proposals would be the same as described for Late-Successional Reserve (LSR) management contained in the Northwest Forest Plan Record of Decision (1994).

In order to be a potential ACEC, an area must satisfy the criteria of relevance and importance, consistent with the regulations, 43 CFR 1610.7–2.

FOR FURTHER INFORMATION CONTACT: Lynda J. Roush, Area Manager, at Bureau of Land Management, Arcata Resource Area, 1695 Heindon Road, Arcata, CA 95521–4573. Telephone: (707) 825–2300.

SUPPLEMENTARY INFORMATION: The proposed ACECs are discussed in the *Arcata Planning Area Proposed Resource Management Plan Amendment and Environmental Assessment, March 1995*. There will be a 60-day comment period on the proposed ACEC's beginning with the publication of this notice. Public comments must be in writing and mailed to the above address. Following this 60–day comment period, action will be taken by the California State Director to approve or disapprove the proposed ACECs. Approval of the proposed Arcata RMP Amendment by the California State Director will constitute formal designation of these ACECs.

Daniel E. Averill,

Acting Arcata Area Manager.

BILLING CODE 4310–40–M

[OR–942–00–1420–00: G5–206]

Filing of Plats of Survey: Oregon/Washington

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The plats of survey of the following described lands are scheduled to be officially filed in the Oregon State Office, Portland, Oregon, thirty (30) calendar days from the date of this publication.

Willamette Meridian

Oregon

T. 16 S., R. 2 E., accepted August 1, 1995;
T. 1 N., R. 6 E., accepted July 24, 1995;
T. 2 N., R. 6 E., accepted July 24, 1995;
T. 30 S., R. 7 W., accepted July 18, 1995;
T. 13 S., R. 7 W., accepted July 17, 1995;
T. 10 S., R. 11 W., accepted July 14, 1995;
T. 31 S., R. 14 W., accepted August 11, 1995;
T. 37 S., R. 14 W., accepted August 8, 1995.

If protests against a survey, as shown on any of the above plat(s), are received prior to the date of official filing, the filing will be stayed pending consideration of the protest(s). A plat will not be officially filed until the day after all protests have been dismissed and become final or appeals from the dismissal affirmed.

The plat(s) will be placed in the open files of the Oregon State Office, Bureau of Land Management, 1515 S.W. 5th Avenue, Portland, Oregon 97201, and will be available to the public as a matter of information only. Copies of the plat(s) may be obtained from the above office upon required payment. A person or party who wishes to protest against a survey must file with the State Director, Bureau of Land Management, Portland, Oregon, a notice that they wish to protest prior to the proposed official filing date given above. A statement of reasons for a protest may be filed with the notice of protest to the State Director, or the statement of reasons must be filed with the State Director within thirty (30) days after the proposed official filing date.

The above-listed plats represent dependent resurveys, survey and subdivision.

FOR FURTHER INFORMATION CONTACT: Bureau of Land Management, (1515 SW., 5th Avenue,) P.O. Box 2965, Portland, Oregon 97208.

Dated: August 28, 1995.

Robert D. DeViney, Jr.,

Acting Chief, Branch of Realty and Records Services.

Fish and Wildlife Service

Notice of Receipt of Applications for Permit

The following applicants have applied for a permit to conduct certain activities with endangered species. This notice is provided pursuant to Section 10(c) of the Endangered Species Act of 1973, *as amended* (16 U.S.C. 1531, *et seq.*):

PRT–805282

Applicant: International Animal Exchange, Ferndale, MI.

The applicant requests a permit to export one captive-born female grey wolf (*Canis lupus lycaon*) to the Seoul Grand Park Zoo, Seoul Korea, for the purpose of enhancement of the survival of the species through propagation and conservation education.

PRT–805801

Applicant: International Animal Exchange, Ferndale, MI.

The applicant requests a permit to export one captive-born female grey wolf (*Canis lupus lycaon*) to the Akita Omoriyama Zoo, Akita City, Japan, for the purpose of enhancement of the survival of the species through propagation and conservation education.

PRT–806242

Applicant: Michael Wilmet, Long Grove, FL.

The applicant requests a permit to import the sport-hunted trophy of one male bontebok (*Damaliscus pygargus dorcas*) culled from the captive herd maintained by M.G. Wienand at Longwood, Bedford, Cape Province, South Africa for the purpose of enhancement of the survival of the species.

PRT–806340

Applicant: St. Louis Zoological Park, St. Louis, MO.

The applicant requests a permit to import four pairs of captive-held black and white ruffed lemur (*Varecia variegata variegata*) from Parc Zoologique Ivoloina, Madagascar for placement in SSP institutions for the purpose of enhancement through captive propagation.

PRT–805879

Applicant: Eugene M. Bishop, Roswell, GA.

The applicant requests a permit to import the sport-hunted trophy of one bontebok (*Damaliscus pygarcus dorcas*) culled from the captive herd maintained by Mr. Luke Kock, Verborgenfontein, Richmond, Republic of South Africa, for the purpose of enhancement of the survival of the species.

Written data or comments should be submitted to the Director, U.S. Fish and Wildlife Service, Office of Management Authority, 4401 North Fairfax Drive, Room 420(c), Arlington, Virginia 22203 and must be received by the Director within 30 days of the date of this publication.

Documents and other information submitted with these applications are available for review, *subject to the requirements of the Privacy Act and Freedom of Information Act*, by any party who submits a written request for a copy of such documents to the following office within 30 days of the date of publication of this notice: U.S. Fish and Wildlife Service, Office of Management Authority, 4401 North Fairfax Drive, Room 420(c), Arlington, Virginia 22203. Phone: (703/358–2104); FAX: (703/358–2281).

Dated: September 1, 1995.

Mary Ellen Amtower,

Acting Chief Branch of Permits, Office of Management Authority.

BILLING CODE 4310–55–P

INTERSTATE COMMERCE COMMISSION

[Docket No. AB–167 (Sub-No. 1146X)]

Consolidated Rail Corporation—Abandonment Exemption—in Clearfield and Centre Counties, PA

AGENCY: Interstate Commerce Commission.

ACTION: Notice of exemption.

SUMMARY: The Commission, pursuant to 49 U.S.C. 10505, exempts from the prior approval requirements of 49 U.S.C. 10903–04 the abandonment by Consolidated Rail Corporation of: (1) The Snow Shoe Industrial Track between milepost 11.7± and milepost 22.5±, a distance of 10.8 miles; (2) the Phillipsburg Industrial Track between milepost 0.0± and milepost 4.5±, a distance of 4.5 miles; (3) the Winburne Industrial Track between milepost 0.0± and milepost 1.9±, a distance of 1.9 miles; and (4) the Ophir Industrial Track between milepost 0.0± and milepost 2.09±, a distance of 2.09 miles, a total distance of 19.29 miles in Centre and Clearfield Counties, PA, subject to standard labor protective conditions.

DATES: Provided no formal expression of intent to file a financial assistance offer has been received, this exemption will be effective on October 8, 1995. Formal expressions of intent to file financial assistance offers[1] under 49 CFR 1152.27(c)(2) must be filed by September 18, 1995. Petitions to stay must be filed by September 25, 1995. Requests for a public use condition must be filed by September 28, 1995. Petitions to reopen must be filed by October 3, 1995.

ADDRESSES: Send pleadings referring to Docket No. AB–167 (Sub-No. 1146X) to: (1) Office of the Secretary, Case Control Branch, Interstate Commerce Commission, 1201 Constitution Ave., N.W., Washington, DC 20423; and (2) Petitioner's representative: Robert S. Natalini, 2001 Market St.-16A, Philadelphia, PA 19101–1416.

FOR FURTHER INFORMATION CONTACT: Joseph H. Dettmar, (202) 927–5660. [TDD for the hearing impaired: (202) 927–5721.]

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to, call, or pick up in person from: Dynamic Concepts, Inc., Room 2229, Interstate Commerce Commission Building, 1201 Constitution Ave., NW., Washington, DC 20423. Telephone: (202) 289–4357/4359. [Assistance for the hearing impaired is available through TDD services (202) 927–5721.]

Decided: August 24, 1995.

By the Commission, Chairman Morgan, Vice Chairman Owen, and Commissioners Simmons and McDonald.

Vernon A. Williams,

Secretary.

BILLING CODE 7035–01–P

---

[1] *See Exempt. of Rail Abandonment—Offers of Finan. Assist.*, 4 I.C.C.2d 164 (1987).

[Docket No. AB–290 (Sub-No. 173X)]

Norfolk Southern Railway Company—Abandonment Exemption—at Maryville, TN

Norfolk Southern Railway Company (NS) has filed a notice of exemption under 49 CFR 1152 Subpart F—*Exempt Abandonments* to abandon its line of railroad at Maryville, Blount County, TN as follows: (1) between milepost 15.84–KA and milepost 16.05–KA, and (2) between milepost 0.09–KC and milepost 0.82–KC, a total distance of 0.94 miles.

NS has certified that: (1) No local traffic has moved over the line for at least 2 years; (2) any overhead traffic on the line can be rerouted over other lines; (3) no formal complaint filed by a user of rail service on the line (or by a State or local government entity acting on behalf of such user) regarding cessation of service over the line either is pending with the Commission or with any U.S. District Court or has been decided in favor of the complainant within the 2-year period; and (4) the requirements at 49 CFR 1105.7 (environmental reports), 49 CFR 1105.8 (historic reports), 49 CFR 1105.11 (transmittal letter), 49 CFR 1105.12 (newspaper publication), and 49 CFR 1152.50(d)(1) (notice to governmental agencies) have been met.

As a condition to use of this exemption, any employee adversely affected by the abandonment shall be protected under *Oregon Short Line R. Co.—Abandonment—Goshen*, 360 I.C.C. 91 (1979). To address whether this condition adequately protects affected employees, a petition for partial revocation under 49 U.S.C. 10505(d) must be filed.

Provided no formal expression of intent to file an offer of financial assistance (OFA) has been received, this exemption will be effective on October 8, 1995, unless stayed pending reconsideration. Petitions to stay that do not involve environmental issues,[1] formal expressions of intent to file an OFA under 49 CFR 1152.27(c)(2),[2] and trail use/rail banking requests under 49 CFR 1152.29[3] must be filed by September 18, 1995. Petitions to reopen or requests for public use conditions under 49 CFR 1152.28 must be filed by September 28, 1995, with: Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

A copy of any pleading filed with the Commission should be sent to applicant's representative: James R. Paschall, Three Commercial Place, Norfolk, VA 23510.

If the notice of exemption contains false or misleading information, the exemption is void ab initio.

NS has filed an environmental report which addresses the abandonment's effects, if any, on the environmental and historic resources. The Section of Environmental Analysis (SEA) will issue an environmental assessment (EA) by September 13, 1995. Interested persons may obtain a copy of the EA by writing to SEA (Room 3219, Interstate Commerce Commission, Washington, DC 20423) or by calling Elaine Kaiser, Chief of SEA, at (202) 927–6248. Comments on environmental and historic preservation matters must be filed within 15 days after the EA is available to the public.

Environmental, historic preservation, public use, or trail use/rail banking conditions will be imposed, where appropriate, in a subsequent decision.

Decided: September 5, 1995.

By the Commission, David M. Konschnik, Director, Office of Proceedings.

Vernon A. Williams,

Secretary.

BILLING CODE 7035–01–P

---

[1] A stay will be issued routinely by the Commission in those proceedings where an informed decision on environmental issues (whether raised by a party or by the Commission's Section of Environmental Analysis in its independent investigation) cannot be made prior to the effective date of the notice of exemption. *See Exemption of Out-of-Service Rail Lines*, 5 I.C.C.2d 377 (1989). Any entity seeking a stay on environmental concerns is encouraged to file its request as soon as possible in order to permit the Commission to review and act on the request before the effective date of this exemption.

[2] *See Exempt. of Rail Abandonment—Offers of Finan. Assist.*, 4 I.C.C.2d 164 (1987).

[3] The Commission will accept a late-filed trail use request as long as it retains jurisdiction to do so.

DEPARTMENT OF JUSTICE

Information Collections Under Review

The Office of Management and Budget (OMB) has been sent the following collection(s) of information proposals for review under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35) and the Paperwork Reduction Reauthorization Act since the last list was published. Entries are grouped into submission categories, with each entry containing the following information:

(1) The title of the form/collection;

(2) The agency form number, if any, and the applicable component of the Department sponsoring the collection.

(3) Who will be asked or required to respond, as well as a brief abstract;

(4) An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond;

(5) An estimate of the total public burden (in hours) associated with the collection; and,

(6) An indication as to whether Section 3504(h) of Public Law 96–511 applies.

Comments and/or suggestions regarding the item(s) contained in this notice, especially regarding the estimated public burden and associated response time, should be directed to the OMB reviewer, Mr. Jeff Hill on (202) 395–7340 and to the Department of Justice's Clearance Officer, Mr. Robert B. Briggs, on (202) 514–4319. If you anticipate commenting on a form/collection, but find that time to prepare such comments will prevent you from prompt submission, you should notify the OMB reviewer and the Department

of Justice Clearance Officer of your intent as soon as possible. Written comments regarding the burden estimate or any other aspect of the collection may be submitted to Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, and to Mr. Robert B. Briggs, Department of Justice Clearance Officer, Systems Policy Staff/Information Resouces Management/Justice Management Division, Suite 850, WCTR, Washington, DC 20530.

Reinstatement, with Change, of a Previously Approved Collection for Which Approval has Expired

(1) Change of Address Form.

(2) Form: EOIR–33. Executive Office for Immigration Review, United States Department of Justice.

(3) Primary: Individuals or households. Other: None. This form is to be used by individuals in immigration proceedings to report their change of address to Immigration Judges or the Board of Immigration Appeals.

(4) 15,000 responses per year at .04 hours per response.

(5) 600 annual burden hours.

(6) Not applicable under section 3504(h) of Public Law 96–511.

Public comment on this item is encouraged.

Dated: September 5, 1995.

Robert B. Briggs,

Department Clearance Officer, United States Department of Justice.

BILLING CODE 4410–01–M

Notice of Lodging of Consent Decree Pursuant to the Clean Water Act

In accordance with Departmental policy and 28 C.F.R. 50.7, notice is hereby given that on August 25, 1995, a Consent Decree in *United States* v. *Arrow Concrete Company*, Civil Action No. 5:95CV122 was lodged with the United States District Court for the Northern District of West Virginia.

This Consent Decree settles claims brought pursuant to section 309(b) of the Clean Water Act (the "Act"), 33 U.S.C. 1319(b), for civil penalties and injunctive relief for the discharge of pollutants in violation of section 301 of the Act, 33 U.S.C. § 1311. Under the terms of the Consent Decree, Arrow Concrete Company has agreed to pay a civil penalty of $140,000, comply with interim discharge limits protective of water quality, and promptly apply for, and comply with the requirements of, National Pollution Discharge Elimination System ("NPDES") permits for its West Virginia facilities.

The Department of Justice will receive comments relating to the proposed Consent Decree for a period of thirty days from the date of publication of this notice. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States* v. *Arrow Concrete Company*, Civil Action No. 95CV122, Ref. No. 90–5–1–1–5066. The proposed Consent Decree may be examined at the office of the United States Attorney, Northern District of West Virginia, 1100 Main Street, Suite 200, Wheeling, West Virginia 26003. Copies of the Consent Decrees may also be examined and obtained by mail at the Consent Decree Library, 1120 G Street, N.W., 4th Floor, Washington, DC 20005 (202–624–0892) and the offices of the Environmental Protection Agency, Region III, 841 Chestnut Building, Philadelphia, Pennsylvania 19107. When requesting a copy by mail, please enclose a check in the amount of $6.25 (twenty-five cents per page reproduction costs) payable to the "Consent Decree Library."

Notice of Lodging of Consent Decree Pursuant to the Clean Air Act

In accordance with Departmental policy, 28 U.S.C. 50.7, and pursuant to 42 U.S.C. 7413(g), notice is hereby given that a proposed Consent Decree in *United States* v. *National Cooperative Refinery Association*, Civil Action No. *94–2015 GTV*, was lodged on August 22, 1995, with the United States District Court for the District of Kansas.

The Consent Decree settles an action brought under Section 113 of the Clean Air Act ("the Act"), 42 U.S.C. 7413, and the Standards of Performance for New Stationary Sources ("NSPS"), 40 CFR Part 60, Subpart Db. The Consent Decree provides for NCRA's payment of a civil penalty to the United States in the amount of $176,312.00, and requires NCRA's continued operation and maintenance of a Continuous Emissions Monitoring System ("CEMS") installed on two steam boilers at its McPherson, Kansas refinery, in accordance with the requirements of the NSPS, 40 CFR Part 60, Subpart Db.

The Department of Justice will receive, for a period of thirty (30) days from the date of this publication, comments relating to the proposed Consent Decree. Comments should be addressed to the Assistant Attorney General for the Environment and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States* v. *National Cooperative Refinery Association*, DOJ Ref. #90–5–2–1–1835.

The proposed Consent Decree may be examined at the Office of the United States Attorney, 500 State Avenue, suite

360, Kansas City, Kansas 66101; the Region VII Office of the Environmental Protection Agency, 726 Minnesota Avenue, Kansas City, Kansas 66101; and at the Consent Decree Library, 1120 G Street, NW., 4th Floor, Washington, DC 20005, (202) 624–0892. A copy of the proposed Consent Decree may be obtained in person or by mail from the Consent Decree Library, 1120 G Street, NW., 4th Floor, Washington, DC 20005. In requesting a copy please refer to the referenced case and enclose a check in the amount of *$2.75* (25 cents per page reproduction costs), payable to the Consent Decree Library.

BILLING CODE 4410–01–M

Antitrust Division

United States v. Computer Associates International, Inc. and Legent Corporation; Proposed Final Judgment and Competitive Impact Statement

Notice is hereby given pursuant to the Antitrust Procedures and Penalties Act, 15 U.S.C. 16(b)–(h), that a proposed Final Judgment and Competitive Impact Statement have been filed with the United States District Court for the District of Columbia in a civil antitrust case, *United States* v. *Computer Associates International, Inc. and Legent Corporation*, Civil No. 95 CV 1398.

On July 28, 1995, the United States filed a Complaint seeking to enjoin a transaction by which Computer Associates agreed to acquire Legent. Computer Associates is the world's largest independent vendor of computer software for mainframe computers and a leading producer of mainframe computer systems management software. Legent is CA's major competitor in the mainframe computer systems management software business. The Complaint alleged that the proposed acquisition would substantially lessen competition in the sale of VSE tape management software, VSE disk management software, VSE security software, VSE job scheduling software, VSE automated operations software, and cross-platform systems management software in violation of Section 7 of the Clayton Act, 15 U.S.C. 18.

With respect to the five VSE markets, the proposed Final Judgment requires Computer Associates to license Legent's VSE products to a person determined by the United States to have the capabilities and resources needed to use the licenses as a viable and effective competitor. If CA is unable to identify a viable licensee that is satisfactory to the Department of Justice, the Court may appoint a trustee to carry out the licensing. With respect to the cross-platform systems management software market, the proposed Final Judgment forbids CA for five years from taking any action to restrict any other person's access to Peer Logic's key cross-platform systems management technology, called "PIPES." A Competitive Impact Statement filed by the United States describes the Complaint, the proposed Final Judgment, and remedies available to private litigants.

The public is invited to comment to the Justice Department and to the Court. Comments should be addressed to John F. Greaney, Chief, Computers and Finance Section, U.S. Department of Justice, Antitrust Division, 555 4th Street, NW., Room 9901, Washington, DC 20001 (telephone: 202/307–6200). Comments must be received within sixty days.

Copies of the Complaint, proposed Final Judgment, and Competitive Impact Statement are available for inspection in Room 207 of the U.S. Department of Justice, Antitrust Division, 325 7th Street NW., Washington, DC 20530 (telephone: 202/514–2481), and at the Office of the Clerk of the United States District Court for the District of Columbia, 333 Constitution Avenue NW., Washington, DC 20001. Copies of these materials may be obtained upon request and payment of a copying fee.

Constance K. Robinson,

Director of Operations.

In the matter of: United States of America, Plaintiff, v. Computer Associates, International, Inc., and Legent Corporation, Defendants. Civil Action No. 1:95CV01398. Filed: July 28, 1995.

Stipulation

It is stipulated by and between the undersigned parties, by their respective attorneys, that:

1. The Court has jurisdiction over the subject matter of this action and over each of the parties hereto, and venue of this action is proper in the District of Columbia.

2. The parties consent that a Final Judgment in the form hereto attached may be filed and entered by the Court, upon the motion of any party or upon the Court's own motion, at any time after compliance with the requirements of the Antitrust Procedures and Penalties Act (15 U.S.C. 16), and without further notice to any party or other proceedings, provided that plaintiff has not withdrawn its consent, which it may do at any time before the entry of the proposed Final Judgment by serving notice thereof on the defendants and by filing that notice with the Court.

3. The defendants shall abide by and comply with the provisions of the proposed Final Judgment pending entry of the Final Judgment, and shall, from the date of the filing of this Stipulation, comply with all the terms and provisions thereof as though the same were in full force and effect as an order of the Court.

4. In the vent plaintiff withdraws its consent or if the proposed Final Judgment is not entered pursuant to this Stipulation, this Stipulation shall be of no effect whatever, and the making of this Stipulation shall be without prejudice to any party in this or any other proceeding.

Dated: July 27, 1995.

For Plaintiff United States of America.

____

United States District Judge

Disclosure Pursuant to Rule 108(k)

Pursuant to Rule 108(k) of the Local Rules of this Court, the following is a list of all individuals entitled to be notified of the entry of the foregoing Stipulation and of the entry of the proposed Final Judgment:

Richard L. Rosen, Esq., Arnold & Porter, 555 Twelfth St., N.W., Washington, D.C. 20004–1202
Counsel for Defendant Computer Associates International, Inc.

Michael H. Byowitz, Esq., Wachtell, Lipton, Rosen & Katz, 51 West 52nd St., New York, NY 10019–6150
Counsel for Defendant Legent Corporation

Kenneth W. Gaul, Esquire, Attorney,
Computers & Finance Section,
Antitrust Division, U.S. Department of
Justice, 555 4th St., N.W.,
Washington, D.C. 20001
Counsel for Plaintiff the United States

Final Judgment

In the matter of: United States of America, Plaintiff, v. Computer Associates International, Inc., and Legent Corporation, Defendants. Civil Action No. 1:95CV01398. Filed: July 28, 1995.

Whereas, Plaintiff, United States of America, having filed its Complaint herein on July 28, 1995, and Plaintiff and Defendants, by their respective attorneys, having consented to the entry of this Final Judgment without trial or adjudication of any issue of fact or law, and without this Final Judgment constituting any evidence against or an admission by any party with respect to any issue of fact or law;

And Whereas, Defendants having agreed to be bound by the provisions of this Final Judgment pending its approval by the Court;

And Whereas, the essence of this Final Judgment being prompt and certain remedial action to ensure that, after the acquisition referred to herein, competition is not substantially lessened in certain product markets for enumerated types of mainframe systems management software;

And Whereas, Defendants having represented to Plaintiff that the licensing and customer election procedures required below can and will be accomplished and that Defendants will later raise no claims of hardship or difficulty as grounds for asking the Court to modify any of the licensing and customer election provisions contained below;

Now, Therefore, before the taking of any testimony, and without trial or adjudication of any issue of fact or law herein, and upon consent of the parties hereto, it is hereby ordered, adjudged, and decreed as follows:

I. Jurisdiction

This Court has jurisdiction over each of the parties hereto and the subject matter of this action. Venue is proper in this Court. The Complaint states a claim upon which relief may be granted against the Defendants under Section 7 of the Clayton Act, as amended (15 U.S.C. 18).

II. Definitions

A. "Computer Associates" means Defendant Computer Associates International, Inc., its successors and assigns, each subsidiary and division thereof, and each officer, director, employee, agent and other person acting for or on behalf of any of them.

B. "Customer" means a holder of any current license or maintenance agreement for any subject software product with defendants, regardless where the customer is located.

C. "Customer Information" means all information, files, and records maintained by Defendants concerning Customers, including (i) all customer call reports (or portions thereof covering the Subject Software Products); (ii) all pricing information; (iii) all support and maintenance logs; and (iv) all other information maintained by defendants about specific Customers as concerns the Subject Software Products.

D. "Defendants" means, collectively or individually as the context requires, Computer Associates and/or Legent.

E. "Effective Date(s)" means the later of (i) the date of entry by the Court of this Final Judgment; or (ii) the execution of definitive license agreement(s) as contemplated in Part IV, below.

F. "Legent" means Defendant Legent Corporation, its successors and assigns, each subsidiary and division thereof, and each officer, director, employee, agent and other person acting for or on behalf of any of them.

G. "PIPES" means the technology developed by Peer Logic, Inc. known as PIPES, PIPES Platform, PIPES Platform Software Developers Kit, and derivative works of any of these products, both in object code and source code forms.

H. "Subject Software Product" means each of the following computer programs presently sold by Legent: (i) EPIC/VSE (VSE tape management and disk management); (ii) FAQS/PCS (VSE automated job scheduling); (iii) Alert/VSE and Alert/CICS (VSE security); and (iv) FAQS/ASO for VSE (VSE automated operations). Each Subject Software Product shall include:

1. all source code and object code for the version or versions of the Subject Software Product currently being sold or distributed anywhere in the world, all existing source code and object code for all prior versions of the Subject Software Product previously sold or distributed anywhere in the world, and the most current iterations of source code and object code for all versions of the Subject Software Product under development or developed but not yet being sold or distributed, as of the date of the license(s) entered into pursuant to Part IV, below;

2. all optional modules, add-ons, enhancements and software customization sold or distributed to customers for use with the Subject Software Product;

3. all development tools, development environments, unique programming languages, software patches and other software or intellectual property that are or were used to develop, upgrade, and maintain that Subject Software Product that (i) defendants have the right to license, sub-license or assign, and (ii) that are not generally commercially available;

4. all existing documentation developed for use with any past, present or future version of the Subject Software Product, including all technical or development documentation, all user documentation, and all support documentation and support records, delivered to each licensee in an electronic form acceptable to that licensee.

III. Applicability

A. The provisions of this Final Judgment apply to the Defendants, their successors and assigns, their subsidiaries, affiliates, directors, officers, managers, agents, employees, attorneys and all other persons in active concert or participation with any of them who shall have received actual notice of this Final Judgment by personal service or otherwise. Defendants and each person bound by this Final Judgment shall cooperate in ensuring that the provisions of this Final Judgment are carried out.

B. Defendants shall require, as a condition of the licensing required herein, that the licensee(s) agree to be bound by the provisions of this Final Judgment that apply to such licensee(s).

IV. Licensing

A. Bidding Procedures

Defendants are hereby ordered and directed to grant a nonexclusive, worldwide, irrevocable license for each Subject Software Product, on the terms and in the manner hereinafter stated:

1. Defendants shall, within seven (7) days after execution of the stipulation in this action, retain an independent investment banker to identify and solicit bidders, and to evaluate bids, for each Subject Software Product. The identity of and terms of retention of said investment banker shall be subject to the approval of the Plaintiff, and said investment banker shall be charged with faithfully carrying out the terms of this Final Judgment. In the event that Plaintiff does not approve the investment banker proposed by Defendants, Defendants shall within three (3) days, submit to Plaintiff six (6) alternate investment bankers, with the terms of the proposed retention stated for each. Plaintiff shall have the right to

select from among these six (6) alternatives.

2. The investment banker shall serve at the cost and expense of Defendants, and shall receive compensation based on a fee arrangement providing an additional incentive based solely on the price and terms of the license and the speed with which it is accomplished.

3. The investment banker shall have discretion to solicit bids for license of the Subject Software Products and to otherwise make known, by usual and customary means, the availability for license of the Subject Software Products. Plaintiff and Defendants may provide names of prospective licensees to the investment banker for solicitation, but in no event shall the investment banker be limited to soliciting bids only from persons identified by Plaintiff or Defendants.

4. The investment banker shall provide any person making an inquiry regarding a possible bid for the Subject Software Products with a copy of this Final Judgment, and shall coordinate the furnishing to all bona fide prospective licensees the information and access specified in sub-section IV.A.5, below. The investment banker shall have discretion to establish such pre-bidding and bidding procedures, subject to the approval of Plaintiff, as are reasonably designed to elicit acceptable bids not later than twenty (20) days after the investment banker is retained. The investment banker shall file weekly reports with the parties setting forth the investment banker's efforts to accomplish licensing of the Subject Software Products as contemplated under this Final Judgment, including the name, address, and telephone number of each person who, during the preceding week, made an offer to acquire, expressed an interest in acquiring, entered into negotiations to acquire, or was contacted or made an inquiry about acquiring, any interest in the subject software products, and shall describe in detail each contact with any such person during that period.

5. Defendants shall promptly furnish to all bona fide prospective licensees, subject to customary confidentiality assurances, all information reasonably necessary for pre-bidding due diligence regarding the subject software products, except such information as may be subject to the attorney-client privilege or the attorney work product doctrine. Defendants shall provide such information to the Plaintiff at the same time that such information is made available to any other person. Defendants shall permit prospective licensees of each Subject Software Product to have reasonable access to personnel and to make such reasonable inspection of any Subject Software Product, together with such financial, operational, or other documents and information as may be relevant to the license required by this Final Judgment.

6. Within seven (7) days after the close of bidding, provided for in sub-section IV.A.3 above, the investment banker shall, in consultation with the parties, determine the successful bidder or bidders for each Subject Software Product. No bid may be accepted that contains any provision requiring or permitting continuing royalty payments to Defendants or the reporting to defendants of sales units or revenues of the Subject Software Product by the bidder. Preference may first be given to bids to license all subject software products, then to license multiple Subject Software Products, then to license an individual Subject Software Product.

7. Defendants shall make all reasonable efforts to enter into a definitive agreement for the licensing of each Subject Software Product to the successful bidder or bidders within fourteen (14) days after selection by the investment banker of the successful bidder or bidders. Plaintiff may, in its sole discretion, extend the time period for completion of a definitive licensing agreement for an additional period of time not to exceed thirty (30) days.

8. Unless Plaintiff otherwise consents, licensing of the Subject Software Products shall include such assets and be accomplished in such a way as to satisfy Plaintiff, in its sole discretion, that each Subject Software Product can and will be used by the licensee(s) as part of a viable, ongoing business involving the sale or license of the Subject Software Product to customers, including a demonstration to Plaintiff's satisfaction that (i) the license is for the purpose of competing effectively in the selling of the Subject Software Products to customers; (ii) the licensee has the managerial, operational, technical and financial capability to compete effectively in the selling of the Subject Software Products to customers; and (iii) none of the terms of the any agreement between the licensee and Defendants gives Defendants the ability artificially to raise the licensee's costs, impairs the licensee's ability to innovate the Subject Software Products, impairs the licensee's ability to support customers, or otherwise interferes with the ability of the licensee to compete effectively. Plaintiff may decline to approve a license of a Subject Software Product to any person currently selling any product in the same product market (as alleged in Plaintiff's Complaint).

9. Within one (1) business day following execution of a definitive agreement for the licensing of any or all of the Subject Software Products, Defendants or the trustee, whichever is then responsible for effectuating the license, shall notify Plaintiff of the proposed license. If the trustee is responsible, it shall similarly notify Defendants. The notice shall set forth the details of the proposed transaction and list the name, address, and telephone number of each person not previously identified who offered to, or expressed an interest in or desire to, acquire any ownership interest in any Subject Software Product, together with full details of same. Plaintiff may, at its sole discretion, request additional information concerning the proposed license and the proposed licensee, which Defendants and the proposed licensee shall promptly provide. Plaintiff shall provide prompt written notice to Defendants and the trustee, if there is one, stating whether or not it objects to the proposed licensee. Upon written notice that the Plaintiff does not object to the proposed licensee, a license proposed under this Part IV may be consummated.

B. License Rights

Any license for one or more of the Subject Software Products shall, at minimum, convey the following:

1. the Subject Software Product, as defined herein;

2. the right of the licensee(s) to obtain comprehensive training for its developers and support personnel from Defendants, such that the licensee(s) will be able to maintain, develop and support the Subject Software Product in substantially the same manner as Defendants;

3. the right of the licensee(s) to assign or sub-license substantially all of its rights under the license(s) to another person, or to sub-license for the purpose of creating distributorships or agents of the licensee, *provided however,* that the license may, if Defendants and the licensee(s) so agree, preclude the sub-license of rights to any Subject Software Product on a non-exclusive basis for the purpose of creating additional independent, competing software vendors of a Subject Software Product;

4. for a period of 180 days after the Effective Date, the right of the licensee(s), without interference from Defendants, to solicit, bid for and hire any of Defendants' employees, agents or contractors whose job duties as of the date of the filing by the parties of this Final Judgment relate, in whole or in part, directly to the development of technical support of the subject software

products (hereinafter, the "Subject Software Product Employees"). To effectuate this right, Defendants shall provide to the licensee(s): (i) the name, address, telephone number, job description, and current compensation of each Subject Software Product Employee; (ii) the right to contact and recruit any or all such persons regarding possible employment; (iii) releases by defendants from any non-compete covenants applicable to any Subject Software Product Employee; and (iv) releases by Defendants from any right under federal, state or other applicable law to claim misappropriation of intellectual property or trade secrets, insofar as such intellectual property or trade secrets relate to the development or support of the Subject Software Products;

5. the right of the licensee to obtain the employment files and records of the Subject Software Product Employees, pursuant to the following procedure: (i) All such employment files and records (or copies thereof), as well as the names, addresses, and telephone numbers of such persons, shall be provided by the Defendants to the investment banker, within five (5) days after the retention of the investment banker; (ii) the investment banker shall contact each Subject Software Product Employee and notify such person, in a form approved in advance by Plaintiff (a) of that person's right to authorize the investment banker or trustee to release that person's employment file or record to any licensee; (b) of the manner in which that person shall provide notice to the investment banker or trustee of its authorization (such as a telephone number that Employee should call); (c) that Defendants will not learn from the investment banker or trustee of the person's authorization to release his or her employment file or record to the licensee; and (d) of the time period in which the person must communicate his or her authorization to the investment banker or trustee; (iii) if a person chooses to authorize the release of his or her employment file or record, the investment banker or trustee shall promptly provide to the licensee(s) that person's employment file or record; and (iv) the investment banker or trustee shall not disclose to Defendants the identity of any person that has chosen to authorize the release of his or her employment file to a licensee(s);

6. for all Customers who elect to transfer their customer relationship for any Subject Software Product to the licensee pursuant to section V, blow: (a) full and complete assignment of all licenses and maintenance contracts for the Subject Software Products so transferred, and (b) full and complete transfer of all Customer Information covering the Subject Software Products so transferred, *provided however* that Defendants may retain Customer Information, but no Customer Information retained by Defendants shall be used for purposes of selling or marketing any Subject Software Product to any Customer who elects, pursuant to Part V herein, to transfer its business relationship to the licensee(s) for any Subject Software Product.

7. for a period of not less than one year after the Effective Date, full and prompt disclosure of all technical updates and problem resolution protocols for the Subject Software Products;

8. for a period of not less than one year after the Effective Date, reasonable (post-license) access during normal business hours to senior members of Defendants' development and support teams for the Subject Software Products to answer questions and provide problem resolution and advice relating to customer support;

9. for a period of not less than one year after the Effective Date, the right of the licensee to refer to the trademarks or trade names of the Subject Software Product for the purpose of representing to Customers and prospective customers that the Subject Software Product was developed by and licensed from Defendants. This subparagraph, however, shall not be construed to grant the licensee any right to market the Subject Software Product under the Defendants' trademarks or trade names.

C. Appointment of Trustee

1. If Defendants have not executed a definitive license or licenses to transfer all Subject Software Products as required by section IV.A, above, within the time specified therein (including any extension granted by Plaintiff pursuant to subsection IV.A.7, above), Defendants shall immediately notify Plaintiff of that fact in writing. Within five (5) calendar days of that date, Plaintiff shall provide Defendants with written notice of the names and qualifications of not more than two (2) nominees for the position of trustee for the required licensing. Defendants shall notify Plaintiff within five (5) calendar days thereafter whether either or both of such nominees are acceptable. If either or both of such nominees are acceptable to Defendants, Plaintiff shall notify the Court of the person upon whom the parties have agreed and the Court shall appoint that person as the trustee. If neither nominee is acceptable to Defendants, they shall furnish to Plaintiff, at the time of Defendant's notification to Plaintiff, written notice of the names and qualifications of not more than two (2) nominees for the position of trustee for the required license. If either or both of such nominees are acceptable to Plaintiff, Plaintiff shall notify the Court of the person upon whom the parties have agreed and the Court shall appoint that person as the trustee. If neither nominee is acceptable to Plaintiff, Plaintiff shall furnish the Court the names and qualifications of its and Defendants' proposed nominees. The Court may hear the parties as to the nominees' qualifications and shall appoint one of the nominees as the trustee.

2. After the trustee's appointment has become effective, only the trustee shall have the right to license the Subject Software Products. The purpose of the trust shall be to create a viable, ongoing business which can compete effectively in the selling of the Subject Software Products. The trustee shall have the power and authority to execute a license or licenses to a person(s) acceptable to Plaintiff at such price and on such terms as are then obtainable upon the best reasonable effort by the trustee, subject to the provisions of sections IV.A and IV.B of this Final Judgment, and shall have such other powers as this Court shall deem appropriate to perform those functions. Defendants shall not object to the licensing of the Subject Software Products by the trustee on any grounds other than the trustee's malfeasance. Any such objection by Defendants must be conveyed in writing to Plaintiff and the trustee within five (5) calendar days after the trustee has notified Defendants of the proposed licensing.

3. The trustee shall serve at the cost and expense of Defendants, shall receive compensation based on a fee arrangement providing an incentive based on the price and terms of the license(s) and the speed with which it is accomplished, and shall serve on such other terms and conditions as the court may prescribe; provided however, that the trustee shall receive no compensation, nor incur any costs or expenses, prior to the effective date of its appointment. The trustee shall account for all monies derived. After approval by the Court of the trustee's accounting, including fees for its services, all remaining monies shall be paid to Defendants and the trust shall then be terminated.

4. Defendants shall take no action to interfere with or impede the trustee's accomplishment of the licensing of the Subject Software Products and shall use their best efforts to assist the trustee in accomplishing the required license(s). The trustee shall have such full and

complete access to the personnel, books, records, and facilities of Defendants' overall businesses as is reasonably necessary to carry out its responsibilities, and Defendants shall develop such financial or other information the trustee deems reasonably necessary to the licensing of the Subject Software Products. The trustee shall have full and complete access to the books and records of the investment banker retained pursuant to Section IV.A, above, relating to the investment banker's (i) attempts to obtain licensing of the Subject Software Products; and (ii) collection of employee files and records and authorizations to release such files and records to licensee(s).

5. After its appointment becomes effective, the trustee shall file weekly reports with the parties and the Court setting forth the trustee's efforts to accomplish licensing of the Subject Software Products as contemplated under this Final Judgment; *provided however*, that to the extent such reports contain information that the trustee deems confidential, such reports shall not be filed in the public docket of the Court. Such reports shall include the name, address, and telephone number of each person who, during the preceding week, made an offer to acquire, expressed an interest in acquiring, entered into negotiations to acquire, or was contacted or made an inquiry about acquiring, any interest in the Subject Software Products, and shall describe in detail each contact with any such person during that period. The trustee shall maintain full records of all efforts made to license the Subject Software Products.

6. Within ninety (90) days after its appointment has become effective, if the trustee has not accomplished the license(s) required to effectuate this Final Judgment, the trustee shall promptly file with the parties and the Court a report setting forth (i) the trustee's efforts to accomplish the required licensing, (ii) the reasons, in the trustee's judgment, why the required license(s) have not been accomplished, and (iii) the trustee's recommendations; *provided however*, that to the extent such reports contain information that the trustee deems confidential, such reports shall not be filed in the public docket of the Court. The parties shall each have the right to be heard and to make additional recommendations consistent with the purpose of the trust. The Court shall thereafter enter such orders as it shall deem appropriate in order to carry out the purpose of the trust, which shall, if necessary, include disposing of any or all assets of the Subject Software Product businesses, including Customer contracts and/or software assets, to such buyers as the Court deems appropriate, or extending the trust and the term of the trustee's appointment.

V. Customer Election

Defendants are hereby ordered and directed to take all measures necessary to effectuate the orderly and fair election and, where applicable, orderly transfer of all customer relationships concerning each Subject Software Product to the licensee of such Subject Software Product in the manner hereinafter stated.

A. Immediately upon execution of a definitive agreement to license any Subject Software Product, all provisions of any customer license or maintenance contract concerning such Subject Software Product that directly or indirectly restrict the Customer's ability to transfer its license or maintenance agreements of any Subject Software Product to the licensee of such Subject Software Product shall be suspended until the completion of the election and transfer process.

B. Within one (1) business day after execution of a definitive agreement or agreements to license the Subject Software Product, Defendants shall provide the investment banker or, if applicable, the trustee, with a complete list of the names, addresses, telephone numbers, and primary contact person of each Customer of each Subject Software Product, together with all licenses or other contracts relating to the Subject Software Products.

C. Within five (5) calendar days after execution of a definitive agreement to license each Subject Software Product, the investment banker or, if applicable, the trustee, shall at Defendants' expense provide all customers with a notification of the right to elect whether to transfer their software license and maintenance contracts for the Subject Software Product to the licensee(s) of the Subject Software Product, such notification to be in a form approved by Plaintiff. Such notification shall include a copy of this Final Judgment, specify the identity of the licensee(s) of the Subject Software Products, specify the procedures to be followed in electing to transfer software licenses and maintenance contracts, and state an address of Plaintiff at which to direct questions or complaints about possible violations of the terms of this Final Judgment. Defendants and the licensee of the Subject Software Product shall have an equal right to enclose marketing or promotional materials with such notification, subject to Plaintiff's advance approval of such materials.

D. Except for the marketing or promotional materials included in the notification pursuant to the preceding subsection, Defendants and the licensee of the Subject Software Product shall not otherwise contact or communicate with any customer so notified regarding the Subject Software Products or the customer's election until after the conclusion of the election period and transfer of all customer relationships to the licensee of each Subject Software Product, except (i) insofar as the customer initiates such contacts; and (ii) as may be necessary for routine technical support. In the event a customer's license or maintenance agreement covering any Subject Software Product shall expire or otherwise be renewable during the election period, the terms of the previous license or contract shall be extended until the conclusion of the election period and transfer of the customer relationship, unless the customer affirmatively terminates the license or contract. Defendants shall not solicit or induce customers to terminate licensees or contracts for the purpose of negotiating successor contracts during the election period.

E. Each Customer shall be permitted thirty (30) days after notification in which to notify the investment banker, or, if applicable, the trustee, of its election as to whether Defendants or the licensee shall have the rights to their software licenses and maintenance contracts for the Subject Software Products. Each Customer shall be given instructions how to notify the investment banker or trustee of its election. At the close of the thirty (30) day period, each Customer that has not communicated its election to the investment banker or, if applicable, the trustee shall be notified by the investment banker or trustee that it has fifteen (15) additional days in which to make an election and that failure to elect within that period shall result in such Customer being allocated either to the Defendants or to the licensee(s). Customers failing to elect by the end of the fifteen (15) day period shall be randomly assigned to defendants or the licensee(s) of the Subject Software Products on a pro rata percentage equal to that of Customers who timely elected.

F. Promptly upon the close of the notification period or the Effective Date, whichever is later, the investment banker or trustee shall notify the parties and the licensee of the Subject Software product of the election of each Customer, whether the Customer affirmatively made an election or was assigned at random, and provide the licensee with the information specified in subsection V.B, above, relating to each Customer that elected or was assigned to the licensee.

G. Within five (5) business days after receiving notification from the investment banker or trustee identified in the previous Section, Defendants shall transfer to the licensee of the subject software product all Customer Information for each Customer that (i) elected to transfer its license or maintenance agreement; or (ii) was allocated to the licensee(s) pursuant to Section V.E, above.

H. For each Customer that elects to transfer its license or maintenance agreement, or that is allocated to licensee(s) pursuant to Section V.E, above, Defendants shall pay to licensee a pro rata amount of all maintenance fees already paid by such Customer to Defendants to the extent such fees relate to service periods after the date of such assignment. If the maintenance fees were negotiated or calculated as part of a multi-product bundle or package, the payment to licensee(s) shall be calculated by apportioning the maintenance fees among the products subject to the bundle or package in a ratio derived from the prices of each product as stated in Defendants' standard price list or schedule as of the date upon which the maintenance agreement became effective.

I. Upon transfer of all Customer Information, the licensee of the Subject Software Product, or Defendants, as the case may be, shall be deemed to be in full privity of contract with the Customer, and any provisions of the license or maintenance agreements that were suspended pursuant to section V.A. above shall be reinstated for the full remaining term of the contract.

J. Defendants shall not solicit any Customer electing to transfer its customer relationship for any Subject Software Product to the licensee, or that is allocated to the licensee pursuant to section V.E. above, to breach, repudiate, or abrogate the transferred maintenance agreement during the full remaining term of such agreement.

K. In any case where a Customer elects to transfer its customer relationship to the licensee, or is allocated to the licensee pursuant to section V.E. above, for a Subject Software Product covered by a license or maintenance agreement that also covers other products, such election shall apply only in respect of the Subject Software Product, and the license or maintenance agreement shall otherwise remain fully in effect; *provided however* that any continuing license or maintenance obligation shall be reduced by an amount calculated by apportioning the licensing or maintenance fees in a ratio derived from the prices of each product as stated in Defendants' standard price list or schedule as of the ate upon which the license or maintenance agreement became effective.

VI. Preservation of Assets

Until the transfer of the Subject Software Products and customers relationships required by the Final Judgment have been accomplished, Defendants shall take all steps necessary to comply with this Final Judgment and with the Stipulation previously executed by Defendants. Defendants shall take no action that would jeopardize the licensing of any Subject Software Product, shall continue to commit resources, development and support to each Subject Software Product at a level not materially less than that committed prior to the announcement of the subject acquisition, and shall not otherwise jeopardize the commercial viability of any Subject Software Product insofar as rights thereto may be transferable to a licensee of the Subject Software Product.

VII. Cross-Platform Technology

For five years following the entry by the Court of this Final Judgment, Defendants shall take no action, nor assert any right, to restrict Peer Logic, Inc. or any successor or assign of Peer Logic, Inc. from licensing PIPES to any other person, notwithstanding any provisions of any agreement between such defendant and Peer Logic, Inc. to the contrary.

VIII. Compliance Inspection

For the purposes of determining or securing compliance with the Final Judgment and subject to any legally recognized privilege or doctrine, from time to time:

A. Duly authorized representatives of the Department of Justice, upon written request of the Attorney General or of the Assistant Attorney General in charge of the Antitrust Division, and on reasonable notice to Defendants made to its principal office, shall be permitted:

1. Access during office hours of Defendants to inspect and copy all books, ledgers, accounts, correspondence, memoranda, and other records and documents in the possession or under the control of Defendants, who may have counsel present, relating to any matters contained in this Final Judgment; and

2. Subject to the reasonable convenience of Defendants and without restraint or interference from them, to interview or depose officers, employees, and agents of defendants, who may have counsel present, regarding any such matters.

B. Upon the written request of the Attorney General or of the Assistant Attorney General in charge of the Antitrust Division made to Defendants' principal office, Defendants shall submit such written reports, under oath if requested, with respect to the matters contained in this Final Judgment as may be requested.

C. No information or documents obtained by the means provided in this Section shall be divulged by a representative of the Department of Justice to any person other than a duly authorized representative of the Executive Branch of the Untied States, except in the course of legal proceedings to which the United States is a party (including grand jury proceedings), or for the purpose of securing compliance with this Final Judgment, or as otherwise required by law.

D. If at the time information or documents are furnished by Defendants to Plaintiff, Defendants represent and identify in writing the material in any such information or documents to which a claim of protection may be asserted under Rule 26(c)(7) of the Federal Rules of Civil Procedure, and Defendants mark each pertinent page of such material, "Subject to claim of protection under Rule 26(c)(7) of the Federal Rules of Civil Procedure," then ten (10) calendar days notice shall be given by Plaintiff to Defendants prior to divulging such material in any legal proceeding (other than a grand jury proceeding) to which a defendant is not a party.

IX. Retention of Jurisdiction

Jurisdiction is retained by this Court for the purpose of enabling any of the parties to this Final Judgment to apply to this Court at any time for such further orders and directions as may be necessary or appropriate for the construction or carrying out of this Final Judgment, for the modification of any of the provisions hereof, for the enforcement of compliance herewith, and for the punishment of any violations hereof.

X. Termination

This Final Judgment will expire on the tenth anniversary of the date of its entry.

XI. Public Interest

Entry of this Final Judgment is in the public interest.

____

United States District Judge

Dated: ________________________

In the matter of: United States of America, Plaintiff, v. Computer Associates International, Incorporated, and Legent Corporation, Defendants. Case No. 95 CV 1398 (TPJ). Filed: August 18, 1995. Received: August 18, 1995.

Competitive Impact Statement

The United States, pursuant to Section 2(b) of the Antitrust Procedures and Penalties Act ("APPA"), 15 U.S.C. § 16(b)–(h), files this Competitive Impact Statement relating to the proposed Final Judgment submitted for entry in this civil antitrust proceeding.

I. Nature and Purpose of the Proceeding

The United States filed a civil antitrust Complaint on July 28, 1995, alleging that the acquisition of Legent Corporation ("Legent") by Computer Associates International, Inc. ("CA") would violate Section 7 of the Clayton Act, 15 U.S.C. § 18. CA and Legent are among the world's leading suppliers of systems management software for mainframe computers.

The Complaint alleges that the acquisition would eliminate significant competition between CA and Legent in five markets for systems management software used with mainframe computers that work with the VSE operating system: VSE tape management software; VSE disk management software; VSE security software; VSE job scheduling software; and VSE automated operations software. In addition, the Complaint alleges that the transaction would substantially lessen competition in the market for "cross-platform" systems management software, used in computer installations where a mainframe computer is linked together with other types of computer "platforms" (such as midrange computers or networks of workstations or personal computers). The Complaint seeks adjudication that CA's acquisition of Legent would violate Section 7 of the Clayton Act and preliminary and permanent injunctive relief.

At the same time as the filing of the Complaint, the United States filed a Stipulation and a proposed Final Judgment in settlement of the suit. With respect to each of the five markets for VSE systems management software products, the proposed Final Judgment requires CA to license Legent's products to a person who can and will use the license to compete effectively in the relevant markets. With respect to the market for cross-platform systems management software, the proposed Final Judgment prohibits CA from taking any action to restrict competitors' access to an important technology, called "PIPES," that has been licensed to Legent by a third party, Peer Logic, Inc. ("Peer Logic").

The United States, CA, and Legent have stipulated that the proposed Final Judgment may be entered after compliance with the APPA. Entry of the proposed final judgment would terminate this action, except that the Court would retain jurisdiction to construe, modify, or enforce the provisions of the proposed Final Judgment and to punish violations thereof.

II. Description of Events Giving Rise to the Alleged Violation

A. The Defendants and the Proposed Transaction

CA is a Delaware corporation with its principal place of business in Islandia, New York. In its fiscal year 1994, CA reported revenues in excess of $2.1 billion. CA produces and markets software for a variety of computers and operating systems, including systems management software for mainframe computers running IBM's VSE operating system. Aside from IBM, which writes the operating system software that run almost all mainframe computers, CA is the largest vendor of the software for IBM and IBM-compatible mainframe computers.

Legent is a Delaware corporation with its principal place of business in Herndon, Virginia, and sells several different types of computer software and related services. In its fiscal year 1994, Legent's total revenues were over $500 million. Like CA, Legent is a leading vendor of systems management software products for mainframe computers.

On May 25, 1995, CA announced that it had entered into a definitive agreement with Legent to purchase all issued and outstanding shares of Legent's common stock through a cash tender offer. This $1.75 billion transaction forms the basis of the government's suit.

B. VSE Systems Management Software

Mainframe computers are the large and powerful computers used by industrial, commercial, educational, and governmental enterprises for large scale data processing applications. Mainframe computers provide unique storage, throughput, and security features and functions that make them superior data processing devices for large corporate and institutional computer users throughout the world.

An operating system is software that controls the operational resources of the computer (including the central processor unit, memory, data storage devices, and other hardware components) and allows "applications" software (programs that perform user-directed tasks requested of the computer, such as programs that maintain payroll, inventory, sales, and other business accounts of a company) to run on the computer. The vast majority of the world's mainframe computers run with operating systems developed by IBM, of which one of the most widely used is the VSE operating system.

System management software is used to help manage, control, or enhance the performance of mainframe computers. Some systems management functionality may be incorporated in an operating system. Separate systems management software programs such as the products offered by CA and Legent, however, provide additional functionality that is demanded by mainframe users. These separate systems management programs work in conjunction and generally must be compatible with the computer's operating system.

CA and Legent both produce a wide range of mainframe computer systems management software products for the VSE operating system. They are direct competitors of each other with respect to the following VSE systems management software products: (1) Tape management software, which controls the computer's cataloguing, loading, formatting, and reading of the magnetic tapes used for data storage; (2) disk management software, which performs functions similar to that of tape management with respect to data storage in hard disk drive installations; (3) security management software, used to prevent unauthorized access to computer applications and data; (4) job scheduling software, used to direct the computer to run particular processing operations (called "jobs") at particular times or sequences; and (5) automated operations software, used to automate message and error handling and other operations at the computer system console.

Each of the above described VSE systems management software products perform distinct functions for which no reasonable substitute products exist. As to each of the VSE products, even a substantial price increase would not cause their purchasers to begin substituting any other products. Each of the VSE products, therefore, constitutes a relevant product market in which to assess the competitive effects of CA's acquisition of Legent.

C. Cross-Platform Systems Management Software

"Cross-platform" refers to different types of computer processor designs or architectures. In addition to mainframe computers, other "platforms" are midrange computers, workstations, and PCs, all of which can, in varying degrees, be linked together into integrated multi-platform networks. These networks are also referred to as "distributed" computer systems. The integration of mainframe computers into distributed multi-platform systems is a relatively recent development, but is of increasing importance to modern computer installations.

CA and Legent have developed cross-platform systems management software products that allow different platforms that make up a multi-platform network of computers to be efficiently managed from a single point in the network. Customers that require cross-platform systems management products would not turn to other means of systems management in response to a significant increase in prices of such cross-platform systems management software. Cross-platform systems management software therefore constitutes a relevant product market in which to assess the competitive effects of CA's acquisition of Legent.

D. Competition Between CA and Legent

CA and Legent compete against each other for sales of VSE and cross-platform systems management software throughout the United States. They compete with respect to both license royalties they charge users of systems management products, and the flexibility of the license terms they offer. Both firms market their products under licenses that require royalty payments for the right to use the product and payments for maintenance of and upgrades to the products.

Moreover, CA and Legent compete in providing product support and service to their customers. Due to the "mission critical" nature of the work done with mainframe computers, users highly value the speed and effectiveness of a vendor's installation, maintenance, and technical support of systems management products. CA and Legent also compete to improve, upgrade, and enhance their systems management products, both in terms of developing products of greater performance or functionality and in terms of products that are easier to install, use, and maintain.

E. Anticompetitive Consequences of the Acquisition

The Complaint alleges that CA's acquisition of Legent would substantially lessen competition and create (or facilitate CA's exercise of) market power in each of the relevant systems management software markets. Each of the relevant markets already is highly concentrated, and the acquisition would substantially increase concentration. In the VSE tape management, VSE disk management, and VSE security markets, CA's acquisition of Legent would make CA the sole supplier. In the VSE job scheduling and VSE automated operations markets, the acquisition would allow CA dominate with post-acquisition market shares of 71 percent and 88 percent respectively. In the cross-platform systems management market, the acquisition would eliminate substantial competition because CA and Legent currently are two of only a few competitors that have to date developed and commercialized the technology necessary to integrate mainframe computers into distributed computing systems.

The Complaint alleges that in each of the relevant markets, the reduction or elimination of competition from CA's acquisition would likely lead to higher prices and lower levels of product quality, service and support, and product innovations and development. The Complaint further alleges that the competitive harm resulting from the proposed acquisition is not likely to be mitigated by possibilities of new entry. For any of the relevant markets, entry would entail expenditures of substantial costs and time for the development of a competitive product that would be acceptable to mainframe customers. Such entry would not be timely, likely, or sufficient in scale to counteract or deter a price increase or a reduction in service or product quality in any of the relevant markets.

III. Explanation of the Proposed Final Judgment

The proposed Final Judgment would preserve competition in each of the relevant systems management software markets in which CA's acquisition of Legent would be anticompetitive. As to each of the five VSE markets, the proposed Final Judgment requires CA to license Legent's products to a person determined by the United States to have the capabilities and resources needed to use the licenses as a viable and effective competitor.

Under the proposed Final Judgment, each of the VSE product licenses will be worldwide and perpetual in scope, granting the licensee full rights and capabilities to produce, market, and support the products, as well as to develop and market new product versions. The proposed Final Judgment provides that licensee with product development and support assistance and expertise—including the right to recruit Legent development and support personnel—that may be needed to compete effectively.

The proposed Final Judgment establishes procedures enabling current Legent customers to choose whether to purchase future support, maintenance and upgrades of the relevant systems management software products from CA or the licensee, without regard to the customers' current contracts with Legent. Five days after a license is finalized, Legent customers will be notified and given up to 45 days to elect to be supplied by CA or by the licensee. Customers who do not make an election will be assigned to CA or to the licensee on a pro rata basis in the same proportion as the customers who did make elections. The proposed Final Judgment provides that the new supplier will have all customer files, service and support records, and other documentation necessary for the new supplier to effectively serve the needs of the customers who elect to be supplied by the licensee.

If CA, with the assistance of an investment banker, is unable to identify a viable licensee that is satisfactory to the Department of Justice, the Court may appoint a trustee to attempt to carry out the licensing. In the event that the licensing provisions of the proposed Final Judgment do not result in the selection and establishment of a viable and effective competitor in a relevant VSE market, the Judgment requires CA to dispose of additional assets, including the complete divestiture of the products and transfer of Legent customer contracts, to accomplish the goal of establishing a viable and effective competitor.

With respect to the cross-platform systems management software market, the proposed Final Judgment forbids CA for five years from taking any action to restrict any other person's access to a key cross-platform systems management technology. This technology, called "PIPES" and developed by Peer Logic, consists of communication software technology that, among other things, allows the different operating systems in a cross-platform environment to interact with each other.

Peer Logic has licensed PIPES to Legent, for use with or incorporation into Legent Products. With its

acquisition of Legent, and depending on the interpretation of contractual relationships between Legent and Peer Logic, CA may succeed to Legent's rights to use PIPES. By prohibiting CA from potentially interfering with Peer Logic's licensing of PIPES to others, the proposed Final Judgment makes PIPES available to others who would use the technology in competing in the market for cross-platform systems management software.

The relief sought in the markets of concern in the Complaint has been tailored to maintain the level of competition that existed in those markets prior to the acquisition. With respect to the VSE systems management products, the proposed Final Judgment will establish a firm or firms that will offer consumers proven products and competent support. With respect to cross-platform systems management products, the proposed Final Judgment maintains the availability to third parties of technology that is useful in the development of cross-platform systems management solutions, thereby facilitating the more rapid development of competing products by other firms.

IV. Remedies Available to Potential Private Litigants

Section 4 of the Clayton Act (15 U.S.C. 15) provides that any person who has been injured as a result of conduct prohibited by the antitrust laws may bring suit in federal court to recover three times the damages the person has suffered, as well as costs and reasonable attorneys' fees. Entry of the proposed Final Judgment will neither impair nor assist the bringing of any private antitrust damage action. Under the provisions of Section 5(a) of the Clayton Act (15 U.S.C. 16(a)), the proposed Final Judgment has no *prima facie* effect in any subsequent private lawsuit that may be brought against defendants.

V. Procedures Available for Modification of the Proposed Final Judgment

The United States and the defendants have stipulated that the proposed Final Judgment may be entered by the Court after compliance with the provisions of the APPA, provided that the United States has not withdrawn its consent. The APPA conditions entry upon the Court's determination that the proposed Final Judgment is in the public interest.

The APPA provides a period of at least sixty (60) days preceding the effective date of the proposed Final Judgment within which any person may submit to the United States written comments regarding the proposed Final Judgment. Any person who wishes to comment should do so within sixty (60) days of the date of publication of this Competitive Impact Statement in the **Federal Register.** The United States will evaluate and respond to the comments. All comments will be given due consideration by the Department of Justice, which remains free to withdraw its consent to the proposed Final Judgment at any time prior to entry. The comments and the response of the United States will be filed with the Court and published in the **Federal Register**.

Written comments should be submitted to: John F. Greaney, Chief, Computers & Finance Section, Antitrust Division, United States Department of Justice, Suite 9901, 555 4th Street NW., Washington, DC 20001.

The proposed Final Judgment provides that the Court retains jurisdiction over this action, and the parties may apply to the Court for any order necessary or appropriate for the modification, interpretation, or enforcement of the Final Judgment.

VI. Alternatives to the Proposed Final Judgment

The United States considered, as an alternative to the proposed Final Judgment, a full trial on the merits of its Complaint against defendants CA and Legent. The United States is satisfied, however, that the licensing and other relief contained in the Final Judgment should maintain viable and effective competition in the relevant VSE and cross-platform systems management software markets that would otherwise be substantially affected by the acquisition. Moreover, in the event that Legent's five VSE products cannot be promptly licensed to a viable competitor, the Court may order complete divestiture of the products. Thus, the Final Judgment will achieve the same benefit to competition that the government could have obtained through litigation, but avoids the time, expense and uncertainty of a full trial on the merits of the government's Complaint.

VII. Determinative Documents

One determinative document within the meaning of the APPA—a July 26, 1995 letter from Sanjay Kumar, CA's President and Chief Operating Officer—was considered by the United States in deciding to consent to the proposed Final Judgment. Mr. Kumar's letter clearly acknowledges that section IV.C.6 of the proposed Final Judgment empowers the Court to order full divestiture of Legent's five VSE products if viable licensee(s) cannot be found. A copy of this document is attached hereto, and will be available for public inspection.

Dated: August 18, 1995.

Respectfully submitted,

Kenneth W. Gaul,

Attorney, Antitrust Division, U.S. Department of Justice.

July 26, 1995.

By Facsimile

Honorable Anne K. Bingaman,
Assistant Attorney General, Antitrust Division, United States Department of Justice, 10th Street & Pennsylvania Avenue NW., Washington, DC 20530

RE: Computer Associates International, Inc./Legent Corporation

Dear Anne: Pursuant to our conversation of this afternoon, this letter will act as confirmation of Computer Associates' understanding regarding the proposed Consent Decree. We hereby acknowledge that the Decree permits the Court sufficient discretion, if the Court so desires, to dispose of the five VSE software products in question in the event that a suitable licensee or licensees are not found. We understand that such disposition ordered by the Court could include the divestiture of one or more of these five VSE software products.

We remain confident that, with the Department's cooperation, the license mechanism proposed in the Decree will work and satisfy all of your requirements.

Sincerely,

Sanjay Kumar,

President and Chief Operating Officer, Computer Associates International, Inc.

Certificate of Service

The undersigned certifies that he is a paralegal employed by the Antitrust Division of the United States Department of Justice, and is a person of such age and discretion to be competent to serve papers. The undersigned further certifies that on August 13, 1995, he caused true copies of the Competitive Impact Statement of plaintiff, United States, and this Certificate of Service, to be served upon the persons at the place and addresses stated below:

Counsel for Computer Associates

Richard L. Rosen, Esq., Arnold & Porter, 555 12th Street NW., Washington, DC 20004 (by facsimile and by hand delivery)

Counsel for Legent

Michael H. Byowitz, Esq., Wachtell, Lipton, Rosen & Katz, 51 W. 52nd Street, New York, NY 10019 (by facsimile and by overnight courier)

Dated: August 18, 1995.

Joshua Holian,

Paralegal, U.S. Department of Justice, Antitrust Division, Computers & Finance Section.

BILLING CODE 4410–01–M

DEPARTMENT OF LABOR

Employment Standards Administration

Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

General wage determination decisions of the Secretary of Labor are issued in accordance with applicable law and are based on the information obtained by the Department of Labor from its study of local wage conditions and data made available from other sources. They specify the basic hourly wage rates and fringe benefits which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of a similar character and in the localities specified therein.

The determinations in these decisions of prevailing rates and fringe benefits have been made in accordance with 29 CFR Part 1, by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR Part 1, Appendix, as well as such additional statutes as may from time to time be enacted containing provisions for the payment of wages determined to be prevailing by the Secretary of Labor in accordance with the Davis-Bacon Act. The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public comment procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in the effective date as prescribed in that section, because the necessity to issue current construction industry wage determinations frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions, and modifications and supersedeas decisions thereto, contain no expiration dates and are effective from their date of notice in the **Federal Register**, or on the date written notice is received by the agency, whichever is earlier. These decisions are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision, together with any modifications issued, must be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR Part 5. The wage rates and fringe benefits, notice of which is published herein, and which are contained in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts," shall be the minimum paid by contractors and subcontractors to laborers and mechanics.

Any person, organization, or governmental agency having an interest in the rates determined as prevailing is encouraged to submit wage rate and fringe benefit information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Division of Wage Determinations, 200 Constitution Avenue, N.W., Room S–3014, Washington, DC 20210.

Modifications to General Wage Determination Decisions

The number of decisions listed in the Government Printing Office document entitled "General Wage Determinations Issued Under the Davis–Bacon and Related Acts" being modified are listed by Volume and State. Dates of publication in the **Federal Register** are in parentheses following the decisions being modified.

General Wage Determination Publication

General wage determinations issued under the Davis-Bacon and related Acts, including those noted above, may be found in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon and Related Acts". This publication is available at each of the 50 Regional Government Depository Libraries and many of the 1,400 Government Depository Libraries across the country.

The general wage determinations issued under the Davis-Bacon and related Acts are available electronically by subscription to the FedWorld Bulletin Board System of the National Technical Information Service (NTIS) of the U.S. Department of Commerce at (703) 487–4630.

Hard-copy subscriptions may be purchased from: Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402, (202) 512–1800.

When ordering hard-copy subscription(s), be sure to specify the State(s) of interest, since subscriptions may be ordered for any or all of the six separate volumes, arranged by State. Subscriptions include an annual edition (issued in January or February) which includes all current general wage determinations for the States covered by each volume. Throughout the remainder of the year, regular weekly updates are distributed to subscribers.

Signed at Washington, D.C. this 1st day of September 1995.

Alan L. Moss,

Director, Division of Wage Determinations.

BILLING CODE 4510–27–M

Mine Safety and Health Administration

Petitions for Modification

The following parties have filed petitions to modify the application of mandatory safety standards under section 101(c) of the Federal Mine Safety and Health Act of 1977.

1. E & E Fuels

[Docket No. M–95–110–C]

E & E Fuels, P.O. Box 322, Hegins, Pennsylvania 17938 has filed a petition to modify the application of 30 CFR 75.340 to its Orchard Slope (I.D. No. 36–08346) located in Schuylkill County, Pennsylvania. The petitioner proposes to charge batteries on the mine's locomotive during idle periods when all miners are out of the mine and to have intake air used to ventilate the charging station to continue through the normal route to the last open crosscut and into the monkey airway (return). The petitioner asserts that the proposed alternative method would provide at least the same measure of protection as would the mandatory standard.

2. Solar Sources Underground L.L.C.

[Docket No. M–95–111–C]

Solar Sources Underground L.L.C., P.O. Box 325, Monroe City, Indiana 47557 has filed a petition to modify the application of 30 CFR 75.1700 to its Monroe City Mine (I.D. No. 12–02103) located in Knox County, Indiana. The petitioner proposes to plug and mine through oil and gas wells. The petitioner asserts that the proposed alternative method would provide at least the same measure of protection as would the mandatory standard.

3. Peabody Coal Company

[Docket No. M–95–112–C]

Peabody Coal Company, 1951 Barrett Court, P.O. Box 1990, Henderson, Kentucky 42420–1990 has filed a petition to modify the application of 30 CFR 75.342(a)(2) to its Camp No. 11 Mine (I.D. No. 15–08357) located in Union County, Kentucky. The petitioner proposes to have alternative locations for two additional methane monitors in the longwall face area of the longwall shearing machine instead of using a single methane monitor. The petitioner asserts that the proposed alternative method would provide at least the same measure of protection as would the mandatory standard.

4. Continuous Mining, Inc.

[Docket No. M–95–113–C]

Continuous Mining, Inc., P.O. Box 239, Edgarton, West Virginia 25672 has filed a petition to modify the application of 30 CFR 75.1710 to its Mine No. 1 (I.D. No. 46–07891) located in Mingo County, West Virginia. The petitioner operates its bridge haulage equipment manufactured for use in extremely low-seam mines and built without operator compartments or canopies. The petitioner proposes to operate this haulage equipment without canopies due to the frequent tearing out of roof bolts when tramming through dips and crests of hills in the coal seam being mined. The petitioner states that the use of canopies would expose the equipment operator to greater hazards than those incurred by operating without operator compartments and canopies.

5. Mystic Energy, Inc.

[Docket No. M–95–114–C]

Mystic Energy, Inc., 130 George Street, Suite J, Beckley, West Virginia 25801 has filed a petition to modify the application of 30 CFR 75.364(b)(1) to its B. L. Mining No. 3 Mine (I.D. No. 46–07139) located in Boone County, West Virginia. Due to deteriorating roof conditions in the intake air course, the area cannot be traveled safely. The petitioner proposes to examine approximately 3,000 feet of the intake air course in the No. 4 Entry by checking the inby and outby ends of the affected area and to monitor for methane and the quantity and quality of air. The petitioner asserts that the proposed alternative method would provide at least the same measure of protection as would the mandatory standard.

6. Consolidation Coal Company

[Docket No. M–95–115–C]

Consolidation Coal Company, Consol Plaza, 1800 Washington Road, Pittsburgh, Pennsylvania 15241–1421 has filed a petition to modify the application of 30 CFR 75.364(b)(1) to its Shoemaker Mine (I.D. No. 46–01436) located in Marshall County, West Virginia. Due to deteriorating roof and rib conditions in the intake airway from the Seabright Shaft to the No. 8 Seal in 4 North, the area cannot be traveled safely. The petitioner proposes to establish check points J and K to monitor the affected area and to have a certified person examine the area for methane and the quantity of air at both check points on a weekly basis; and to have the certified person initial and record the date, time, and results of the weekly examinations in a book kept on the surface and made available for inspection by interested persons. The petitioner asserts that the proposed alternative method would provide at least the same measure of protection as would the mandatory standard.

Request for Comments

Persons interested in these petitions may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before October 10, 1995. Copies of these petitions are available for inspection at that address.

Dated: August 29, 1995.

Patricia W. Silvey,

Director, Office of Standards, Regulations and Variances.

NATIONAL SCIENCE FOUNDATION

Special Emphasis Panel in Design, Manufacture, and Industrial Innovation; Notice of Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92–463, as amended), the National Science Foundation announces the following meeting:

Name: Special Emphasis Panel in Design, Manufacture, and Industrial Innovation—#1194.

Date and Time: September 29, 1995, 8:00 a.m.–5:00 p.m.

Place: Room 580, National Science Foundation, 4201 Wilson Boulevard, Arlington, VA 22230.

Type of Meeting: Closed.

Contact Person: Ritchie Coryell, Program Director, SBIR Office, (703) 306–1390.

Purpose of Meeting: To provide advice and recommendations concerning proposals submitted to the NSF for financial support.

Agenda: To review and evaluate Phase I Small Business proposals as part of the selection process for awards.

Reason for Closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are exempt under 5 U.S.C. 552b(c) (4) and (6) of the Government in the Sunshine Act.

Dated: September 5, 1995.

NUCLEAR REGULATORY COMMISSION

PECO Energy Company; Notice of Issuance of Amendment to Facility Operating Licenses

[Docket Nos. 50–277 and 50–278]

The U.S. Nuclear Regulatory Commission (Commission) has issued Amendment Nos. 210 and 214 to Facility Operating Licenses Nos. DPR–44 and DPR–56 issued to PECO Energy Company (the licensee), which revised the Technical Specifications (TS) for operation of the Peach Bottom Atomic Power Station, Units 2 and 3, located in York County, Pennsylvania. The amendment is effective as of the date of issuance and shall be implemented within 150 days from the date of issuance.

The amendments replace the current TS and associated Bases with a set of TS based on NUREG–1433, "Standard Technical Specifications, General Electric Plants, BWR/4," dated September 1992.

The application for the amendment dated September 29, 1994, as supplemented by letters dated March 3, March 30, May 4 (two letters), May 8, May 9, May 16, May 24, May 25, May 26, June 7, July 7, July 13, July 21 and August 4, (two letters), August 11, and August 28, 1995, complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

Notice of Consideration of Issuance of Amendment to Facility Operating License and Opportunity for a Hearing in connection with this action was published in the **Federal Register** on May 19, 1995 (60 FR 26905). No request for a hearing or petition for leave to intervene was filed following this notice.

The Commission has prepared an Environmental Assessment related to the action and has determined not to prepare an environmental impact statement. Based upon the environmental assessment, the Commission has concluded that the issuance of the amendment will not have a significant effect on the quality of the human environment (60 FR 42190).

For further details with respect to the action see (1) the application for amendment dated September 29, 1994, as supplemented by letters dated March 3, March 30, May 4 (two letters), May 8, May 9, May 16, May 24, May 25, May 26, June 7, July 7, July 13, July 21, August 4, (two letters), August 11 and August 28 1995, (2) Amendment Nos. 210 and 214 to Licenses Nos. DPR–44 and DPR–56, (3) the Commission's related Safety Evaluation, and (4) the Commission's Environmental Assessment. All of these items are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street NW., Washington, DC, and at the local public document room located at the Government Publications Section, State Library of Pennsylvania, (REGIONAL DEPOSITORY) Education Building, Walnut Street and Commonwealth Avenue, Box 1601, Harrisburg, Pennsylvania.

Dated at Rockville, Maryland, this 30th day of August 1995.

For the Nuclear Regulatory Commission.

Joseph W. Shea,

Project Manager Project Directorate I–2, Division of Reactor Projects—I/II, Office of Nuclear Reactor Regulation.

[FR Doc. 95–22309 Filed 9–7–95; 8:45 am]

BILLING CODE 7590–01–P

NUCLEAR WASTE TECHNICAL REVIEW BOARD

Board Meeting: OCRWM Program Update, Waste Isolation Strategy, ESF Construction & Science Update, NAS "Release Standards," Total System Performance Assessment

Pursuant to its authority under section 5051 of Public Law 100–203, the Nuclear Waste Policy Amendments Act of 1987, the Nuclear Waste Technical Review Board will hold its fall meeting on October 17–18, 1995, in Arlington, Virginia. (Please note: In the event of a general government shutdown, the Board will decide on October 10, 1995, whether or not to cancel the meeting. Please call (703) 235–4473 on October 10 for the announcement.) The meeting will be held at the Arlington Renaissance Hotel, 950 N. Stafford Street, Arlington, Virginia 22203; (Tel) 703–528–6000; (Fax) 703–528–4386. The meeting is open to the public and will begin at 8:30 a.m. both days. Presentations during the meeting will focus on strategic concerns and performance assessment.

Strategic concerns in the high-level nuclear waste program will be covered the first day of the meeting. The Department of Energy (DOE) has been asked to provide updates on the Office of Civilian Radioactive Waste Management (OCRWM) program, the developing waste isolation strategy, and construction progress and initial science results in the exploratory studies facility. Congressional staff members will be invited to provide their views on pending legislation that may affect the nuclear waste program. The Board also will hear about the National Academy of Sciences report on release standards for Yucca Mountain and the DOE's reaction to the report. The Electric Power Research Institute will provide an analysis of different proposed standards. At the end of the day, there will be a round-table discussion of strategic developments and concerns.

Performance assessment will be covered on the second day of the meeting, including a detailed look at the OCRWM's Total System Performance Assessment 1995 for the Yucca Mountain site. Additional presentations and a round-table discussion on making the best use of performance assessment will conclude the day's activities.

Time will be set aside on the agenda for public comment and questions. To ensure that everyone wishing to speak is provided time to do so, the Board encourages those who have comments to sign the Public Comment Register, which will be located at the sign-in table. Those registering are advised that, depending on the number of people wishing to speak, a speaking time limit may have to be set on the length of individual remarks. However, written comments of any length may be submitted for the record.

The Nuclear Waste Technical Review Board was created by Congress in the Nuclear Waste Policy Amendments Act of 1987 to evaluate the technical and scientific validity of activities undertaken by the DOE in its program to manage the disposal of the nation's spent nuclear fuel and defense high-level waste. In that same legislation, Congress directed the DOE to characterize a site at Yucca Mountain, Nevada, for its suitability as a potential location for a permanent repository for the disposal of that waste.

Transcripts of the meeting will be available on computer disk or on a library-loan basis in paper format from Davonya Barnes, Board staff, beginning December 15, 1995. For further information, contact Frank Randall, External Affairs, 1100 Wilson Boulevard, suite 910, Arlington, Virginia 22209; (Tel) 703–235–4473; (Fax) 703–235–4495.

Dated: September 1, 1995.

William Barnard,

Executive Director, Nuclear Waste Technical Review Board.

BILLING CODE 6820–AM–M

OFFICE OF PERSONNEL MANAGEMENT

Federal Employees Health Benefits Program Medically Underserved Areas for 1996

AGENCY: Office of Personnel Management.

ACTION: Notice of Medically Underserved Areas for 1996.

SUMMARY: The Office of Personnel Management has completed its annual determination of the States that qualify as Medically Underserved Areas under the Federal Employees Health Benefits (FEHB) Program for calendar year 1996. This determination is necessary to comply with a provision of FEHB law that mandates special consideration for enrollees of certain FEHB plans who receive covered health services in States with critical shortages of primary care physicians. Accordingly, for calendar year 1996, OPM has determined that the following States are Medically Underserved Areas under the FEHB program: Alabama, Arkansas, Idaho, Louisiana, Mississippi, New Mexico, North Dakota, South Carolina, South Dakota, West Virginia, and Wyoming. Arkansas and Idaho are new for 1996; Georgia has been removed from the list.

EFFECTIVE DATE: January 1, 1996.

FOR FURTHER INFORMATION CONTACT: Karen Leibach, 202–606–0004.

SUPPLEMENTARY INFORMATION: FEHB law [5 U.S.C. 8902(m)(2)] mandates special consideration for enrollees of certain FEHB plans who receive covered health services in States with critical shortages of primary care physicians. Such States are designated as Medically Underserved Areas for purposes of the FEHB Program, and the law requires payment to all qualified providers in these States.

FEHB regulations (5 CFR 890.701) require OPM to make an annual determination of the States that qualify as Medically Underserved Areas for the next calendar year by comparing the latest Department of Health and Human Services State-by-State population counts on primary medical care manpower shortage areas with U.S. Census figures on State resident population.

Office of Personnel Management.

James B. King,

Director.

BILLING CODE 6325–01–M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–36175; File No. SR–Amex–95–32]

Self-Regulatory Organizations; Notice of Filing of Proposed Rule Change and Amendment No. 1 to the Proposed Rule Change by the American Stock Exchange, Inc., Relating to the Listing and Trading of Options on the Amex HMO Index

August 31, 1995.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on July 31, 1995, the American Stock Exchange, Inc. ("Amex" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Exchange filed with the Commission Amendment No. 1 on August 24, 1995.[3] The Commission is publishing this notice, as amended, to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to list for trading options on the Amex HMO Index ("HMO Index" or "Index"). In addition, the Amex proposes to amend Rule 901C, Commentary .01 to reflect that 90% of the Index's numerical index value will be accounted for by stocks that meet the current criteria and guidelines set forth in Rule 915. The text of the proposed rule change is available at the Office of the Secretary, the Exchange, and at the Commission.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Section (A), (B), and (C) below, of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The purpose of the proposed rule change is to permit the Exchange to list and trade cash-settled, European-style[4] stock index options on the HMO Index, an industry-specific index created by the Exchange.

Index Design

The HMO Index[5] consists of ten highly capitalized health care maintenance organization stocks and American Depository Receipts ("ADRs") traded on the Amex, the New York Stock Exchange ("NYSE"), or through the National Association of Securities Dealers Automated Quotations system and are reported national market system securities ("NASDAQ/NMS").[6] The components comprising the Index ranged in capitalization from $6.9 billion to $1.4 billion as of July 25, 1995. The total capitalization as of that date was $28 billion; the mean capitalization was $2.8 billion; and the median capitalization was $1.9 billion. The largest component accounted for 24.70% of the total weight of the Index, and the five largest components accounted for 72.56% of the total weight of the Index. On that same date, the smallest component accounted for 5.02% of the total weight of the Index.

---

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] In Amendment No. 1, the Amex proposes to amend Amex Rule 904C to provide that position and exercise limits for options on the HMO Index shall be 5,500 contracts of the put class and the call class on the same side of the market. *See* Letter from Claire McGrath, Special Counsel, Derivative Securities, Amex, to Michael Walinskas, Branch Chief, Office of Market Supervision ("OMS"), Division of Market Regulation ("Market Regulation"), Commission, dated August 24, 1995.

[4] European-style options can only be exercised during a specified period before the options expire.

[5] The HMO Index is a new stock index established in 1995 by the Amex based on health maintenance organization stocks (or ADRs thereon).

Index Calculation

The Index will be calculated by Amex or its designee on a real-time basis using last-sale prices and will be disseminated every 15 seconds by the Amex to vendors over the Consolidated Tape Association's Network B. If a component share is not currently being traded on its primary market, the most recent price at which the share traded on such market will be used in the Index calculation.

The Index is calculated on "capitalization-weighted" basis, using the U.S. primary market prices for component securities, and current shares outstanding. For ADRs, the ADR price and total worldwide shares outstanding on an ADR-equivalent basis will be used. The value of the Index equals the current market value (based on U.S. primary market prices) of each of the Components in the Index divided by the current Index divisor. The Index divisor was initially calculated to yield a bench-mark value of 200.00 at the close of trading on May 31, 1995.

Maintenance

The Index will be maintained by Amex, and pursuant to Exchange Rule 901C(b) may at any time or from time to time substitute stocks, or adjust the number of stocks included in the Index, based on changing conditions in the HMO Industry. In the event the Exchange determines to change the number of Index component stocks to less than nine or greater than thirteen, the Exchange will submit a rule filing pursuant to Section 19(b) of the Act.

Additionally, the Exchange will ensure that at least 90% of the stocks in the Index, by weight, individually satisfy the Exchange's listing and maintenance criteria applicable to listing standardized options thereon. Currently, the Exchange represents that all of the Index's components are options eligible[7] and the subject of standardized options trading.

Expiration and Settlement

HMO Index options will have European-style exercise and will be A.M.-settled index options. Standard option trading hours (9:30 a.m. to 4:10 p.m. New York time) will apply. The proposed options on the HMO Index will expire on the Saturday following the third Friday of the expiration month. Thus, the last day for trading in an expiring series will be the second business day (ordinarily a Thursday) preceding the expiration date.

The Index value for purposes of settling a specific HMO Index option will be calculated based upon the primary exchange regular way opening sale prices for the component stocks. In the case of securities traded through the NASDAQ system, the first reported sale price will be used. As trading begins in each of the Index's component securities, its opening sale price is captured for use in the calculation. Once all the component stocks have opened, the value of the Index is determined and that value is used as the settlement value for the option. If any of the component stocks does not open for trading in its primary market on the last trading day before expiration, then the prior day's last sale price is used in the calculation.

Eligibility Standards for Index Components

Amex Rule 901C specifies criteria for inclusion of stocks in an index on which options will be traded on the Exchange. In choosing among HMO stocks that meet the minimum criteria set forth in Rule 901C, the Exchange will focus on stocks that (1) have a minimum market value (in U.S. dollars) of at least $75 million,[8] (2) have an average monthly trading volume in the U.S. markets over the previous six month period of not less than 1 million shares (or ADRs), and (3) are traded on either the NYSE, Amex (subject to limitations of Rule 901C) or NASDAQ. Although the stocks currently selected for inclusion in the HMO Index meet or surpass the above additional criteria, the Exchange intends these additional criteria to be guidelines only and reserves the right to include stocks in the Index that may not meet these guidelines. All Index component securities currently have market capitalizations in excess of $1 billion, with the largest being $6.9 billion. Average monthly trading volume over the previous six months for the individual component stocks ranged from 3.5 million to 43.3 million shares. The five most heavily weighted components account for approximately 73% of the total Index weight, with the largest representing 24.7%.

Exchange Rules Applicable to Stock Index Options

Amex Rules 900C through 980C will apply to option contracts based on the HMO Index. These rules cover issues such as surveillance, exercise prices, and position limits. The Index is deemed to be a Stock Index Option under Amex Rule 900C(a) and a Stock Index Industry Group under Rule 900C(b)(1). Under Rule 903C, the Exchange intends to list up to three near calendar months and two additional calendar months in the three month intervals in the January cycle. The Exchange proposes to codify in Amex Rule 904C that for HMO Index options, the position limit will be 5,500 contracts on the same side of the market.[9]

The Exchange believes that the proposed rule change is consistent with Section 6 of the Act, in general, and furthers the objectives of Section 6(b)(5) of the Act,[10] in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of change, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, and to remove impediments to perfect the mechanism of a free and open market and a national market system.

(B) Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition.

---

[6] The components of the Index are: United Healthcare Corp.; U.S. Healthcare Inc.; Humana Inc.; Wellpoint Health Networks, Pacificare Health Systems-B; Foundation Health Corp.; Value Health Inc.; Oxford Health Plans; Health Systems Intl. Inc.-A; and Healthsource Inc.

[7] The Amex's options listing standards, which are uniform among the options exchanges, provide that a security underlying an option must, among other things, meet the following requirements: (1) there must be a minimum of 7,000,000 shares of the underlying security which are owned by persons other than those required to report their security holdings under Section 16(a) of the Act; (2) there must a minimum of 2,000 stockholders; (3) trading volume in the U.S. must have been at least 2.4 million over the preceding twelve months; and (4) the U.S. market price must have been at least $7.50 for a majority of the business days during the preceding three calendar months. *See* Amex Rule 915, Commentary 01.

[8] In the case of ADRs this represents market value as measured by total world-wide shares outstanding.

[9] The Amex, selecting the 5,500 contracts position limit for the HMO Index, will not utilize the three tier mechanism set forth in Rule 904C for other narrow-based index options. *See* Amendment No. 1, *supra* note 3.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the Amex. All submissions should refer to SR–Amex–95–32 and should be submitted by September 29, 1995.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[11]

Margaret H. McFarland,

Deputy Secretary.

[Release No. 34–36172; File No. SR–NSCC–95–12]

Self-Regulatory Organizations; National Securities Clearing Corporation; Notice of Filing of Proposed Rule Change Limiting the Use of Letters of Credit to Collateralize Clearing Fund Contributions

August 31, 1995.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] notice is hereby given that on August 21, 1995, the National Securities Clearing Corporation ("NSCC") filed with the Securities and Exchange Commission ("Commission") the proposed rule change (File No. SR–NSCC–95–12) as described below. The Commission is publishing this notice to solicit comments from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change increases the minimum cash clearing fund contribution for those members that use letters of credit as clearing fund collateral and sets a limit on the amount of a member's required clearing fund contribution that may be collateralized with letters of credit.[2]

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, NSCC included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. NSCC has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.[3]

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

NSCC is seeking permanent approval of a proposed rule change that modifies the amount of a member's required clearing fund deposit that may be collateralized by letters of credit. Specifically, the proposed rule change increases the minimum cash contribution for any member that uses letters of credit from $50,000 to the greater of $50,000 or 10% of that member's required clearing fund deposit up to a maximum of $1,000,000. In addition, the rule change provides that only 70% of a member's required clearing fund deposit may be collateralized with letters of credit. The rule change also adds headings to the clearing fund formula section of NSCC's rules for purposes of clarity and includes other nonsubstantive drafting changes. The effect of the proposed rule change is to increase the liquidity of the clearing fund and to limit NSCC's exposure to unusual risks resulting from the reliance on letters of credit.

The current status of NSCC's clearing fund[4] as a result of the change in the required clearing fund deposit is that approximately 31.46% of the clearing fund is in cash, approximately 29.32% of the clearing fund is in securities, and approximately 39.22% of the clearing fund is in letters of credit.[5]

When NSCC first filed this change the impetus was to improve NSCC's liquidity resources by requiring additional deposits of cash and cash equivalents. Since that time, NSCC has obtained additional liquidity resources through a line of credit with a major New York clearinghouse bank. NSCC currently has a three hundred million dollar line of credit that can be used for liquidity purposes, and the letters of credit in the NSCC clearing fund are available as collateral for this line of credit. Accordingly, NSCC believes that

---

[1] 15 U.S.C. 78s(b)(1) (1988).

[2] The proposed rule change was originally filed on October 27, 1989, and was approved temporarily through December 31, 1990. Securities Exchange Act Release No. 27664 (January 31, 1990), 55 FR 4297 [File No. SR–NSCC–89–16]. Subsequently, the Commission granted a number of extensions to the temporary approval to allow the Commission and NSCC sufficient time to review and assess the use of letters of credit as clearing fund collateral. Most recently, the Commission extended temporary approval through September 30, 1995. Securities Exchange Act Release No. 34745 (September 29, 1994), 59 FR 50949 [File No. SR–NSCC–94–18].

[3] The Commission has modified the text of the summaries prepared by NSCC.

[4] These statistics are current as of July 31, 1995. Conversation between Anthony H. Davidson, Esq., NSCC, and Margaret R. Blake, Attorney, Division of Market Regulation, Commission (August 23, 1995).

[5] In October of 1989 when the Commission initially granted temporary approval of NSCC's proposal, letters of credit accounted for 76% of the total dollar value of required clearing fund deposits. By May 28, 1993, letters of credit accounted for less than 30%. During the period from June 1, 1992, to May 28, 1993, letters of credit accounted for an average of 30.49% of the total dollar value of required clearing fund deposits, and for no month during that period did the portion of letters of credit used for required clearing fund deposits rise above 34%. Letter from Karen L. Saperstein, Vice President/Director of Legal & Associate General Counsel, NSCC, to Jerry W. Carpenter, Branch Chief, Division of Market Regulation, Commission (June 10, 1993).

it has adequate liquidity resources and requests permanent approval of the change limiting the use of letters of credit to no more than 70% of a member's deposit.

NSCC believes that the proposal is consistent with its requirements under Section 17A of the Act[6] because it enhances NSCC's ability to safeguard securities and funds in its custody or under its control.

B. Self-Regulatory Organization's Statement on Burden on Competition

NSCC does not believe that the proposed rule will have an impact or impose a burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No new written comments have been solicited or received.[7] NSCC will notify the Commission of any written comments it receives.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within thirty-five days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to ninety days of such date if it finds such longer period to be appropriate and publishes its reason for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of NSCC. All submissions should refer to File No. SR–NSCC–95–12 and should be submitted by September 29, 1995.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.[8]

[Release No. 34–36176; International Series Release No. 847; File No. SR–Phlx–95–43]

Self-Regulatory Organizations; Order Approving a Proposed Rule Change by the Philadelphia Stock Exchange, Inc., Relating to Customized Foreign Currency Options Transaction Size

August 31, 1995.

On June 21, 1995, the Philadelphia Stock Exchange, Inc. ("Phlx" or "Exchange") filed with the Securities and Exchange Commission ("Commission"), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] and Rule 19b–4 thereunder,[2] a proposed rule change to reduce the minimum transaction size for customized foreign currency options ("Customized FCOs") from 200 to 100 contracts. Notice of the proposed rule change appeared in the **Federal Register** on July 12, 1995.[3] No comment letters were received on the proposed rule change. This order approves the Exchange's proposal.

On November 1, 1994, the Commission approved the Exchange's proposal to trade Customized FCOs.[4] The Exchange originally imposed a 300 contract minimum opening transaction size pursuant to Rule 1069(a)(6). Earlier this year, the Exchange reduced the minimum size of opening transactions in Customized FCOs to 200 contracts.[5] The Exchange believes, however, that 200 contracts is still too large for a significant segment of mid-sized corporations (*i.e.*, $1–10 billion in market capitalization) that wish to hedge their currency risk in a cost-effective manner using an exchange-traded Customized FCO. The Exchange, therefore, now proposes to reduce the minimum opening transaction size for Customized FCOs to 100 contracts. At the 100 contract level, this will still provide for substantial minimum opening transaction values for Customized FCOs involving all Phlx approved currencies.[6] Specifically, the values for opening transactions will range from a low of approximately $3.6 million for Customized FCOs based on the Australian dollar to a high of approximately $8.0 million for Customized FCOs based on the ECU.[7]

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of Section 6(b)(5)[8] in that the proposal is designed to promote just and equitable principles of trade, to prevent fraudulent and manipulative acts and practices, and to protect investors and the public interest. Specifically, the Commission believes that the proposed rule change is designed to make the Customized FCO market accessible to smaller corporate FCO users while maintaining the focus of this market towards institutional investors. As a result, the Commission believes that the proposal may serve to add liquidity to this market which would benefit all users of Customized FCOs.

Moreover, even with lowering the minimum opening transaction size to 100 contracts, the minimum value of an opening Customized FCO transaction involving any approved currency will be greater than $3 million.[9] The Commission believes that these levels are sufficient to ensure that the

[4] *See* Securities Exchange Act Release No. 34925 (November 1, 1994), 59 FR 55720 (November 8, 1994) ("Exchange Act Release No. 34925").

[5] *See* Securities Exchange Act Release No. 35464 (March 9, 1995), 60 FR 14043 (March 15, 1995).

[6] The currencies for which the Phlx is currently approved to trade FCOs are the Australian dollar, British pound, Canadian dollar, European currency unit ("ECU"), French franc, German mark, Japanese yen, Swiss franc, and U.S. dollar. Additionally, the Phlx has proposed to be able to trade Customized FCOs on the Italian lira and Spanish peseta. *See* Securities Exchange Act Release Nos. 35678 (May 4, 1995), 60 FR 24945 (May 10, 1995) (notice of proposal to trade Customized FCOs on the Italian lira), and 35677 (May 4, 1995), 60 FR 24941 (May 10, 1995) (notice of proposal to trade Customized FCOs on the Spanish peseta).

[7] Based on prevailing exchange rates as of May 16, 1995. *See* Exchange Act Release No. 35928, *supra* note 3.

[8] 15 U.S.C. 78f(b)(5) (1988).

[9] *See supra* note 7 and accompanying text.

Customized FCO market continues to be used almost exclusively by institutional investors. As a result, the Commission believes that this proposal does not raise any regulatory concerns that were not adequately addressed by the Exchange when the Commission approved the trading of Customized FCOs.[10]

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,[11] that the proposed rule change (SR–Phlx–95–43) is hereby approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[12]

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–M

[Release No. 35–26366]

Filings Under the Public Utility Holding Company Act of 1935, as Amended ("Act")

September 1, 1995.

Notice is hereby given that the following filing(s) has/have been made with the Commission pursuant to provisions of the Act and rules promulgated thereunder. All interested persons are referred to the application(s) and/or declaration(s) for complete statements of the proposed transaction(s) summarized below. The application(s) and/or declaration(s) and any amendments thereto is/are available for public inspection through the Commission's Office of Public Reference.

Interested persons wishing to comment or request a hearing on the application(s) and/or declaration(s) should submit their views in writing by September 25, 1995, to the Secretary, Securities and Exchange Commission, Washington, DC 20549, and serve a copy on the relevant applicant(s) and/or declarant(s) at the address(es) specified below. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in the matter. After said date, the application(s) and/or declaration(s), as filed or as amended, may be granted and/or permitted to become effective.

Basic Investment, Inc. (31–908)

Basic Investments, Inc. ("Basic Investments"), P.O. Box 2065, Henderson, Nevada 89009, has filed an application for an order exempting it as a holding company under section 3(a)(3) from all provisions of the Act, except section 9(a)(2).

Basic Investments is primarily engaged in real estate development, sales and rental. All of its capital stock is owned by the following entities, in the proportions indicated parenthetically: Kerr-McGee Chemical Corporation (31%), Titanium Metals Corporation (32%), Pioneer Chlor Alkali Company, Inc. (32%), and Chemstar Incorporated (5%) (collectively, "Industrials"). Basic Investments owns all of the capital stock of three subsidiary companies, Basic Land, Inc. ("Basic Land"), Basic Water Company ("Basic Water"), and Basic Management, Inc. ("Basic Management").

Basic Management owns an electric power distribution system ("Distribution Network") solely for the benefit of the Industrials. This distribution system consists of a 13.8 kV and a 4.16 kV circuit, each approximately 6 miles in length. The Industrials purchase electric power from the Colorado River Commission ("River Commission"), which is transmitted by the River Commission to the Distribution Network. Basic Management distributes this power to the Industrials at certain facilities used by the Industrials in a commonly shared site in Nevada. Distribution costs, which in 1993 were approximately $509,000, are charged to the Industrials on a break-even basis.

Basic Management also develops and operates certain real estate properties in Nevada, the revenues from which totaled approximately $4.5 million in 1993. Additionally, Basic Management monitors a sewage system, which generated gross revenues in 1993 of under $100,000.

Basic Land's sole asset is a 50% partnership interest in Victory Valley Land Company, L.P., which is primarily engaged in the development and/or sale of certain real estate property in Nevada. Gross revenues from Victory Valley's operations allocable to Basic Land in 1993 were approximately $5.5 million. Basic Water owns and operates a water delivery system serving both the town of Henderson, Nevada and an industrial complex jointly used by the Industrials. Gross revenues from this water operation in 1993 were approximately $2.1 million.

Basic Management is a "public-utility company" within the meaning of the Act. Because of Basic Investment's ownership of Basic Management, Basic Investment is a "holding company" within the meaning of the Act. In 1993, Basic Investment's total utility revenue approximated 4% of its combined revenues.

Basic Investment states that it is primarily engaged in businesses other than that of a public utility and that it does not derive a material part of its income from Basic Management's operation of the Distribution Network. Basic Investment further states that, if such revenue were deemed to be material, Basic Investment nonetheless owns all of Basic Management's outstanding capital stock.

Central and South West Corporation, et al. (70–8423)

Central and South West Corporation ("CSW"), a registered holding company, CSW International, Inc. ("CSWI"), a CSW Energy, Inc. ("Energy") (collectively "Applicants"), both wholly owned nonutility subsidiary companies of CSW, all located at 1616 Woodall Rodgers Freeway, P.O. Box 660164, Dallas, Texas 75202, have filed a post-effective amendment to their application-declaration under sections 6(a), 7, 9(a), 10, 12(b), 13(b), 32 and 33 of the Act and rules 43, 45, 53, 83, 86, 87, 90 and 91 thereunder.

By order dated November 3, 1994 (HCAR No. 26156) ("Order"), the Commission authorized the Applicants, among other things, to: (1) Organize CSWI and other special purpose subsidiaries ("Project Parents"), to invest in exempt wholesale generators ("EWGs"), and foreign utility companies ("FUCOs"), up to $400 million for which there is recourse to CSW ("Aggregate General Authority"), and up to $600 million of nonrecourse debt; and (2) fund such investments from time to time through issuances by CSW, CSWI and/or the Project Parents, including, without limitation, CSW de Mexico S.A. de C.V. ("CSWdM") and CSW de Mexico Servicios S.A. de C.V. ("CSWdM Servicios"), of stock, partnership interests, promissory notes, commercial paper or other debt or equity securities.

The Applicants now propose to: (1) Increase their authorization under the Aggregate General Authority to an amount equal to 50% of CSW's "consolidated retained earnings" as determined in accordance with rule 53(a)(1); and (2) increase the aggregate amount of nonrecourse debt securities that may be issued by CSWI and/or Project Parents (including, without limitation, CSWdM and CSWdM Servicios) to third parties to $3 billion under the terms and conditions specified in the Order. In addition, the Applicants propose to delete the limitations on the amount of nonrecourse debt that may be denominated in foreign currency.

The Cincinnati Gas and Electric Company (70–8669)

The Cincinnati Gas and Electric Company "(CG&E"), a wholly owned public-utility subsidiary company of CINergy Corp. ("CINergy"), a registered holding company, both located at 139 East Fourth Street, Cincinnati, Ohio 45202, has filed a declaration under sections 6(a), 7 and 12(e) of the Act and rules 62 and 65 thereunder.

CG&E's amended articles of incorporation ("Articles") currently provide that, without the consent of the holders of not less than a majority of the total number of shares of preferred stock of all series then outstanding, CG&E shall not issue or assume any securities representing unsecured debt (other than for purposes of refunding outstanding unsecured indebtedness or redeeming or otherwise retiring outstanding shares of stock ranking prior to the preferred stock with respect to the payment of dividends or upon the dissolution, liquidation or winding up of CG&E) if, immediately after such issue or assumption, the total outstanding principal amount of all securities representing unsecured debt would exceed 20% of the aggregate of: (1) the total principal amount of all then outstanding secured debt of CG&E; and (2) the capital and surplus of CG&E, as stated on CG&E's books ("20% Limitation").

CG&E proposes to submit to the holders of the outstanding shares of preferred stock of all series, and to CINergy, as the sole holder of all the outstanding shares of CG&E common stock, a proposal ("Proposal") to amend the Articles to eliminate the 20% Limitation. Approval of the Proposal requires the affirmative vote of the holders of not less than two-thirds of the total number of shares of preferred stock of all four series, voting together as one class, and an affirmative two-thirds vote from CINergy as the sole common stock holder. CINergy has informed CG&E that it will vote in favor of the Proposal.

In the event the Proposal fails to receive the requisite affirmative vote, CG&E proposes to seek approval of an alternative proposal amending the Articles to authorize CG&E to issue or assume securities representing unsecured indebtedness in excess of the 20% Limitation through December 1, 2005. Approval of the alternative proposal requires the same affirmative vote as the Proposal.

CG&E proposes to submit the above proposals for consideration and action at a special meeting of stockholders planned to be held on or about November 16, 1995, and, in connection therewith, to solicit proxies from the holders of its capital stock.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–M

DEPARTMENT OF TRANSPORTATION

Office of International Transportation and Trade; Transportation Science and Technology Implementation Arrangement

ACTION: Private sector participation in the U.S. Department of Transportation and Japan's Ministry of Transport Transportation Science and Technology Implementing Arrangement.

BACKGROUND: The Department of Transportation Secretary Federico Peña and his former counterpart, Japan's Minister of Transport Shigeru Ito, signed on February 10, 1994, a Transportation Science and Technology Implementing Arrangement to promote mutually beneficial cooperation in transportation technology. The Implementing Arrangement is designed to establish projects between the U.S. and Japan in all modes of transportation, including intermodalism, safety, environment, transportation for the handicapped and elderly, information-related technology, and other areas as mutually agreed.

The First Annual Meeting of U.S.-Japan transportation experts convened on October 26–27, 1994, in Tokyo, Japan, to discuss/launch project activity on areas relating to all fields of transportation. At the conclusion of the meeting, both parties agreed to seven priority areas for cooperation. These areas are methods to evaluate new design of tankers (oil spill prevention from tankers); marine exhaust emissions; high speed rail transportation; magnetic levitation in rail transport; advanced tunneling technology; transport measures for the mobility handicapped; and intermodalism including an automatic transportation equipment identification system. In addition to the seven priority projects already agreed upon, the United States and Japan are exploring another proposed initiative on emergency management systems/disaster prevention.

SUMMARY: As the Department prepares for the Second Annual Meeting of U.S.-Japan Transportation Experts, this notice sets forth an inquiry to U.S. public and private transportation related companies, research establishments, and academics who are interested in participating in any of the priority areas identified above. Both the U.S. Government and the Government of Japan are eager to have their respective private sector transportation and related technology companies contribute to and benefit from the cooperative exchange.

FOR GENERAL INFORMATION CONTACT: Ms. Phyllis Davis, Office of International Transportation and Trade, telephone (202) 366–9514, U.S. Department of Transportation, 400 7th Street SW., Room 10302, Washington, DC 20590.

SEND INFORMATION TO: Ms. Phyllis Davis, Office of International Transportation and Trade, telephone (202) 366–9514, U.S. Department of Transportation, 400 7th Street SW., Room 10302, Washington, DC 20590.

DEADLINE FOR SUBMISSION OF INFORMATION: Please provide the Department a written summary of the project(s) you may wish to participate in by COB September 29, 1995.

Dated: September 1, 1995.

Nancy K. MacRae,

Deputy Director, Office of International Transportation and Trade.

BILLING CODE 4910–62–P

Office of the Secretary

Reports, Forms and Recordkeeping Requirements

AGENCY: Department of Transportation (DOT), Office of the Secretary.

ACTION: Notice.

SUMMARY: This notice lists those forms, reports, and recordkeeping requirements imposed upon the public which were transmitted by the Department of Transportation to the Office of Management and Budget (OMB) for its approval in accordance with the requirements of the Paperwork Reduction Act of 1980 (44 USC Chapter 35).

DATES: August 31, 1995.

ADDRESSES: Written comments on the DOT information collection requests should be forwarded, as quickly as possible, to Edward Clarke, Office of Management and Budget, New Executive Office Building, Room 10202,

---

[10] *See* Exchange Act Release No. 34925, *supra* note 4.

[11] 15 U.S.C. 78s(b)(2) (1988).

[12] 17 CFR 200.30–3(a)(12) (1994).

Washington, D.C. 20503. If you anticipate submitting substantive comments, but find that more than 10 days from the date of publication are needed to prepare them, please notify the OMB official of your intent immediately.

FOR FURTHER INFORMATION CONTACT: Copies of the DOT information collection requests submitted to OMB may be obtained from Susan Pickrel or Gemma deGuzman, Information Resource Management (IRM) Strategies Division, M–32, Office of the Secretary of Transportation, 400 Seventh Street, S.W., Washington, D.C. 20590, (202) 366–4735.

SUPPLEMENTARY INFORMATION: Section 3507 of Title 44 of the United States Code, as adopted by the Paperwork Reduction Act of 1980, requires that agencies prepare a notice for publication in the **Federal Register**, listing those information collection requests submitted to OMB for approval or renewal under that Act. OMB reviews and approves agency submissions in accordance with criteria set forth in that Act. In carrying out its responsibilities, OMB also considers public comments on the proposed forms and the reporting and recordkeeping requirements. OMB approval of an information collection requirement must be renewed at least once every three years.

Items Submitted to OMB for Review

The following information collection requests were submitted to OMB on August 31, 1995:

DOT No: 4110
OMB No: 2137–0052
Administration: Research and Special Programs Administration (RSPA)
Title: Incident and Annual Reports for Gas Pipeline Operators
Need for Information: 49 CFR Section 1915 requires each gas pipeline operator give telephonic notice to an incident at the earliest practicable moment following discovery.
Proposed Use of Information: This information will be used by RSPA to identify significant failures which may require investigation by the Office of Pipeline Safety Enforcement Division or a state agency pursuant to a certification under action 5(a).
Frequency: Once a year and on occasion
Respondents: Gas Pipeline Operators
Number of Respondents: 2,700
Burden Estimate: 7,023 hours
Form(s): DOT 7100.1, 7100.2, 7100.2–1
Average Burden Hours Per Response: 2.6 hours

DOT No: 4111
OMB No: 2115–0076
Administration: United States Coast Guard
Title: Security Zones, Regulated Navigation Areas and Safety
Need for Information: Under (1) Executive Order 10173, gives Coast Guard the authority to prescribe procedure for establishing security zones on areas of land, water, or land and water, (2) The Port and Tanker Safety Act, Coast Guard has the authority to prescribe special regulations to control vessel traffic in areas determined to be hazardous, and (3) The Ports and Waterways Safety Act, Coast Guard has the authority to prescribe regulation to allow for the designation of safety zones.
Proposed Use of Information: The information will be used by the Coast Guard to assess the need to establish security zones, safety zones or regulated navigation areas.
Frequency: On occasion
Burden Estimate: 929 hours
Respondents: Waterway users
Number of Respondents: 743
Form(s): None
Average Burden Hours Per Response: 1 hour and 25 minutes

DOT No: 4112
OMB No: 2133–0506
Administration: Maritime Administration (MARAD)
Title: Merchant Marine Medals and Awards
Need for Information: Required by Public Law 100–324, this information collection provides a method of documenting requests for merchant marine medals and awards.
Proposed Use of Information: The information received is used by MARAD personnel to assist in processing and verifying requests for seamen's service awards.
Frequency: On occasion
Burden Estimate: 3,000 hours
Respondents: Crew members of United States ships
Number of Respondents: 3,000
Form(s): None
Average Burden Hours Per Response: 1 hour

DOT No: 4113
OMB No: 2115–0553
Administration: United States Coast Guard
Title: 33 CFR 140.15 Equivalents and Approved Equipment
Need for Information: Under 33 CFR Subchapter N, Coast Guard will implement the best available and safest technological concept to comply with Section 21 of the Outer Continental Shelf (OCS) Land Act.
Proposed Use of Information: This information will be used by the Coast Guard for comparison with existing standards or procedures to ensure that an equivalent level of safety is maintained as provided for in the regulations.
Frequency: On occasion
Burden Estimate: 100 hours
Respondents: Owners, operators, equipment manufacturers and subcontractors
Number of Respondents: 10
Form(s): None
Average Burden Hours Per Response: 10 hours

DOT No: 4114
OMB No: 2110–0536
Administration: Federal Aviation Administration
Title: Implementation of the Equal Access to Justice Act
Need for Information: 14 CFR Subpart B, Part 14.10 implements procedures for the application of awards under the Equal Access to Justice Act (EAJA). The EAJA provides for the award of attorney fees and other expenses to eligible individuals and entities who are parties to administrative proceedings before government agencies and who prevail over the government.
Proposed Use of Information: This information will be used to determine whether the applicant is eligible to receive an award under the EAJA.
Frequency: As required
Burden Estimate: 210 hours annually
Respondents: Individuals and businesses
Number of Respondents: 21
Form(s): None
Average Burden Hours Per Response: 5 hours

DOT No: 4115
OMB No: 2105–0517
Administration: Office of the Secretary
Title: Amendment to Transportation Acquisition Regulation (48 CFR)
Need for Information: 48 CFR 1213.70; 1237.70; 1252.237–71; and 1252.237–72 will require contracting officers to obtain and evaluate, qualification or other pertinent information when it is necessary to determine whether offerors have the capability to perform services under a proposed contract.
Proposed Use of Information: This information will be used by OST to evaluate offerors' capability statements and data submitted per the requirement of the solicitation or request for quotation.
Frequency: On occasion
Burden Estimate: 57,167 hours
Respondents: Individuals or households, Businesses or other for-profit, small businesses or organizations
Number of Respondents: 792
Form(s): None

Average Burden Hours Per Response: 1 hour

Issued in Washington, D.C. on August 31, 1995.

Jim Harrell,

Computer Specialist, Information Resource Management (IRM) Strategies Division.

BILLING CODE 4910–62–P

Federal Aviation Administration

Notice of Intent To Rule on Application To Impose and Use the Revenue From a Passenger Facility Charge (PFC) at Cincinnati/Northern Kentucky International Airport, Covington, KY

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of intent to rule on application.

SUMMARY: The FAA proposes to rule and invites public comment on the application to impose and use the revenue from a PFC at Cincinnati/Northern Kentucky International Airport under the provisions of the Aviation Safety and Capacity Expansion Act of 1990 (Title IX of the Omnibus Budget Reconciliation Act of 1990) (Public Law 101–508) and Part 158 of the Federal Aviation Regulations (14 CFR Part 158).

DATES: Comments must be received on or before October 10, 1995.

ADDRESSES: Comments on this application may be mailed or delivered in triplicate to the FAA at the following address: Memphis Airports District Office, 2851 Directors Cove, Suite #3, Memphis, TN 38131–0301.

In addition, one copy of any comments submitted to the FAA must be mailed or delivered to Mr. Robert F. Holscher, Director of Aviation of the Cincinnati/Northern Kentucky International Airport at the following address: Kenton County Airport Board, Second Floor, Terminal 1, Cincinnati/Northern Kentucky International Airport, 2939 Terminal Drive, Hebron, Kentucky 41048.

Air carriers and foreign air carriers may submit copies of written comments previously provided to the Kenton County Airport Board under section 158.23 of Part 158.

FOR FURTHER INFORMATION CONTACT: Peggy S. Kelley, Planner, Memphis Airports District Office, 2851 Directors Cove, Suite 3, Memphis, Tennessee 38131–0301. (901) 544–3495. The application may be reviewed in person at this location.

SUPPLEMENTARY INFORMATION: The FAA proposes to rule and invites public comment on the application to impose and use the revenue from a PFC at Cincinnati/Northern Kentucky International Airport under provisions of the Aviation Safety and Capacity Expansion Act of 1990 (Title IX of the Omnibus Budget Reconciliation Act of 1990) (Public Law 101–508) and Part 158 of the Federal Aviation Regulations (14 CFR Part 158).

On August 31, 1995, FAA determined that the application to impose and use the revenue from a PFC submitted by the Kenton County Airport Board was substantially complete within the requirements of section 158.25 of Part 158. The FAA will approve or disapprove the application, in whole or in part, no later than November 29, 1995.

The following is a brief overview of the application.

Level of the proposed PFC: $3.00
Proposed charge effective date: February 1, 1996
Proposed charge expiration date: August 31, 2000
Total estimated PFC revenue: $117,182,000

Brief description of proposed project(s):

Impose and Use

1. Noise Compatibility Land Use Management Measures (Phase 2).

A. Voluntary Acquisition in the 65/75 LDN, Northwest.

B. Purchase Assurance/Sound Insulation in the 65 to 75 LDN, Southeast.

C. Purchase Assurance/Sound Insulation in the 65 to 75 LDN, Southwest.

2. Runway 18R/36L Extension-1,500 Feet and Related Rehabilitation. Construction of a 1,500 foot extension to the north end of Runway 18R/36L and parallel taxiway and extensive rehabilitation and/or reconstruction of the entire existing 9,500-foot runway and existing taxiways and connectors.

3. Debt Service Cost. This project represents debt service cost related to the issuance of proposed revenue bonds which are to be backed by PFC revenue.

Class or classes of air carriers which the public agency has requested not be required to collect PFCs:

1. FAR Part 121 Supplemental Operators which operate at the airport without an operating agreement with the Board and enplane less than 1,500 passengers per year.

2. FAR Part 135 on-demand air taxi/commercial operators, both fixed wing and rotary.

Any person may inspect the application in person at the FAA office listed above under **FOR FURTHER INFORMATION CONTACT**.

In addition, any person may, upon request, inspect the application, notice and other documents germane to the application in person at the Cincinnati/Northern Kentucky International Airport.

Issued in Memphis, Tennessee, on August 31, 1995.

LaVerne F. Reid,

Manager, Memphis Airports District Office.

BILLING CODE 4910–13–M

DEPARTMENT OF THE TREASURY

Customs Service

Notice of Issuance of Final Determination Concerning Electrical Raceways

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Notice of final determination.

SUMMARY: This document provides notice that Customs has issued a final determination concerning the country of origin of electrical raceways which are to be offered to the United States Government under an undesignated government procurement contract. The final determination found that based upon the facts presented, the country of origin of electrical raceways which are manufactured in Canada from Canadian and foreign components is Canada.

DATES: The final determination was issued on August 24, 1995. Any party-at-interest, as defined at 19 CFR 177.22(d), may seek judicial review of this final determination within 30 days of September 8, 1995. A copy of the nonconfidential portions of this final determination will be published in the Customs Bulletin.

FOR FURTHER INFORMATION CONTACT: Anthony A. Tonucci, Attorney-Advisor, Office of Regulations and Rulings (202) 482–7073.

SUPPLEMENTARY INFORMATION: Notice is hereby given that on August 24, 1995, pursuant to Subpart B of Part 177, Customs Regulations (19 CFR Part 177, Subpart B), Customs issued a final determination concerning the country of origin of electrical raceways which are to be offered to the United States Government under an undesignated government procurement contract. The U.S. Customs ruling number is HQ 559089. This final determination was issued at the request of Wiremold Canada, Inc., under procedures set forth at 19 CFR 177 Subpart B, which implements Title III of the Trade Agreements Act of 1979, as amended (19 U.S.C. 2511–18). The final determination concluded that based upon the facts presented, foreign materials consisting of stainless steel, aluminum sheeting and other small parts, which are further processed and assembled into electrical raceways in Canada, are substantially transformed as a result of the Canadian operations.

Accordingly, the country of origin of the electrical raceways is Canada. This document gives notice pursuant to section 177.29, Customs Regulations (19 CFR 177.29), of that final determination. Pursuant to 19 CFR 177.30, any party-at-interest, as defined at 19 CFR 177.22(d), may seek judicial review of this final determination within 30 days of (date of publication in the **Federal Register**). Any party-at-interest other than the party which requested this final determination may request, pursuant to 19 CFR 177.31, that Customs reexamine the matter anew and issue a new final determination.

Dated: August 24, 1995.

Harvey B. Fox,

Director, Office of Regulations And Rulings.

FEDERAL DEPOSIT INSURANCE CORPORATION

Notice of Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 10:02 a.m. on Tuesday, September 5, 1995, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session to consider the following

Matters relating to the Corporation's supervisory activities.

Recommendation regarding an administrative enforcement proceeding.

Personnel matters.

Incalling the meeting, the Board determined, on motion of Director Jonathan L. Fiechter (Acting Director, Office of Thrift Supervision), seconded by Vice Chairman Andrew C. Hove, Jr., concurred in by Director Eugene A. Ludwig (Comptroller of the Currency), and Chairman Ricki Helfer, that Corporation business required its consideration of the matters on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting by authority of subsections (c)(2), (c)(4), (c)(6), (c)(8), (c)(9)(A) (ii), and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(2), (c)(4), (c)(6), (c)(8), (c)(9)(A) (ii), and (c)(9)(B)).The meeting was held in the Board Room of the FDIC Building located at 550—17th Street, N.W., Washington, D.C.

Dated: September 5, 1995.

Federal Deposit Insurance Corporation.

Patti C. Fox,

Assistant Executive Secretary.

Part II

Department of Agriculture

Forest Service

36 CFR Part 223

Sale and Disposal of National Forest System Timber; Administration of Timber Export and Substitution Restrictions; Final Rule

DEPARTMENT OF AGRICULTURE

Forest Service

36 CFR Part 223

RIN 0596–AB22

Sale and Disposal of National Forest System Timber; Administration of Timber Export and Substitution Restrictions

AGENCY: Forest Service, USDA.

ACTION: Final rule with request for comments.

SUMMARY: This final rule implements the Forest Resources Conservation and Shortage Relief Act of 1990 (Act). It defines certain terms necessary to facilitate uniform compliance; prohibits transfer of unprocessed private timber for export by a person who possesses or acquires unprocessed Federal timber; prohibits export of such unprocessed private timber by a third or successive parties; prescribes procedures for reporting the acquisition and disposition of Federal and private timber, including transfers; prescribes procedures for identifying unprocessed Federal and private timber requiring domestic processing; establishes procedures for assessing civil and criminal penalties and applying administrative remedies for violations of the Act, its implementing regulations, and contracts issued under the Act; and authorizes Regional Foresters' entry into cooperative agreements with other agencies.

This comprehensive rule incorporates, with some changes, the provisions of the interim rule published November 20, 1990 (55 FR 48572) which established sourcing area procedures; continued surplus species determinations; and continued the existing reporting procedures applicable to timber sale contracts awarded prior to August 20, 1990. This comprehensive rule also incorporates the final rule of limited scope, published December 19, 1991 (56 FR 65834), which: Continued the existing reporting procedures applicable to timber sale contracts awarded prior to August 20, 1990; amended the interim rule for sourcing area disapproval and review procedures; and established application procedures for persons applying for a share of the limited amount of unprocessed timber originating from National Forest System lands in the State of Washington that are exempted from the prohibition against indirect substitution. This comprehensive rule also establishes the specific quotas for indirect substitution in Washington State. This comprehensive rule fully implements the Act, except for the determination of surplus species, pursuant to 16 U.S.C. 620a(b). The intended effect of this rule making is to conserve public timber resources and help relieve domestic timber supply shortages by implementing the provisions of the Forest Resources Conservation and Shortage Relief Act of 1990.

Given the scope of this final, comprehensive rule making, the Department is seeking public comment on any "fine tuning" of the regulations that may be necessary for more efficient implementation. This request for public comment in no way affects the finality of this rulemaking.

DATES: This rule is effective September 8, 1995. Comments must be received in writing by October 10, 1995.

ADDRESSES: Send written comments to Jack Ward Thomas, Chief (2400), Forest Service, USDA, P0 Box 96090, Washington, DC 20090–6090.

The public may inspect comments received on this final rule in the Office of the Director, Timber Management Staff, Forest Service, USDA, 201 14th Street SW., Washington, DC 20250, between the hours of 8:30 a.m. and 4:30 p.m. Parties wishing to view comments are encouraged to call ahead ((202) 205–0893) to facilitate entry into the building.

FOR FURTHER INFORMATION CONTACT: Rex Baumback, Timber Management Staff, Forest Service, USDA, P.O. Box 96090, Washington, DC 20090–6090, (202) 205–0855.

SUPPLEMENTARY INFORMATION:

Statutory and Regulatory Background

The Forest Resources Conservation and Shortage Relief Act of August 20, 1990 (16 U.S.C. 620, *et seq.*), hereafter referred to as the Act, prohibits the export of unprocessed timber originating from Federal lands west of the 100th meridian in the contiguous 48 States and restricts direct and indirect substitution of unprocessed Federal timber for timber exported from private lands. Prior to the passage of the 1990 Act, the prohibitions against exporting unprocessed timber harvested from Federal lands had been renewed annually by the Appropriations Act for Interior and Related Agencies, under which Forest Service programs are funded. The Act replaces this annual renewal requirement for contracts awarded on or after the date of enactment of the Act. The specific limitations established in the new Act are described under the applicable regulatory sections.

To meet certain statutory deadlines, the Forest Service published a notice of statutory restrictions in the **Federal Register** on September 17, 1990, (55 FR 36123) followed by publication of several rules, a summary of which follows:

1. An interim rule was published November 20, 1990, (55 FR 48572) to comply with statutory requirements which took effect before this final rule could be issued. The interim rule contained definitions necessary to facilitate uniform compliance, procedures for certifying exemption of a person from the prohibitions against substitution if that person had exported unprocessed private timber in the previous 24 months, and sourcing area application procedures. It also continued the status of existing surplus species until the Secretary could receive public comments and make new surplus species determinations, and continued reporting procedures in effect for contracts awarded prior to enactment of the Act.

2. A proposed comprehensive rule was published January 29, 1991, (56 FR 3354) to fully implement the Act. This proposed rule included procedures for monitoring compliance with the Act and enforcing the prohibition against indirect substitution. Also included were procedures for reporting the acquisition and disposition of unprocessed timber, for documenting transfers, for identifying and marking Federal and private timber required to be domestically processed, procedures for assessing civil and criminal penalties and applying administrative remedies for violations of the Act; revised regulations for debarment and contract suspension, definitions necessary to assure uniform compliance with the Act, provisions for cooperating with other agencies, and procedures for determining surplus species.

3. A proposed rule of limited scope was published January 29, 1991, (56 FR 3375) to implement certain provisions required to take effect before this final comprehensive rule could be adopted. The proposed rule contained regulations for continuing the reporting requirement in timber sale contracts awarded prior to August 20, 1990, establishing sourcing area disapproval and review procedures, and establishing application procedures for indirect substitution prohibition exceptions for persons who acquired unprocessed timber from National Forest System lands in the State of Washington. The final rule of limited scope was issued December 19, 1991 (56 FR 65834).

4. A final rule delegating the Secretary of Agriculture's authority to make the final decision on sourcing area applications received by December 20, 1990 to the Department's Office of Administrative Law Judges (OALJ) was published April 5, 1991 (56 FR 14009);

5. A final rule was published on May 14, 1991 (56 FR 22105), amending the Department's rules of practice governing formal adjudicatory proceedings instituted by the Secretary under various statutes to include log export and substitution disputes arising from the Act.

6. A final rule was published on April 2, 1992 (57 FR 11261), which delegates the Secretary's authority to adjudicate sourcing area applications received after December 20, 1990 to the Department's Office of Administrative Law Judges and the Judicial Officer.

7. A final rule was published on February 24, 1994 (59 FR 8823), which establishes the procedures for adjudicating and reviewing sourcing areas.

This final rule, in combination with the final rule published December 19, 1991, (56 FR 65834) completes the implementation process, except for the determination of surplus species pursuant to 489(b) of the Act (16 U.S.C. 630a(b)).

Contents of comprehensive rule. This final rule contains the following:

1. Requirements of bidders concerning exports;
2. Suspension and debarment of timber purchasers;
3. Definitions necessary to fully implement the Act;
4. Prohibition against export of unprocessed Federal timber;
5. Prohibitions against the transfer of unprocessed private timber for export by a person who also holds or acquires unprocessed Federal timber, and prohibitions against export of unprocessed private timber that requires domestic processing;
6. Sourcing area application procedures;
7. Incorporation of sourcing area disapproval and review procedures;
8. Incorporation of procedures for a non-manufacturer to apply for a waiver of the prohibition against substitution in the preceding 24 months if the person certified by November 20, 1990 that he/she would cease exporting by February 20, 1991;
9. Procedures for reporting the acquisition and disposition of Federal timber and procedures for documenting transfers of unprocessed Federal and private timber requiring domestic processing;
10. Procedures for identifying unprocessed timber requiring domestic processing;
11. Civil and criminal penalties for violations of the Act or regulations issued under the Act, and procedures for assessment of civil and criminal penalties for violations of the Act or regulations issued under the Act;
12. Administrative remedies for violations of the Act or its implementing regulations, or contracts issued under the Act;
13. Authority for Regional Foresters to enter into cooperative agreements with other agencies;
14. Continuation of surplus species determinations pending a separate rule making; and
15. Incorporation of the rule regarding the indirect substitution exception in Washington State.

Summary of Comments and Responses

The Forest Service requested comments on the interim rule published November 20, 1990. The comment period for the interim rule closed December 20, 1990. Subsequently, as previously noted, the Forest Service published a proposed comprehensive rule to implement the remaining provisions of Forest Resources Conservation and Shortage Relief Act of 1990 (16 U.S.C. 620, *et seq.*) in the **Federal Register** on January 29, 1991 (56 FR 3354). The comment period on the proposed rule closed March 15, 1991. The comments received on the interim rule have been considered along with those received on the proposed rule.

Comments were received from 89 respondents who made numerous comments relating to 17 separate subjects. All relevant comments have been given full consideration in adoption of this final rule. Comments were received from 66 timber sale purchasers; 12 timber industry associations; three timber trade associations; two environmental organizations; two law firms; one private citizen; one forestry and marketing consultant; one port district; and one Federal agency, the U.S. Department of the Interior, Bureau of Land Management. With the exception of Bureau of Land Management, all respondents were from the western United States or from associations and entities representing western interests.

General Comments

Most respondents expressed general support for the Act and agreed that aggressive enforcement of the export restrictions on unprocessed Federal timber was necessary. However, most respondents also strongly opposed, as being excessively costly and unnecessarily burdensome, the proposed procedures for reporting and record keeping and for identifying and marking unprocessed Federal and private timber. Many of these respondents offered constructive suggestions to reduce these costs and burdens. In addition, approximately half of the comments received from all respondents requested or suggested clarifications of proposed procedures and definitions of terms used in various sections of the proposed rule.

The proposed rule also requested nominations of surplus species, and specifically requested comments on the current determinations that Alaska Yellow Cedar and Port Orford Cedar are surplus to domestic manufacturing needs. Several respondents expressed opposition to continuing the determination that these species are surplus. Two respondents requested that Pacific Yew be considered surplus, and one requested that Western/Rocky Mountain Juniper be considered surplus. A separate proposed rule making will address surplus species.

Other respondents expressed strong opposition to the exporting of unprocessed timber from any source—Federal, other public and private lands—and to all forms of substitution of Federal and other public timber for exported private timber.

Comments by Section of the Proposed Rule

The following is a section-by-section summary of comments and the Department's responses to these in the final rule.

Amendment of Title 36, Part 223, Subpart B

This subpart provides the policies and procedures for planning, preparing, appraising, advertising, bidding, awarding and administering timber sale contracts. No comments were received specifically addressing these topics, however upon review of comments addressing the reporting requirements in the proposed rule, it became apparent that the requirements of prospective bidders for reporting prior export activities in the existing rule at § 223.87 were made obsolete by the passage of the new Act and the publication of this final rule. These reporting requirements have been removed in this final rule. This rule substitutes new reporting requirements that are consistent with the Act for contracts issued on or after August 20, 1990.

Section 223.87 Requirements of Bidders Concerning Exports

Section 223.87 in the existing rule required bidders to submit with their bid for National Forest timber, as a condition of bid acceptance, a certification and report listing the disposition of all National Forest timber harvested in the previous calendar year; the amount of timber harvested by the bidder from private lands within the bidder's tributary area that was exported or sold for export during the previous calendar year; the locations of manufacturing facilities where the unprocessed timber was expected to be delivered; and the bases of historic purchase and export quotas. Further, § 223.87 required the bidder to notify the Forest Service of changes in destination of unprocessed timber after award of the contract. This report and certification were done on Forest Service form number FS–2400–43 (OMB No. 0596–0021) to be submitted with the completed bid form. If the FS–2400–43 form was not included with the bid or was not properly completed and signed, the bid could be declared nonresponsive.

Section 223.87 of this final rule would eliminate this certification and reporting requirement and the use of form FS–2400–43. Section 223.87 requires, for a bid to be considered responsive, a certification that (1) the bidder is eligible to acquire unprocessed timber originating from National Forest System lands west of the 100th meridian in the contiguous 48 States, in accordance with the Forest Resources Conservation and Shortage Relief Act of 1990 (16 U.S.C. 620, *et seq.*) and its implementing regulations, and (2) the bidder is in compliance with the provisions of the Forest Resources Conservation and Shortage Relief Act of 1990 and its implementing regulations. The reporting requirements in the current bid form are required in the transfer documents and annual report provisions in this rule, so there is no need to collect the information in the bid form. The certification statement is presently part of Forest Service bid form No. FS–2400–14 (1/94). The Office of Management and Budget approved the use of a bid form containing the certification statement regarding compliance through February 28, 1997, and assigned it Control Number 0596–0066. The current bid form was recently revised to add the sentence about eligibility to purchase National Forest System timber consistent with the Act and the regulations. If the bidder is an exporter of unprocessed timber originating west of the 100th meridian in the contiguous 48 States, eligibility includes having an exemption from the prohibition against substitution that would allow the acquisition of unprocessed Federal timber, pursuant to the Forest Resource Conservation and Shortage Relief Act of 1990 and its implementing regulations.

Amendment of Title 36, Part 223, Subpart C

This subpart provides policies and procedures governing suspension and debarment of purchasers of National Forest System timber. It provides for listing of debarred and suspended purchasers and sets forth the causes and procedures for debarment and suspension and for determining the scope, duration, and treatment to be accorded to purchasers listed as debarred or suspended. No comments were received on proposed §§ 223.130, 223.131, 223.133, 223.135, 223.137, and 223.139. Except for minor changes to the text to improve technical and editorial clarity, the Department adopts these sections as proposed.

Section 223.136 Debarment

Section 223.136(b) of the current regulations establishes the effect of a proposed debarment on purchasers of Forest Service timber sale contracts. The current regulations state that, upon issuance of a notice of proposed debarment and until the final debarment decision is rendered, the person proposed for debarment shall not be allowed to bid on or receive new contracts or be granted contract term extensions.

The proposed rule specified that, upon issuance of a notice of proposed debarment, persons violating the Act or any contract or regulation issued under the Act, would not be allowed to enter into any contract to purchase unprocessed timber originating from Federal lands and would not be allowed to take delivery of unprocessed Federal timber from another party who purchased such timber until the debarment proceedings were completed.

Comment. Five respondents stated that it would be unfair if debarment were implemented without prior hearings or opportunity to comment. These respondents were concerned that the affected parties would not have the opportunity to respond to the causes upon which the proposed debarment action was based. Several respondents suggested that such a deprivation would be a violation of the due process clause of the Constitution.

Response. This proposed addition, which prohibits a person proposed for debarment from acquiring timber originating from Federal lands would not alter the procedures for debarment set forth in § 223.138, which establishes the process that Debarment Officers and affected individuals must follow when debarment is being considered. Thus, affected parties would continue to have the opportunity to present information and arguments in opposition to, or in mitigation of the proposed debarment prior to the final debarment determination.

The standard of evidence for debarment (§ 223.138(b)(6)) is a preponderance of the evidence. This standard is deemed met where the cause for debarment is conviction or civil judgment. Where the evidence is sufficient to issue a notice of proposed debarment, good cause exists to protect Government and public interests by not initiating or extending further business dealings with that purchaser.

Further, the process prescribed in the rules provides the due process required by the Constitution. This process is consistent with Government-wide policies and procedures and has been upheld upon judicial review. A trial-type hearing is not required prior to a final debarment decision, unless a dispute of a material fact is raised. Further, the effects of a proposed debarment are limited by the prescribed time for issuance of a final debarment decision. Accordingly, the Department is adopting the revision to § 223.136 as proposed.

Comment. Several respondents suggested that any limitation of rights on a purchaser's existing contracts be deferred until completion of debarment proceedings.

Response. The effect of a proposed debarment is that a purchaser is precluded from consideration of bids on future timber sale contracts, award of future contracts, approval of third party agreements, or extensions of existing contracts, except pursuant to the terms of a contract term adjustment. A purchaser proposed for debarment pursuant to § 223.137(g) is precluded from entering into any contract to purchase unprocessed timber from Federal lands and is also precluded from taking delivery of Federal timber purchased by another person.

The rules do not limit a purchaser's rights on any existing contracts, except with respect to contract extensions. The Forest Service is not obligated to grant contract extensions. There may be situations when refusal to extend the duration of an existing timber sale contract is necessary to protect the Government's interest. If such protective action is not needed, the rule provides that the Chief of the Forest Service or authorized representative may determine that there is a compelling reason to extend an existing contract's term. Therefore, the final rule retains the provision relating to extending the duration of an existing timber sale contract.

Comment. One respondent suggested that purchasers are subject to substantial penalties once a notice of debarment is issued. This respondent asserted that presumptions of guilt or wrongdoing are made prior to an adjudication of a person's rights and that such a system constitutes de facto debarment, is punitive and is impermissible.

Response. The Department realizes that debarment is a serious action. Debarment is, however, a separate administrative action that is not to be confused with criminal, civil or other administrative proceedings that may have punitive effects. Debarment is taken only to protect the Government's and the public's interests and, as a matter of law, is not taken with the intent to punish. Debarment actions are taken only as a means of ensuring that the Government only does business with responsible persons.

The effects of a proposed debarment, by virtue of the process that has been put into place, are not punitive. Once causes for debarment have been established sufficient to issue a notice of proposed debarment, the Government is justified in not conducting further business dealings with a person proposed for debarment, except on existing contracts. The Department also is authorized under the Act to preclude any person who violates the Act, or any regulation or contract issued under the Act from taking delivery of Federal timber purchased by another party.

The due process required by the Constitution is contained in the debarment procedures and is sufficient to avoid penalizing persons proposed for debarment. The procedures contained in the rule provide firm deadlines for the debarring official's final debarment determination. The procedures also allow an opportunity to respond to the proposed debarment, an opportunity for a fact-finding hearing when a dispute over a material fact is raised, and the procedures allow for reconsideration of the debarring official's final debarment determination, as well as appeal to the U.S. Department of Agriculture Board of Contract Appeals (36 CFR 223.138). The effect of a proposed debarment is not punitive. Therefore, except for minor changes to the text to improve technical and editorial clarity, the Department adopts this section as proposed.

Comment. One respondent suggested that the effect of a proposed debarment is the same as debarment and therefore, a purchaser is automatically debarred based on the notice of proposed debarment.

Response. As stated previously, a notice of proposed debarment has the effect of excluding persons from further business dealings pending a final debarment decision. Again, where evidence is sufficient to issue a notice of proposed debarment, good cause exists to protect the Government and public interests by not initiating or extending further business dealings during the period of proposed debarment.

Further, the rules allow persons to submit, either in person or in writing, or through a representative, information and argument in opposition to the proposed debarment. Such persons also may submit evidence of mitigating factors and arguments concerning the imposition, scope, duration or effects of a proposed debarment or debarment. Based on such information, the debarring official may determine that causes for debarment do not exist, that only certain persons or divisions of an organization or company should be debarred, or that a period of less than the maximum allowed may be appropriate. If the information and arguments in opposition, or the mitigating factors are not persuasive, the period of debarment may be effective retroactively from the date of the notice of proposed debarment, that is, a person would not necessarily be proposed for debarment for a period of time and then have an additional three (3) to five (5) year debarment period added on to the time that has already passed during the period of the proposed debarment; any period of debarment may encompass the period of proposed debarment.

Comment. One respondent asserted that some companies or organizations may have separate divisions in various locations and that debarment may not be appropriate for all divisions of a company or its affiliates.

Response. There may be some situations where debarment of all organizational elements of a company or its affiliates would be inappropriate. The rules provide that persons may provide evidence of mitigating factors demonstrating that certain organizational elements or affiliates should not be debarred. However, unless specifically limited, debarment applies to all divisions or organizational elements of a purchaser and any affiliate who is specifically named, given written notice and an opportunity to respond. The rule allows an affiliate to challenge the basis for its debarment, not just its status as an affiliate. *See* § 223.138(b)(1).

Comment. One individual suggested the Forest Service should help parties understand the intent and explain unclear aspects of the rule and stated that the Bureau of Land Management has always been willing to help parties to understand the rules and advise whether a proposed sale complies with its rules.

Response. The Department agrees that the Forest Service should help parties understand the Act and implementing rules; however, the Forest Service cannot give legal advice to timber purchasers. For legal interpretation of the Act or implementing regulations as they pertain to private business proposals, purchasers are advised to seek private counsel.

Amendment of Title 36, Part 223, Subpart D

Subpart D of part 223 governs timber export and substitution restrictions applicable to Federal timber purchases made before the Act. Enactment of the statute and adoption of interim regulations necessitated the addition of a new § 223.159 to existing subpart D in the interim rule to make clear that the provisions of subpart D remained in effect for contracts awarded before August 20, 1990. Section 223.159 of this final rule clarifies that § 223.162 remains in effect for all contracts awarded on or after August 20, 1990 until September 8, 1995. Section 223.159 of this final rule clarifies that certain rules in subpart F of part 223, which implemented the timber export and substitution restrictions of the Act in the interim rule, apply immediately to all contracts awarded on or after August 20, 1990. Minor technical and editorial changes to § 223.159 have been made to improve clarity. This final rule removes § 223.161, *Limitations on timber harvested in Alaska,* and § 223.163, *Determination that unprocessed timber is surplus to domestic needs*. The subjects covered in these sections are now covered in §§ 223.200 and 223.201 in subpart F.

Several respondents advised that the rule needs to clarify definitions and prohibitions in subpart D. However, since the terms are relevant to the new comprehensive rule, rather than those in effect at the time the new Act passed, the definitions identified by the public through submitted comments are addressed in § 223.186.

Amendment of Title 36, Part 223, Subpart F

The rules in Subpart F implement provisions of the Forest Resources Conservation and Shortage Relief Act of 1990 (16 U.S.C. 620, *et seq.*) that became effective upon enactment or as otherwise specified in the Act, and incorporate and supplement the interim rules of this Subpart that were published in the **Federal Register** on November 20, 1990 (55 FR 48572). Except as otherwise provided in the Act, this Subpart will govern timber export and substitution restrictions applicable to Federal timber sale contract awarded on or after August 20, 1990.

Section 223.185 Scope and Applicability

Comment. One individual commented that the regulations do not adequately explain the differences between the old and new regulations. Another respondent was unclear as to which contracts the substitution provisions in this regulation apply.

Response. Section 497 of the Act (16 U.S.C. 620h) provides that nothing in this Act, or regulations issued under this Act, abrogates or affects any timber sale contract entered into before August 20, 1990.

Section 494 of the Act (16 U.S.C. 620 note) states that the provisions of the Act take effect on the date of enactment, except as otherwise provided. Section 490(a)(2)(A) of the Act (16 U.S.C. 620b) specifically provides that the substitution rules in effect before issuance of regulations to carry out the provisions of § 490(a) will continue to govern all contracts entered into between the purchaser and the Secretary of Agriculture before issuance of final rules. The prior rule concerned *direct* substitution only (36 CFR 223.162). Therefore, contracts awarded after enactment, but before the issuance of final rules continue to be governed by the rules concerning substitution in existence prior to enactment at § 223.162. As these contracts are completed, this regulation will no longer be effective, and will be removed or revised at that time. Contracts awarded on or after September 8, 1995 are governed in full by subpart F.

Section 490(b)(1) of the Act (16 U.S.C. 620b) states that, as of September 10, 1990, a person is prohibited from purchasing federal timber indirectly if that person would be prohibited from purchasing Federal timber directly. Contracts entered into before the date of publication of this final rule are governed by the substitution restrictions in effect before enactment of the Act. Federal timber purchased pursuant to a contract entered into before September 8, 1995 may be purchased indirectly only if the timber could be purchased directly under the prior rule.

Section 490(b)(2)(D) of the Act (16 U.S.C. 620b) delayed application of the indirect substitution restrictions in the State of Washington until rules were issued to "carry out" the exemption from indirect substitution in Washington State. Therefore, the indirect substitution restrictions for National Forest System timber from Washington State are effective for contracts entered into between the purchaser and the Secretary of Agriculture as of publication of the rule of limited scope (56 FR 3375, December 19, 1991). This rule establishes the shares of exempted timber for specific persons.

The interim rule was the final rule for the provisions contained in that rule: Sourcing area applications, disapproval and review procedures, procedures for a non-manufacturer, certification procedures, continue surplus species determinations, and definitions applicable to the provisions of the interim rule (55 FR 48572, November 20, 1990). The interim rule has now been incorporated into this final rule, with changes as noted.

A final rule of limited scope was published on December 19, 1991 (56 FR 65834). This rule continued the reporting requirements applicable to contracts awarded before enactment, amended the rules for sourcing area disapproval and review procedures found in the interim rule and established procedures for persons applying for a share of the limited amount of unprocessed timber originally from National Forest System lands in Washington State that is exempt from the prohibition against indirect substitution. This rule has been incorporated into this final rule. Contracts entered into after enactment are governed by the provisions of the interim rule and the final rule of limited scope on the effective dates of those rules.

The Department has added a sentence regarding the application of subpart F to unprocessed private timber to clarify that unprocessed private timber that requires domestic processing is subject to subpart F. Further, the Department has added a sentence to clarify that the reporting requirements for transfers of unprocessed Federal timber applies on September 8, 1995, regardless of the contract award date. This ensures that enforcement of the Act can begin immediately. Since the transfer documents are not part of the substitution regulation, this requirement is not limited by the Act's provision that the prior substitution regulation applies to contracts entered into before issuance of this final rule. In addition, the Department has made minor technical and editorial changes to this section to improve clarity and describe the status of contracts awarded between enactment of this Act and promulgation of final rules to maintain consistency throughout the rule.

Section 223.186 Definitions

The complexity of the Act requires definitions in order to explain and understand critical terms. Section 493 of the Act (16 U.S.C. 620e) defines several terms that require refinement. The following terms were defined in the interim rule, and were repeated with minor technical changes as needed, in the proposed rule for continuity, public understanding and comment: *Acquire, Act, Cants* or *Flitches, Export, Federal lands, Fiscal year, Non-manufacturer, Person, Private lands, Purchase, Substitution,* and *Unprocessed timber.* In addition, under the proposed rule definitions of the following additional terms were proposed: *Area of operations, Disregard, Each violation, Finished products, Gross value, Hammer brand, Highway yellow paint, Logs, Processed, Same geographic and economic area, Should have known, Transfer, Willful disregard,* and *Willfully.*

Nineteen responses were received concerning definitions. Ten responses addressed the definition of *Person,* focusing on the subcontractor. Other definitions addressed were: *Disregard, Each violation, Export, Finished products, Gross value, Processed, Same geographic and economic area, Transfer, Unprocessed timber* and *Willful.* Several respondents requested definitions for "manufacturing facility" and "sourcing area."

Person

Comment. Comments regarding the definition of "person" called for a more limited definition of "subcontractor," exclusion of independent contractors as subcontractors, and inclusion of subcontractors as only those persons controlled by the purchaser, or who meet the criteria of affiliates.

Response. The Act defines "person" as "any individual, partnership, corporation, association, or other legal entity and includes any subsidiary, subcontractor, or parent company, *and* business affiliates * * *" 16 U.S.C. 620e(3) (emphasis added). If subcontractors were only to be considered in the context of affiliation, there would be no reason to include subcontractors in the definition of person.

The definition of subcontractor is "One who has entered into a contract, express or implied, for the performance of an act with the person who has already contracted for its performance."

Black's Law Dictionary

The extent to which a contractor and a subcontractor would be considered one "person" will depend on the specific facts of the arrangement between the contractor and subcontractor. The subcontractor obtains his status through his relationship with the contractor. If the subcontractor is acting independently, for instance, in violation of a provision in the Act or regulations, the subcontractor might be prosecuted as an "individual" or other corporate entity, not as a subcontractor.

Comment. One respondent expressed concern that a federal timber purchaser subcontracting with a contract logger who exports or who contracts to log timber that will be exported might be in violation of the Act under the definition of person. The same respondent was concerned that the contract logger who logs both federal logs and private logs eligible for export might be in violation of the Act under the definition of person.

Response. The response above outlines the purchaser's status. The status of the contract logger depends on the definition of "acquire". That is, if the contract logger is acquiring federal timber and exports private timber, then the contract logger would be in violation of the prohibition against substitution, assuming no exemption from the prohibition applied. The Act states that "acquire" means, "to come into possession of, whether directly or indirectly, through a sale, trade, exchange, or other transaction, * * *" 16 U.S.C. 620e(1). While the definition of acquire includes "possession", the definition seems to encompass only possession through different types of transactions that lead to control. The contract logger's ability to log federal timber and log exportable timber or export timber will depend on the specific circumstances by which each transaction is conducted.

After the end of the comment period for this rule, the Department received numerous letters regarding the definition of possession as used in the definition of acquire, and its effect on various business relationships, mainly service contracts. The Department may not consider these comments in this rule under the Administrative Procedure Act, 5 U.S.C. 553. However, the Department recognizes the need to clarify this issue, especially in light of the apparent change in the way business is conducted. Therefore, the Department is committed to issuing a proposed rule that will attempt to flesh out the definition of possession, and will ask for comment on a sensible way to implement the intent of the Act to prohibit substitution while balancing enforcement of the Act with reasonable restrictions on business. The Department has deleted the last sentence regarding the standards in the Small Business Administration regulation at 13 CFR 121.401 that may serve as guidelines to determining affiliation for purposes of this Act. This deletion clarifies that the Small Business Administration regulation serves as a guideline only and does not govern these rules.

Each Violation

Comment. Several respondents expressed concern that the term "each violation" is too inclusive to meet the intent of the Act, and that, as defined in the rule, the violation counts would be compounded or multiplied. For example, each missing log brand and paint mark would be a separate violation in addition to the violation caused by the export of the log itself. These respondents suggested that multiple violations be treated as a single event.

Response. The Department believes that the rule's use of the term "each violation" is consistent with the intent of Congress, and that to reduce it would weaken the intent of the Act. Congress considered each violation of the Act serious and prescribed a penalty deemed appropriate to the infraction. Nothing in the Act suggests that "each violation" means a series of acts, or anything other than the plain meaning of the term. Further, section 492(c) of the Act (16 U.S.C. 620d(c)) provides the Secretary with discretion in assessing civil penalties. Therefore, this suggestion is not adopted.

Comment. One respondent commented in regard to "each violation," that human errors and mistakes are inevitable, and that, at times, safety conditions make complete compliance with the branding and painting requirement very difficult. This respondent felt that some reasonable standard must be used when enforcing this requirement.

Response. The Department agrees that occasional "human errors" are understandable. However, purchasers are expected to emphasize the importance of complying with the Act to their employees and subcontractors and to ensure that compliance is attained.

Comment. One individual said the rule should indicate that the Secretary would use discretion and judgment in determining penalties for specific violations of the Act.

Response. Congress gave the Secretary authority in section 492(c) of the Act (16 U.S.C. 620d(c)) to impose penalties for specific violations. These penalties include ceilings but do not mandate specific amounts. Therefore discretion will be used in the imposition of the penalties.

Having considered the various comments received, the Department adopts the definitions of "each violation" as presented in the proposed rule.

Export

Comment. One respondent stated that the definition of when export occurs provides a possible loophole in the prohibition against substitution.

Response. The Department agrees that the definition of when export occurs could provide a loophole to the substitution restrictions. Accordingly, the Department has revised the portion of the definition that relates to the date that an export agreement is entered into.

The definition in the proposed rule states that "(E) export occurs on the date that a person enters into an agreement to sell, trade, exchange, or otherwise convey such timber to a person for delivery to foreign country. If that date cannot be established, export occurs * * *". This definition could permit a person to enter into long-term export agreements just before the issuance of this rule, or 24 months before acquiring Federal timber, and still be exporting, or causing to be exported, private timber while acquiring Federal timber. This activity could occur because the date of the export agreement preceded the effective date of this rule or the 24-month restriction against exporting prior to acquiring Federal timber. This kind of activity would constitute substitution.

To close this potential substitution loophole, the Department has revised the definition of when export occurs by dropping the phrase "If this date cannot be established" and simply listing three independent conditions which for the purposes of the Act, would establish when export occurs as follows: "Export occurs: (1) On the date that a person enters into an agreement to sell, trade, exchange or otherwise convey such timber to a person for delivery to a foreign country; (2) when unprocessed timber is placed in an export facility in preparation (sorting, bundling, container loading etc.) for shipment outside the United States; or (3) when unprocessed timber is placed on board an ocean-going vessel, rail car, or other conveyance destined for a foreign country."

Comment. Another respondent commented that the date on which export occurred must be established with certainty.

Response. The Department intends to ascertain as closely as possible when export occurs by thoroughly investigating all suspected or alleged export violations. The Department believes the definition of export, as revised in this final rule, meets the administrative and enforcement responsibilities required by the Act.

Comments. Several respondents stated that the definition of "export" fails to clarify which contracts fall within its definition.

Response. The purpose of a definition is to clarify and provide a consistent meaning of a term wherever it is used in the regulation. See § 223.185, Scope and Applicability, regarding which contracts are governed by this rule.

Comment. One respondent stated that the definition of export in the proposed rule needs clarification because by "transporting * * * through another party", a person cannot prevent the other party from exporting the timber.

Response. If a person notifies the recipient of the timber of the need for domestic processing, pursuant to the rule's requirements at 36 CFR 223.193 and 223.194, the person would not be entering into an agreement to export, nor would the person be responsible for export that is conducted by a subsequent party.

Finished Products, Processed and Unprocessed Timber

Comment. Several respondents commented that the definitions of "finished products" and "unprocessed timber" are ambiguous. As an example, they point to § 223.187, where certain products which are not in finished product form are excluded from the definition of unprocessed timber.

Response. The Department believes that the term "finished products" is clear. The term is used in reference to "finished products" made of western red cedar that are exempt from the prohibition against indirect substitution (16 U.S.C. 620b(b)(1)). The term "finished products" in the Act suggests more than simply products processed to specific standards, since these products could be remanufactured; the term suggests that the products must be intended for end product use.

The Department agrees that clarification regarding "unprocessed timber" is necessary to prevent products produced within the sale area that could be either finished products or unprocessed timber, such as poles, posts, piling, pulpwood bolts, pulp logs and cull logs, from being removed from the sale area or transferred without reporting or identification, and later exported as unprocessed timber. While the Act lists some of the products that may fall into this category in section 493(7)(B) (16 U.S.C. 620e(7)(B)), other products, such as house logs that are part of a structure kit may be indistinguishable from unprocessed timber. Accordingly, the definition of "unprocessed timber" has been expanded in the final rule to add "* * * For the purposes of reporting and identifying under §§ 223.193, 223.194 and 223.195, unprocessed timber also means timber products listed in § 223.187 of these regulations, and other timber products, including house logs, that are indistinguishable from other unprocessed timber." The Department also added a statement to the definition that "unprocessed timber does not include products intended for remanufacture that meet the criteria listed in § 223.187(a) (2) or (3)." This clarifies that the Act defines certain products as not unprocessed, or processed, that are intended for remanufacture.

The Department has also concluded that the definition of the term "processed" should be revised to remove the reference to "not unprocessed" because this terminology is not used in the rule. Further, § 223.187(b) of these regulations must be included in the reference to § 223.187, since paragraph (b) states what is *not* unprocessed western red cedar. Therefore, the definition has been revised to read as follows: "*Processed* means timber processed into products listed in § 223.187 of these regulations."

Comment. In commenting on these definitions, two respondents expressed uncertainty as to whether each piece in an entire order must satisfy the lumber grade requirements specified in the Act for determining whether timber is processed to standards and specifications suitable for end product use.

Response. Congress specified in section 493(7)(B) (16 U.S.C. 620e(7)(B) that products meeting the current standards of the American Lumber Standards Grades or Pacific Lumber Inspection Bureau's Export R or N list clear grades are not "unprocessed." The standards that the two bureaus use are defined in the *Export R List Grading and Dressing Rules* book, published by the Pacific Lumber Inspection Bureau (1971) and adopted by the West Coast Lumberman's Association and the British Columbia Lumber Manufacturers Association, which reads, "* * * a variation not to exceed 10 percent, more or less, of the quantity ordered shall be allowed in filling cargoes and/or parcel lots." (p. 4) Thus, there is no requirement that each piece in the entire order satisfy the grade requirements. However, in any given lot, at least 90 percent of the pieces must meet these grade requirements.

Gross Value

Comment. One respondent stated that gross value should not include the cost of ocean freight or insurance when sales are made on a "C&F" or "CIF" basis. The respondent stated that including these costs could cause customers to obtain these services abroad.

Response. The Act uses the term, "gross value" in the civil penalties section, where the Secretary may assess a $500,000 penalty or "three times the gross value of the unprocessed timber involved" for a violation of the prohibition against exporting Federal timber. The proposed rule defined gross value as the total amount that the person received from the export purchaser for the unprocessed Federal timber involved in the violation, before production, delivery, agent fees, overhead, and other costs are removed. The marketplace decides the total amount received and the Department does not intend to look behind this figure at the specifics of the business agreement. The Department has clarified in this rule that the gross value is the value of the timber when it is transferred. Other than this change, no change in the rule has been made in response to this comment.

Manufacturing Facility

Comment. Several respondents suggested that a definition be included in the final rule defining the meaning of "manufacturing facility." One respondent stated that the term "non-manufacturer" needs clarification, because of the ambiguity of the term "manufacturing facility." This respondent suggested that non-manufacturer be defined as it is in the SBA program. Another respondent objected to the inability of non-manufacturers to obtain sourcing areas. It was also suggested that "manufacturing facility" be limited to a permanently located operation designed and used to convert logs into primary wood products, including lumber and veneer products, and that it should not include secondary wood processing plants, chip, or fiber operations.

Response. The Department agrees that the term "manufacturing facility" needs to be defined, and that a manufacturing facility should be defined in terms of its permanent location. The Act implies a

permanent location for manufacturing facilities, in section 490(c)(3) (16 U.S.C. 620b(c)(3)); the Act requires the sourcing area to be the area sourced by the applicant's "timber manufacturing facilities." The Act's intent to define a sourcing area by a permanent manufacturing facility is the reason that non-manufacturers may not apply for sourcing areas.

However, the Department disagrees that the definition should exclude producers of chips or fiber products. Sourcing areas are where the applicant desires to "process" timber (16 U.S.C. 620b(c)(3)). In 16 U.S.C. 620e(7)(B)(ix), the Act defines timber not included as unprocessed, that is, processed timber, to include pulp or logs *processed* for conversion into chips. Since this type of facility is specifically included as a processing facility, it is also included in the definition of "manufacturing facility."

Therefore, the Department has added the following to § 223.186: "*Manufacturing facility* means a permanently located processing plant, used to convert unprocessed timber into products." The Department believes this addresses the ambiguity in the term "non-manufacturer" without adopting SBA rules.

Same Geographic and Economic Area

Comment. One respondent stated that there is no reference to "same geographic and economic area" with regard to sourcing areas, as the proposed definition seems to indicate.

Response. While there is no specific reference to "same geographic and economic area" in the sourcing area provision of the Act, this concept is used in determining sourcing areas; the term reflects the Act's requirement that sourcing areas be "geographically and economically separate" from areas where a person harvests private timber for exporting. An area that is geographically and economically separate from an exporting area cannot also be the same geographic and economic area from which a person exports. No change is needed in the rule.

Comment. Several respondents called for a revised definition of "same geographic and economic area." The respondents felt that the definition is too broad and suggested narrowing the definition to meet the Act's intent regarding substitution. Another respondent stated that the Act has a provision that prohibits the purchase of unprocessed federal timber and the export of unprocessed private timber within the past 24 months (16 U.S.C. 620b(a)(1)(B)). The respondent said this provision addresses the concern in the proposed rule that if substitution generally were defined pursuant to the sourcing area concept of geographically and economically separate areas, persons would be granted *de facto* sourcing areas. This commenter also said that the two different definitions of "same economic and geographic area" hinge on a definition of "private lands" as west of the 100th meridian in the contiguous 48 states, and that the Act does not so limit the definition of private lands.

Response. The Department agrees with the last commenter that the Act provides a prohibition that addresses the concern about *de facto* sourcing areas, and that, accordingly, as the other respondents suggested, there is no need to have the second, broader definition of "same economic and geographic area." The Act states, in the section concerning direct substitution, that, "except as provided in subsection (c) of this section (sourcing area approval process)," a person may not purchase unprocessed federal timber originating from west of the 100th meridian in the contiguous 48 States if, "(A) such unprocessed timber is to be used in substitution for exported unprocessed timber originating from private lands; *or* (B) such person has, during the preceding 24-month period, exported unprocessed timber originating from private lands." 16 U.S.C. 620b(a)(1) (emphasis added).

The prohibition in subsection (A) is further defined in the Act. Section 620(e)(8) states that, "*[t]he acquisition of unprocessed timber from Federal lands west of the 100th meridian in the contiguous 48 States to be used in 'substitution' for exported unprocessed timber originating from private lands* means acquiring unprocessed timber from such Federal lands and engaging in exporting, or selling for export, unprocessed timber originating from private lands within the same geographic and economic area." (emphasis added) The underlined portion of the definition is virtually identical to the prohibition in section 620b(1)(A). The prohibition in subsection (B) is much broader, and, by its own terms, prohibits the purchase of federal timber and the export of private timber in the past 24 months, without reference to the same geographic and economic area.

The Act provides that an approved sourcing area is an exemption from the prohibitions in subsection (a) of 16 U.S.C. 620b, in addition to those prohibitions as they relate to indirect substitution in subsection (b). The section concerning sourcing areas states that, "*[t]he prohibitions contained in subsections (a) and (b)* of this section shall not apply with respect to the acquisition of unprocessed timber originating from Federal lands within a sourcing area west of the 100th meridian in the contiguous 48 states approved by the Secretary * * *" 16 U.S.C. 620b (emphasis added). In terms of the prohibition in section 620b(a)(1)(*A*), an approved sourcing area is the only structure provided by the Act to show that purchasing unprocessed federal timber and exporting unprocessed private timber is not occurring within the same economic and geographic area. (For example, a person who had not exported within the past 24 months, but began exporting after purchase of the unprocessed federal timber, would need a sourcing area within which to purchase the federal timber in order to demonstrate that the export and federal purchase areas were geographically and economically separate.) In terms of the prohibition in section 620b(a)(1)(*B*), a sourcing area is required if a person who had exported within the past 24 months in the west wanted to purchase unprocessed federal timber. Because of the specific statutory provision prohibiting the purchase of unprocessed federal timber and the export of private timber without limitation to the "same geographic and economic area," the Department agrees that there is no need for the second, broader definition of that term, and has deleted that definition from the rule.

The Department does not agree that the term "private lands" should not be limited to west of the 100th meridian in the contiguous 48 states. While the Act does not specifically define "private lands" as being west of the 100th meridian in the contiguous 48 States, the Act must be implemented in a manner that gives meaning to all of the provisions of the Act. The Act concerns transactions west of the 100th meridian in the contiguous 48 States. To interpret private lands without such a limitation would mean that export in the previous 24 months from anywhere in the United States (and possibly even export from private lands in a foreign country) would disqualify a person from purchasing unprocessed federal timber, pursuant to 16 U.S.C. 620b(a)(1)(B). There is nothing in the Act to suggest such a broad prohibition. No change in the rule is necessary in response to this comment.

Sourcing Area

Comment. Several respondents suggested that a definition of "sourcing area" be included in the rules.

Response. The Department concurs that a definition of "sourcing area" is desirable. The definition includes the requirement that the sourcing area be economically and geographically separate from any geographic area from which the persons harvests private timber for export, pursuant to the requirement in the Act. 16 U.S.C. 620b(c)(3). Further, the interim rule required sourcing area applicants to include in the map of the sourcing area boundary both Federal and private lands that source the mill that was the subject of the initial applications. The Department has adopted this requirement in the definition of sourcing area. The Act requires the Secretary to consider the "timber purchasing patterns, on private and Federal lands" in the determination of the sourcing area boundary (16 U.S.C. 620b(c)(3)). If private lands were not included in the sourcing area boundary, the Secretary could not establish that the sourcing area is geographically and economically separate from the area where the sourcing area holder or applicant harvests private timber for export as required by the Act. Otherwise, private lands sourcing the mill could be the same lands from which the sourcing area holder or applicant harvests timber for export. The definition of sourcing area is as follows: "*Sourcing area* means the geographic area approved by the Secretary which includes a person's timber manufacturing facility and the private and Federal lands from which the person acquires or intends to acquire unprocessed timber to supply such facility; a sourcing area must be geographically and economically separate from any geographic area from which that person harvests for export any unprocessed timber originating from private lands."

Substitution

The proposed rule included the definition of substitution found in section 493(8) of the Act (16 U.S.C. 620e(8)). However, analysis of the comments and preparation of the final rule, specifically, the comments on the definition of "same geographic and economic area" discussed in the preamble, revealed that this definition applies only to one of the substitution prohibitions in the Act. Under the section entitled, "Limitations on the substitution of unprocessed Federal timber for unprocessed timber exported from private lands (a) Direct substitution" the Act lists two prohibitions. The section states that, except as provided in subsection (c), the sourcing area approval process, no person may purchase directly from the United States unprocessed timber originating from federal lands west of the 100th meridian in the contiguous 48 States if, "(A) such unprocessed timber is to be used in substitution for exported unprocessed timber originating from private lands; or (B) such person has, during the preceding 24-month period, exported unprocessed timber originating from private lands."

16 U.S.C. 620e(8) further defines the prohibition in § 620b(1)(A). The definition does not state, "Substitution means * * *," but rather, uses a phrase virtually identical to the prohibition in section 620b(1)(A), and states what that phrase means: "*The acquisition of unprocessed timber from Federal lands west of the 100th meridian in the contiguous 48 States to be used in 'substitution' for exported unprocessed timber originating from private lands* means acquiring unprocessed timber from such Federal lands and engaging in exporting, or selling for export, unprocessed timber originating from private lands within the same geographic and economic area." (Emphasis added)

A need to modify the definition of substitution to fully reflect all of the substitution prohibitions in 16 U.S.C. 620b was recognized. Therefore, the definition of substitution has been modified as follows.

First, the definition of substitution has been modified to include both prohibitions found in section 620b(a), as further defined in section 620e(8). That is, a person violates the prohibition against substitution if such person acquires, directly or indirectly, unprocessed timber from Federal lands west of the 100th meridian in the contiguous 48 States and engages in exporting or selling for export, unprocessed timber originating from private lands within the same geographic and economic area, pursuant to section 620b(a)(1) (A), as further clarified in section 620e(8), or such person has, during the preceding 24-month period, exported unprocessed timber originating from private lands, pursuant to section 620b(a)(1)(B).

Second, the definition of substitution has been modified to close a loophole, in order to heed the Act's intent regarding the substitution prohibitions. The proposed rule's list of prohibitions did not limit when the purchase of unprocessed Federal timber could occur if there is subsequent exporting, unlike the 24-month limit on exporting that precedes the purchase of unprocessed Federal timber. The prohibitions did not prevent unprocessed Federal timber purchased before the export of unprocessed private timber from being substituted for the unprocessed private timber. To comply with the Act's prohibitions, a person will be committing a violation if the person engages in export, or selling for export, unprocessed timber originating from private lands during any calendar year within the same geographic and economic area that a person has unprocessed Federal timber in the person's possession or under contract. Calendar year has been adopted as the appropriate time period because it provides a consistent time period and is familiar to many purchasers who have operated under the prior substitution regulations.

Third, for clarity, the definition of substitution has been modified to include one of the prohibitions against substitution included in the proposed rule in § 233.189. Substitution occurs when a person purchases unprocessed Federal timber and sells unprocessed private timber that requires domestic processing to a third party if the third party or successive parties export the private timber. The third party or successive parties may not export such timber. The prohibition has been modified to clarify that the private timber that may be subject to a substitution violation is that timber that requires domestic processing. In this way, the private timber that may be subject to a substitution violation is identified.

In summary, the modified definition of substitution is as follows: "*Substitution*" occurs when: (1) A person acquires, directly or indirectly, unprocessed timber from Federal lands west of the 100th meridian in the contiguous 48 States and engages in exporting or selling for export, unprocessed timber originating from private lands within the same geographic and economic area; or (2) a person acquires, directly or indirectly, unprocessed timber from Federal lands west of the 100th meridian in the contiguous 48 States and, during the preceding 24-month period, exported unprocessed timber originating from private lands; or (3) a person exports or sells for export, unprocessed timber originating from private lands within the same geographic and economic area in the same calendar year that the person has unprocessed timber originating from Federal lands in the person's possession or under contract; or (4) a person purchases, directly or indirectly, unprocessed timber originating from Federal lands if such person sells or otherwise transfers unprocessed timber that originates from private lands west of the 100th meridian in the contiguous 48 States and that requires domestic processing, to a third party if that third party or successive parties export that unprocessed private timber. A third party or successive parties who acquire such unprocessed timber that originates from private lands west of the 100th meridian in the contiguous 48 States and that requires domestic processing may not export such timber.

Transfer

Comment. One respondent was unsure whether "transfer" was limited to transfer of ownership.

Response. The definition of "transfer" means to pass title "or otherwise convey"; it is not limited to the transfer of ownership. No change in the definition is necessary.

Willfully, Willful Disregard, and Disregard

Comment. Several respondents criticized the definitions of *willful* and *willfully disregard* for not including the requirement that the person intended to violate the Act or its implementing regulations. One respondent stated that, while the rule defines the terms as requiring the general intent of intentionally violating an act that is prohibited, the Act requires that these terms include the specific intent of violating the Act.

Response. The Department does not agree with these comments. Defining "willfully" or "willful disregard" as a specific intent to violate a statute or regulations is a standard used in criminal law. The definition of "willfully" or "willful disregard" in the context of civil penalties is a less stringent standard. *See, e.g., Brock* v. *Morello Brothers Construction, Inc.,* 809 F.2d 161, 164 (1st Cir. 1987). However, the Department is modifying the definitions of "willfully" and "willful disregard" to follow more closely the Supreme Court's decision in *McLaughlin* v. *Richland Shoe Co.,* 486 U.S. 128 (1988). In that case, the statute of limitations for a willful violation of the Fair Labor Standards Act (FLSA) extended the statute of limitations from two to three years. The Court stated that a party had committed a willful violation if the party knew or showed reckless disregard for the matter of whether its conduct was prohibited by the statute. *McLaughlin,* 486 U.S. at 133, *citing Transworld Airlines, Inc.* v. *Thurston, et al.,* 469 U.S. 111 (1984). The party need not know that the conduct is unlawful, but must at least show indifference to the rules. *Brock,* 809 F.2d at 164, *citing Thurston*. The Supreme Court in *McLaughlin* favored this stricter standard over a less stringent standard followed in some of the case law, given the distinction in the FLSA between the statute of limitations for "ordinary" violations and that for willful violations. *McLaughlin,* 486 U.S. at 132.

Likewise, in the Act, there is an appreciable difference in the amount of penalty that may be assessed for a willful violation, or a violation committed with willful disregard ($500,000), and violations committed either in disregard or by a person who "should have known" ($75,000 and $50,000, respectively). Therefore, the Department has changed the definition of willfully and willful disregard to mean committing an action that a person knew or showed reckless disregard for the matter of whether the person's conduct was a violation of the Act (or its implementing regulations, in the case of "willfully").

Comment. One respondent stated that the definition of disregard is too broad, and should also include specific intent.

Response. The rule's definition of disregard is taken from *Black's Law Dictionary,* 5th Ed.: "to ignore, overlook, or fail to observe" any provision of the Act. Intent is not a prerequisite to committing a violation "in disregard" of the Act or its implementing regulations. Such a definition would render the definition of willfully and willful disregard meaningless. No change has been made in the rules in response to this comment.

The standards of "disregard" and "should have known" are similar to the degrees of negligence. That is, they differ in the "degree of inattention" with which the actor commits an act. "Disregard", is more than "simple inadvertence." The Department believes that the civil penalties may be understood more clearly if they are presented together. Therefore, the Department has placed all of the standards for civil penalties under the heading, "Civil penalties."

In addition to the aforementioned changes, the Department has made minor technical and editorial changes to other definitions within this section to improve clarity; these changes have no substantive effect.

Section 223.187 Determination of Unprocessed Timber

The definition of unprocessed timber in the Act refers to minimum standards and grades of lumber. In order to determine that these standards have been met, the Department proposed in § 223.187 that the shipper of record possess a legible copy of a lumber inspection certificate issued by a lumber inspection/grading organization generally recognized by the industry as setting a selling standard. This certificate would be in the shipper's possession for each shipment and be available for inspection upon request of the Forest Service.

Comment. Several persons objected to the requirement that products be "manufactured for a specific order," stating that commonly ordered products generally are produced without specific orders and stored in inventory. This practice ensures that production need not be curtailed during slow periods and that companies can respond quickly to subsequent orders for products.

Response. The Department concurs with these respondents that § 223.187(a)(1)(ii) needed revision for clarity. It is important for enforcement of the Act, not that products in a shipment have been manufactured for a specific order, but that the products are only intended to be used in the form shipped, and not to be remanufactured into other products in the foreign country. Therefore, in response to this comment, § 223.187(a)(1)(ii) in the final rule has been revised to require that the shipper of record have available for Forest Service inspection a certificate certifying to the intended use of the shipment or order. Likewise, a certification requirement has been added for pulpwood bolts, pursuant to § 223.187(a)(8), to insure that the intent of processing the bolts into pulp is met. These certifications are not required if the timber obtained may be exported (for instance, because the timber originates from private lands from which the timber may be exported) without regard to intended use of the shipment or order. This has been clarified in § 223.187(a)(1).

For ease of administration, the specific certification language has been provided in § 223.187(b) (2) and (3). The person signing the certificate certifies the shipping order number, the date of that order and the intent that the material will be used as shipped or processed into pulp and will not be manufactured into other products. The certifier also certifies that the certification is made with full knowledge of the Act and its implementing regulations. Further, the certifier certifies that exporting unprocessed timber originating from Federal lands or exporting unprocessed timber from private lands that is required to be processed domestically is a violation of the Act and its implementing regulations, and that signing the certificate without abiding by its contents is a violation of the False Statements Act. Regarding a corporation, only a person authorized in writing by the Chief Executive Officer to sign certificates pursuant to 36 CFR 223.187(a)(1)(ii) may sign such certificates. The Forest Service must receive the original, written authorization from the Chief Executive Officer, pursuant to 36 CFR 223.187(b)(5), before a person is authorized to sign the certificates.

Comment. Three respondents suggested that instead of requiring that the shipper of record have in its possession a certificate issued by a lumber inspection/grading bureau, the provisions of the Act related to processed products could be met simply by either requiring the shipper of record to have the certificate available for inspection, or declaring that the products in a particular shipment were inspected, graded, and found to meet the requirements of processed products under the Act, or requiring the shipper of record to certify that "The material in this shipment is conveyed pursuant to the attached order and is not intended for remanufacture."

Response. The Department is requiring that the shipper of record have the certificate issued by the lumber inspection/grading bureau in his/her possession, available for inspection, i.e., readily available, not that the shipper of record necessarily have the certificate on his/her person. Regarding the declaration and the certificate, the Department agrees that these are necessary to ensure that the shipper of record understands that the shipment is not intended for remanufacture. The proposed rule required such a certificate in § 223.187(a)(1)(ii). In order to clarify this requirement, the final rule has amended this section to include the specific certification language that should be used. This certification does not substitute for the lumber inspection certificate. This certificate assures the Department, by the persons responsible for lumber inspection and grading, that the lumber meets the grading requirements of the Act at 16 U.S.C. 620e(7)(B).

Comment. One person stated that requiring separate (lumber grade) inspections of each shipment would deter processed product exports, contrary to the intention of Congress. The respondent also stated that products scheduled for one shipment that are delayed or diverted to another should not require a second certificate.

Response. The Department disagrees with this comment. Certified lumber inspection certificates are a common component of shipment documentation and, therefore, pose no deterrence to lumber exports. The Department accepts the certificate for compliance and enforcement purposes in lieu of breaking apart bundles of lumber prepared for export and individually grading each lumber piece, which certainly would deter exports.

Further, a lumber inspection certificate is required for each shipment or order, regardless of how the material in the shipment came to that shipment. This requirement is necessary for effective inspection of various shipments.

Comment. Several respondents stated that § 223.187 should make clear that restrictions and documentation apply only to material to be exported, not to products sold for domestic consumption, regardless of the degree of manufacture.

Response. The Department agrees with this comment. The Act does not place restrictions on products intended to be sold or manufactured domestically. The Department believes that the rule clearly states that the requirements in § 223.187 apply to material to be exported. Therefore no revisions are necessary in response to this comment. It should be noted, however, that the definition of unprocessed timber includes the items listed in § 223.187 that are indistinguishable from unprocessed timber for purposes of the record keeping and marking requirements in §§ 223.193–.195.
